URBAN DESIGN ATLAS

JINGZHANG CIVIC CALIBRATION GROUNDS

Jingzhang AI Innovation Belt × Civic Calibration Layer

URBAN DESIGN FRAMEWORK · BOARD 01

HOW THE BRIEF BECOMES JINGZHANG SPACE

Real Jingzhang ground × three positionings × five functions × proposed regional interfaces

REAL JINGZHANG GROU

OSM context + repository provisional geometry; not statutory

THREE POSITIONINGS / PUBLIC READINGS

CENTENNIAL JINGZHANG CULTURAL BELT
Engineering Problem Archive → Open-source Ground → Release-Retirement Commons

URBAN AI LIVING EXPERIENCE BELT
Research commute → campus learning → bounded first use and daily service

AI INTEGRATED INNOVATION BELT
Research → prototype → calibration → translation → first use → feedback

FIVE OFFICIAL FUNCTIONS → SPATIAL CARRIERS

	NORTH / ZZY	CENTRAL / AI ORIGIN	SOUTH / DAZHONGSI	TWO WINGS	CALIBRATION LAYER
FULL-STACK INDEPENDENT AI INNOVATION	controlled evaluation	open reproduction		standards / IP	test credential
WORLD-CLASS AI INNOVATION ECOSYSTEM	research interface	talent / prototype	bounded first use	professional support	evidence return
NEW PARADIGM FOR AI-ENABLED SCENARIOS	low-disturbance test	open education / culture	urban first use	Xiaoyuehe feedback	release conditions
INTELLIGENT AI VITALITY CITY	ecological commute	learning / open space	public service / commerce	daily-life context	No-AI continuity
GLOBAL VOICE IN AI GOVERNANCE	safety / access	open verification	appeal / rollback / retire		PASS / CONDITIONAL / FAIL

PROPOSED REGIONAL COLLABORATION INTERFACES

BEIWEI COMMUNITY	FUTURE SCIENCE CITY	HUAIROU SCIENCE CITY	BDA / E-TOWN	BEIJING–TIANJIN–HEBEI
public problem / evidence feedback	talent / research / test methods	research / technology / validation	embodied tech / scenario / translation	evidence recognition / shared learning
POTENTIAL	POTENTIAL	POTENTIAL	POTENTIAL	PROPOSED

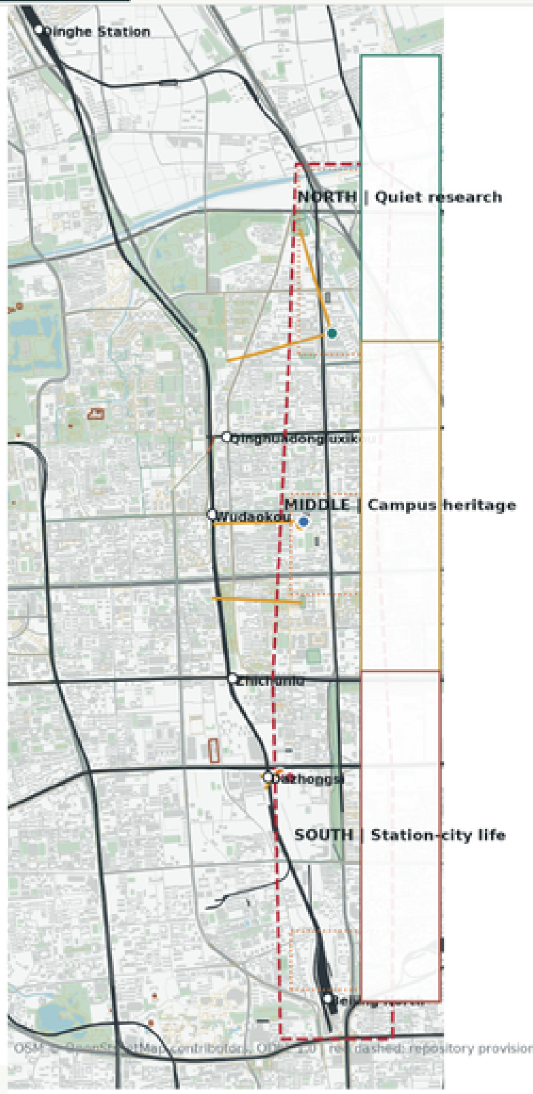
ALL REQUIRE PARTNERSHIP. No existing partnership, funding, data sharing, compute supply or institutional commitment is claimed.

URBAN DESIGN FRAMEWORK · BOARD 01

HOW THE BRIEF BECOMES JINGZHANG SPACE

Real Jingzhang ground × three positionings × five functions × proposed regional interfaces

REAL JINGZHANG GROU



OSM context + repository provisional geometry; not statutory

THREE POSITIONINGS / PUBLIC READINGS

CENTENNIAL JINGZHANG CULTURAL BELT

POTENTIAL	POTENTIAL	POTENTIAL	POTENTIAL	PROPOSED

ALL REQUIRE PARTNERSHIP. No existing partnership, funding, data sharing, compute supply or institutional commitment is claimed.

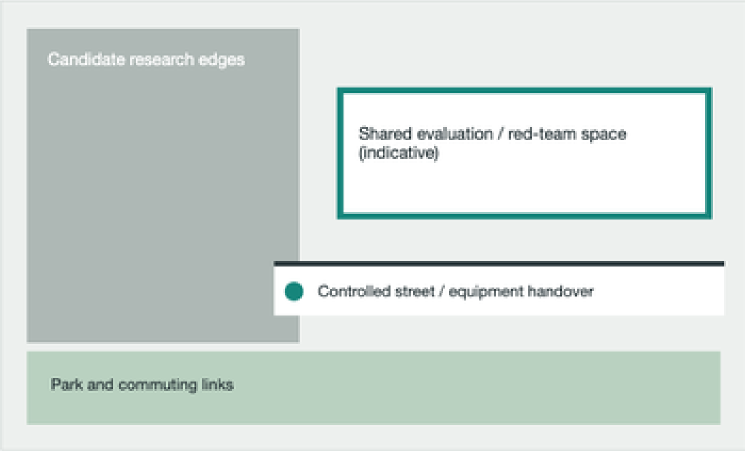
The real plan leads; brief requirements appear as spatial relationships, not a checklist.

URBAN DESIGN ATLAS · BOARD 02

THREE URBAN INTERFACES

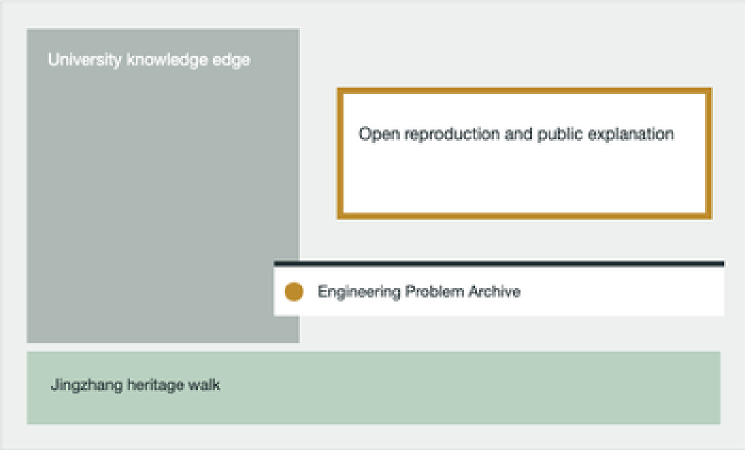
Two honest indicative interfaces + one conflict-checked Dazhongsi demonstration district

ZHONGZHIYUAN CALIBRATION INTERFACE



INDICATIVE RELATIONSHIPS · NOT BUILDING FOOTPRINTS · SURVEY AND PARTNERSHIP REQUIRED

AI ORIGIN / CENTRAL KNOWLEDGE INTERFACE

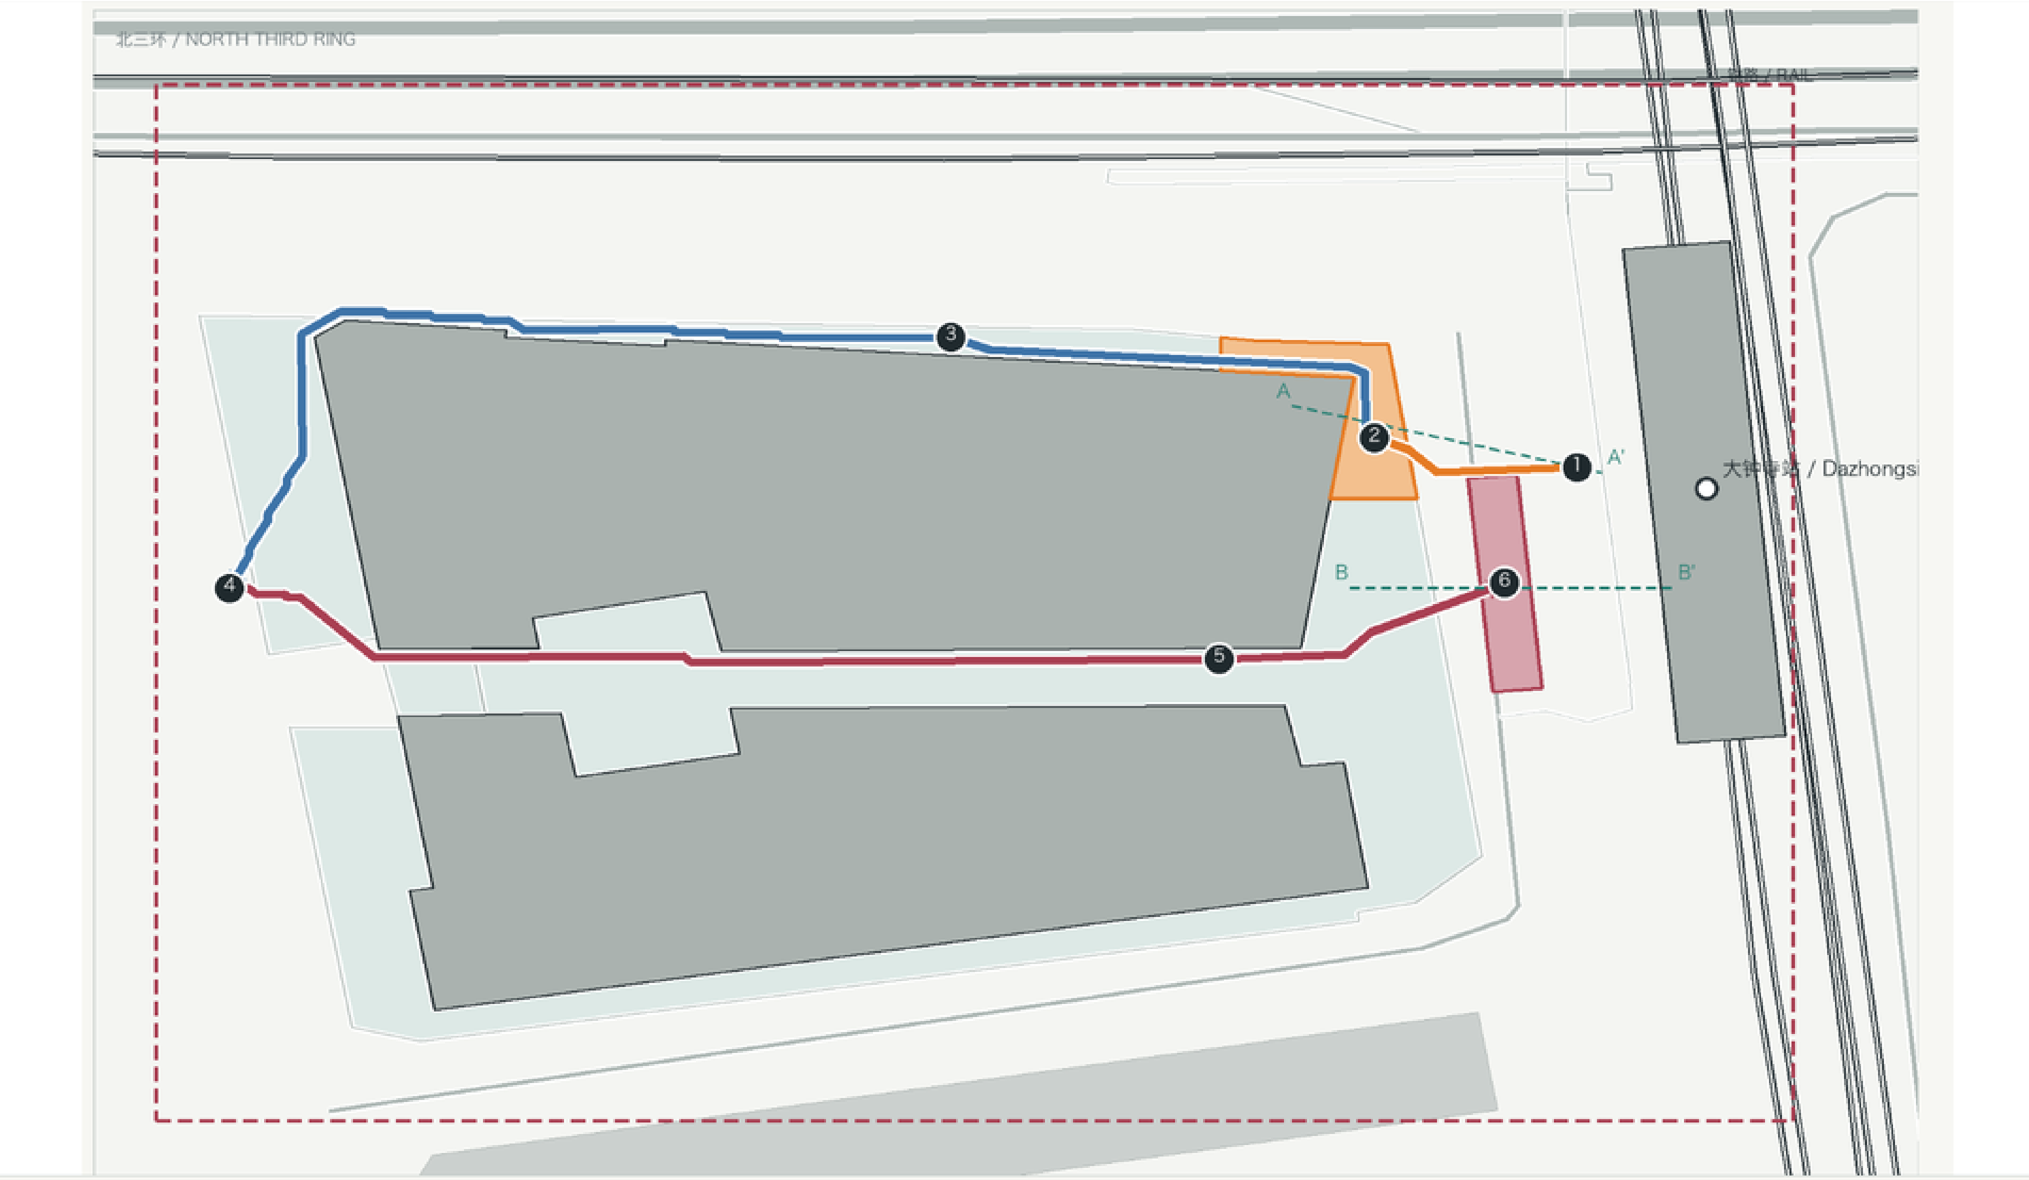


INDICATIVE RELATIONSHIPS · NOT BUILDING FOOTPRINTS · SURVEY AND PARTNERSHIP REQUIRED

DAZHONGSI RELEASE–RETIREMENT DISTRICT

≈8.7 ha study window / ≈0.52 ha intervention / ≈625 m continuous walk / 0 building crossings

PROPOSED + EXISTING OSM CONTEXT



01 CALIBRATION Zhongzhiyuan	**02 OPEN KNOWLEDGE** AI Origin / university-heritage interface	**03 FIRST USE + PUBLIC ACCOUNTABILITY** Dazhongsi

Existing / public basemap · Proposed · Potential interface · Partnership / survey required

Zhongzhiyuan and AI Origin remain indicative; Dazhongsi retains its conflict-checked plan.

URBAN DESIGN SET · BOARD 03

HOW AI ENTERS, SERVES AND LEAVES PUBLIC LIFE

Six-node Dazhongsi walk × human fallback × three flagship scenarios

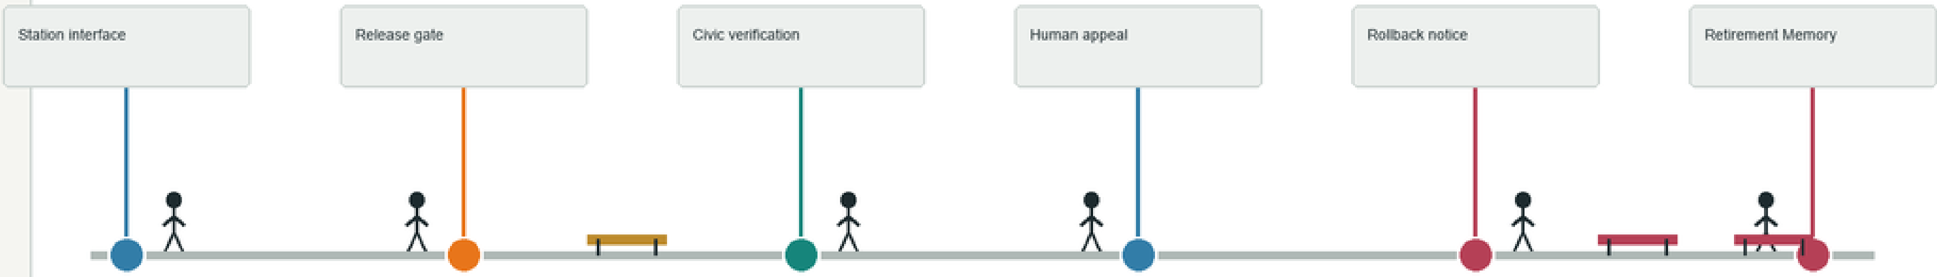
01 Problem	02 Research	03 Open prototype	04 Calibration	05 Support	06 First use	07 Release	08 Service	09 Feedback	10 Iteration

CIVIC CALIBRATION LAYER

Intake → Calibrate → Bounded release → Civic verification → Appeal → Rollback / retire

DAZHONGSI: AN EVERYDAY WALK THAT ALSO HOLDS RELEASE–RETIREMENT

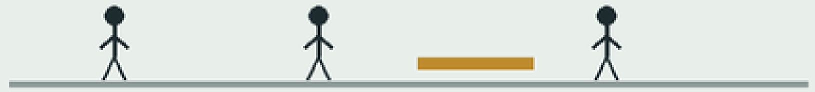
Without an AI event, people can still transfer, walk, rest and obtain human assistance.



WHEN STOPPED: static / tactile guidance + paper information + human takeover + accessible non-digital route + complaint channel

EVERYDAY STATE / DAILY COMMON

walking · transfer · shade · seating · learning · human service



RETIREMENT EVENT / PUBLIC RECORD

stop → human takeover → public decision → alternative service → data disposition → durable archive

FAILED AI IS PUBLICLY REMEMBERED

01 ACCESSIBLE TRANSFER GUIDANCE

Verified route only; withdraw live guidance and restore human service on failure.

TEST A · safety / accessibility

02 PUBLIC-SERVICE INFORMATION AGENT

Traceable source and date; stop and restore paper / human service on failure.

TEST C · accuracy / provenance

03 OPEN-SOURCE LOW-SPEED SERVICE AGENT

Time- and route-bounded; remove after collision, obstruction or takeover failure.

TEST B · low-speed embodied service

A six-node everyday walk holds release, verification, appeal, rollback and retirement.

URBAN DESIGN ATLAS · BOARD 04

ENGINEERING CULTURE THAT KEEPS LEARNING

From railway engineering problems to open-source contribution and the public retirement of technology

Engineering Problem Archive
1

Historic engineering problems ↔ present urban problems
Reading, rest and walking

→

Open-source Contribution Ground
2

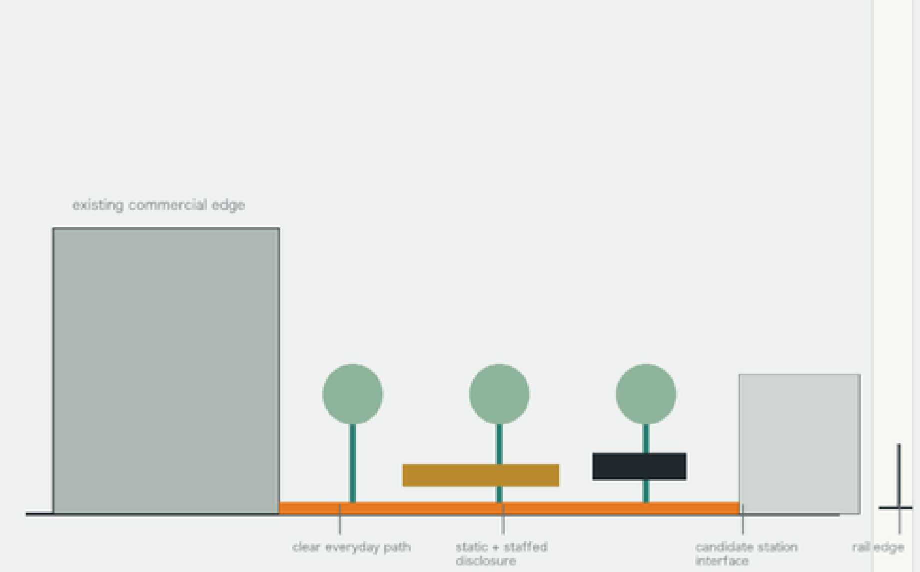
Contribution, reproduction, adoption and version history
Public meaning and developer value

→

Release–Retirement Commons
3

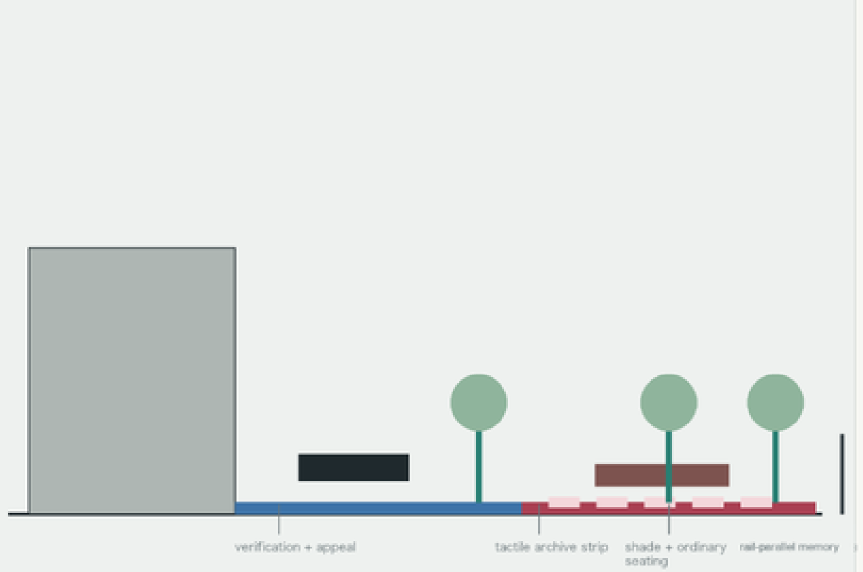
Release, challenge, rollback, replacement and memory
Daily shade, seating and accessible movement

A - A' Station interface → release forecourt



Indicative relative arrangement; all widths and levels require measured survey.

B - B' verification → retirement memory → rail



No specific heritage artifact is claimed; access, trees and underground utilities require survey.

Building-conflict-checked site relationships · dimensions and heritage details require survey

ANNUAL OPERATING LOOP

- 01 CONTINUOUS: problem intake
- 02 SPRING: open source / education / prototype
- 03 SUMMER: calibration / evaluation
- 04 AUTUMN: limited release / civic verification
- 05 WINTER: renew / rollback / retirement archive

Organizers are role-based only; no signed institution, funding or deployment permission is claimed. Each stage leaves traceable outputs for the next year.

problem evidence → contribution → evaluation → public record → next intake

RETIREMENT MEMORY · ≈535 m² Failed AI is also remembered in public: the stopping cause, accountable decision, alternative service and data disposition enter a durable archive.

PUBLIC DAILY VALUE walking · shade · seating · accessibility **DEVELOPER MEANING** problem · correction · version history

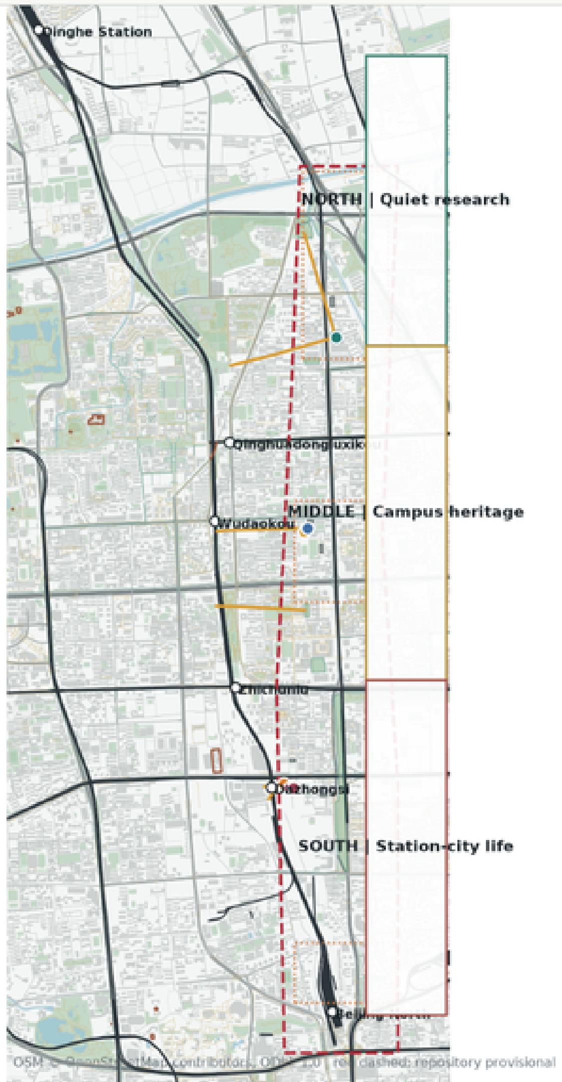
Existing context, provisional bounds, proposals, potential interfaces and partnership-dependent content are visibly separated.

Failed AI is publicly remembered; without an event, the commons remains walkable and restful.

URBAN DESIGN ATLAS · SPATIAL SYSTEM

SPACE × INNOVATION × PUBLIC LIFE

The railway-heritage spine organizes three rhythms; ecosystem roles do not claim statutory land use



JINGZHANG RAILWAY-HERITAGE SPINE

THREE URBAN RHYTHMS

EXISTING + PROPOSED

NORTH

Zhongzhiyuan / Qinghe / Fifth Ring
Research interface, equipment transfer, controlled low-disturbance validation

EXISTING + POTENTIAL

CENTRAL

AI Origin / universities / railway heritage
Open knowledge, reproduction, contribution, learning and incubation interface

EXISTING + PROPOSED

SOUTH

Dazhongsi / southern daily-life interface
Limited first use, disclosure, verification, rollback and retirement

THREE KEY INTERFACES

01 Zhongzhiyuan

02 AI Origin / university-heritage interface

03 Dazhongsi

TWO SUPPORTING WINGS

Zhongguancun wing
standards · IP · professional service · capital interface
REQUIRES PARTNERSHIP

Xiaoyuehe wing
youth · recreation · everyday feedback · future-life context
POTENTIAL

IDENTITY SYSTEM

parallel rails = continuity
open gate = accountable entry
visible gap = reversible operation

Value flow	People flow	Data / evidence flow	Service / capital interface	Public feedback flow
research → service → iteration	students ↔ developers ↔ residents	provenance → evaluation → public record	potential support; partnership required	use → appeal → next problem intake

Existing / public basemap · Proposed · Potential interface · Partnership / survey required

North–Central–South, three key areas and two wings support the innovation belt.

GLOBAL PRECEDENTS → TRANSFERABLE PRINCIPLES → JINGZHANG TRANSLATION

Singapore LaunchPad

Shared startup infrastructure works with professional support.

Paris-Saclay

Research, firms and transit form an accessible network.

MIT Kendall Square

University edges can become translation interfaces.

Toronto Vector Institute

Talent, research and industry need intermediary capacity.

Montréal Mila

Open research and social responsibility can share a platform.

London Knowledge Quarter

Existing knowledge institutions can collaborate through public routes.

Seoul AI Hub

Space, technical support and entrepreneurship can form a service sequence.

Helsinki Maria 01

Historic renewal can host a startup community without copying operators.

PROFESSIONAL LIMITS AND PRECONDITIONS

- 43.6 km^2 is the coordinated research context; ≈11.4 km^2 is repository provisional computation geometry. They are not competing site-area claims.
- Zhongzhiyuan and AI Origin reach indicative urban-interface depth only; they are not survey-grade detailed plans.
- Zhongguancun and Xiaoyuehe are potential / partnership-dependent wings; no cooperation is claimed.
- All three tests are PROPOSED EVALUATION PROTOCOLS; no measured performance, approved dataset or deployment permission is claimed.
- Official boundaries, road redlines, station engineering, ownership, building survey, heritage, utilities, traffic and cost remain data gaps.

43.6	≈11.4	≈625	≈535	0	0	0
km^2 context	km^2 provisional geometry	m walking sequence	m^2 retirement memory	route/building	space/building	node/building
