

A city does not chase model versions; it releases its own civic versions

One public spine · three release stations · six-stage contract · every version can be repaired or retired

A PUBLIC SPINE THAT STAYS OPEN

Provisional geometry · relational, not statutory

Walking · staffed service · no-app route remain available

SIX OBJECTS FOR ONE CIVIC VERSION

01 ISSUE

whose problem · where · who responds

02 FORK

boundary · window · ordinary alternative

03 TEST

baseline · event · stop and recovery

04 REVIEW

professional duty + affected public

05 RELEASE

state · limits · appeal · version ID

06 RETIRE

work order · budget · restore · archive

CURRENT S-02 VERSION STATE

Tabletop PASS 4/4 + 6/6 + 5/5

Field window HOLD · RELEASE not issued

One public spine, three civic release stations

Concept land use, mobility and key areas share one provisional GeoJSON source and recompute together

11.41 km² PROVISIONAL OVERALL DESIGN AREA

FOUR CONCEPT LAND-USE CLASSES

	AI R&D	2.67 km²
	Park and open space	2.59 km²
	Enterprise and commerce	3.37 km²
	Community support	2.78 km²

SPATIAL RULES

- 01 The public spine never closes for a test
- 02 Tests stay in bypassable pockets
- 03 Permanent works await official controls
- 04 Every station has staff and a retirement path

Provisional concept geometry only; not an official boundary, title, control or engineering alignment.

Three civic release stations: test, review, release

Every station starts from an ordinary route, passes six actions and returns to ordinary city life

Collective Intelligence trusted test garden

TEST · keep risk inside a bounded fork

AI Origin open review street

REVIEW · make evidence and rights reviewable

Dazhongsi everyday release room

RELEASE · return reviewed capability to daily life

Failed gate: do not test, do not merge, or reduce activity to zero.

Keep the ordinary route open before embodied AI

A 9.60 km public spine, three east-west seams and four field-release gates

ORDINARY MOBILITY + BLUE-GREEN + PUBLIC SPACE

G0 walking, staffed service and hand-cart delivery remain available

S-02 ROUTE RELEASE LADDER

STOP TRIGGERS

pedestrian conflict · reduced clear width · failed stop
lost human sight · flood or fire concern

Three accounts decide whether a civic version can be released

Spatial account recomputes · service account remains unmeasured · version account requires all six

S-02 local synthetic tabletop PASS

03 VERSION ACCOUNT / 6 OF 6 REQUIRED

- 01 public issue
- 02 named owner
- 03 ordinary alternative
- 04 evidence pack
- 05 public decision
- 06 repair or retire
- ONE MISSING: NO RELEASE

Recomputable spatial numbers do not establish a field service; every version publishes state, limits and exit.
