

Bio-Pulse Symbiosis

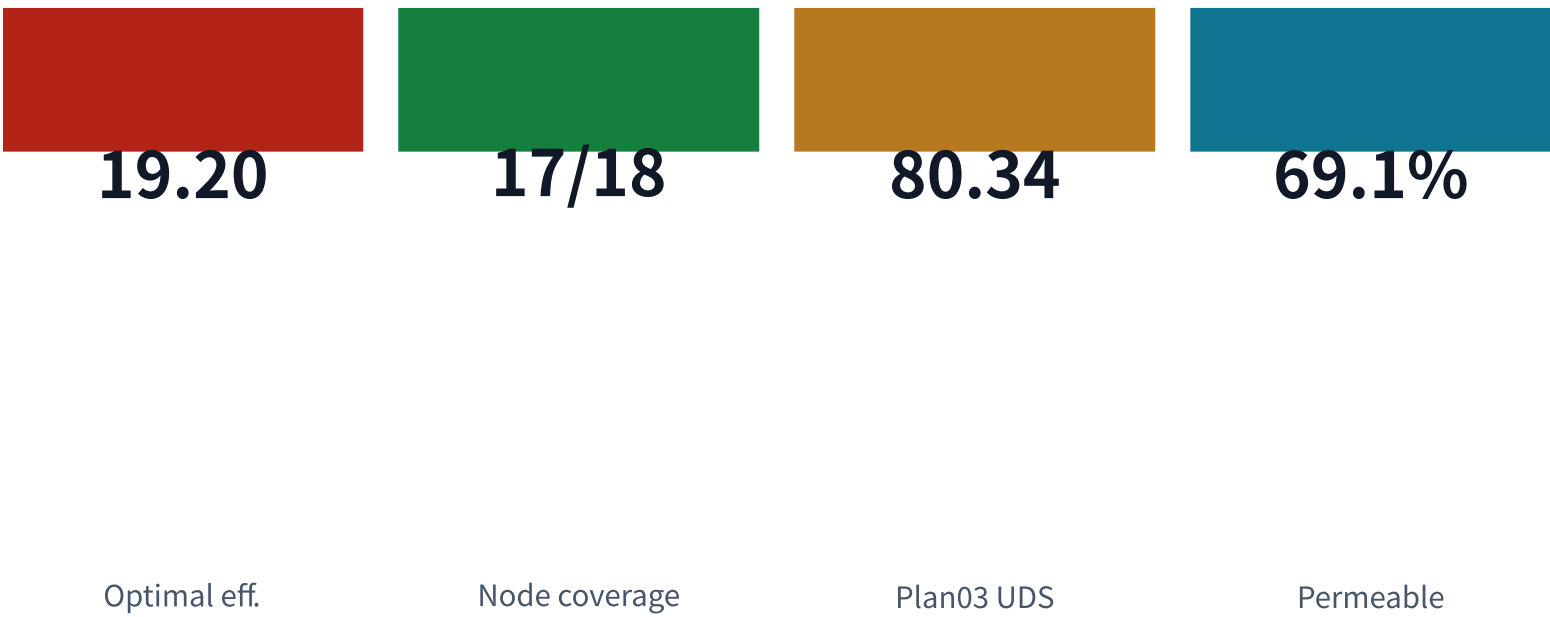

智脉共生

Bio-Physarum Mobility Network Renewal for the Dazhongsi AI Industry Cluster

Method: Bio-Physarum (Tero et al. 2010) + NSGA-II

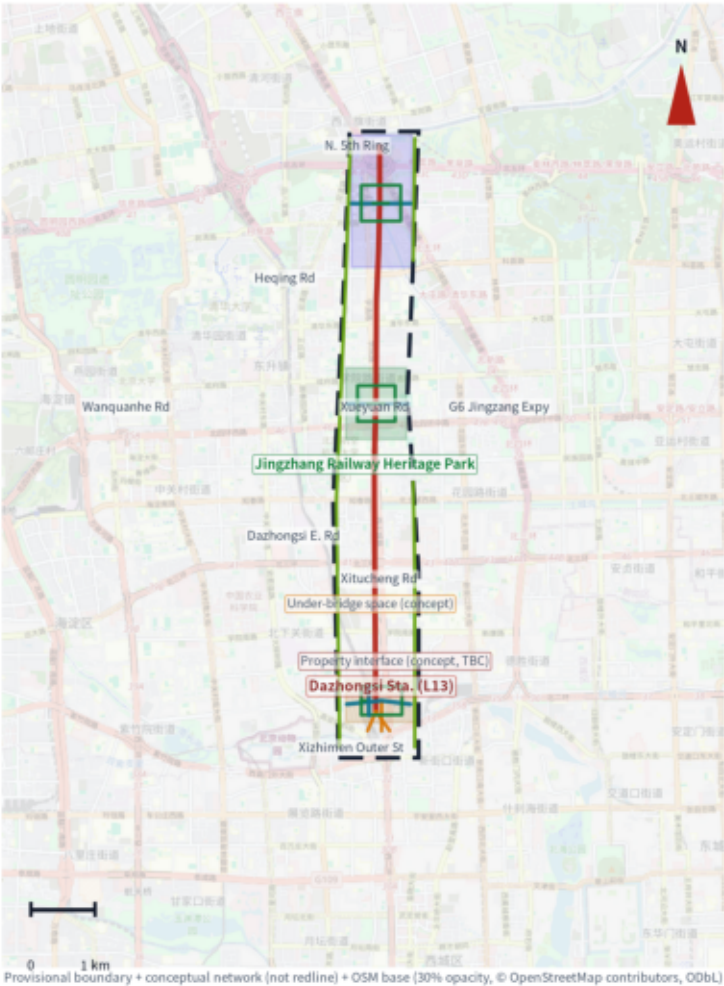

Validation: 167-edge / heritage f3≡f2

Recommended: Plan03 UDS 80.34 • permeable 69.1% • green penetration 25.2%

Formal geometry = conceptual network inside provisional boundary; real Physarum is method-validation evidence only.

Site Overview & Conceptual Network

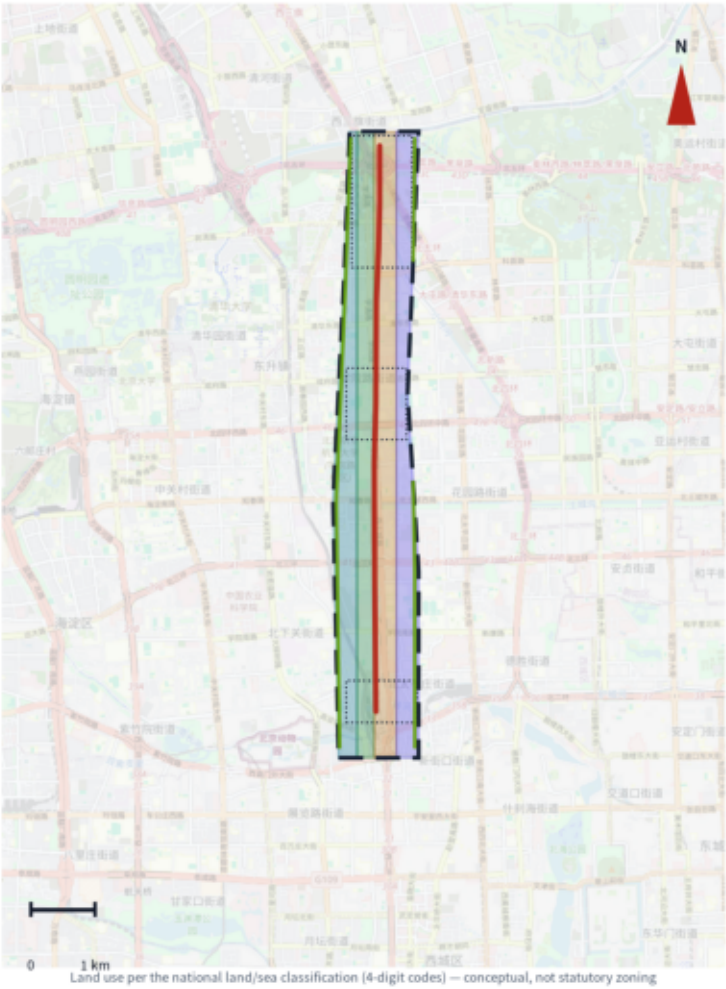

Legend

- Physarum primary vein
- Secondary branch
- Local loop
- Jingzhang green corridor
- Station feeder
- Zhongzhiyuan Area
- Beijing AI Origin Community
- Dazhongsi AI Industry Cluster

Boundary/network/districts are algorithmic conceptual & provisional extents (not surveyed, not approval geometry). Road/station/park names are based on OSM public data and the brief's textual extents (illustrative). Under-bridge space and property interface are conceptual annotations, pending official verification.

Land-Use & Spatial Structure

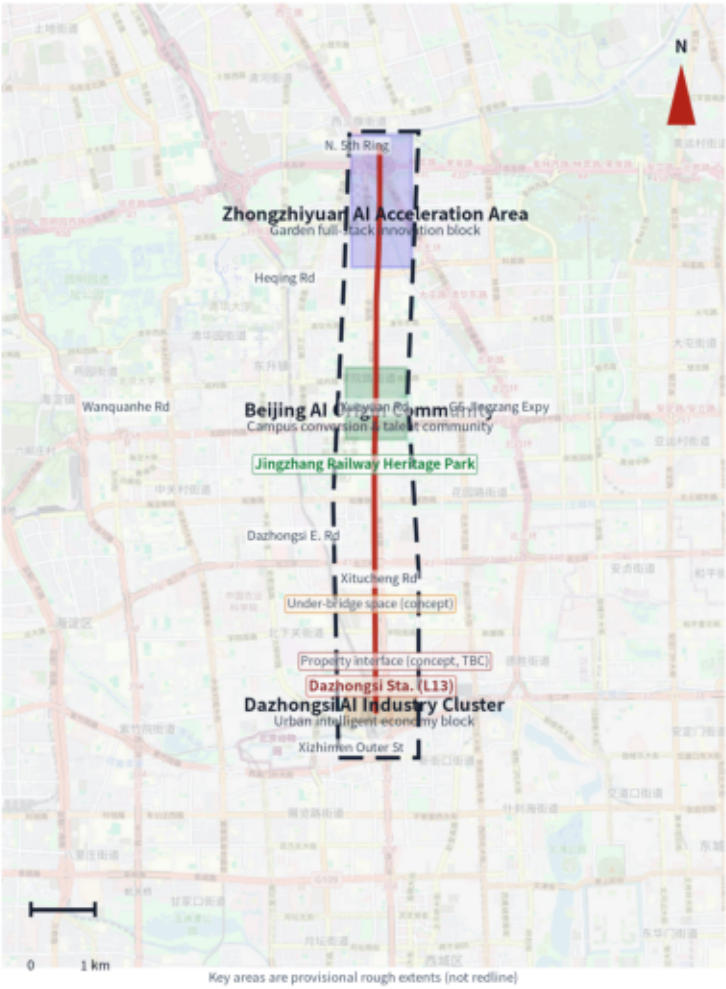

Legend

- 0802 R&D land (AI R&D testbed)
- 1401 Park & open space
- 05 Commercial & industrial services
- 0702 Community services & residential
- Physarum primary vein
- Jingzhang Heritage Park green corridor

Land-use colors & codes are conceptual (agent-generated design) per the national classification — not statutory zoning, not redline. Dashed line = provisional extents of the three key areas.

Three Key Areas + Physarum Spine

Legend

- Zhongzhiyuan AI Acceleration Area
- Beijing AI Origin Community
- Dazhongsi AI Industry Cluster
- Physarum primary vein
- Provisional site boundary (dashed)

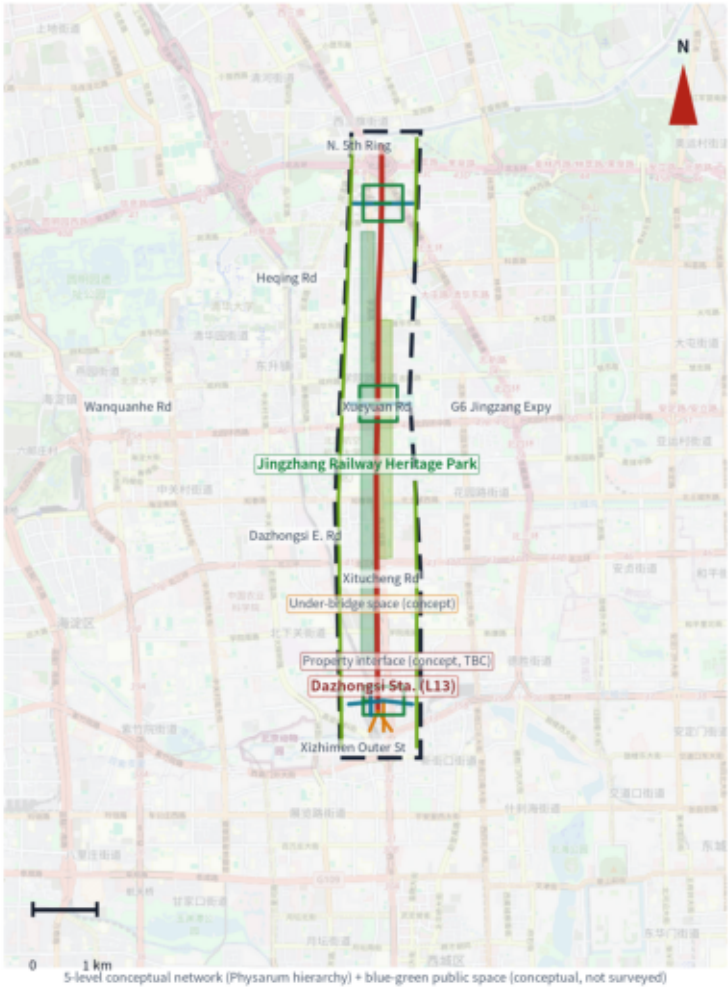

The three district boundaries are provisional extents

Inferred from the brief's area figures & textual extents

— not official polygons, not redline. Station

coordinates are OSM public data.

Mobility & Blue-Green Public Space

Legend

- Primary vein
- Secondary branch
- Local loop
- Green corridor
- Station feeder
- Park & green space
- Public space

Network is a conceptual line network generated by Bio-Physarum simulation (not approval redline, not surveyed geometry); blue-green space is conceptual (agent-generated design).

Metrics recalculation (same level • off-site validation)

OFF-SITE • not formal site geometry

0

Heritage hard-crossings

g1 hard constraint • off-site

19.20

Optimal efficiency

Run7 frozen 2.802 • baseline 1.143 • off-site

167

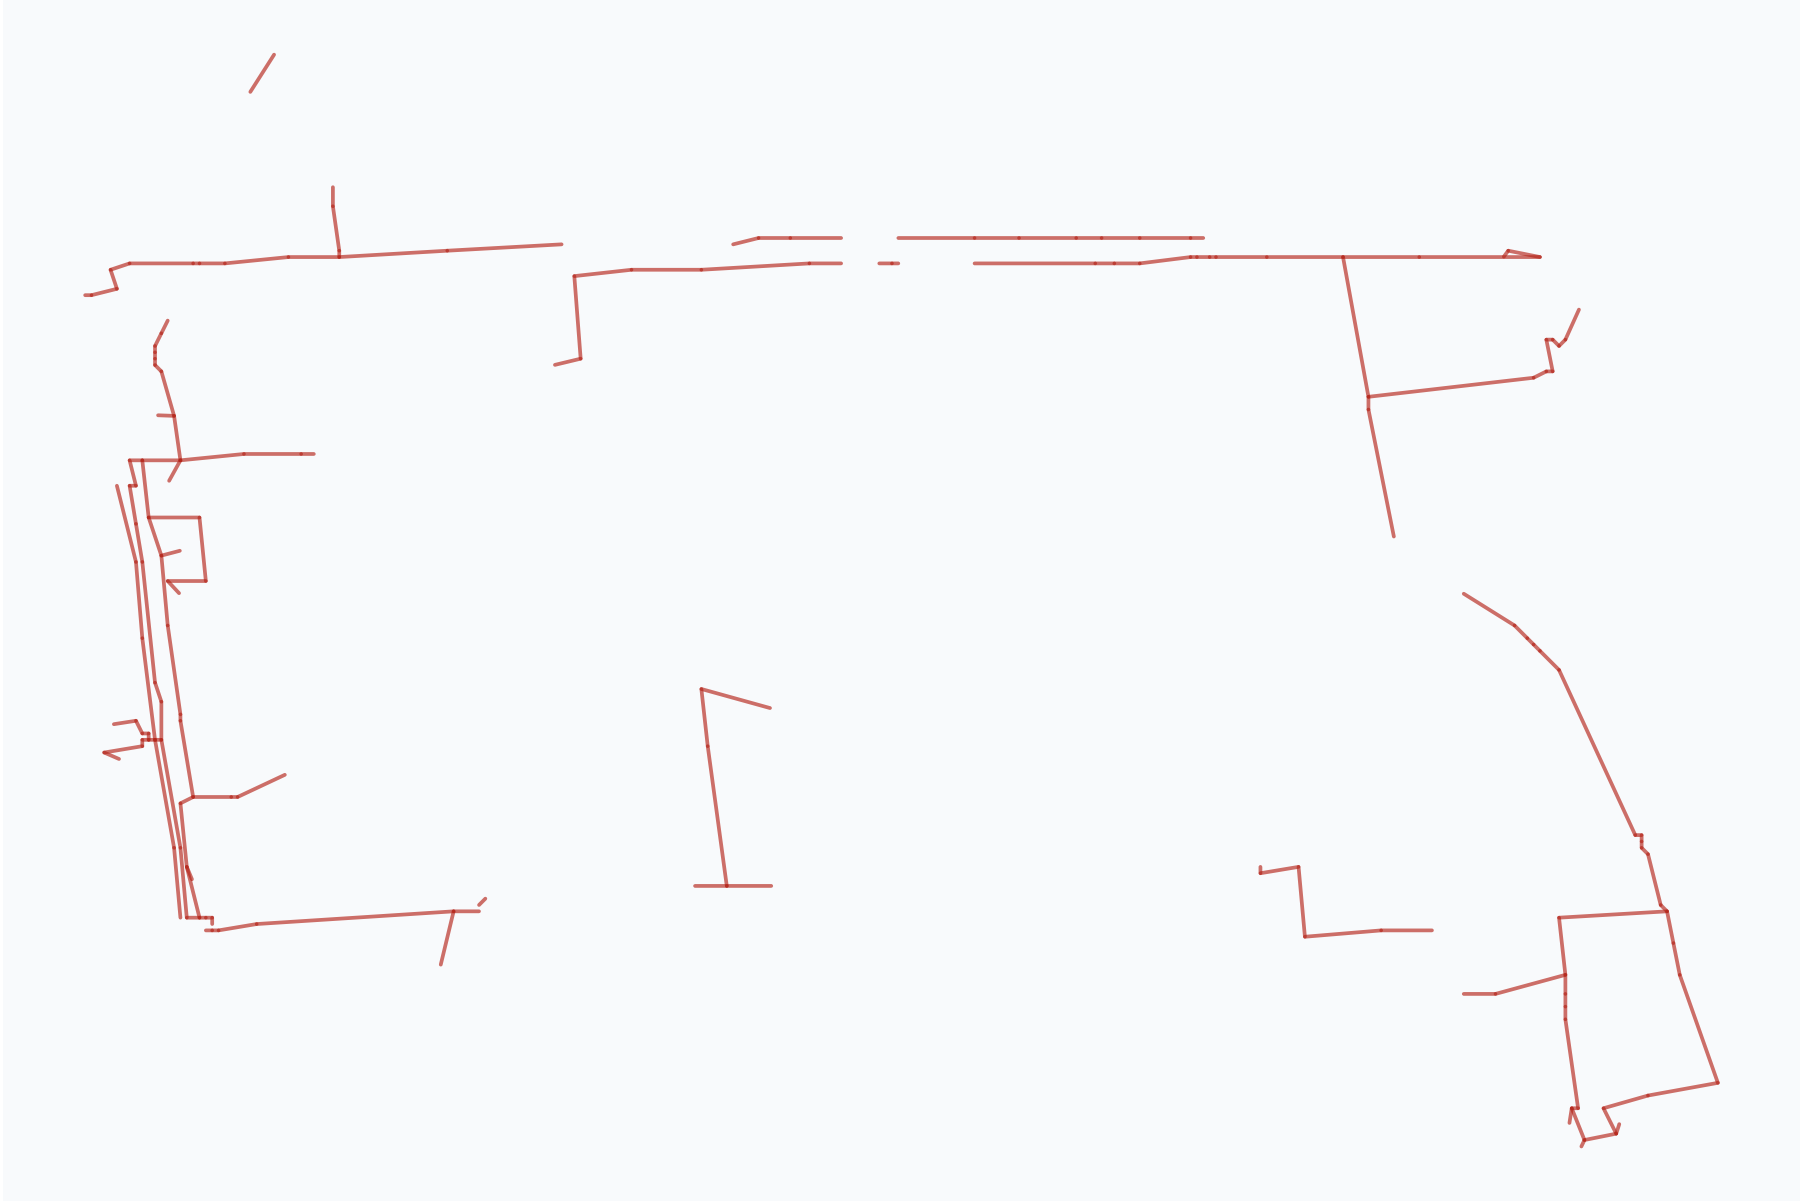

Network edges

real Physarum skeleton • off-site

Method validation (real Physarum run): 167-edge network / efficiency 19.20 / heritage objective $f_3 \equiv f_2$ (degenerates to cost; no independent site heritage conclusion)

Brand: 智脉共生 (Bio-Pulse Symbiosis)

Real Physarum 167-edge skeleton (method validation)

Zhi = AI belt Mai = Physarum network Symbiosis = blue-green • slow • industry • community

Conceptual brand (suggestive framework); does not replace existing names/trademarks/marks.

Visual base: real Physarum run skeleton (167 edges, ~2-3 km west of provisional boundary, method validation only).

Global Benchmark Cases (Public Information)

Global Benchmark Cases (Public Information)

案例 Case	地点 Location	核心做法 (公开报道)	借鉴 / 警示
Sidewalk Labs Quayside	Toronto, CA	Sensing, adaptive building, data trust (2017-2020)	Governance mechanism / privacy caution
Masdar City	Abu Dhabi, UAE	Low-emission block, passive cooling, early PRT	Low-carbon + feeder / fiscal balance
Songdo IBD	Incheon, KR	Reclaimed town, U-City sensing, pneumatic waste	New infra reservation / keep organic growth
Amsterdam Smart City	Netherlands	PPP collaboration, living-lab pilots	Incremental + multi-party / responsibility
Xiong'an New Area	Hebei, CN	CIM twin, blue-green network, utility tunnels	Digital twin + blue-green slow priority

Test Validation Scenarios (suggestive framework)

Test Validation Scenarios (suggestive framework)

场景	验证对象	检验依据（真实）	关键目标
T-01 Dazhongsi TOD	Four-quadrant link & feeder	GB 50763-2012 / GB/T 51328-2018	Barrier-free flow; feeder on primary vein
T-02 Xiaoyue stormwater	Blue-green + permeable paving	Sponge City guide / GB 50014	Permeable 69.1% / green pen. 25.2%
T-03 AI Origin access	Campus-park-block stitching	GB 50763-2012	Slow loop covers nodes; continuous access

Implementation Matrix (suggestive framework)

Implementation Matrix (suggestive framework)

项目	建议责任主体	资金来源（建议性）	建议周期	暂停/退出条件
JZ-01 Slow-travel stitching	Transport commission + park	Fiscal + renewal fund	Near-term	Pause if ownership unsettled
JZ-02 Qinghe interface	Water authority + park	Fiscal + green bond	Mid-term	Exit if flood unmet
JZ-03 Conversion street	University + sci-tech bureau	University + social capital	Mid-term	Pause if ownership dispute
JZ-04 Dazhongsi four-quadrant	Rail operator + transport	Rail + fiscal	Mid-term	Postpone if timing mismatch
JZ-05 Edge computing	Sci-tech bureau + operator	Social capital + subsidy	Long-term	Exit if operator absent
JZ-06 Physarum recalibration	Design team + university	Research funding	Long-term	Keep 'to be confirmed'

Accessibility & Inclusivity (GB 50763-2012)

Accessibility & Inclusivity (GB 50763-2012)
