

Overall structure: heritage spine, three cores and two wings

Land-use structure: heritage spine and open weave

Concept technical architecture / vendor-neutral

Five interface layers connect public access, scenarios, evidence and edge infrastructure; this is not a deployment or capacity claim.

01 Civic access

Paper / phone / staffed desk

Human fallback

02 Scenario orchestration

scenario_id / consent / risk

Version + provenance

03 Model and rules

Retrieval / routing / translation

Advice only

04 Evidence registry

Authorization / complaint / exit

No record, no expansion

05 Edge infrastructure

Device / network / power

Offline + takeover drill

Four priority pilots / 四个优先 pilot

Pilot	Observable acceptance	Stop / rollback
02 Safety sandbox	Rules, scope, human conclusion, withdrawal	Unauthorized field or audit gap
04 AI walking guide	Accessible, older-adult, night/rain walk audit	Misdirection or failed takeover
08 Data commons	Authorization summary; personal fields = 0	Broken provenance or deletion
10 Civic route	Capacity, access, safety, copyright checklist	Missing item or unknown capacity

Three key areas / place and operations

Place-specific nodes, interfaces, section evidence and a joint field-pilot stop gate

Open Weave / key everyday scenes

Concept renderings: AI as explainable, staffed, opt-out-capable civic service

Heritage spine / slow mobility

Zhongzhiyuan / standards commons

AI Origin / inclusive learning

Dazhongsi / staffed smart economy
