

JING-ZHANG OPEN WORKS

JING-ZHANG OPEN WORKS

TURN RAILWAY HERITAGE INTO TESTABLE, STOPPABLE AND
AUDITABLE CIVIC INFRASTRUCTURE

12-PAGE DESIGN BOOKLET

FORMAL OPEN-CALL PACKAGE · 2026

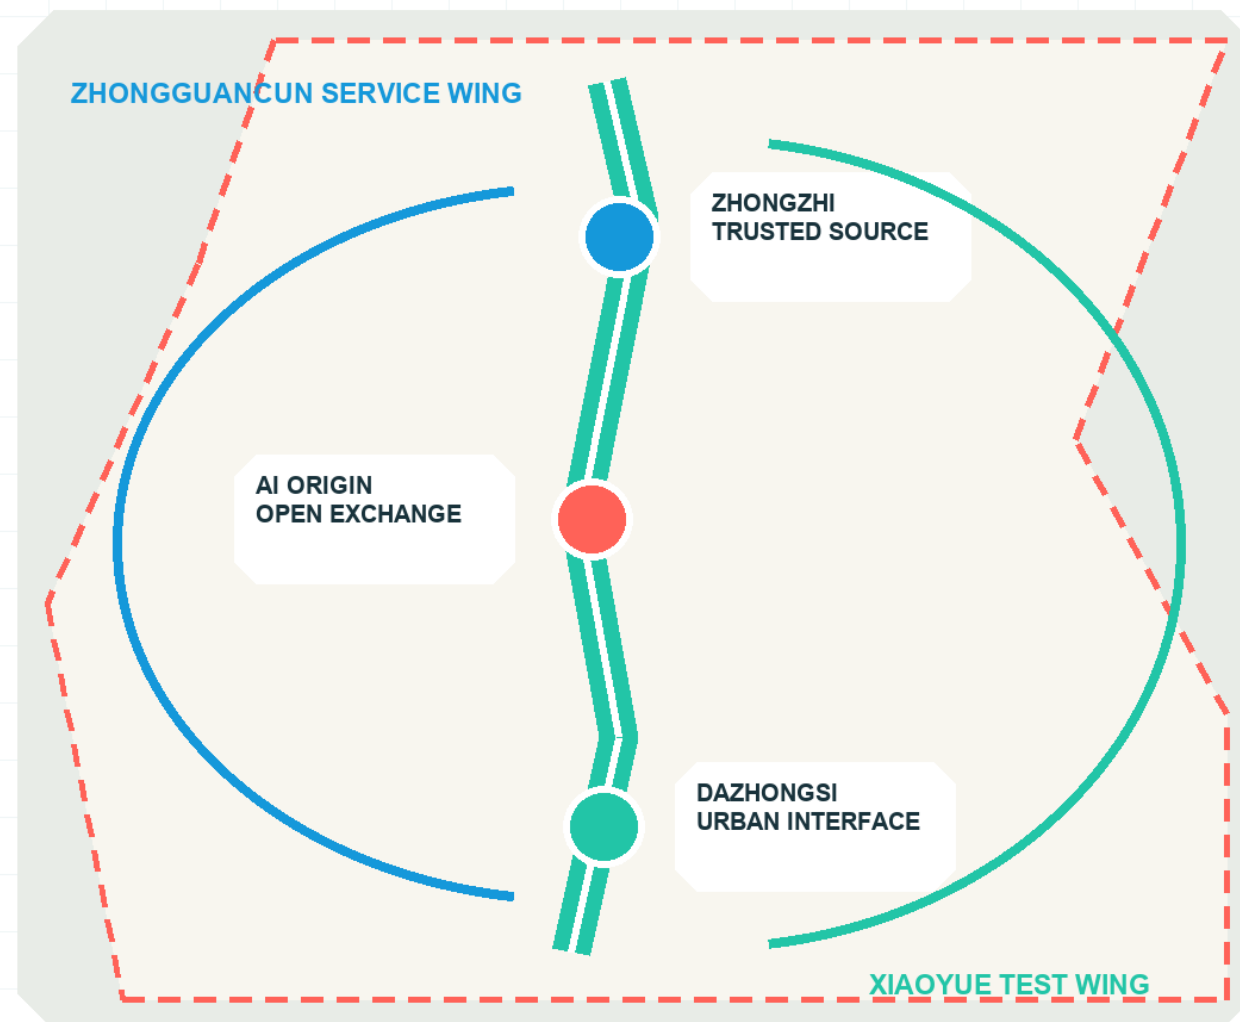

DESIGN BASIS + EVIDENCE BOUNDARY

Official facts, cases, provisional geometry and design suggestions remain separated.

SITE OVERVIEW | HERITAGE AS CIVIC INNOVATION INFRASTRUCTURE

JZ
OPEN WORKS

One spine, three districts, two wings; daily city first, bounded innovation second

JING-ZHANG OPEN WORKS

Turn urban problems into tasks that can be shared, verified and retired.

1 CIVIC INNOVATION SPINE

3 DIFFERENTIATED DISTRICTS

6 URBAN INTERFACE TYPES

12 AI SCENARIO CARDS

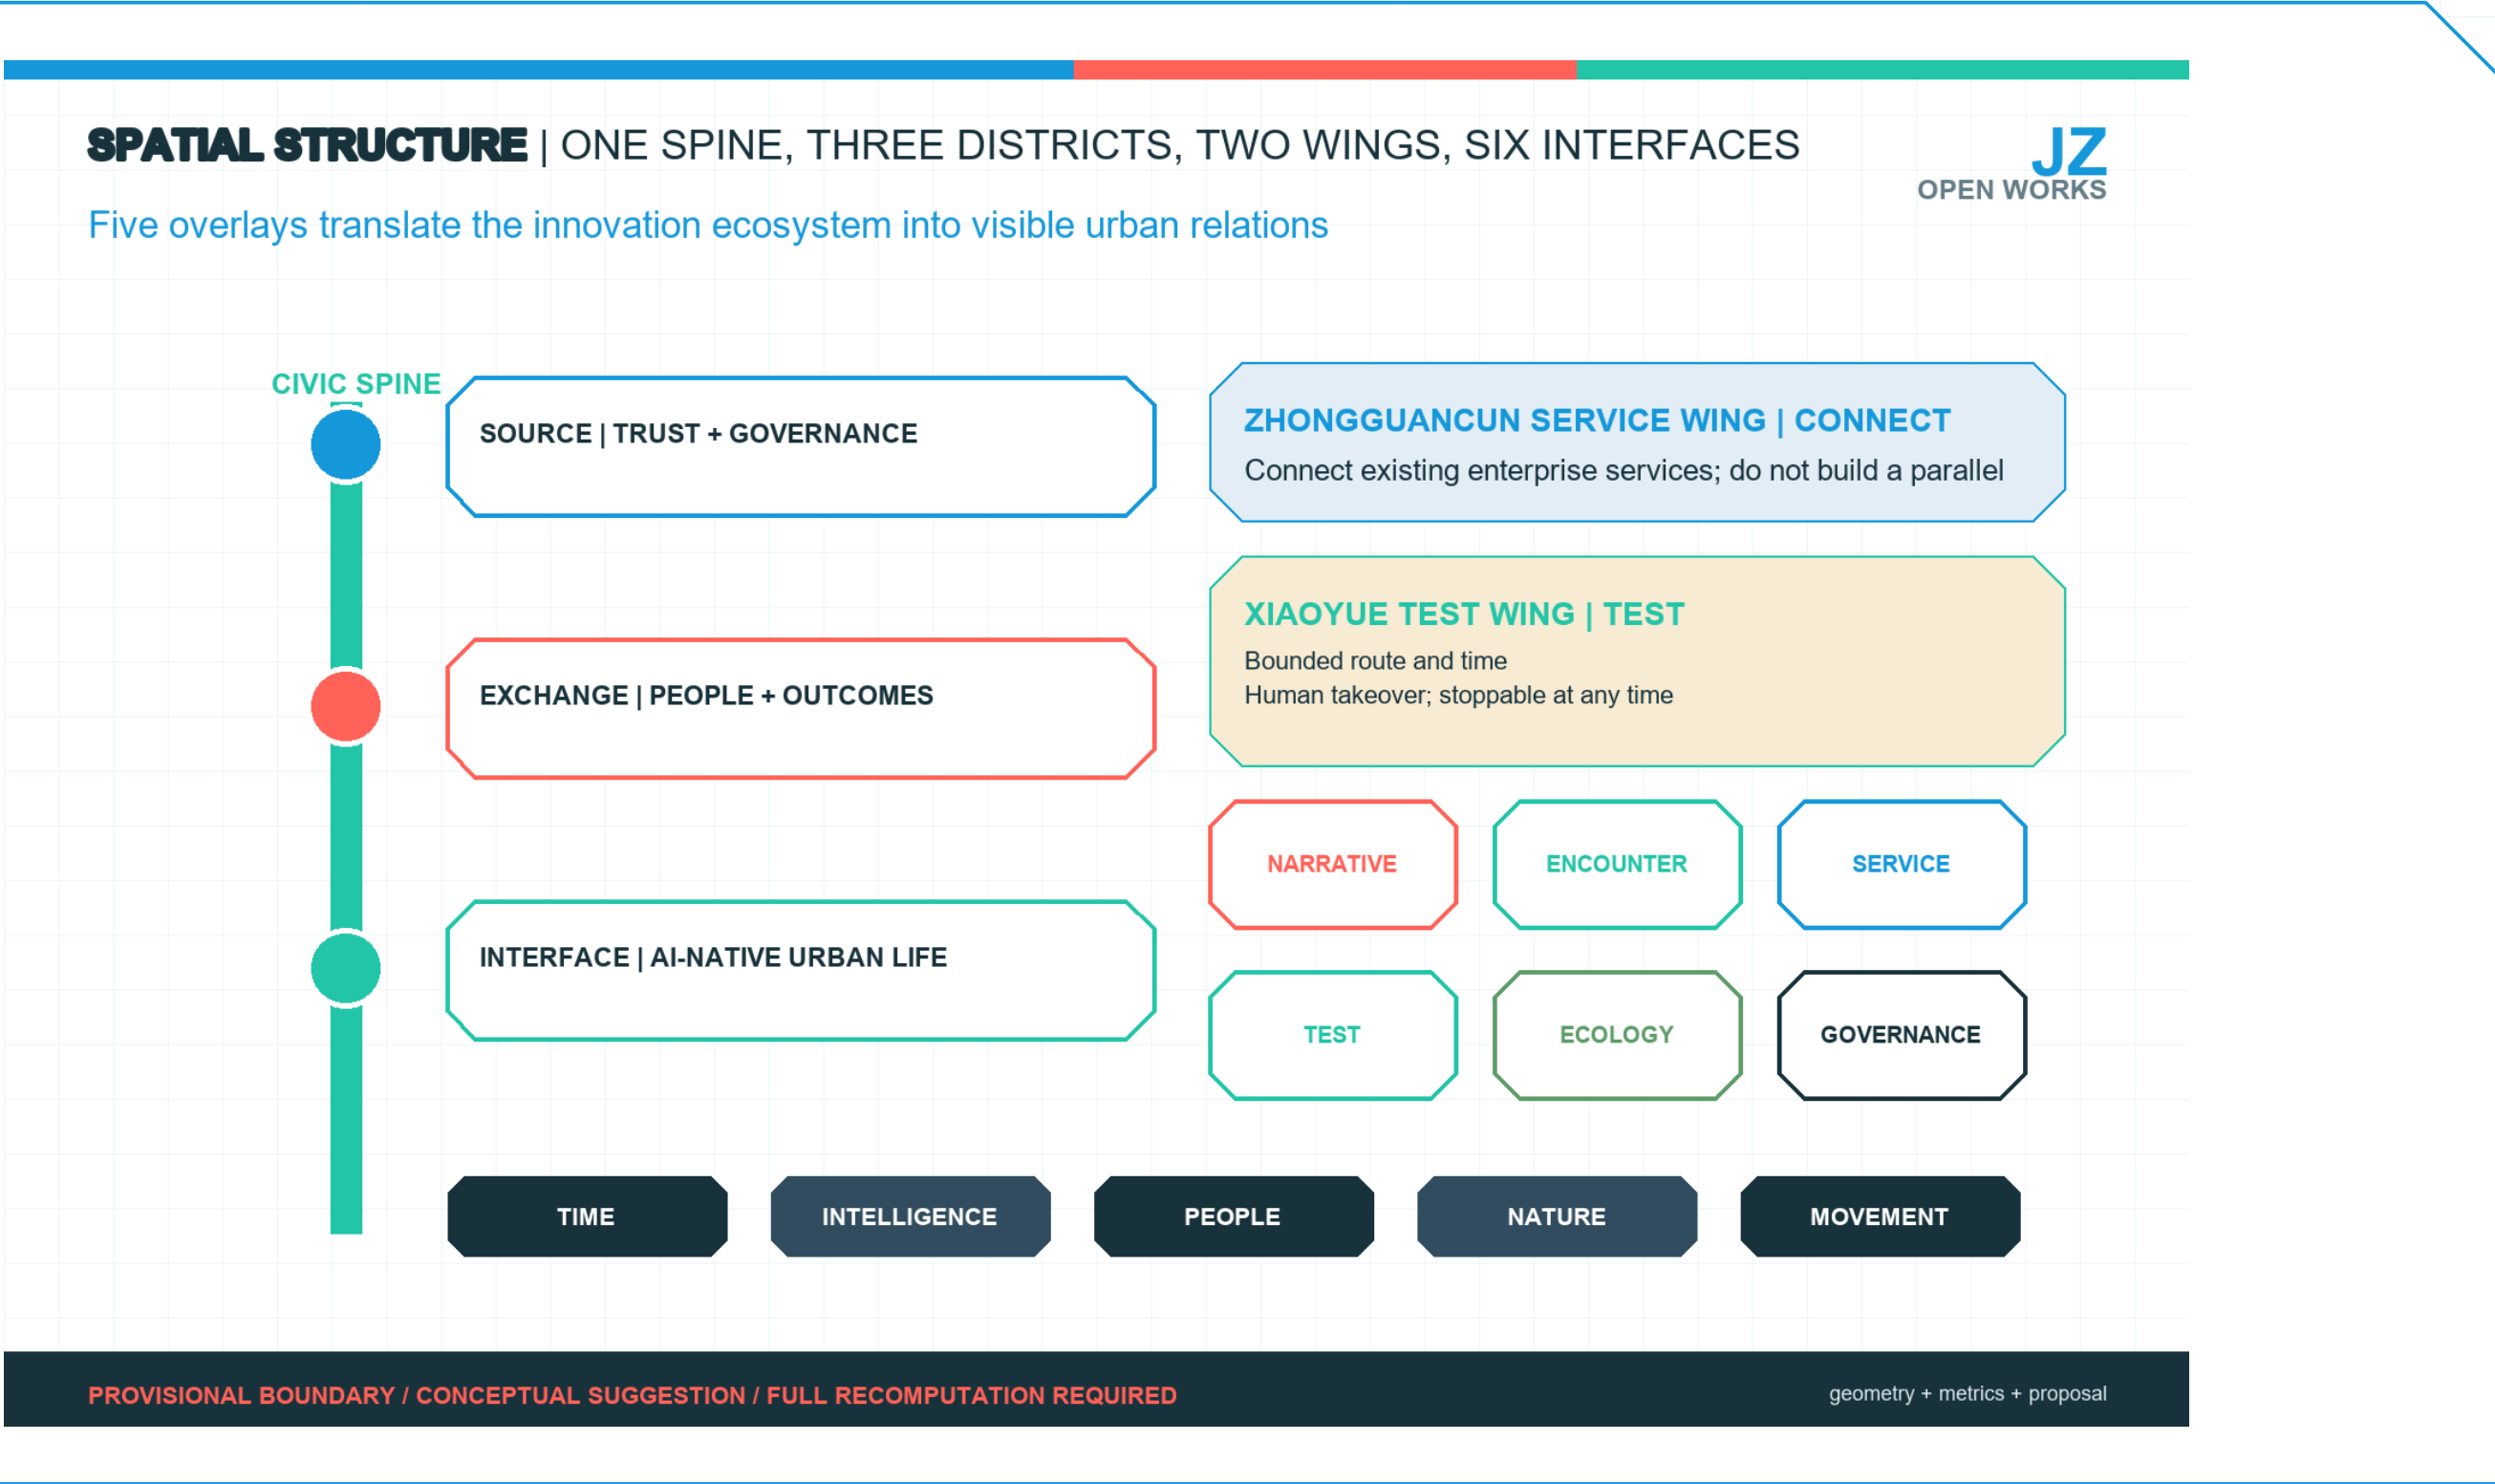

3 BOUNDED TESTBEDS

PROVISIONAL BOUNDARY / CONCEPTUAL SUGGESTION / FULL RECOMPUTATION REQUIRED

geometry + metrics + proposal

ONE SPINE, THREE DISTRICTS, TWO WINGS, SIX INTERFACES

A civic spine links trusted source, open exchange and urban interface.

EXISTING BASE + FEASIBILITY

The opened park and public events establish a real physical and operating base.

01

OPENED PARK

About 2.5 km of open space and roughly 16.8 ha of park provide a real physical base.

02

PUBLIC EVENTS

Technology and culture events show a real audience, but not year-round demand.

03

EXISTING ECOSYSTEM

Connect universities, firms and civic services instead of rebuilding a closed platform.

01

FIELD CHECK

02

USE LOG

03

OWNER

04

SMALL PILOT

THREE KEY AREAS

Three areas carry trusted technology, open exchange and intelligent urban-life roles.

KEY AREAS | THREE ROLES, THREE IMPLEMENTATION CONDITIONS

Not three generic parks: a trusted source, an open exchange and an urban interface

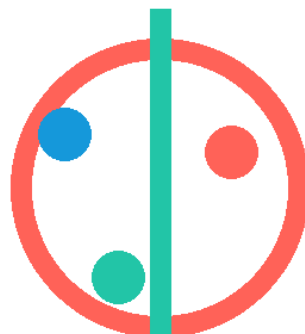

ZHONGZHI | TRUSTED AI GARDEN

- PUBLIC LOOP | OPEN LINK | STOP NODE
- T01 trusted-model lab
- Qinghe ecology + standards workshop
- bounded test + physical stop + human owner

FLOOD | FIRE | RIGHTS | SECURITY | INSURANCE

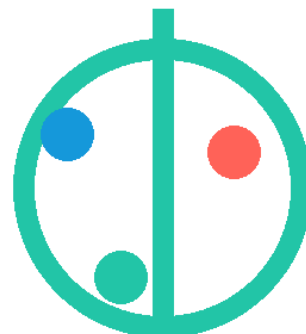

AI ORIGIN | 10-MIN KNOWLEDGE EXCHANGE

- PUBLIC LOOP | OPEN LINK | STOP NODE
- T02 human-backed agent evaluation
- open table + release room + services
- ordinary service + quiet hours + no-account access

CAMPUS | RIGHTS | ACCESS | NIGHT NOISE

DAZHONGSI | AI-NATIVE URBAN LIVING ROOM

- PUBLIC LOOP | OPEN LINK | STOP NODE
- station + four-quadrant crossing audit
- small public rooms + bilingual reception
- no preset bridge, capacity or programme

RAIL | TRAFFIC | FIRE | UTILITIES | NOISE

PROVISIONAL BOUNDARY / CONCEPTUAL SUGGESTION / FULL RECOMPUTATION REQUIRED

geometry + metrics + proposal

12 SCENARIO CARDS | NEAR-TERM PROTOTYPES

Near-term prototypes retain human, paper or offline alternatives.

01

EVERYDAY SERVICES

S01-S04: low-risk prototypes for orientation, accessibility, advice and public feedback.

02

PUBLIC CULTURE

S05-S07: rail stories, open discussion and co-creation retain account-free access.

03

CONDITIONAL PILOTS

S08-S12: higher-risk technologies enter bounded tests only.

01

7 NEAR TERM

02

5 CONDITIONAL

03

6 PERSONAS

04

HUMAN BACKUP

05

STOP RULE

CONDITIONAL PILOTS + THREE TESTBEDS

Higher-risk scenarios start only in professional or bounded settings.

01

MODEL GOVERNANCE

Test explainability, bias, logs and human review without presenting experiments as certification.

02

HUMAN-BACKED SERVICE

Humans own major decisions; account-free, paper and in-person channels remain.

03

LOW-SPEED ROBOTICS

Bound time, route and speed; provide physical stops, takeover drills and insurance.

01

RIGHTS

02

SAFETY

03

INSURANCE

04

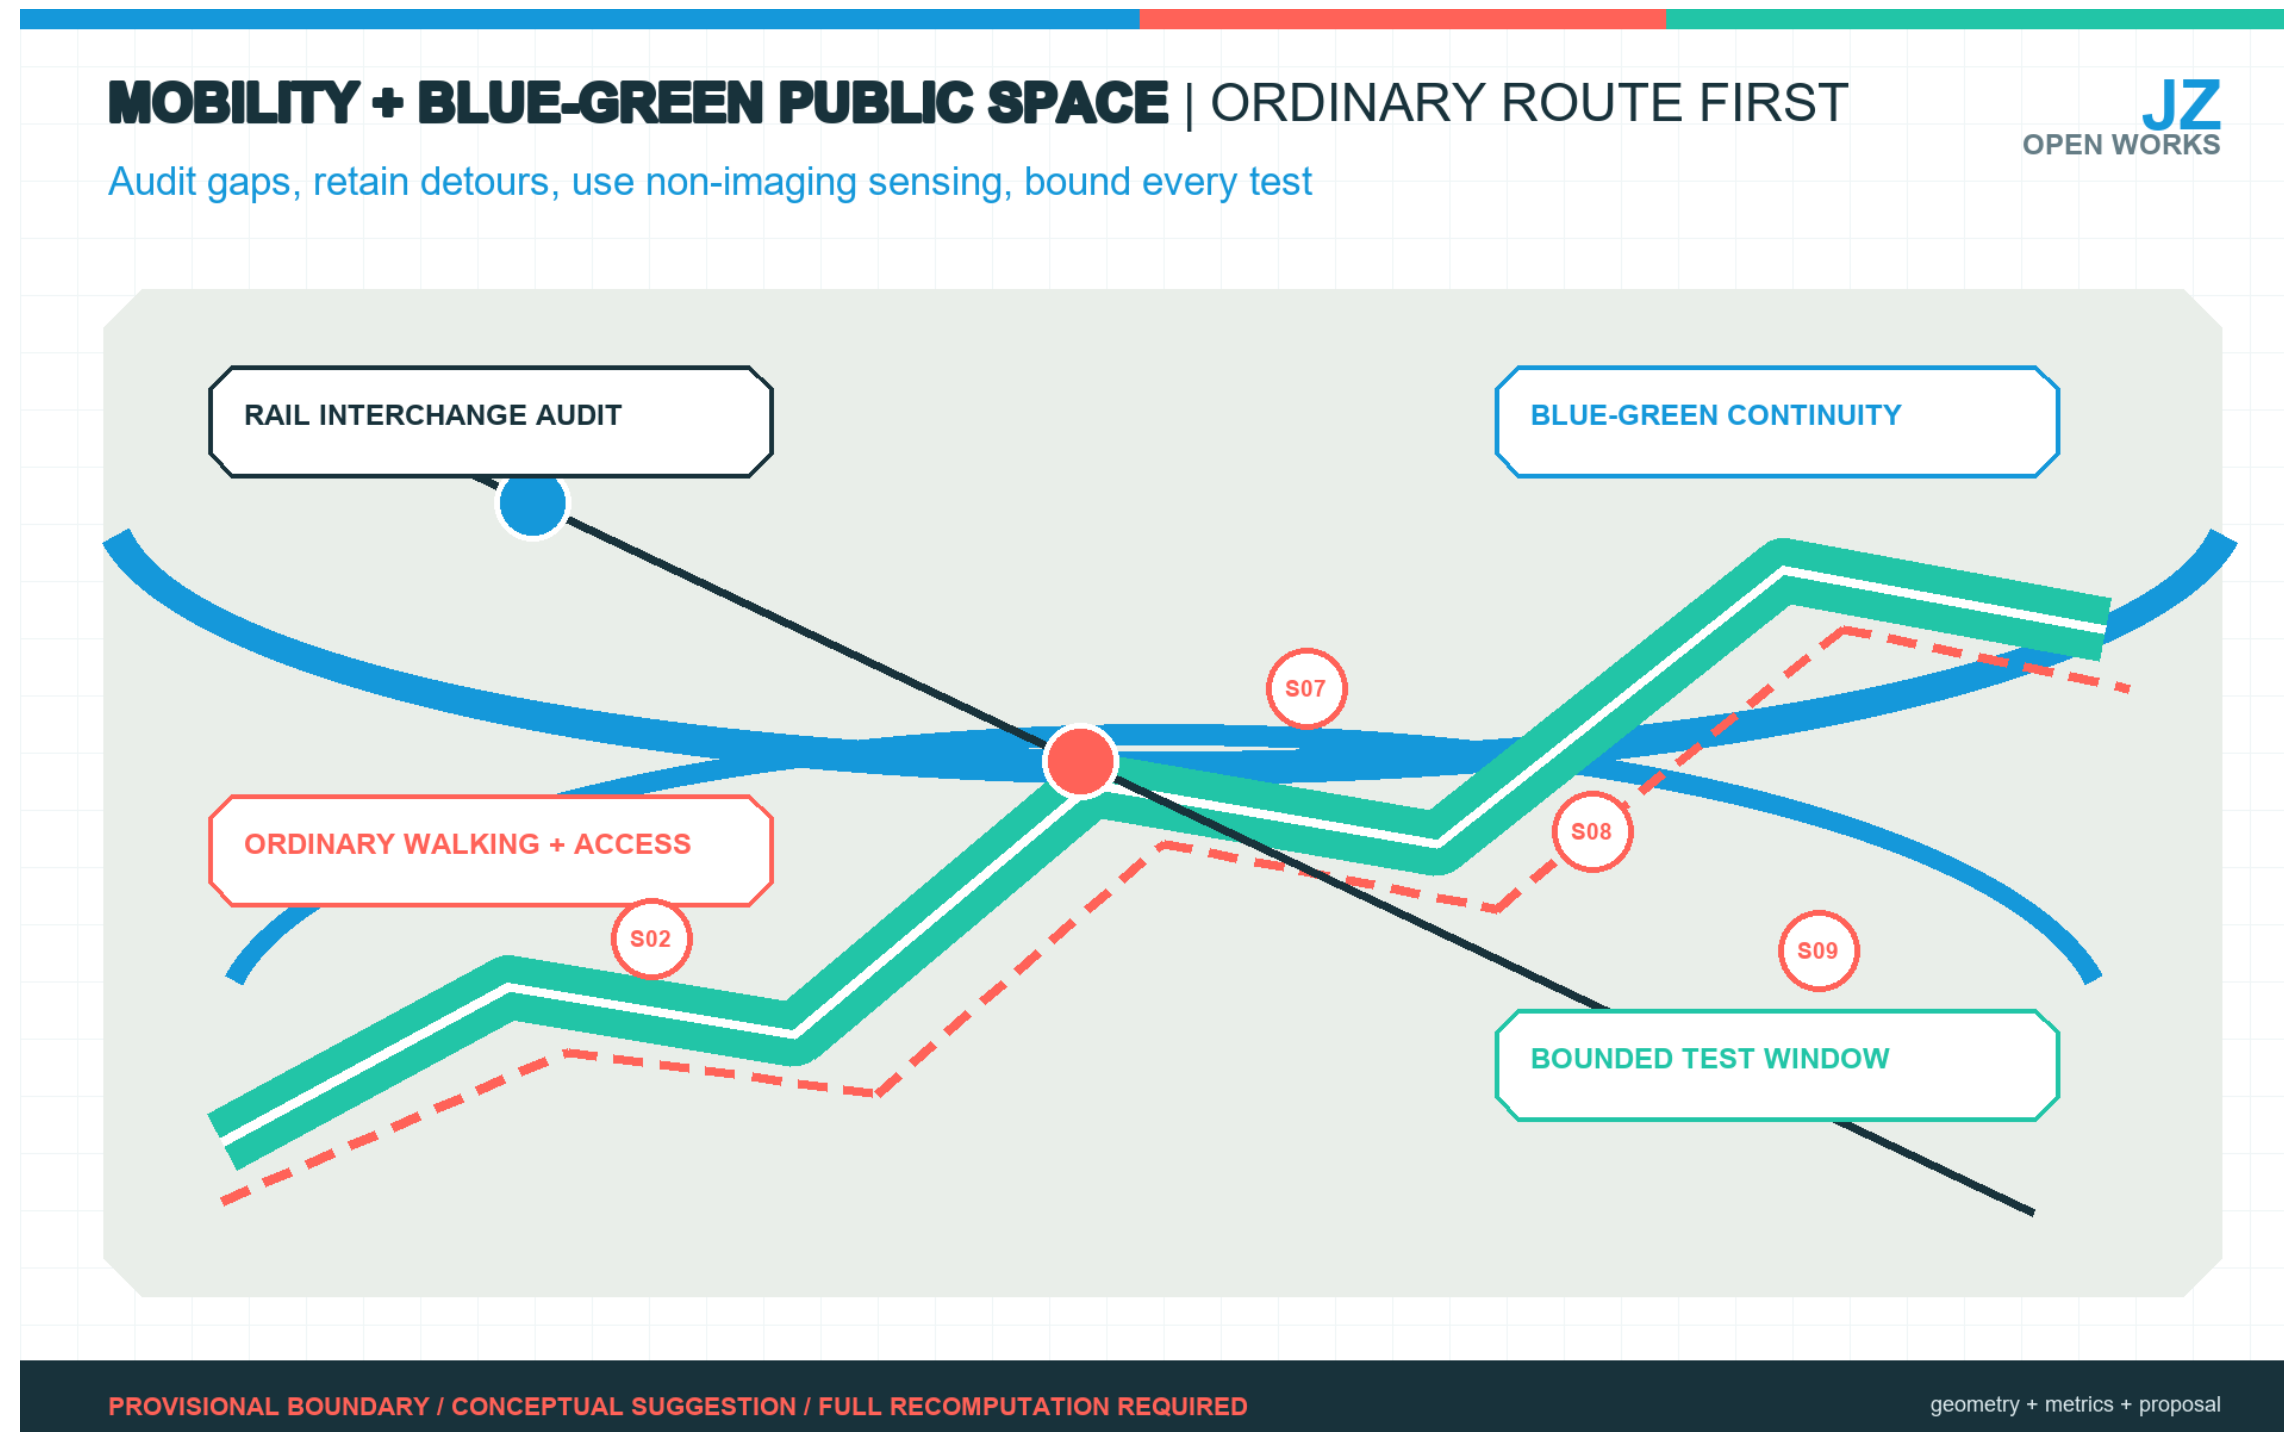

TAKEOVER

05

STOP TEST

ORDINARY ROUTE FIRST

Walking, accessibility, rail interchange and blue-green continuity precede robotics.

FOUR EVOLUTIONS OF CONNECTION

Rail, park paths, networks and open source form a new Jing-Zhang cultural system.

01

RAIL ENGINEERING

Rail construction connected city and region, forming Jing-Zhang's physical memory.

02

HERITAGE PARK

Linear heritage becomes walkable, dwellable public space with shared narratives.

03

OPEN-SOURCE CITY

Networks and public tasks connect knowledge, communities and civic services.

01

RAIL MEMORY

02

PARK PATH

03

KNOWLEDGE

04

OPEN MAKING

JZ-PATCH URBAN PATCH PROTOCOL

Public tasks move through bounded tests, scaling, repair or retirement.

01

PROBLEM + BASELINE

State the civic problem, then show how service continues without the technology.

02

DATA + HUMAN OWNER

Declare data bounds, human responsibility, rights impacts and appeal routes.

03

ACCEPTANCE + EXIT

Publish acceptance, stop, rollback, care and retirement rules before launch.

01

TASK

02

VERIFY

03

PROTOTYPE

04

RECOMPUTABLE, PACKAGE-ONLY

Provisional polygon area; concept green,
public-space and building-envelope areas; counts of
scenarios, testbeds, personas and interfaces.

KEEP UNKNOWN; DO NOT INVENT

Official redlines, FAR, height, ownership, bridge/tunnel
feasibility, utility capacity, investment, schedule,
bandwidth, green power and carbon effects.

PROVISIONAL BOUNDARY / CONCEPTUAL SUGGESTION / FULL RECOMPUTATION REQUIRED

geometry + metrics + proposal

IMPLEMENTATION CONDITIONS + NEXT STEPS

Begin with official evidence and fieldwork, then move through prototypes and professional deepening.
