

JING-ZHANG · THE WAY FORWARD

A century-old railway did not end at arrival; a responsive intelligent city begins by answering back.

JING-ZHANG · THE WAY FORWARD

JINGZHANG CIVIC LOOP / ONE LINE · TWO WINGS · THREE ZONES · THREE STATIONS

CORE FIGURE 01 / OVERVIEW

Connect rail heritage, AI innovation and everyday life through a public loop that can be verified, returned and stopped.

SPATIAL ARMATURE

A Zhongzhiyuan · Truth
Calibration | Is it safe and trustworthy?

B AI Origin · Origins
Co-creation | Can a need become a prototype?

THE LINE
Jing-Zhang Knowledge & Validation Spine

WEST WING
Zhongguancun Technology Services

EAST WING
Xiaoyue River Scenario Enablement

C Dazhongsi · City
Feedback | Can people choose and appeal?

The Civic Loop is not a new road.

It is a stoppable public-learning mechanism:
validate → co-create → use → feedback → return.

Extant: repository provisional boundaries; basemap: © OpenStreetMap contributors, 2026-08-11, ODbL; overlay: conceptual recommendation.

Provisional boundaries are not official planning boundaries · Figures do not replace machine data

ONE LINE, TWO WINGS: STRUCTURE AND FUNCTION

LAND-USE STRUCTURE / FUNCTIONAL RELATIONSHIPS, NOT STATUTORY ZONING

CORE FIGURE 02 / STRUCTURE

A complete but low-confidence conceptual partition expresses functional relationships; civic interfaces and the loop connect them.

CONCEPTUAL FUNCTION PARTITION

0802 Technology R&D and validation

Zhongzhiyuan / professional validation

1401 Knowledge and blue-green open space

Jing-Zhang / everyday civic base

05 AI co-creation and industry services

Origin-Dazhongsi / services network

0702 Community life and public services

Basic services for all users

FIVE PUBLIC-SPACE PROTOTYPES

1 Calibration · 2 Co-creation · 3 Feedback
4 Knowledge pocket · 5 Low-disturbance observation

WHY THIS REMAINS A STRUCTURE DIAGRAM

The partition covers the provisional boundary to express functional relationships only. It does not determine statutory land use, FAR, demolition, road redlines or building scale.

Land-use codes follow official terminology; all partitions are design proposals and require full recalculation after official controls and ownership data arrive.

Provisional boundaries are not official planning boundaries · Figures do not replace machine data

02 ONE LINE / TWO WINGS / THREE DISTRICTS / THREE STATIONS

43.6 km² research · 11.4 km² overall design · 368.4 ha key areas

The public knowledge and validation line follows Jingzhang. Two wings connect Zhongguancun services and Xiaoyue River scenarios. Three stations are calibration, co-creation, and feedback interfaces embedded in the three districts.

03 DETAILED DESIGN OF THREE STATIONS

All key areas share one information structure: a core question, three spatial actions, civic interfaces, an honour-display node, and preconditions for phasing. Long labels sit outside the map with leader lines.

10 AI+ SCENARIOS / 7 PERSONAS / 6 VALIDATION GATES

Shared knowledge · Maintenance intake · Civic review · Walking diagnosis · Model safety · Embodied test · Data sandbox · Prototype clinic · Talent services · Ecology observation

Student founder · Research engineer · Small business · Older resident · Wheelchair user · Young family · International visitor

05 MOBILITY AND BLUE-GREEN FOUNDATION

Provisional geometry passes intake only; official boundaries require a complete recalculation before formal professional scoring.

MOBILITY, BLUE-GREEN AND PUBLIC SPACE: CONTINUITY FIRST

MOBILITY · BLUE-GREEN · PUBLIC REALM / ONE INTEGRATED BASE

CORE FIGURE 04 / SYSTEM

Secure continuous ground-level access, accessibility and everyday public space before connecting innovation scenarios; dashed lines mark ecology links pending review.

Basemap: © OpenStreetMap contributors, 2026-08-11, ODbL; overlays derive from submission GeoJSON; no road-redline or engineering claim.

Provisional boundaries are not official planning boundaries · Figures do not replace machine data

04 MOBILITY / BLUE-GREEN PUBLIC REALM

PROJECT PACKAGES / TRIGGERED PHASING

Public knowledge · Trustworthy validation · Origin co-creation · Civic rights · Blue-green observation

P0 Evidence → P1 Reversible pilots → P2 Controlled links → P3 Network operation

METRICS, EVIDENCE AND UNKNOWNNS: ONE RECOMPUTATION CHAIN

DECLARED VALUES ≠ PROVISIONAL GEOMETRY ≠ OBSERVED PERFORMANCE

CORE FIGURE 05 / EVIDENCE

Official declared values, provisional geometry recomputations and future observed performance remain distinct; missing controls remain null.

01 TWO NUMBER SETS MUST REMAIN DISTINCT

02 ONE DATA CHAIN UPDATES EVERY OUTPUT

EXPLICITLY UNKNOWN (value: null)

FAR and total floor area

Existing coverage and DRR decisions

Road redlines, station entrances and utilities

Accessibility, non-digital and operational baselines

Sources: metrics.json, geometry/*.geojson and compliance matrix; ratios are conceptual design-layer recomputations, not existing or statutory indicators.

Provisional boundaries are not official planning boundaries · Figures do not replace machine data

05 METRICS / EVIDENCE / UNKNOWNNS

KNOWN METRICS / SOURCES / ASSUMPTIONS

site_area_sqm 11,412,825.386 m² · green_ratio 17.58% · public_space_ratio 6.88% · building footprints 346,178.609 m²

Basis: official announcement, agent taskbook, site package, source registry, professional standards, and local OSM background. Licences and limits are recorded in sources.json.

Evidence Addendum • Cases / Collaboration / Operation

Mechanism transfer only • conceptual cooperation pathways / recommendations • provisional boundary unchanged

01 Seven global cases

Toronto • Vector Institute

CASE-VECTOR-TORONTO

Independent not-for-profit and board governance; research, talent, adoption / Campus research and collaboration space

Transfer: Separate research, adoption service, and public communication

Limit: Research space not generally toured; not public-district governance; Funding, governance, and campus conditions

Montréal • Mila

CASE-MILA-MONTREAL

Universities, open science, responsible AI, and translation / Mile-Ex premises and university network

Transfer: Ethics review, provenance, contribution records

Limit: Institutional ecosystem is not an entire urban district; Talent scale, alliances, and local institutions

Seoul • Seoul AI Hub

CASE-SEOUL-AI-HUB

City-established, academic / research co-operation, staged support / Yangjae anchor and support space

Transfer: Separate sponsor, operator, and service roles

Limit: Mandates and industry conditions are city-specific; Mandates, incentives, siting, partnerships

Singapore • AI Singapore

CASE-AI-SINGAPORE

National programme linking problems, research, talent, governance, tools / NUS-hosted network platform

Transfer: Problem—project—talent—reusable tool path

Limit: A national programme, not an urban district; National authority, funding, eligibility

Paris-Saclay • Hi! PARIS

CASE-HI-PARIS

Inter-university technical, business, legal, societal review / Distributed campus network

Transfer: Plural professional review

Limit: Academic consortium is not a public-service operator; Brand, membership, and campus resources

Zürich • ETH AI Center

CASE-ETH-AI-CENTER

Cross-department research, talent, entrepreneurship, industry, engagement / University network and offices

Transfer: Interdisciplinary and public interfaces

Limit: Depends on university organisation and access; University authority, facilities, talent

Berlin • Merantix AI Campus

CASE-MERANTIX-BERLIN

Privately operated workspace, residencies, events, practitioner community / Membership- and event-oriented campus

Transfer: Visible entry, recurring events, peer community

Limit: Operator-authored and privately curated; Private selection, investment links, membership

02 Five regional interfaces

Beiwei Community

Flow: Resident knowledge → AI Origin; non-digital service / use feedback → Dazhongsi → issue desk

Interface: Public issue ledger, staffed rights desk, community review seat

Boundary: Consent and existing services remain with responsible parties; stations do not speak for the community

Trigger: Purpose, lead, exit, and non-digital route clear before G0

Future Science City

Flow: Methods / talent / prototypes → Zhongguancun wing and Origin; review returns

Interface: Periodic open call, joint technical review seat

Boundary: No assumed access to labs, people, data, or name

Trigger: Cleared brief, named lead, and conflict disclosure complete

Huairou Science City

Flow: AI-for-science methods / protocols / negative results ↔ Zhongzhiyuan

Interface: Controlled validation docket, reproducibility record

Boundary: Stations cannot authorise external instruments, research data, or safety conditions

Trigger: Data, IP, safety classification, reproducibility complete before G1–G2

Beijing E-Town

Flow: Industrial need → Zhongzhiyuan limited test → Dazhongsi service feedback → responsible party

Interface: Scenario permit, emergency stop, maintenance log

Boundary: No procurement, investment, attraction, or site promise

Trigger: Site, technical lead, insurance / emergency, bypass plan before G2–G3

Beijing–Tianjin–Hebei

Flow: Problems, talent leads, protocols, service directories, and feedback summaries move both ways

Interface: Shared taxonomy, annual review, reciprocity checklist

Boundary: No assumed cross-jurisdiction approval, data sharing, or standards reciprocity

Trigger: Licences, parties, complaint, and exit channels before minimum exchange

03 Five operating paths

Developer community

Roles: Community operations secretariat; technical, ethics / rights, IP, public review

Entry / exit: Public issue repository, submission, offline clinic; future exit

IP: Background IP retained; per-project licence; future-display attribution may be withdrawn

Monthly clinic; quarterly demo / maintenance • Issue → team → G0/G1 → prototype → review → maintain, refer, archive, or exit

Future indicators: Maintainers, response time, reuse, withdrawal handling, diversity

Annual programme

Roles: Annual planning group; factual, accessibility, safety, public review

Entry / exit: Open call / offline entry; postpone, cancel, or exit

IP: Talks, exhibits, media, translations licensed separately; attendance is not training consent

Spring issues, summer test, autumn defence, winter review • Call → selection / conflict disclosure → test → public reason → continue, narrow, or stop

Future indicators: Issue diversity, gate rate, accessible sessions, public decisions, repeat participation

Scenario opening

Roles: Permit office and actual operator; privacy, accessibility, ecology, safety, maintenance, complaint review

Entry / exit: Permit card and staffed entry; pause; return / delete data

IP: Data purpose, background / foreground IP, model, and device duties separated

Monthly batch / stated window; G4 extends after review • Issue → risk → G2 → G3 → G4 → G5 retain, return, or remove

Future indicators: Permit cycle, stop rate, near misses, complaint time, non-digital completion, retention

International communication

Roles: Bilingual editorial / liaison group; fact, source, licence, translation review

Entry / exit: Bilingual evidence packet / submissions; correct, remove, or end contact

IP: Authors, translators, data, images attributed separately; no endorsement implied

Quarterly brief, annual exchange; updates follow evidence • Source → translate → review → publish → feedback → correct, continue, or archive

Future indicators: Source completeness, correction time, bilingual coverage, qualified responses, licensed reuse

Enterprise attraction / conversion

Roles: Industry service / first-use coordination; public-interest, conflict, IP / data, procurement, site review

Entry / exit: Open challenge / first-use application; exit gets reason and data disposition

IP: Background / foreground IP and trial licence separated; no procurement / investment commitment

Quarterly batch; limited first use after G3 • Issue → fit → G1/G2 → trial → public-value review → referral → retain, expand elsewhere, or exit

Future indicators: Qualified applications, decision time, gate rate, retention / exit reasons, disputes
