核心指标复算与证据链 • Metrics Recalculation & Evidence Chain

边界为临时约束范围 (provisional, 虚线), 非官方红线; 面积均为临时边界复算设计值。Provisional boundary (dashed), not an official redline; areas recomputed on provisional geometry. 来源 Sources: 官方公告 2026-05-09 • 仓库资料包 • 本包 geometry/"*.geojson "概念设计量, 非法定指标 concept design quantities, not statutory

品牌识别系统 • Brand Identity System — 连续体 CONTINUUM

跨区域创新协同机制 • Cross-Regional Coordination — 一带五向 One Belt, Five Directions

机制矩阵详见方案正文表格: 产业 (产链/链动)、人才 (链网/链群)、算力与数据 (资源压力/供需协调)、场景验证 (中试能力/落地复制)、传播活动 (链合/品牌创新等)。See the mechanism matrix table in the proposal for the full partner × interface mapping. 概念方案图, 非行政边界图; 未使用任何官方边界数据。Conceptual diagram, not an administrative boundary map.

08 Scenario System & Implementation Outline

Twelve AI scenario cards (SN-01 to SN-12) line the heritage-park AI learning spine; SN-03 (compute & model open testbed), SN-07 (low-speed autonomous delivery loop) and SN-11 (Dazhongsi AI-native retail testbed) are the three industrial validation scenarios. All scenarios follow data minimization, visible on-site notice, and human reviewability.

Five personas: hardcore researchers / founders & engineers / AI-native youth / residents & elders / global visitors & developers.

Three AI pilgrimage landmarks: the Zhongzhiyuan Switchback Point governance tower • the Origin Community First Line of Code plaza • the Dazhongsi Bell-Sound Computing hall.

Concept phasing: near 4.66 km² (three ~60 ha priority catalysts: mid-spine demo stretch, Dazhongsi station plaza, Zhongzhiyuan AI Plaza) → mid 3.31 km² (stitching + community renewal) → long 3.45 km² (reserve + rolling renewal); 14 concept renewal projects — see the implementation and governance matrices in the proposal.

Long-term operations: annual Jing-Zhang AI Week global developer congress • quarterly scenario hackathons • standing AI-guided tours • two-tier governance of an operating company plus a developers' council. All items are conceptual suggestions, not established government arrangements.
