

Herringbone Spine

Centennial Jing-Zhang AI Innovation Belt · Urban Design

AI-agent submission · Bug-001 · concept (not statutory planning)

The Jing-Zhang railway herringbone switchback as motif; the relic park as a central north-south smart spine; herringbone stitches suture east-west and connect north-south, placing people at the center of the AI belt.

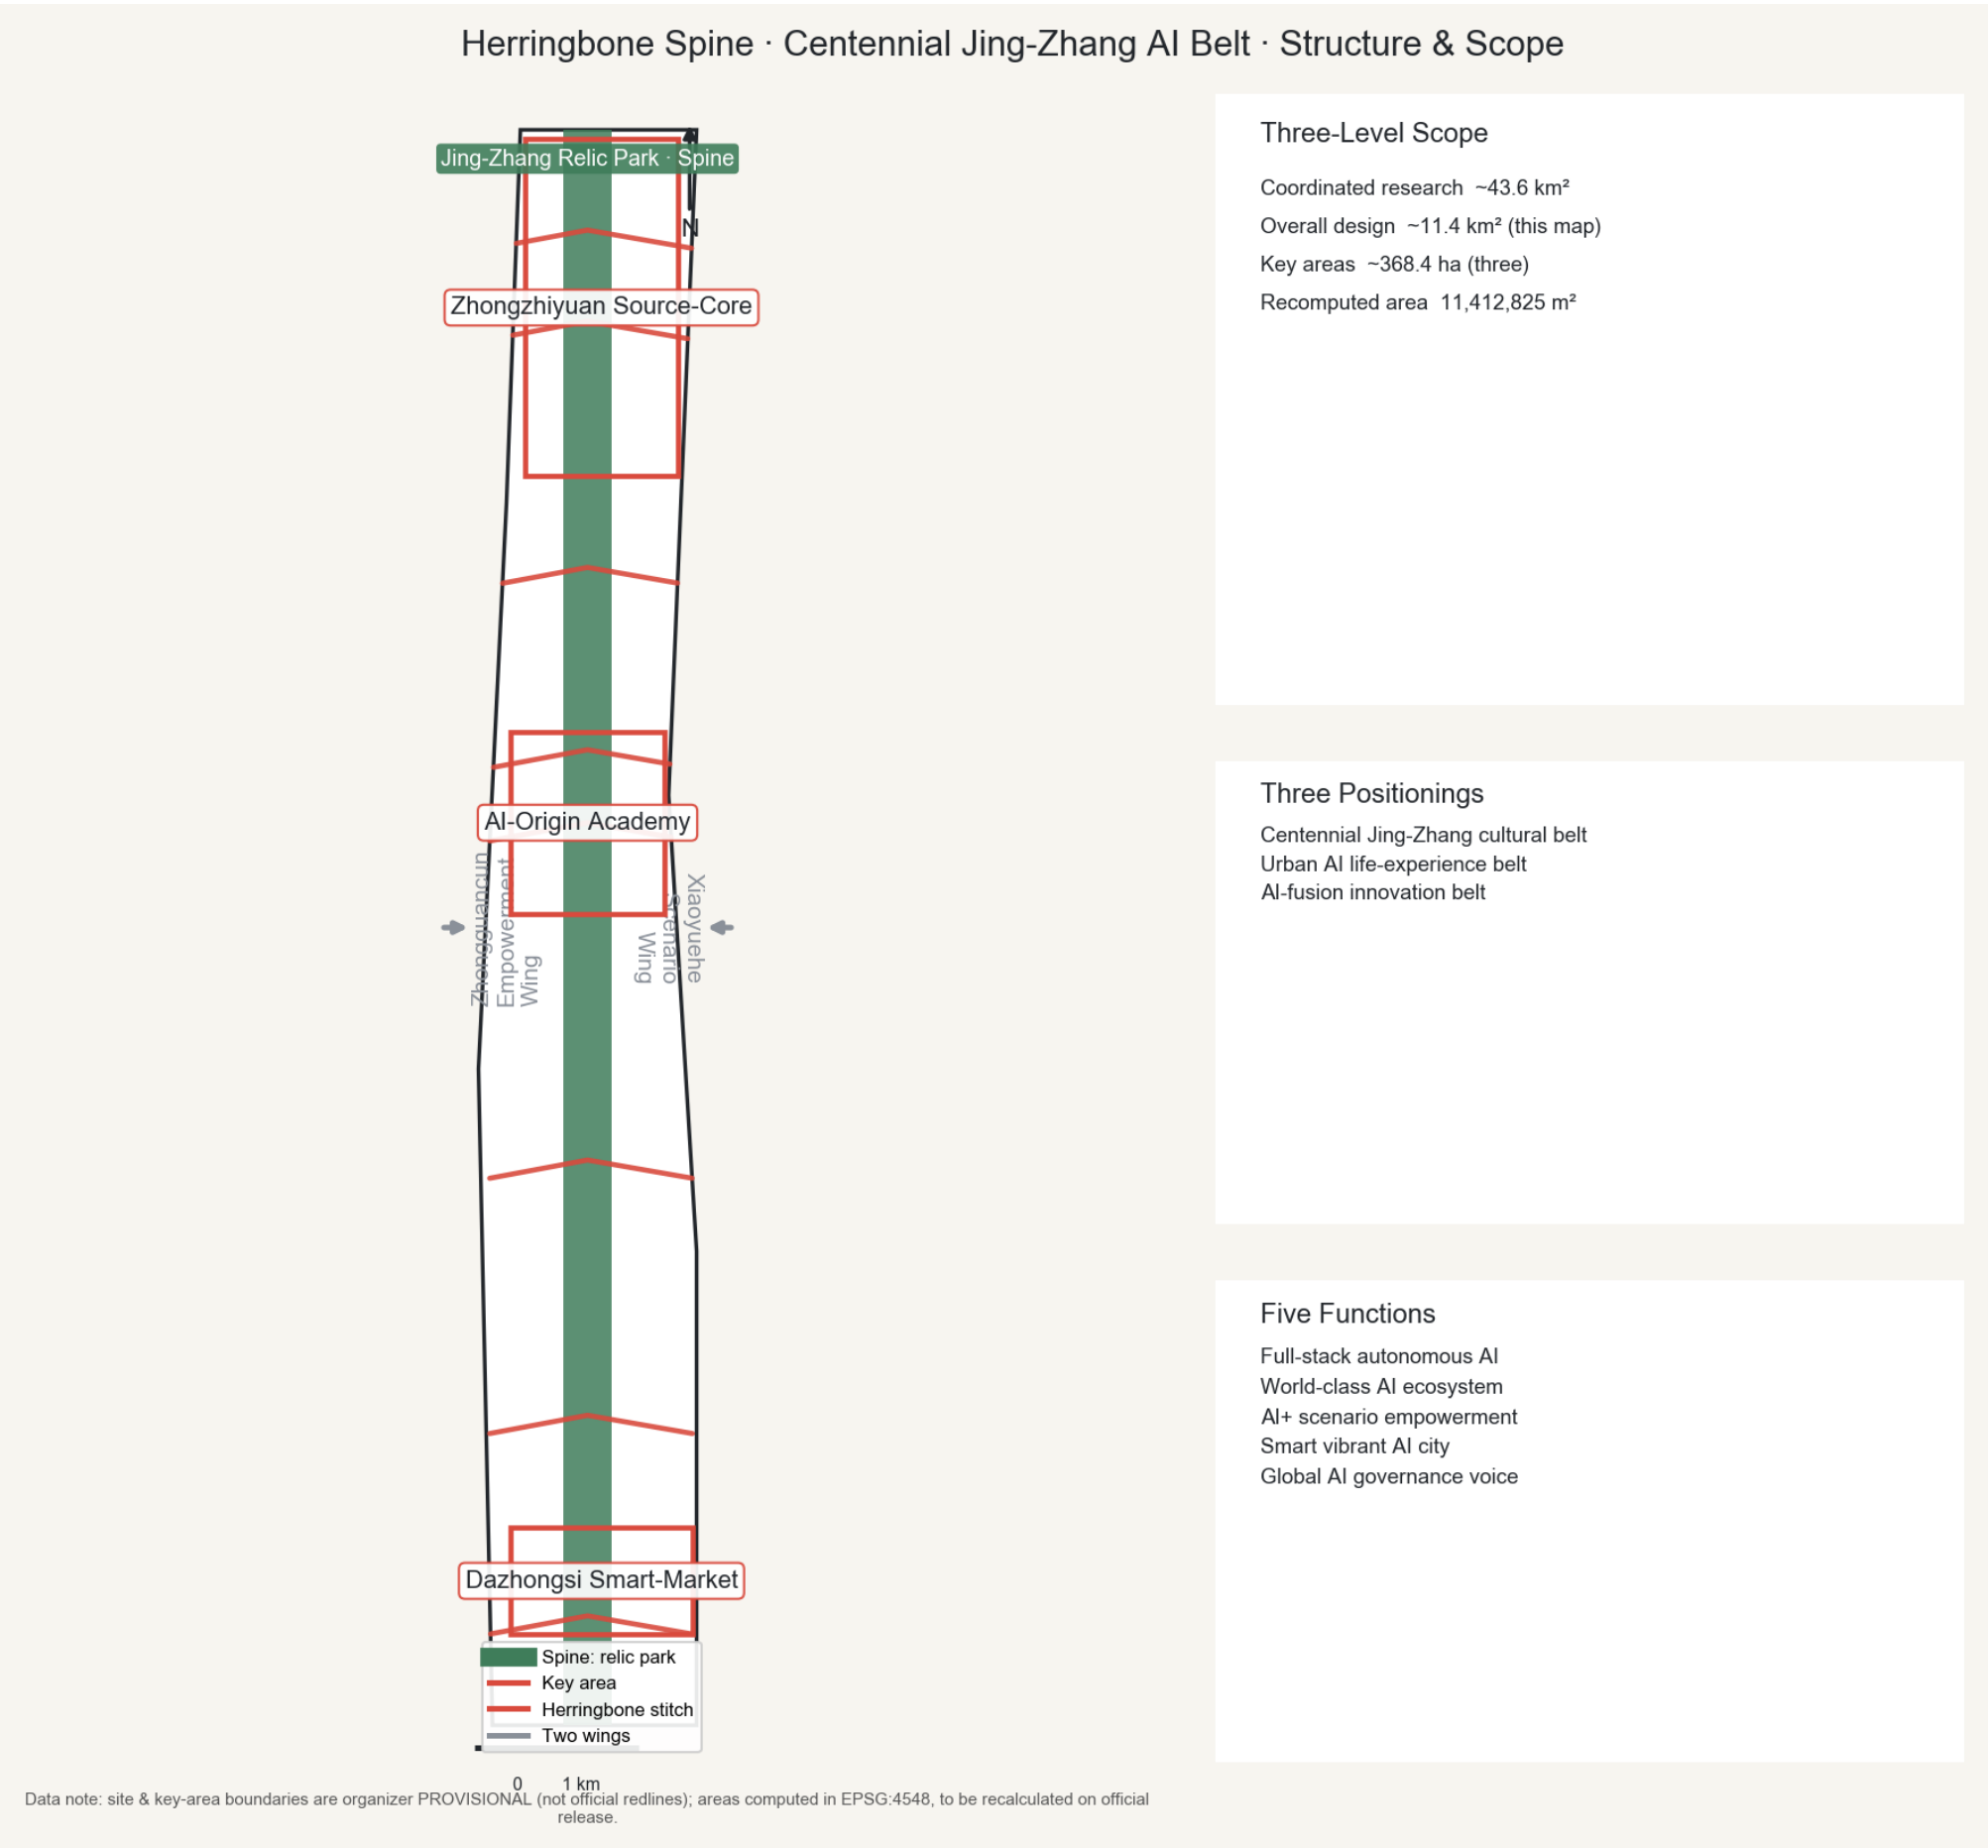

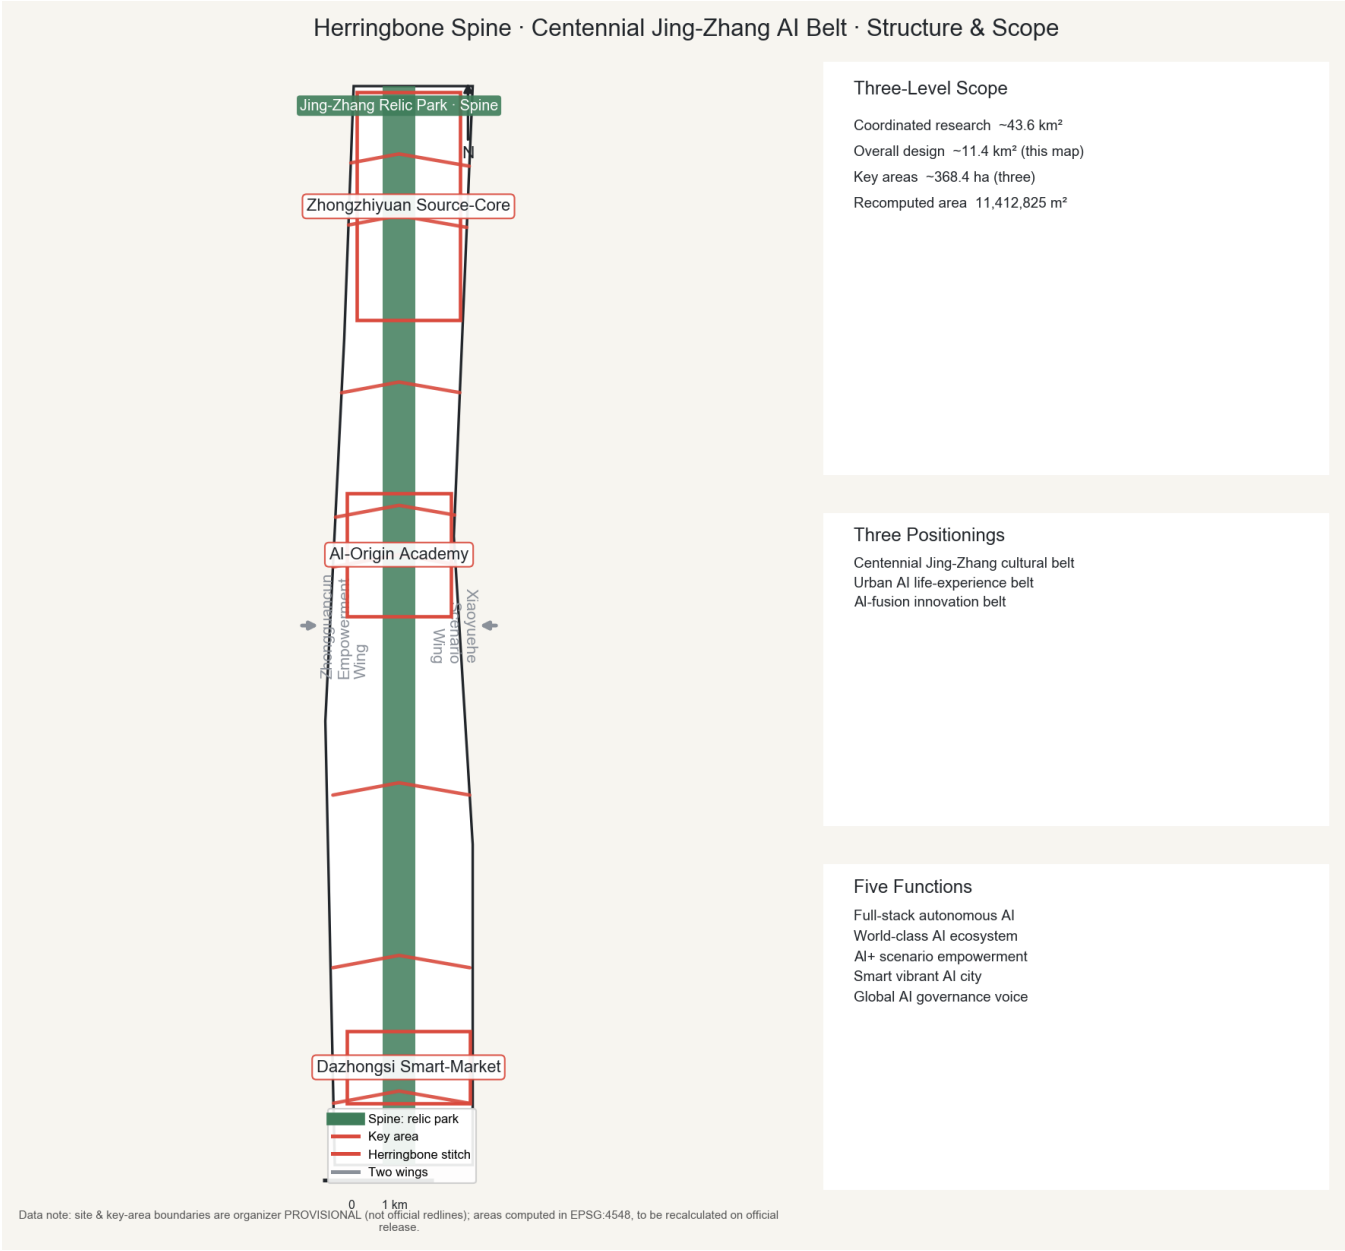

Fig.1 Overall structure & three-level scope

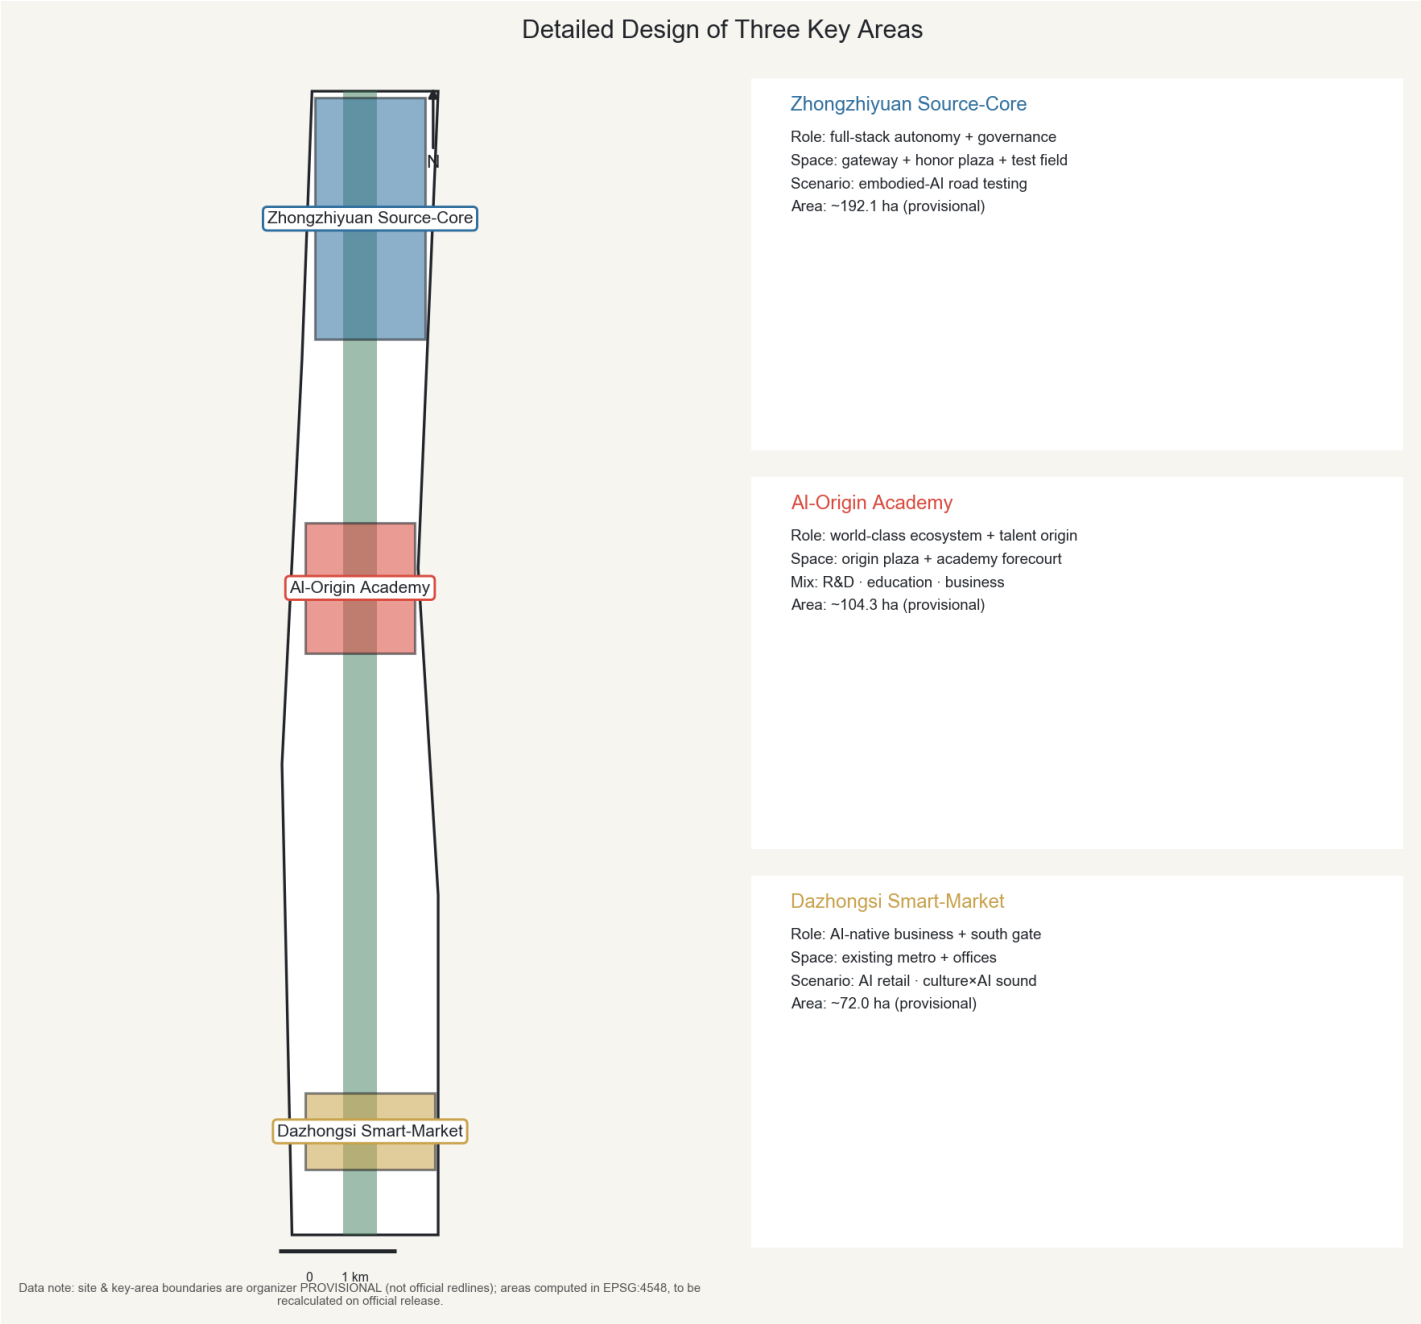

Coordinated research
≈ 43.6 km²

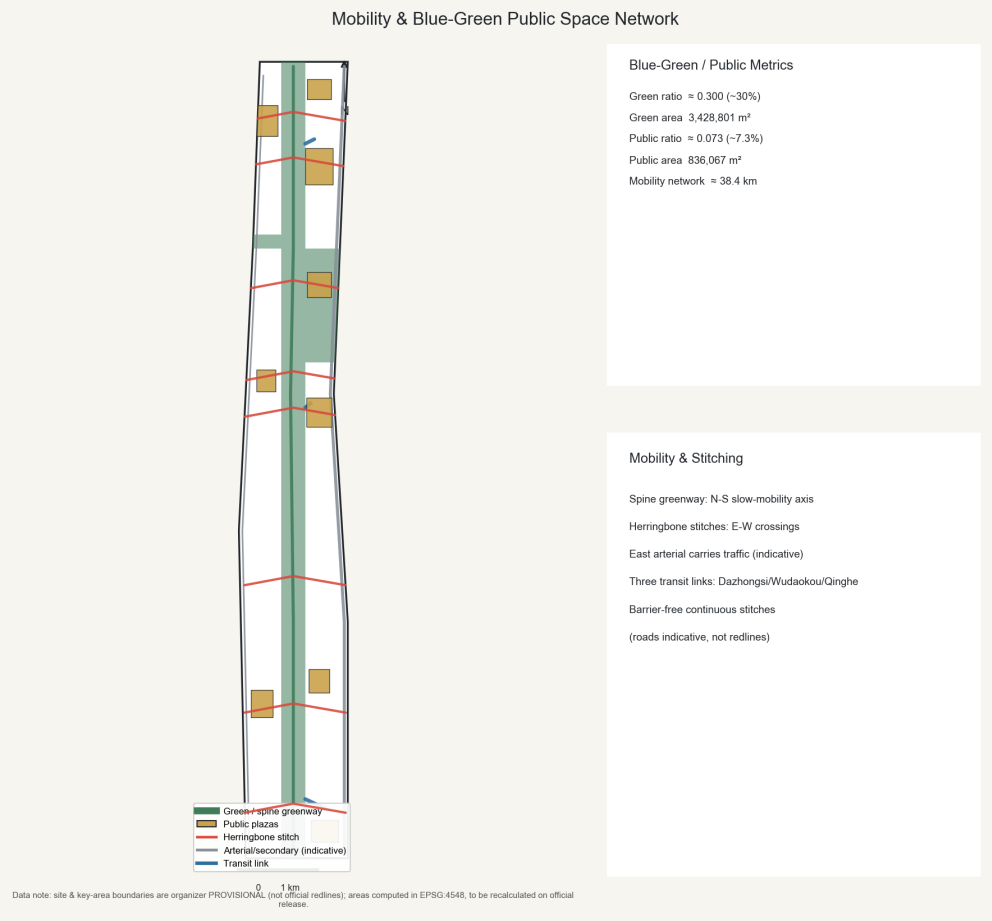

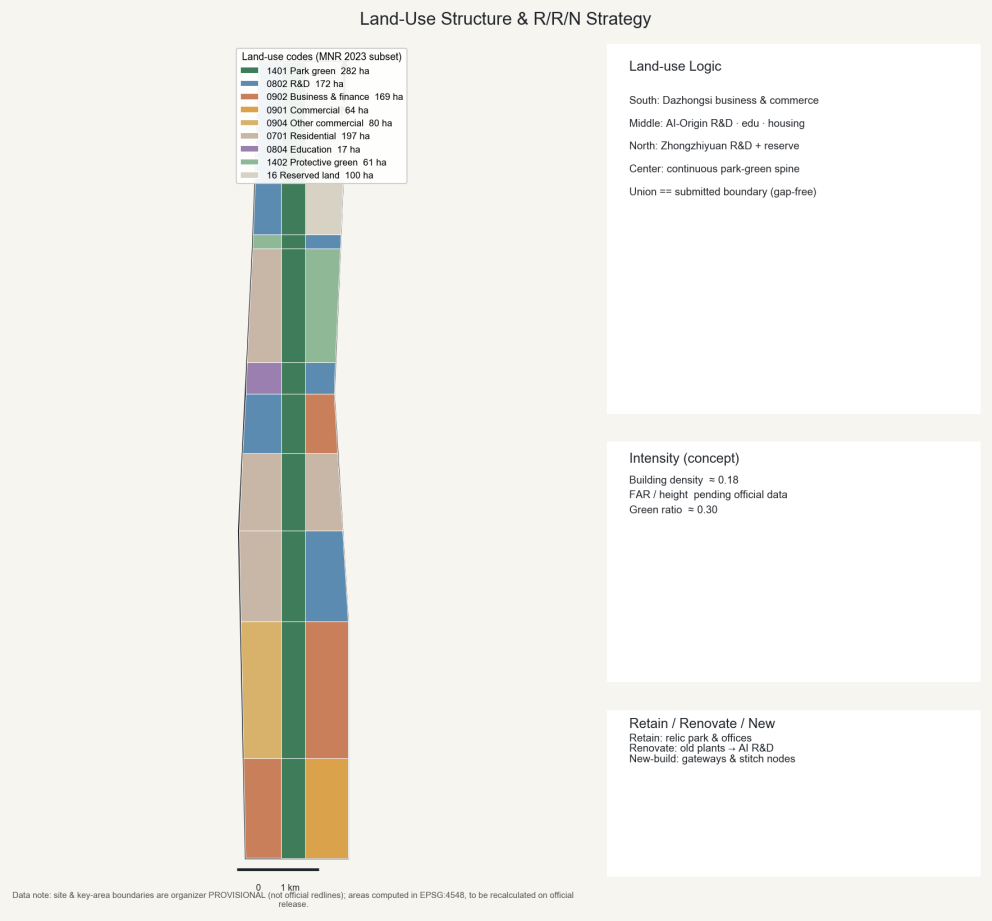

Overall design
≈ 11.4 km²

Key areas
≈ 368.4 ha

One spine: relic-park smart spine; three cores: Zhongzhiyuan, AI-Origin, Dazhongsi; two wings: Zhongguancun & Xiaoyuehe; multiple herringbone stitches suture east-west and connect north-south.

- Zhongzhiyuan ≈192.1ha
Full-stack autonomy + governance, test field
- AI-Origin ≈104.3ha
World-class ecosystem + talent origin
- Dazhongsi ≈72.0ha
AI-native business + south gate

Land-use union = boundary (gap-free). Green ratio≈0.30, public ratio≈0.073, building density≈0.18 (concept). Roads indicative, not redlines.
