

EXISTING NORTH-SOUTH BASE × SIX CROSS-CORRIDOR GATEWAYS

01 / PLANNING ALIGNMENT

THE PARK LINKS NORTH-SOUTH; WE ADD SIX CROSS-CORRIDOR GATEWAYS

AI MAIN STREET / v2.6

The existing park, centres and nodes form an enterable, pausable first-use network.

REACH IT

The heritage park and active green corridor are the existing public base.

ENTER IT

Six named gateways connect neighbourhoods, campuses, innovation parks, communities and transit.

PASS 3 GATES

Zhongzhiyuan asks safety; Origin asks understanding; Dazhongsi asks real use.

EXIT SAFELY

The Street Pass carries evidence and duty; ordinary space still works with AI off.

ALIGNMENT: publicised draft 'one belt, one axis, two centres, multiple nodes' × Haidian four-zone integration.

ONE REAL PROBLEM / THREE PUBLIC GATES / ONE EVIDENCE CHAIN

ONE PERSON / ONE SERVICE / ONE EVIDENCE PASS

ONE PERSON RAISES A REAL PROBLEM; ONE SERVICE PASSES THREE EVIDENCE GATES

Lin Lan (a composite persona) represents a passenger accompanying an older person; she raises a real arrival problem at Dazhongsi | The person stays at the real site to co-test and veto; the problem, service and evidence travel through the Street Pass. No passenger identity is uploaded, and the ordinary route must work first.

Each is a representative 100-m concept study window, not an official area boundary, road line, surveyed plan, engineering dimension, investment or delivery commitment. It requires official data, ownership, heritage, transport, fire, utility, operating-authority and professional review before development.

PLAN + SECTION + FOUR STATES

03 / THREE FIRST-USE YARDS

THREE 100-m STUDIES: DIFFERENT SPACES, CONNECTED DUTY

AI MAIN STREET / v2.6

PROVE

Zhongzhiyuan Garden Validation Yard

100 m CONCEPT SEQUENCE / NOT SURVEYED

AI OFF

A complete garden, observation porch and safety-information point.

TRANSLATE

AI Origin Translation Street House and Courtyard

100 m CONCEPT SEQUENCE / NOT SURVEYED

AI OFF

A shared information, reading, resting and community courtyard for residents and talent.

FIRST USE

Dazhongsi Relocatable Station-City First-use Interface

100 m CONCEPT SEQUENCE / NOT SURVEYED

AI OFF

An ordinary transfer route sustained by physical wayfinding, continuous movement, an accessible alternative, waiting and human information.

Each is a representative 100-m concept study window, not an official area boundary, road line, surveyed plan, engineering dimension, investment or delivery commitment. It requires official data, ownership, heritage, transport, fire, utility, operating-authority and professional review before development.

SP-01–08 / 0–6 / 6–18 / 18–36

06 / DELIVERY GATES

FIRST USE IS NOT ROLLOUT: EVIDENCE DECIDES REPLICATION OR EXIT

AI MAIN STREET / v2.6

FIRST VERIFIABLE MOVE | DAZHONGSI T0: SP-01 PASS + SP-04 STATION-CITY INTERFACE + SP-05 ACCESSIBLE JOURNEY | M-SCALE

Package		0–6 m reversible	6–18 m evidence-gated	18–36 m network review	Stop/accept gate
SP-01	S Street Pass and status board existing venue + mobile kit + one operating shift	Paper pass, human desk, shutdown drill	Shared status fields and appeal receipt	Cross-node version ledger	No launch without on-site staff, a non-AI route and a shutdown drill
SP-02	M Zhongzhiyuan Validation Yard bounded 100-m pocket + safety and maintenance review	Closed or physically bounded pocket	Controlled loop after safety evidence	Replication after independent review	Near-miss closure, takeover and restored exit
SP-03	S AI Origin Translation Window existing public ground floor + staffed explanation shift	Model cards and human explanation	Booked co-testing and need return	One-kilometre translation-loop nodes	Understandable, correctable and withdrawable
SP-04	M Dazhongsi Relocatable Station-City Interface multi-point route audit + mobile desk + joint review	T0 physical map, human desk and route version	T1 relocation to a reviewed temporary entrance	T2 connection to approved passages and public ground floors	Route changes invalidate it; human review, maintenance and restoration
SP-05	M Accessible Journey Chain continuous-route audit + human help + repair list	Physical-route audit and human help	Optional AI advice after gaps close	Extension to twelve nodes	Connected main route, response and no-app access
SP-06	L Twelve-node service kit multi-node replication + annual maintenance and spares	Dual-height, low-light and maintenance samples	Replication matched to maintenance capacity	Annual replacement and repair protocol	No route obstruction, switchable and maintained
SP-07	S Correctable Contribution Record open template + curatorial and rights review	Contribution template and first verification	Four landmarks linked	Globally correctable archive	Evidence, licence, version and correction access
SP-08	M Four-season public operation annual operator + four seasonal releases and public review	One problem call and one co-test	Complete four-season loop	Annual maintainers' review	Public archive, failure review and exit route

Time denotes a conceptual maturity sequence only; every cell still needs authority, professional review and public co-review.
