JingZhang AI Spine: the century-old rail corridor as a 9.5 km walking-cycling green spine linking three key areas; three east-west stitch links connect to the heritage park (west of the provisional boundary). Naming: Spine-Node-Quarter hierarchy; Logo concept: the 1909 switchback line x neural synapse, Jingzhang teal x Origin orange.

Rail as the skeleton (7 existing stations inside: Xizhimen/Beijing North/Jimenqiao/Xitucheng/Xueyuanqiao/Liudaokou/Xuezhizhuan), walking-cycling as the veins; one spine, two rivers, many parks: ~66.8 ha linear park + Xiaoyue/Qing River waterfront + existing parks; green ratio 14.2%; Nine Spine Nodes (~23.6 ha concept public spaces); three AI pilgrimage landmarks: Origin Bell Tower / Zhiyuan Loop / Jingzhang Memory Prelude.

# Key-Area Detailed Design & AI Scenarios

## Three Key Areas: Detailed Design Index (provisional boundary, concept massing)

Base map © OpenStreetMap contributors (ODbL 1.0) | Boundary & key areas are PROVISIONAL constraints, not official redlines | Areas recomputed in EPSG:4548

10 scenario cards incl. 3 industry testbeds (low-speed robot delivery / building-energy sandbox / station passenger-flow simulation);  
5 personas: researchers, founders, students & scholars, local residents, international visitors;  
annual events: JingZhang AI Open Week (flagship) + developer hackathon + heritage park night season + university open-source day;  
operation: scenario pool + test alliance, space-for-contribution. All are concept suggestions, not confirmed government arrangements.

## Mobility, Walking-Cycling & Blue-Green Network

Base map © OpenStreetMap contributors (ODbL 1.0) | Boundary & key areas are PROVISIONAL constraints, not official redlines | Areas recomputed in EPSG:4548

Boundary: provisional rough polygons; all layers and metrics must be recomputed once official polygons arrive;  
intensity: FAR/height/density controls pending — no statutory conclusions given;  
existing stock: building inventory and ownership missing; DRR is a classification logic only;  
base map: OSM crowd-sourced data (ODbL 1.0 attribution), not a statutory basis;  
compliance: all spatial proposals are concept suggestions; no RDP adjustment, engineering feasibility, or investment commitment.
