

AI Origin Community: World-Class AI Innovation Ecosystem Neighbourhood in Beijing (Concept)

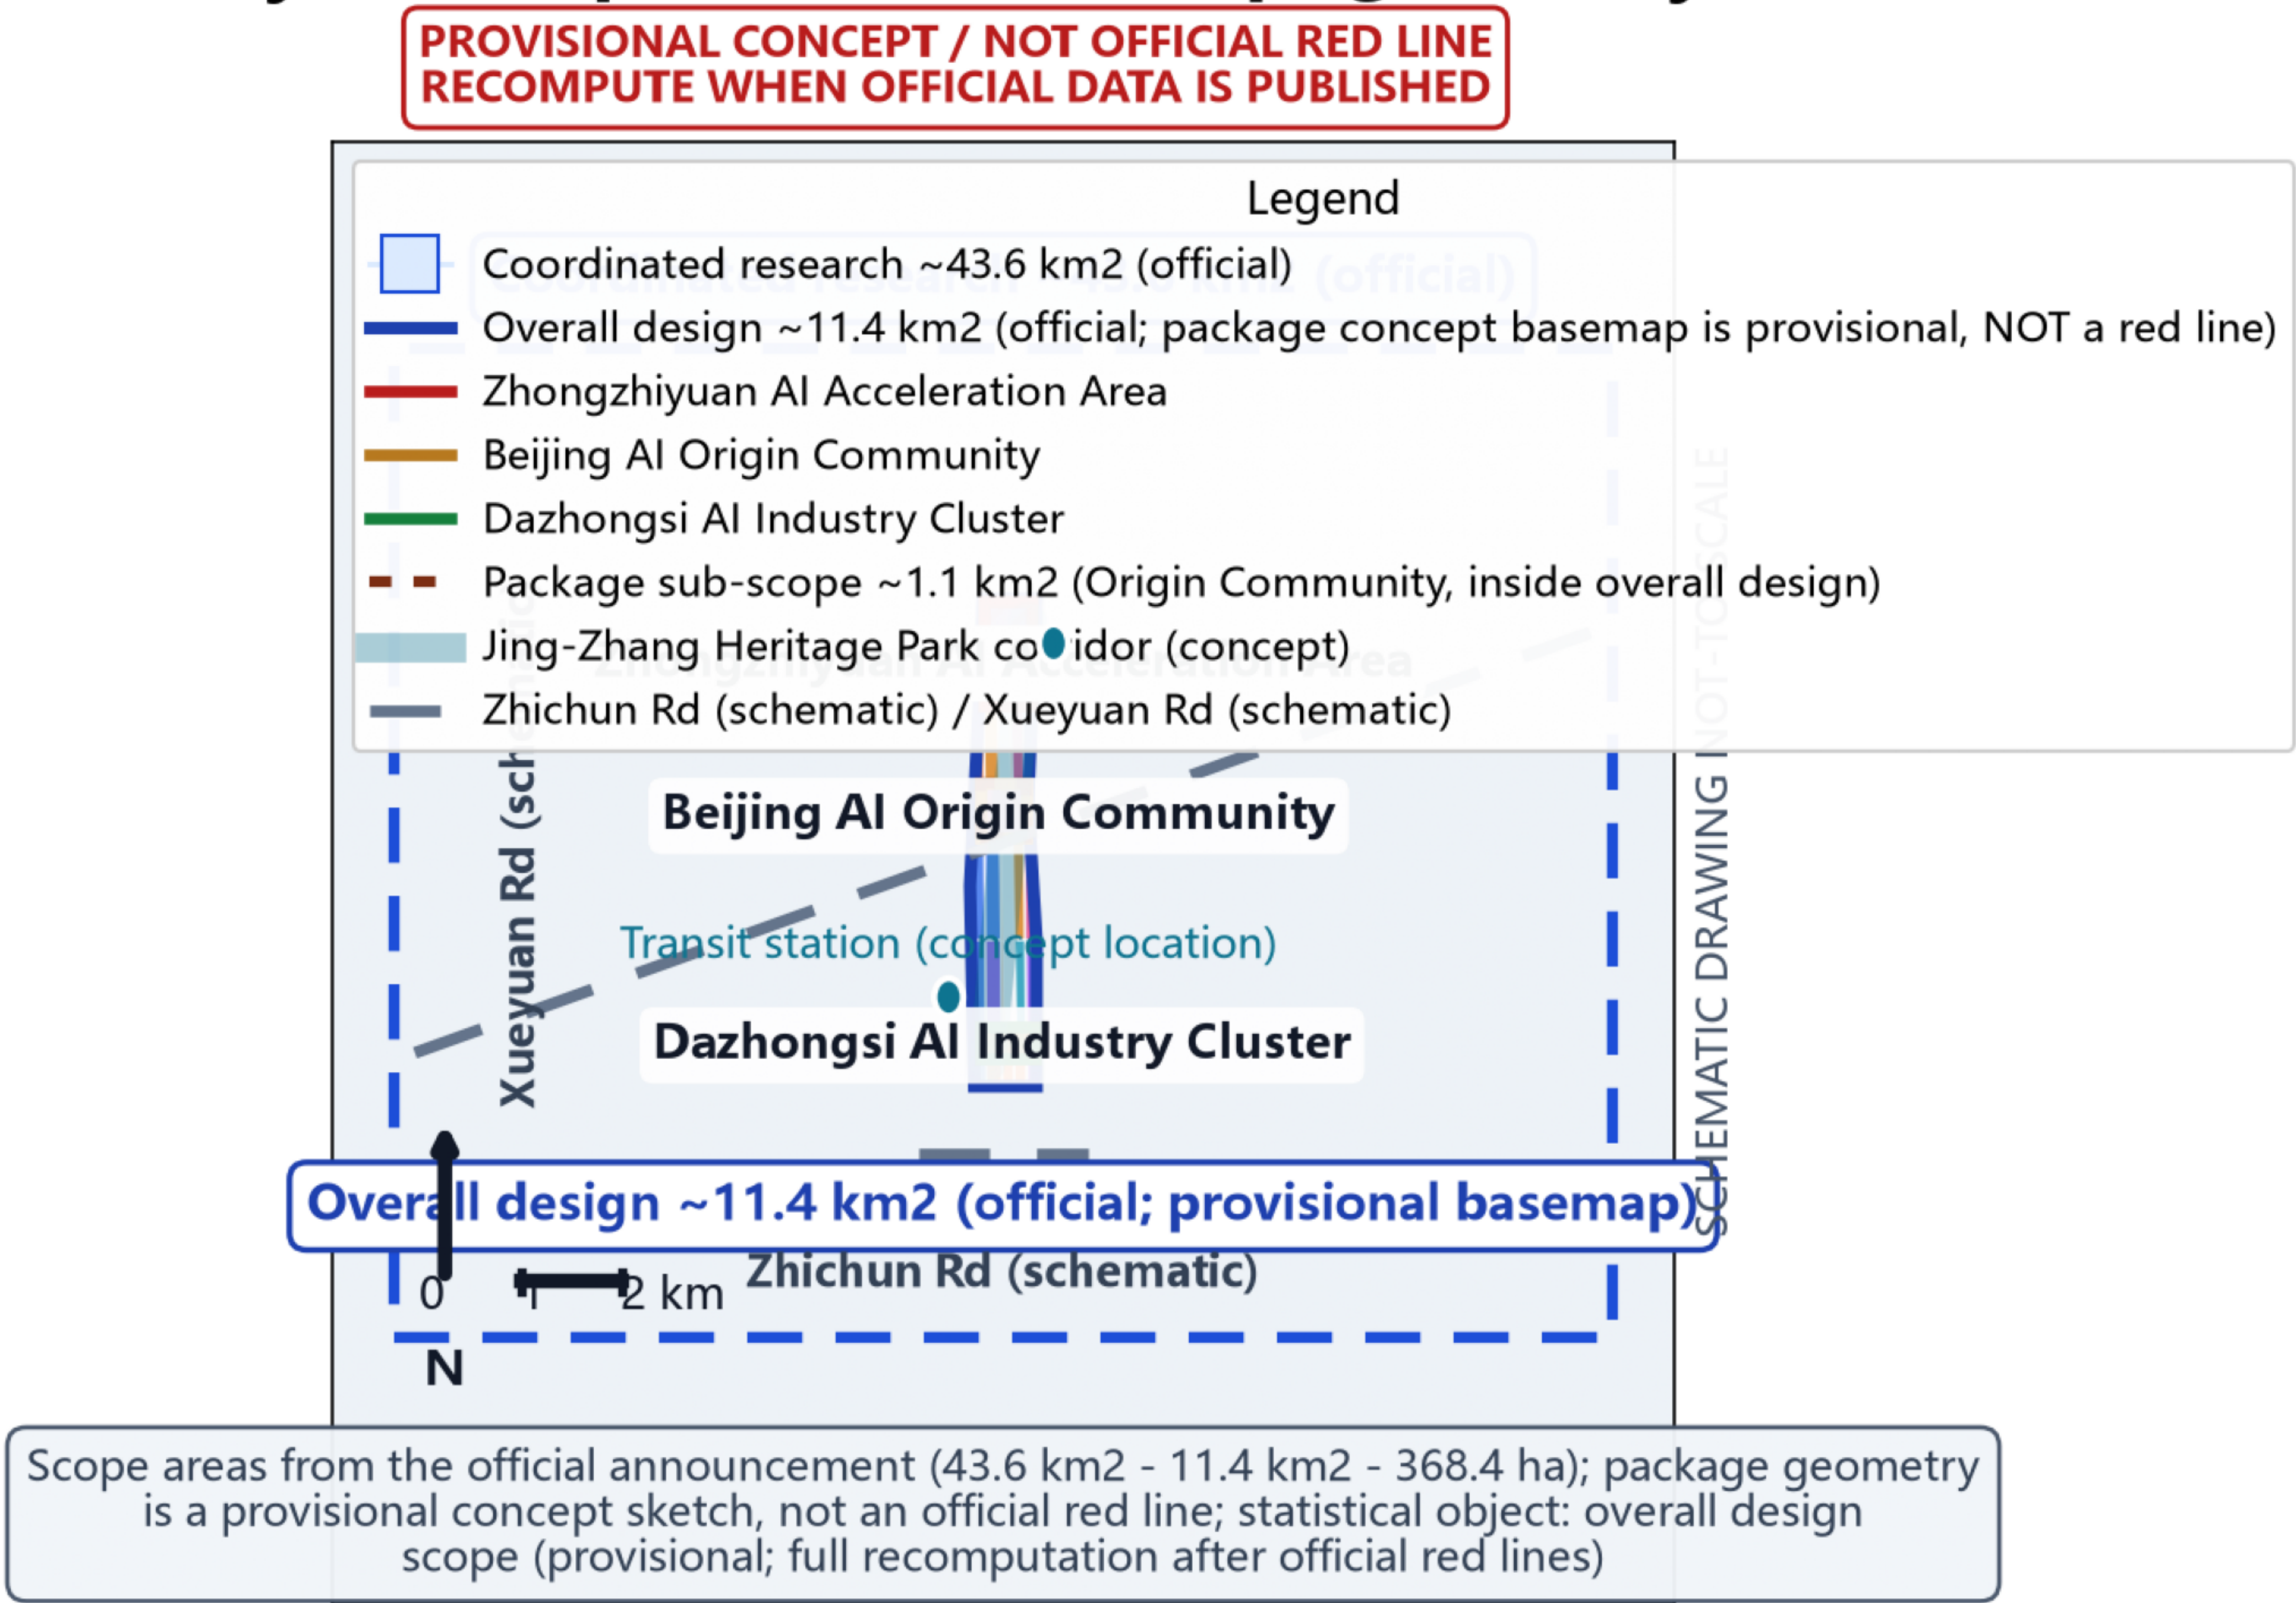

Centennial Jing-Zhang AI Innovation Belt - concept board (participant JohnXu22786 / agent-oc-haidian)

Three-level scopes (official announcement; all provisional concept sketches, not official red lines)

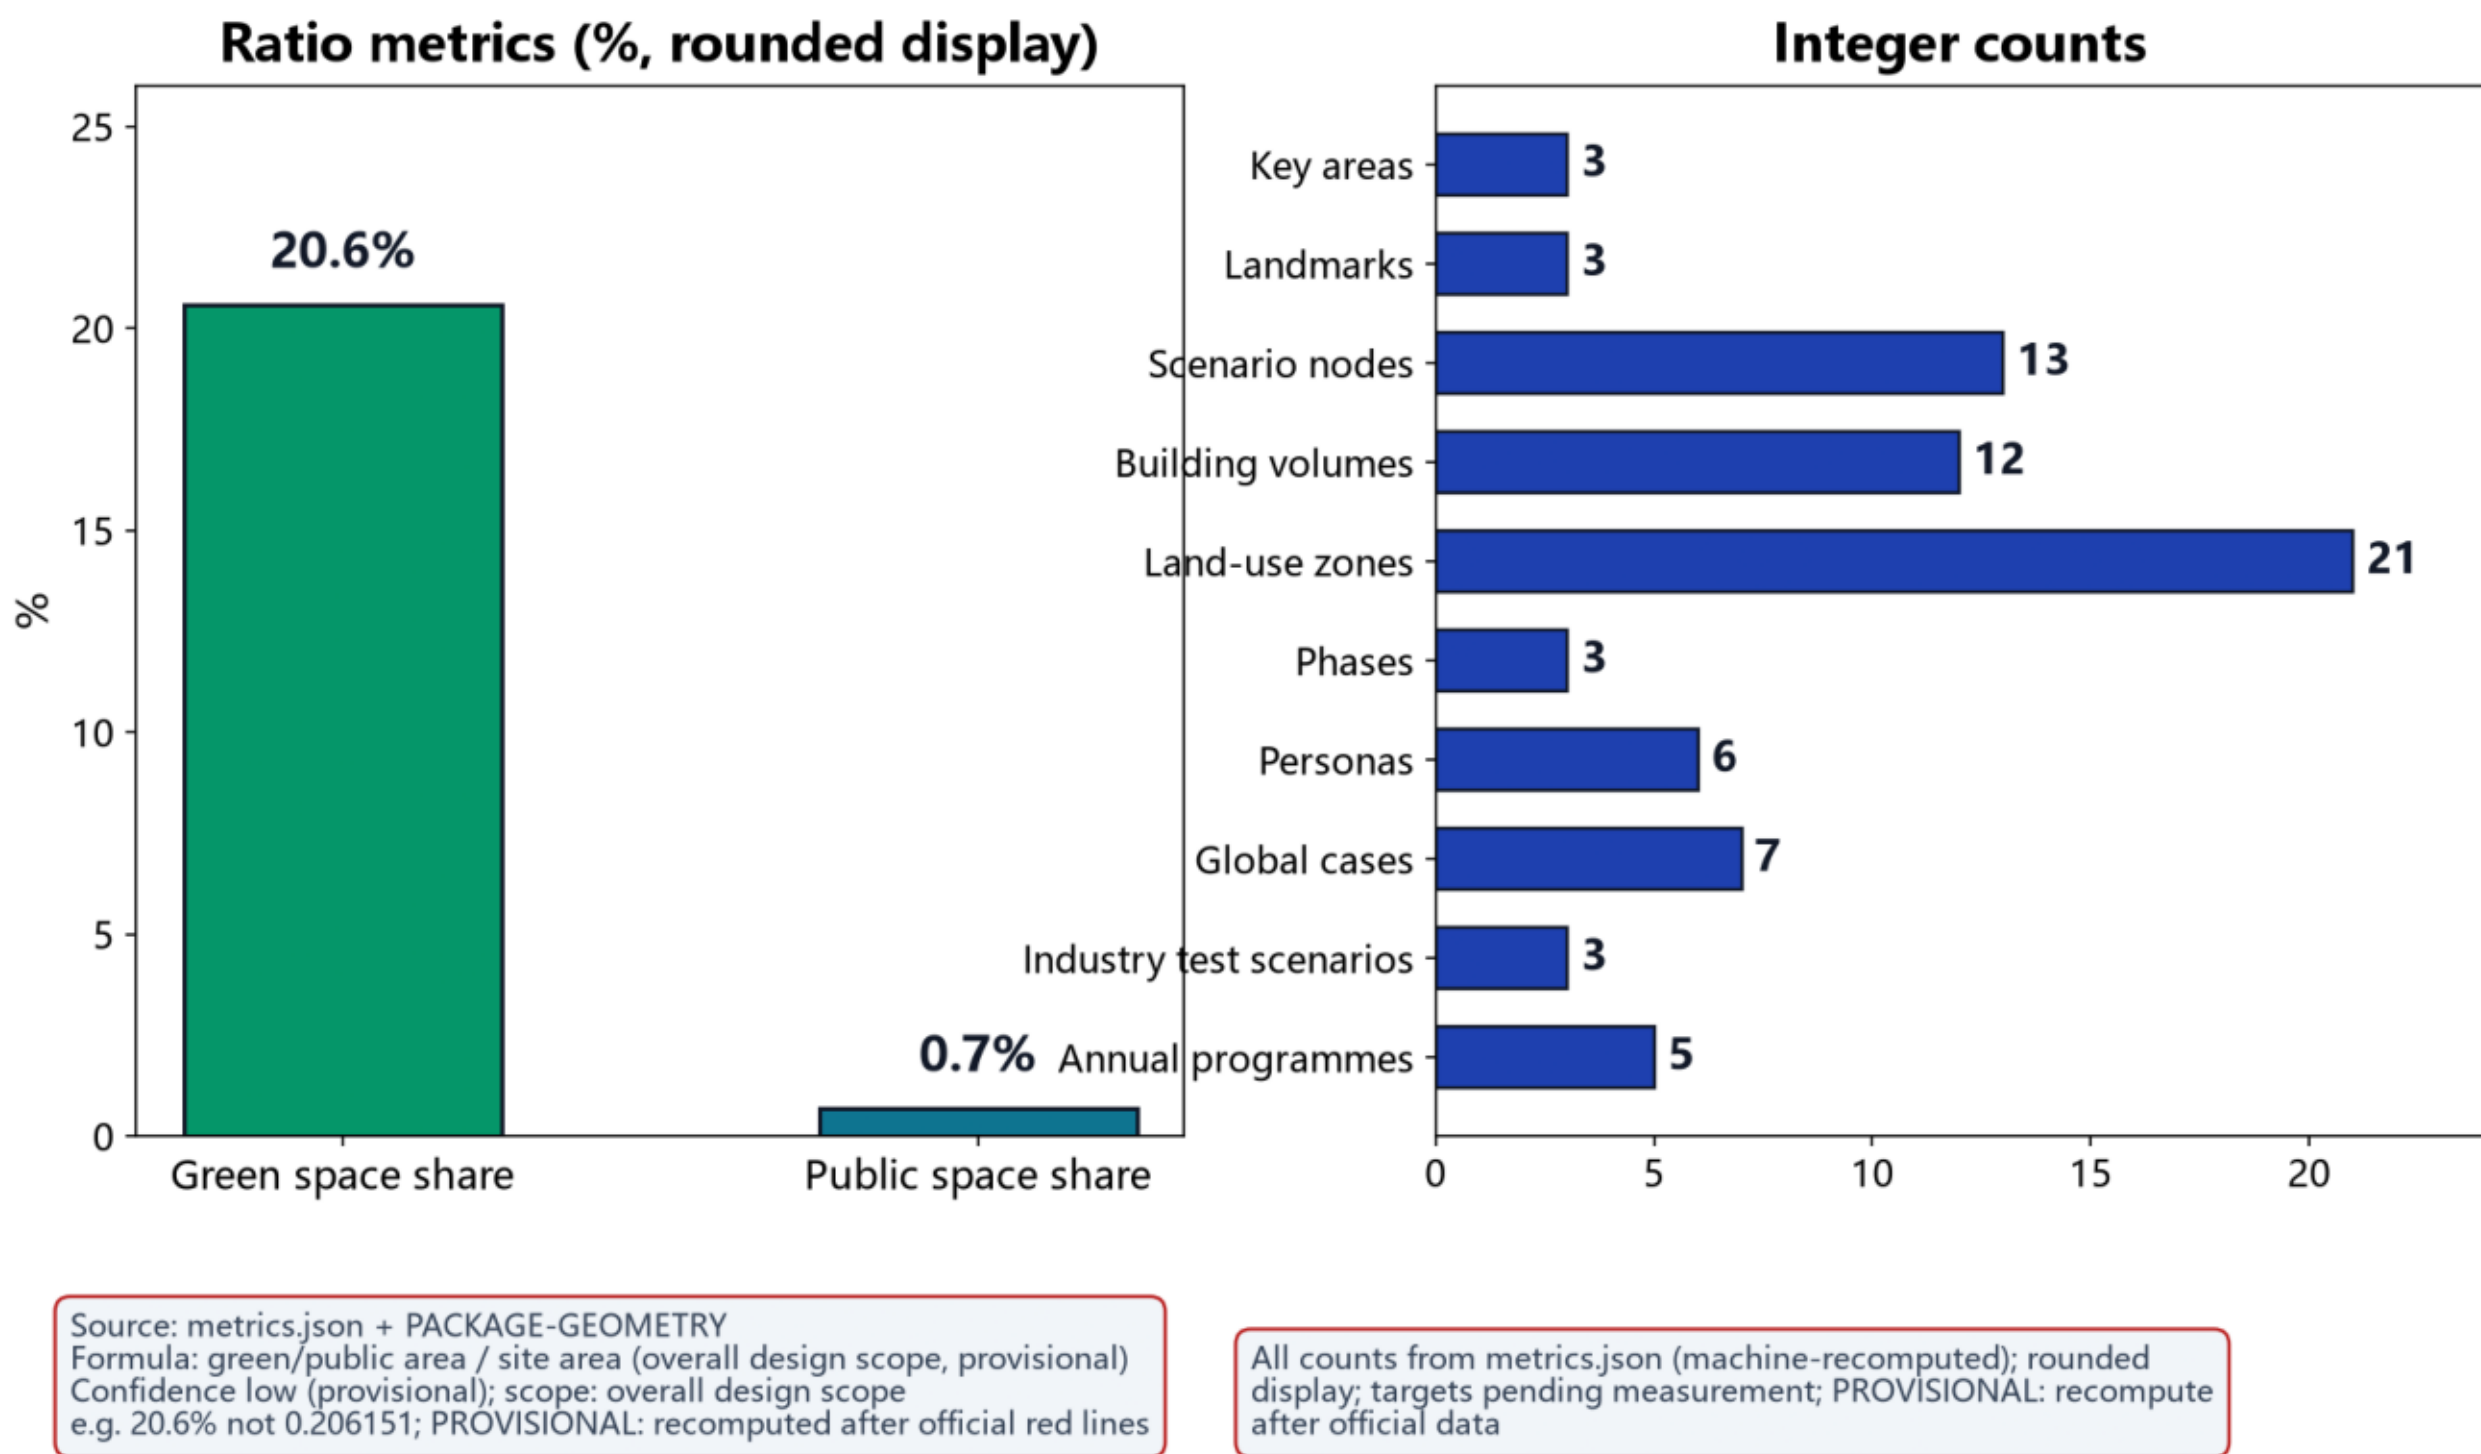

Coordinated research ~43.6 km2 (regional layer) > Overall design ~11.4 km2 (package concept basemap, provisional) > Key areas ~368.4 ha (three sites);

package sub-scope ~1.1 km2 (Origin Community neighbourhood, inside overall design); full recalculation after official red lines / regulatory plans /

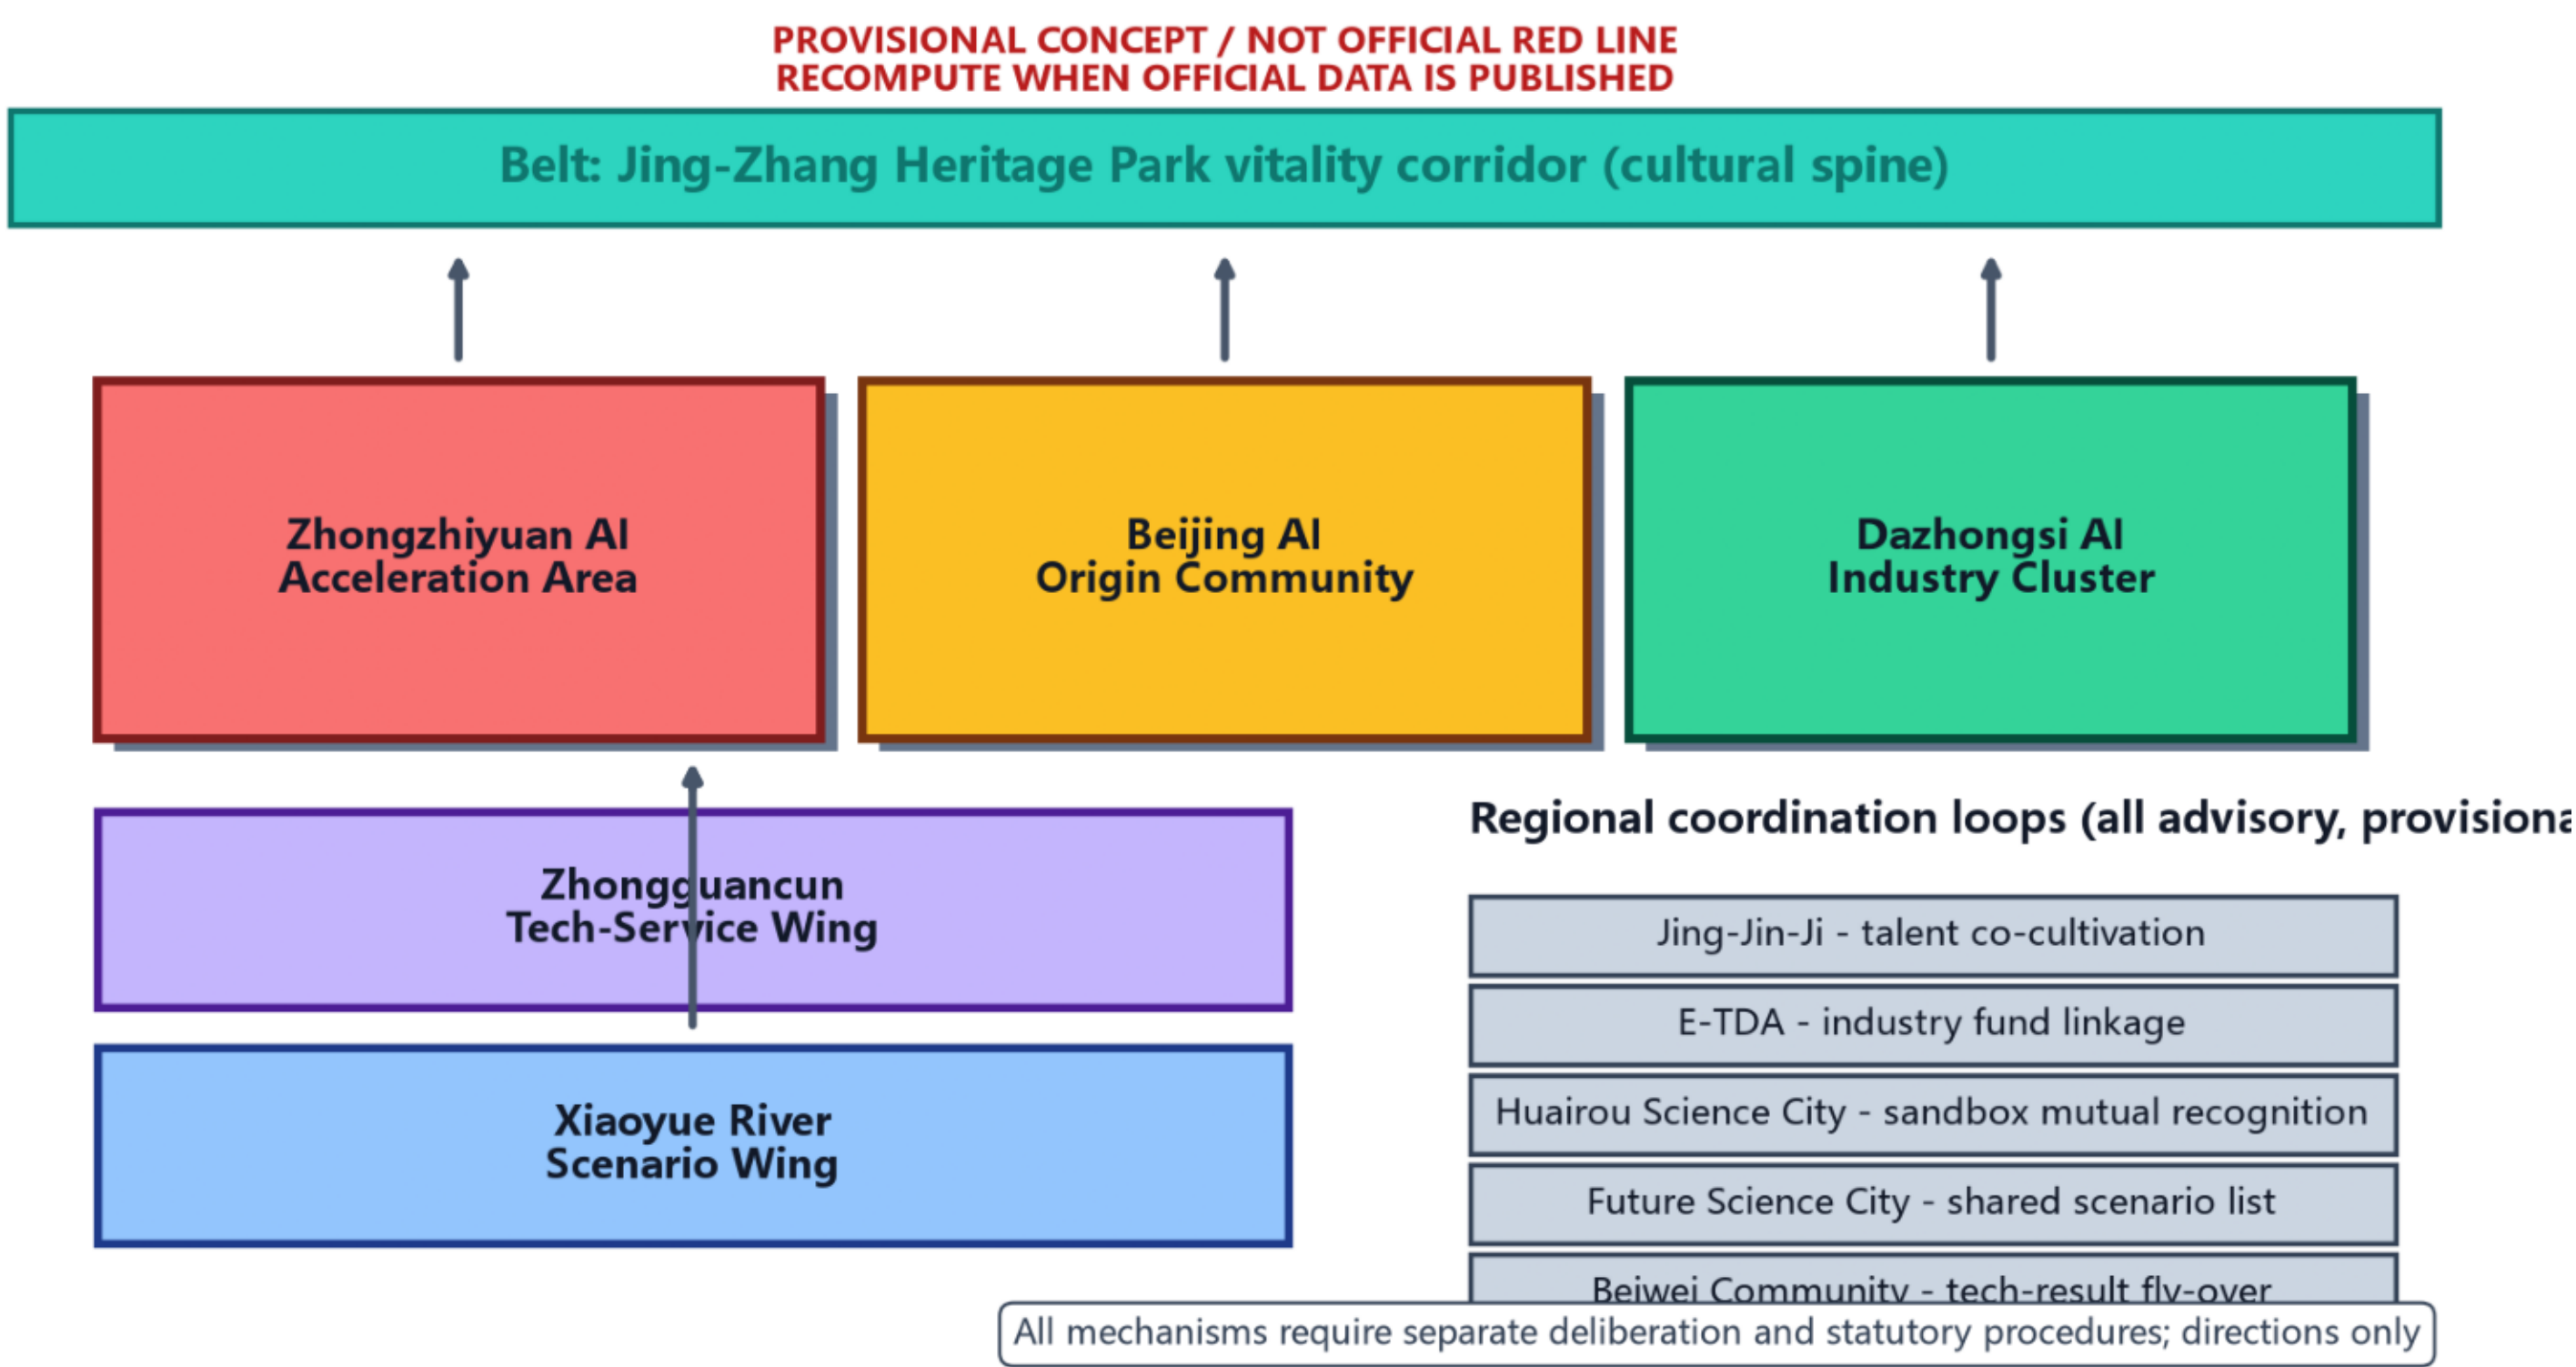

Overall Design Overview: Three-Level Scopes & Key Areas (provisional concept geometry)

Core Metric Evidence: Ratios and Counts (concept / pending recalculation)

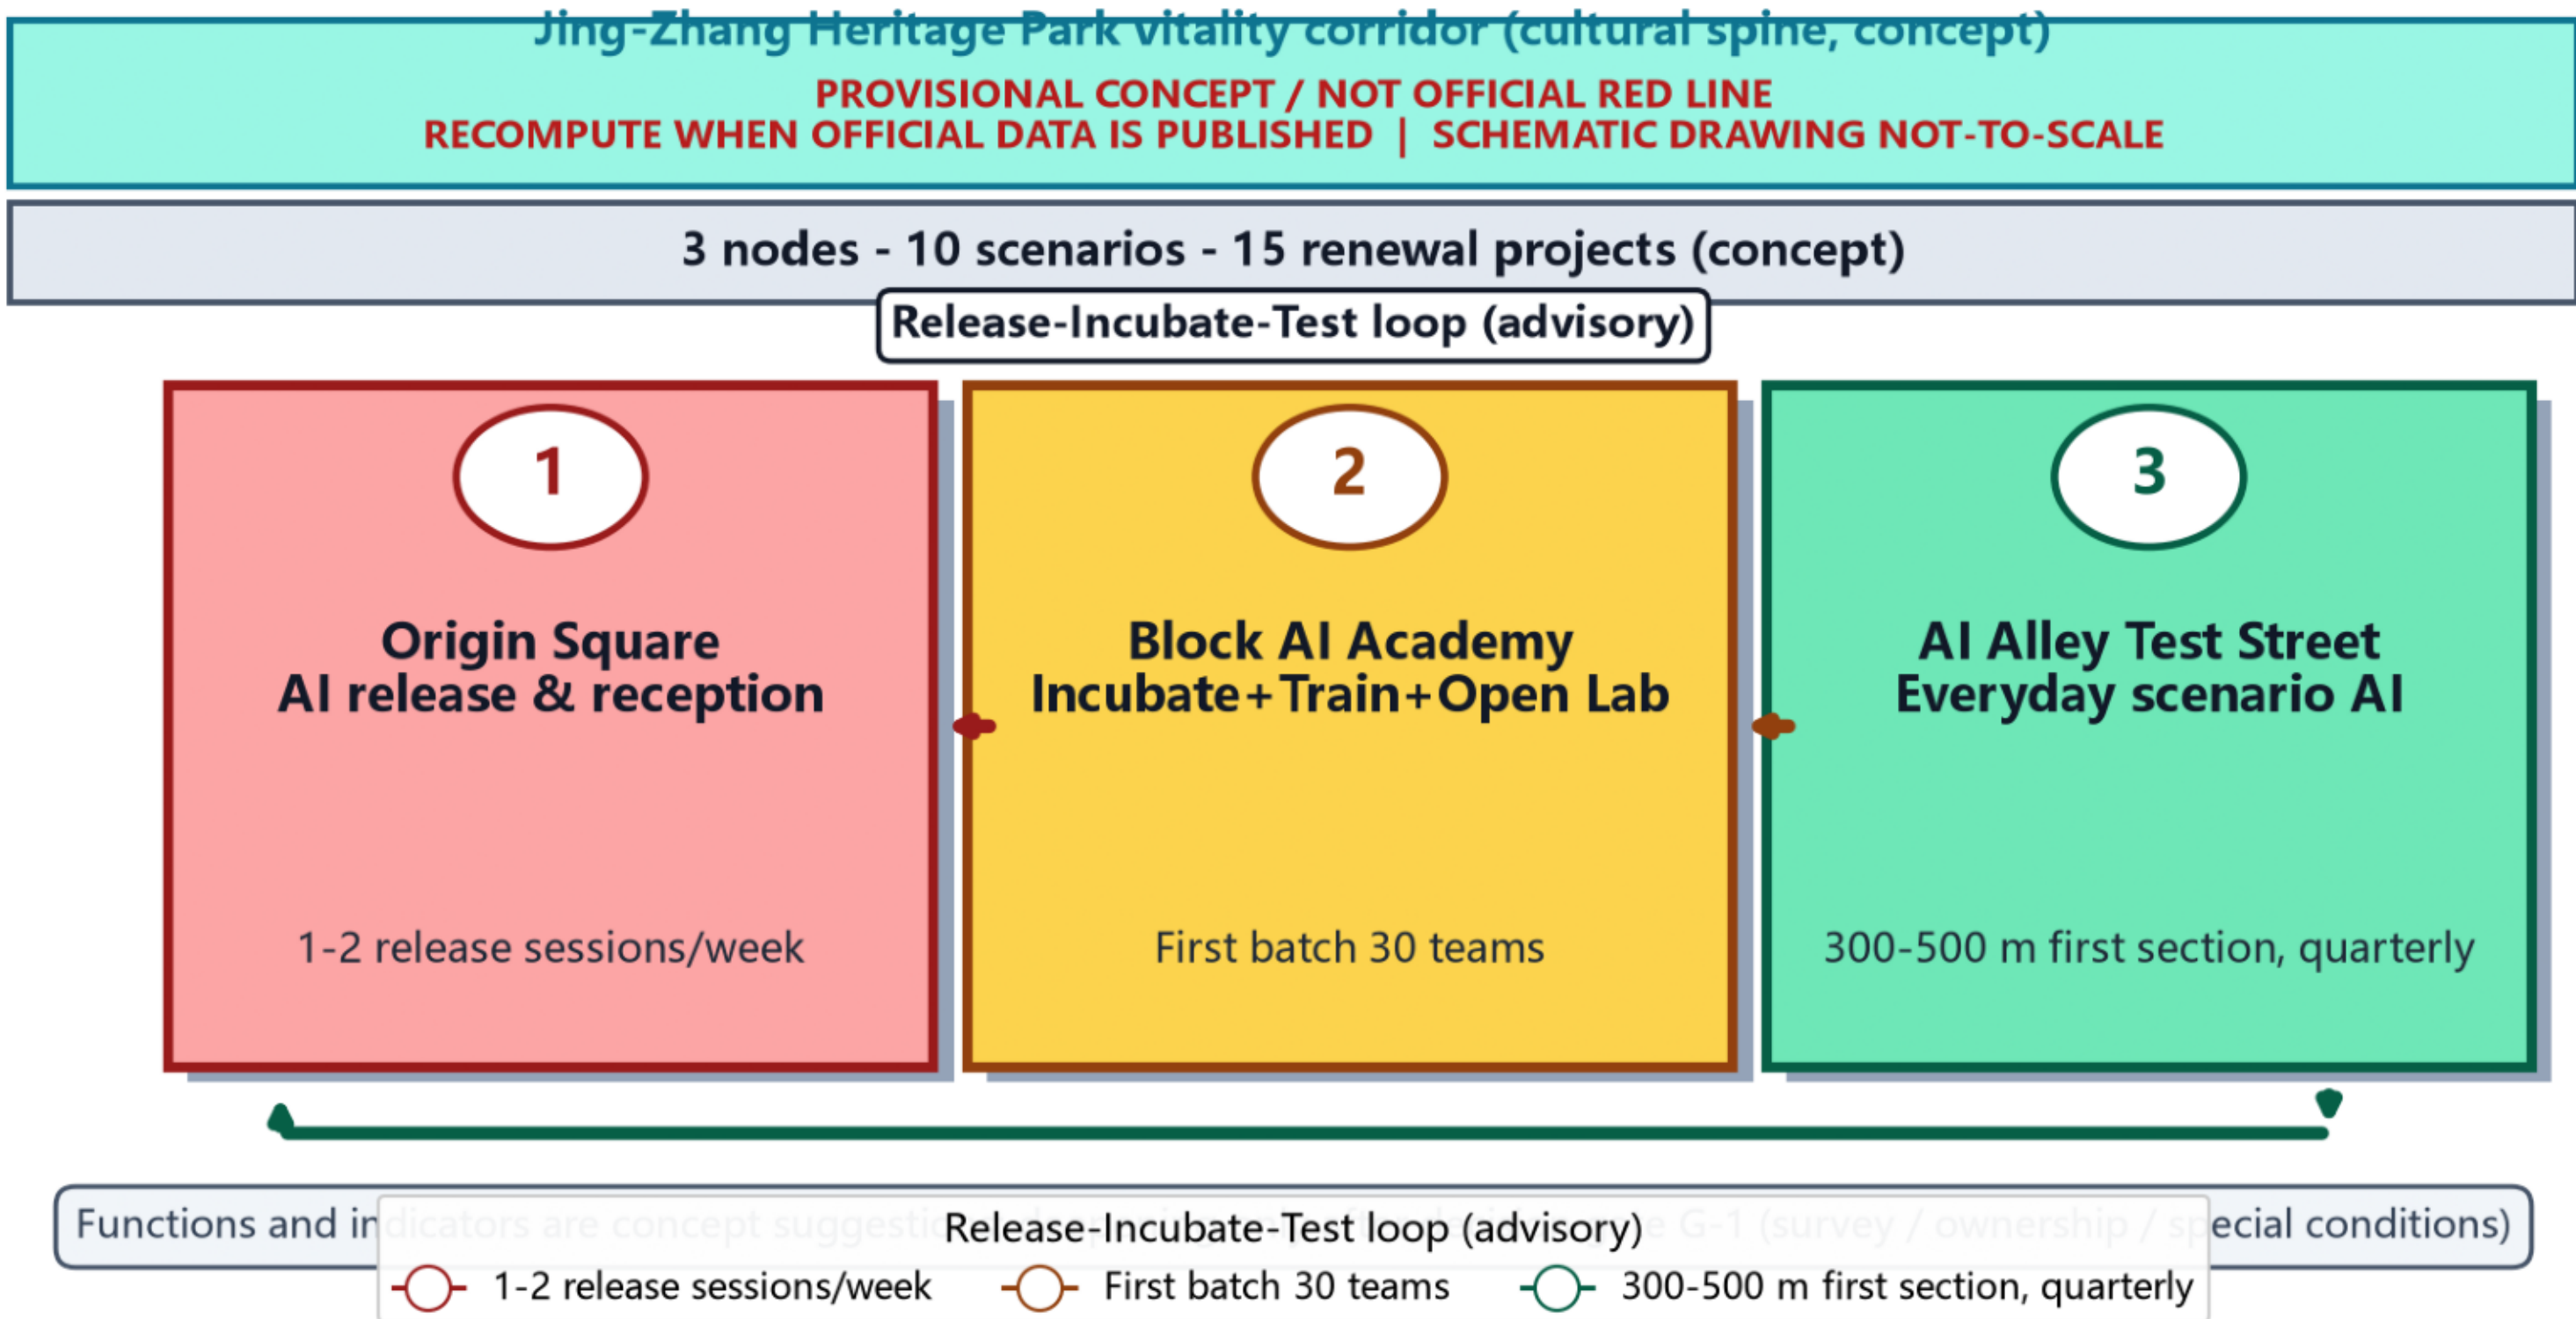

Three Zones, Two Wings & Regional Coordination Loops (advisory concept)

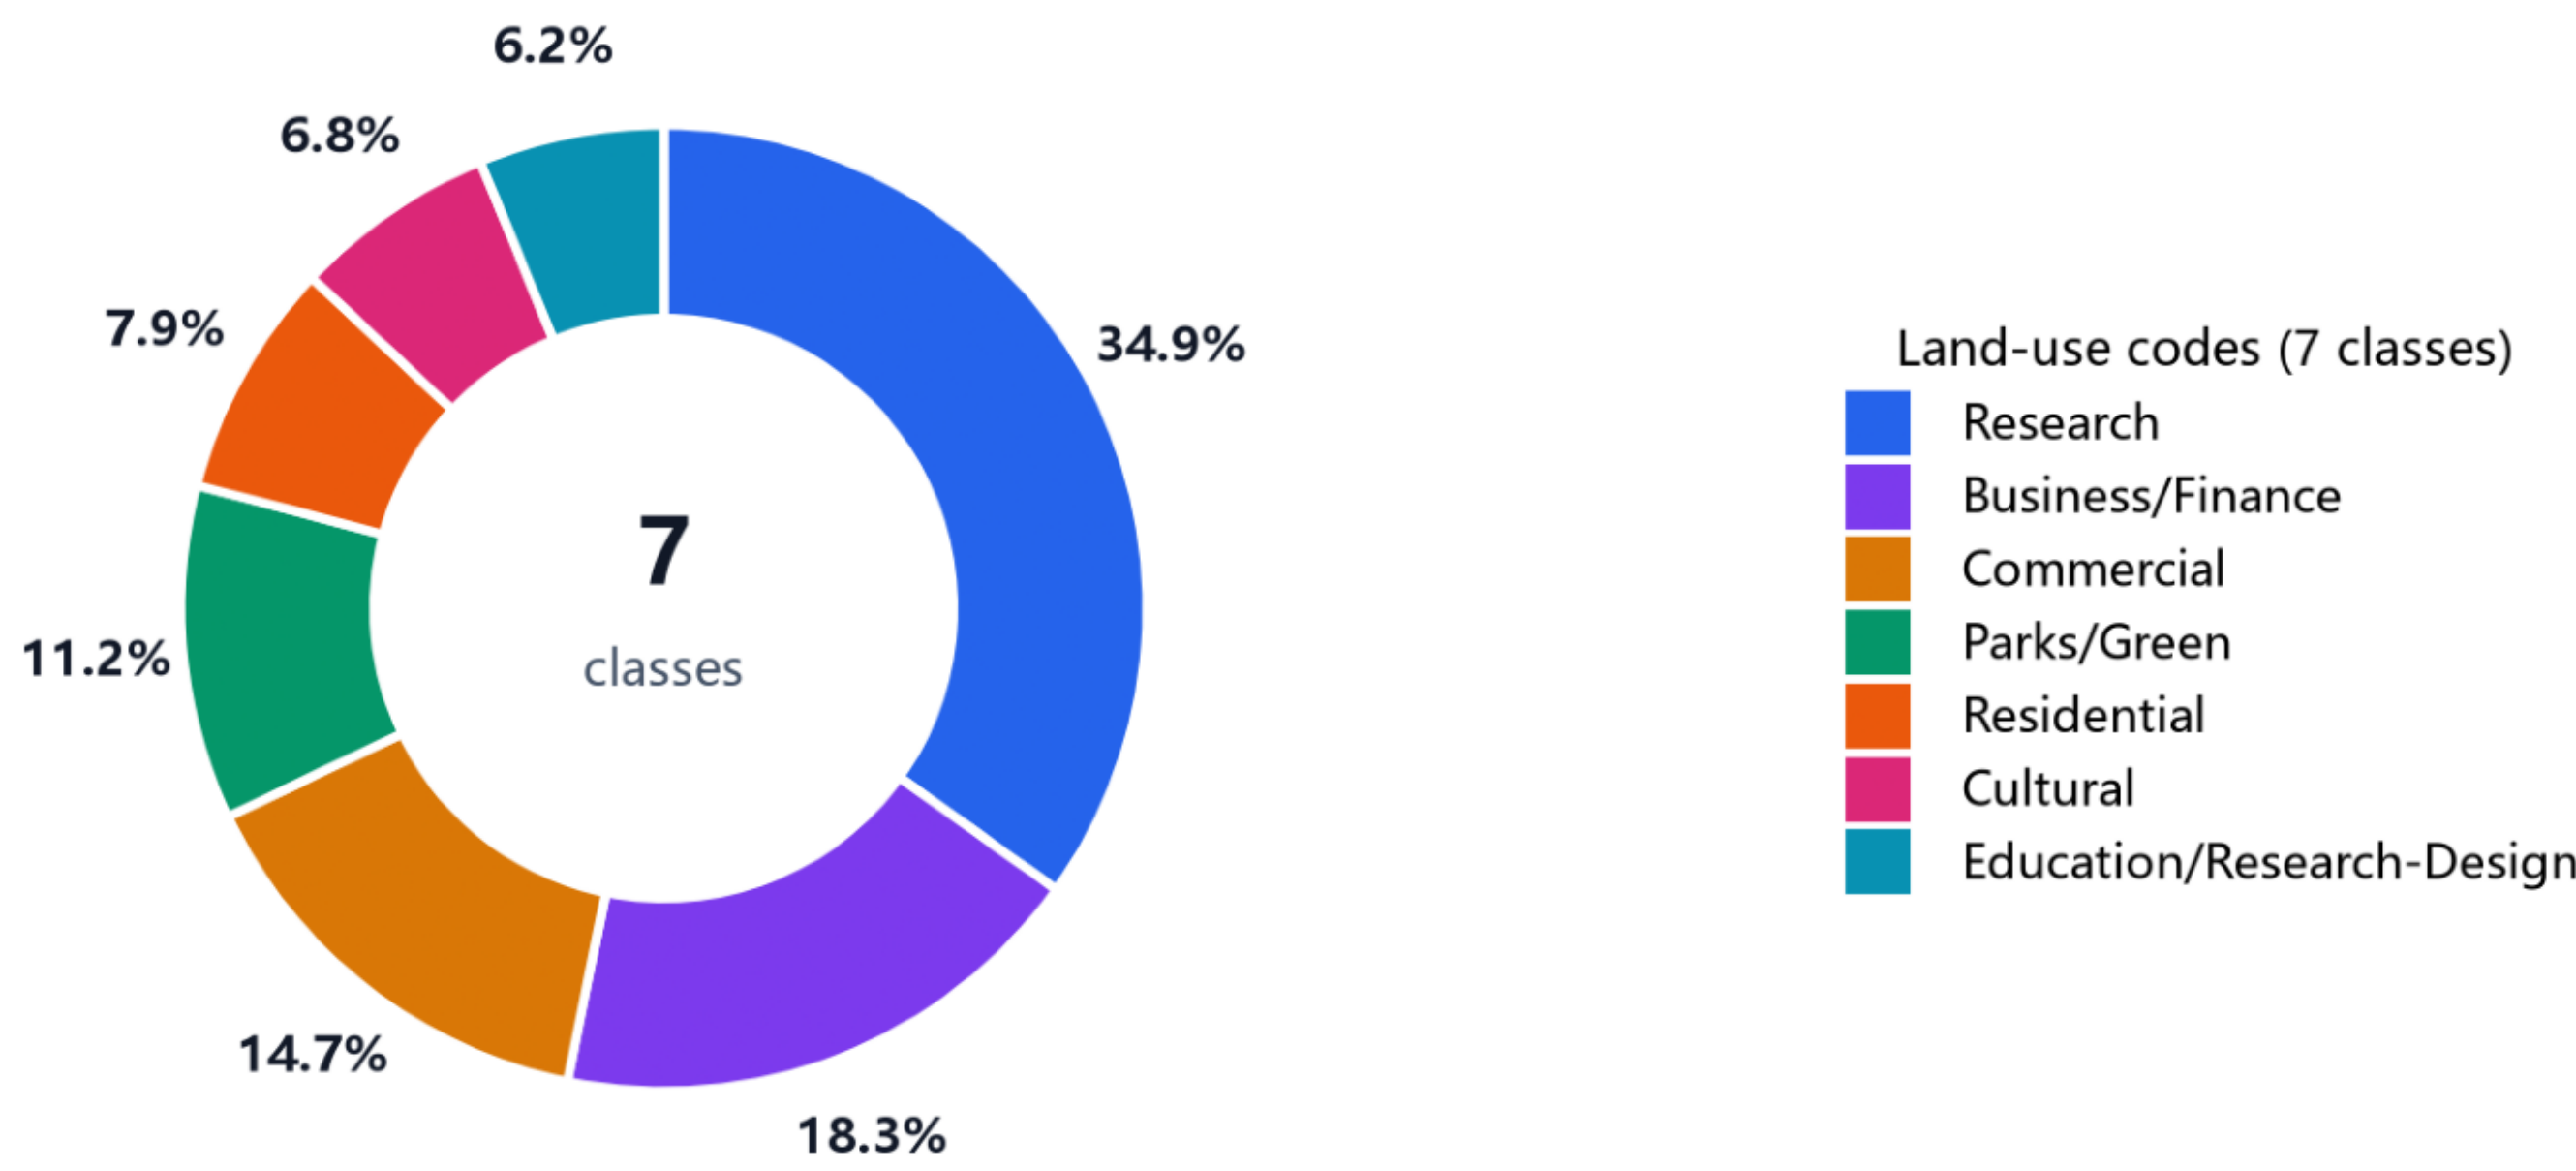

AI Origin Community: World-Class AI Innovation Ecosystem Neighbourhood in Beijing (Concept)

Centennial Jing-Zhang AI Innovation Belt - concept board (participant JohnXu22786 / agent-oc-haidian)

Key Areas: Three Nodes and the Release-Incubate-Test Loop (concept)

Land-Use Structure (concept shares, machine-recomputed)

Statistical object: overall design scope (provisional concept geometry, machine-recomputed from geometry/site_boundary.geojson)

PROVISIONAL CONCEPT BOUNDARY / NOT OFFICIAL RED LINE / RECOMPUTE WHEN OFFICIAL DATA IS PUBLISHED | Percentages machine-recomputed and rounded; full recomputation after official red lines

Key data (machine-recomputed, provisional)

Overall design basemap ~11.4 km2 (11412825.386 m2) | green share ~20.6% (0.206151) | public-space share

~0.7% (0.006526) | scenario nodes 13 | landmarks 3 | building volumes 12 | land-use zones 21 | key areas

3 | global cases 7 | personas 6 | industry test protocols 3 | annual programmes 5

Origin Square (release) -> Block AI Academy (incubate) -> AI

Alley (test): advisory loop; deepening only after gate G-1

Ratio metrics shown as % (e.g., 20.6% not 0.206151); machine precision in metrics.json governs;

targets pending measurement.

All content is provisional concept advice, not an approval commitment; costs are

qualitative tiers (low/medium/high); recalculation trigger: approval estimates and

design development; basis in sources.json.
