

AI Origin Community: World-Class AI Innovation Ecosystem Neighbourhood in Beijing (Concept)

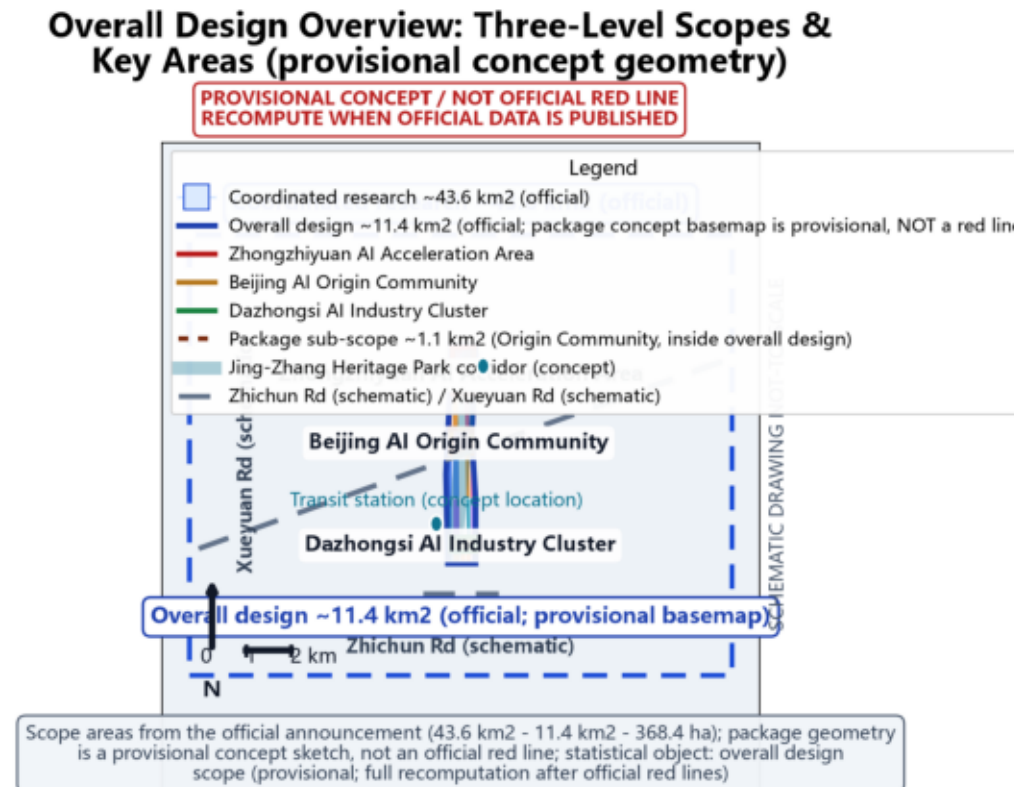

Concept booklet (A3) - all content provisional concept advice - bilingual counterparts, Chinese governs

Official scopes: 43.6 km² > 11.4 km² > 368.4 ha > package sub-scope 1.1 km²

PROVISIONAL CONCEPT / NOT OFFICIAL RED LINE

Coordinated research ~43.6 km² (regional layer) > Overall design ~11.4 km² (package concept basemap, provisional) > Key areas ~368.4 ha (three sites); package sub-scope ~1.1 km² (Origin Community neighbourhood, inside overall design); full recalculation after official red lines / regulatory plans / survey data.

1. Three-Level Scopes & Overall Design Overview

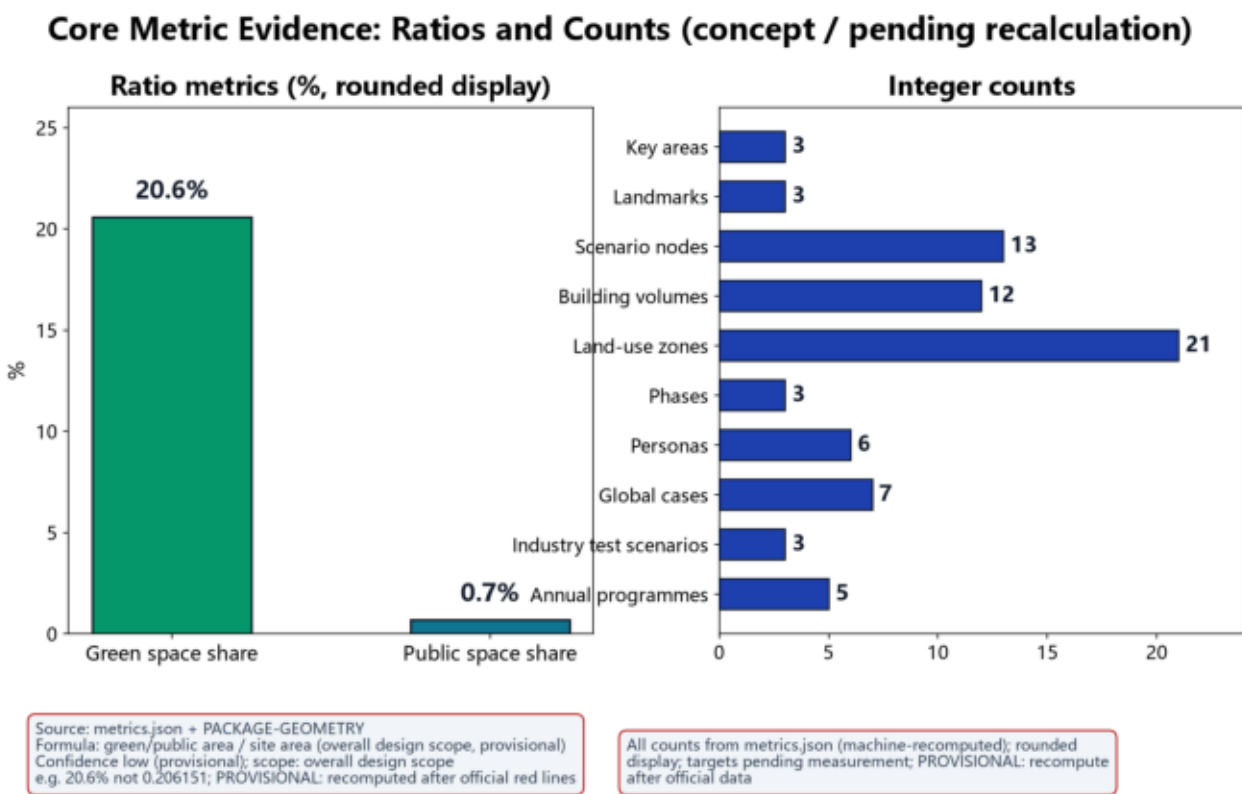

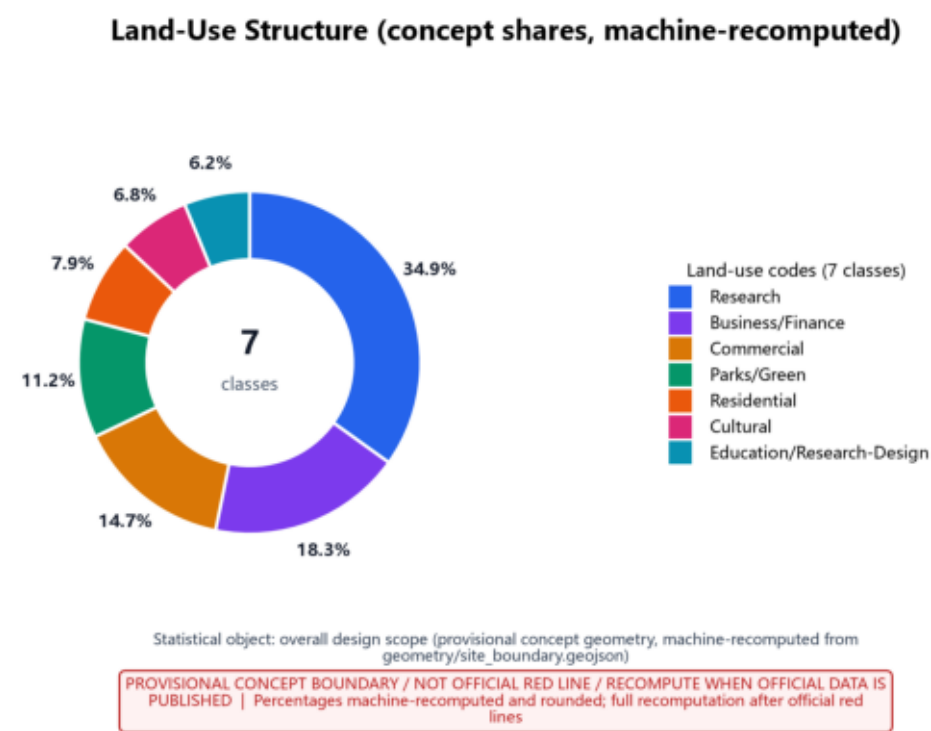

Three-level scopes (official announcement; all provisional concept sketches, not official red lines): Official scopes: 43.6 km2 > 11.4 km2 > 368.4 ha > package sub-scope 1.1 km2

Coordinated research ~43.6 km2 (regional layer) > Overall design ~11.4 km2 (package concept basemap, provisional) > Key areas ~368.4 ha (three sites); package sub-scope ~1.1 km2 (Origin Community neighbourhood, inside overall design); full recalculation after official red lines / regulatory plans / survey data.

Origin Square (release) -> Block AI Academy (incubate) -> AI Alley (test): advisory loop; deepening only after gate G-1

SCHEMATIC DRAWING NOT-TO-SCALE

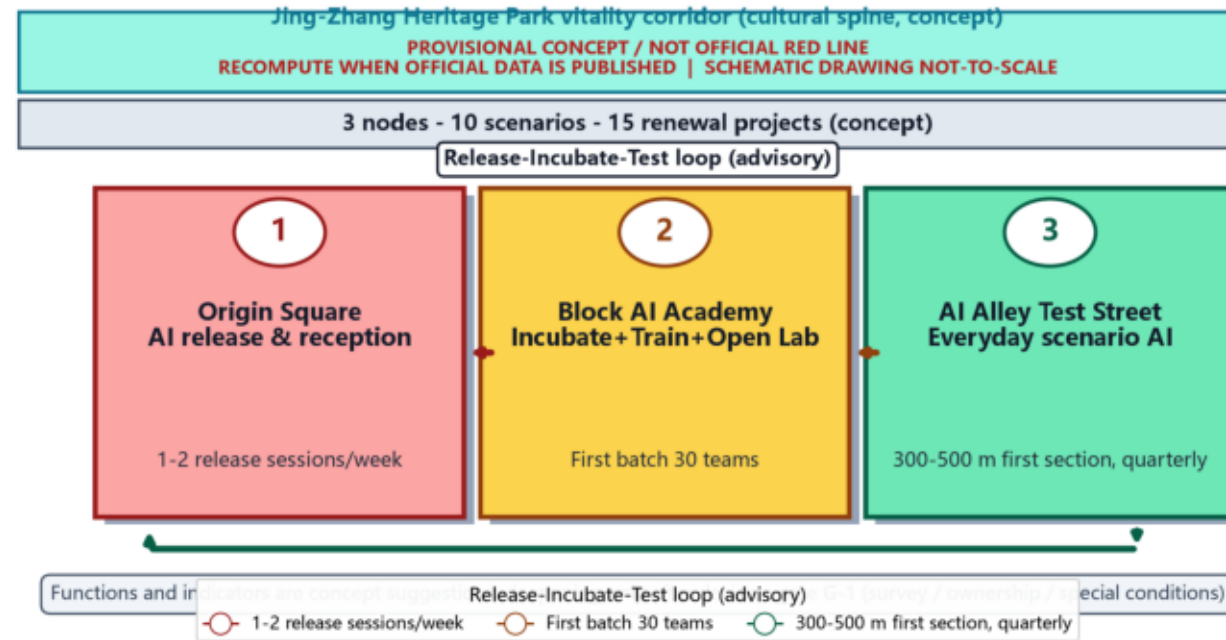

2. Land-Use Structure & Core Metrics

Overall design basemap ~11.4 km2 (11412825.386 m2) |
green share ~20.6% (0.206151) | public-space share
~0.7% (0.006526) | scenario nodes 13 | landmarks 3 |
building volumes 12 | land-use zones 21 | key areas
3 | global cases 7 | personas 6 | industry test
protocols 3 | annual programmes 5
Ratio metrics shown as % (e.g., 20.6% not 0.206151);
machine precision in metrics.json governs; targets
pending measurement.
All content is provisional concept advice, not an
approval commitment; costs are qualitative tiers
(low/medium/high); recalculation trigger: approval
estimates and design development; basis in
sources.json.

3. Key Areas: Three Nodes

Key Areas: Three Nodes and the Release-Incubate-Test Loop (concept)

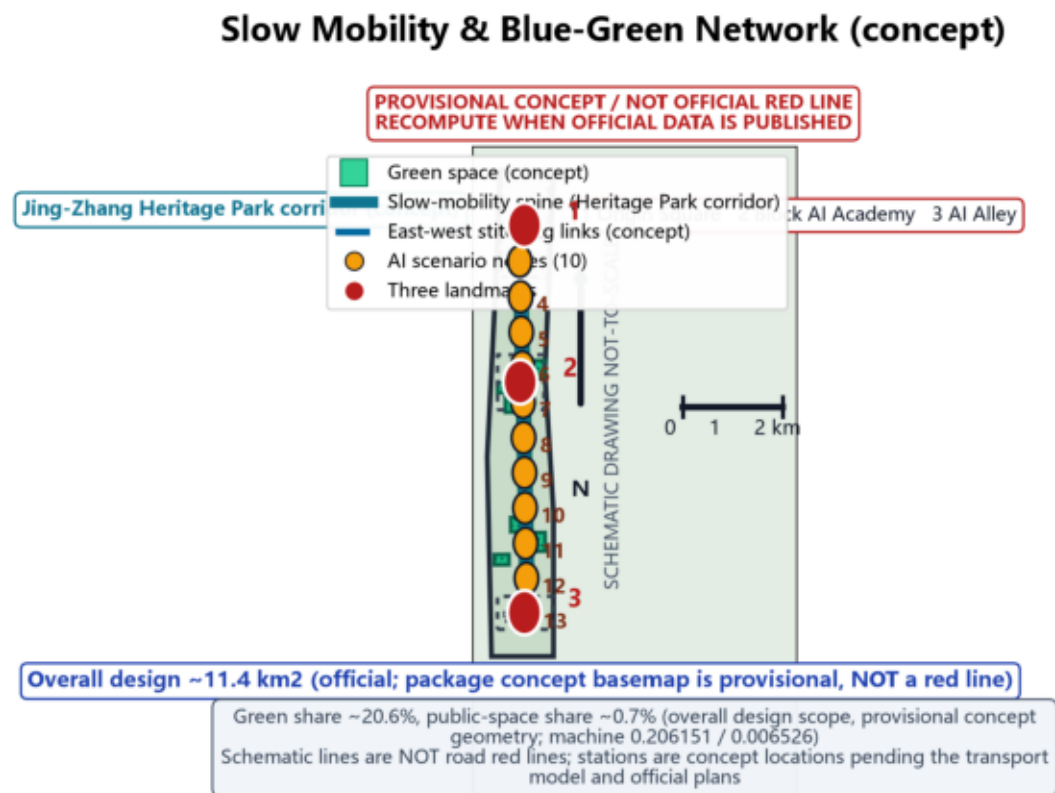

Origin Square (release) -> Block AI Academy (incubate)

-> AI Alley (test): advisory loop; deepening only after gate G-1

All content is provisional concept advice, not an approval commitment; costs are qualitative tiers (low/medium/high), price base 2025 Beijing levels (concept), confidence low (pending professional verification), recalculation trigger: project approval estimates and design development; substantive Chinese-English equivalence declared by the participant (declarative); basis in sources.json and the matrices.

4. Slow Mobility, Blue-Green & Transport

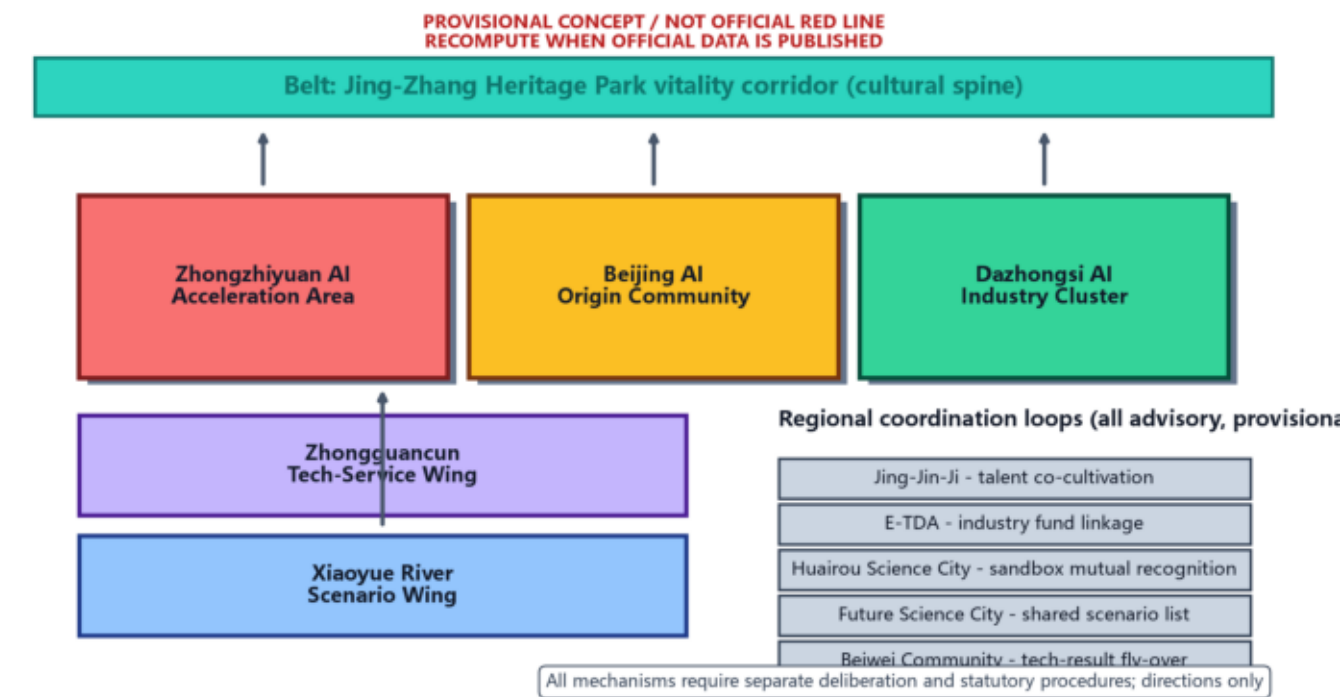

Overall design basemap ~11.4 km² (11412825.386 m²) |
green share ~20.6% (0.206151) | public-space share
~0.7% (0.006526) | scenario nodes 13 | landmarks 3 |
building volumes 12 | land-use zones 21 | key areas 3 |
global cases 7 | personas 6 | industry test protocols 3
| annual programmes 5

All content is provisional concept advice, not an
approval commitment; costs are qualitative tiers
(low/medium/high), price base 2025 Beijing levels
(concept), confidence low (pending professional
verification), recalculation trigger: project approval
estimates and design development; substantive Chinese-
English equivalence declared by the participant
(declarative); basis in sources.json and the matrices.

5. Three Zones, Two Wings & Regional Coordination

Three Zones, Two Wings & Regional Coordination Loops (advisory concept)

All content is provisional concept advice, not an approval commitment; costs are qualitative tiers (low/medium/high), price base 2025 Beijing levels (concept), confidence low (pending professional verification), recalculation trigger: project approval estimates and design development; substantive Chinese-English equivalence declared by the participant (declarative); basis in sources.json and the matrices.

6. Renewal Projects & Phasing

Renewal project	Cost tier	Estimation method (concept)	Confidence
Origin Square	Medium	Square-renewal unit-price analogy	Low (pending)
Block AI Academy	High	Stock-conversion unit-price analogy	Low (pending)
AI Alley test street	Medium	Calming + device unit-price analogy	Low (pending)
Pitch centre	Low	Venue fit-out analogy	Low (pending)
Hackathon base	Low	Shared-lab conversion analogy	Low (pending)
Talent station phase 1	High	Housing conversion/leasing analogy	Low (pending)
Prototype test field	Medium	Controlled site + compute analogy	Low (pending)
Corner gallery network	Low	Gallery module analogy	Low (pending)
Smart commute facilities	Medium	Traffic-info facility analogy	Low (pending)
Deliberation hall	Low	Community room conversion analogy	Low (pending)
Digital-twin station	Low	Station software/hardware analogy	Low (pending)
Accessible AI tour	Low	Tour device + adaptation analogy	Low (pending)
White Paper platform	Low	Platform dev manpower analogy	Low (pending)
Blue-green upgrade	Medium	Greening + sponge works analogy	Low (pending)
Transit & municipal works	High	Utility/road works analogy	Low (pending)

Price base: 2025 Beijing price levels (concept); cost scope: design + construction (excl. O&M/taxes/land); confidence: low (pending professional verification); recalculation trigger: after project approval estimates

Phasing (concept): near-term 1-3y - Origin Square / talent station / corner galleries / deliberation hall; mid-term 3-5y - Academy / full AI Alley / hackathon base / prototype test field; long-term 5-10y - work-live community / full accessible tour / normalised White Paper

Risk & compliance: five risk families (policy, market, technology, implementation, safety-ethics) with response strategies; all scopes, indicators, phasing and costs are provisional and not approval commitments; compliance

All content is provisional concept advice, not an approval
