

Warm Stove Loop KIT • JZ - Community Kitchen & Meal-Service Network (Concept - A0 Board 1/2)

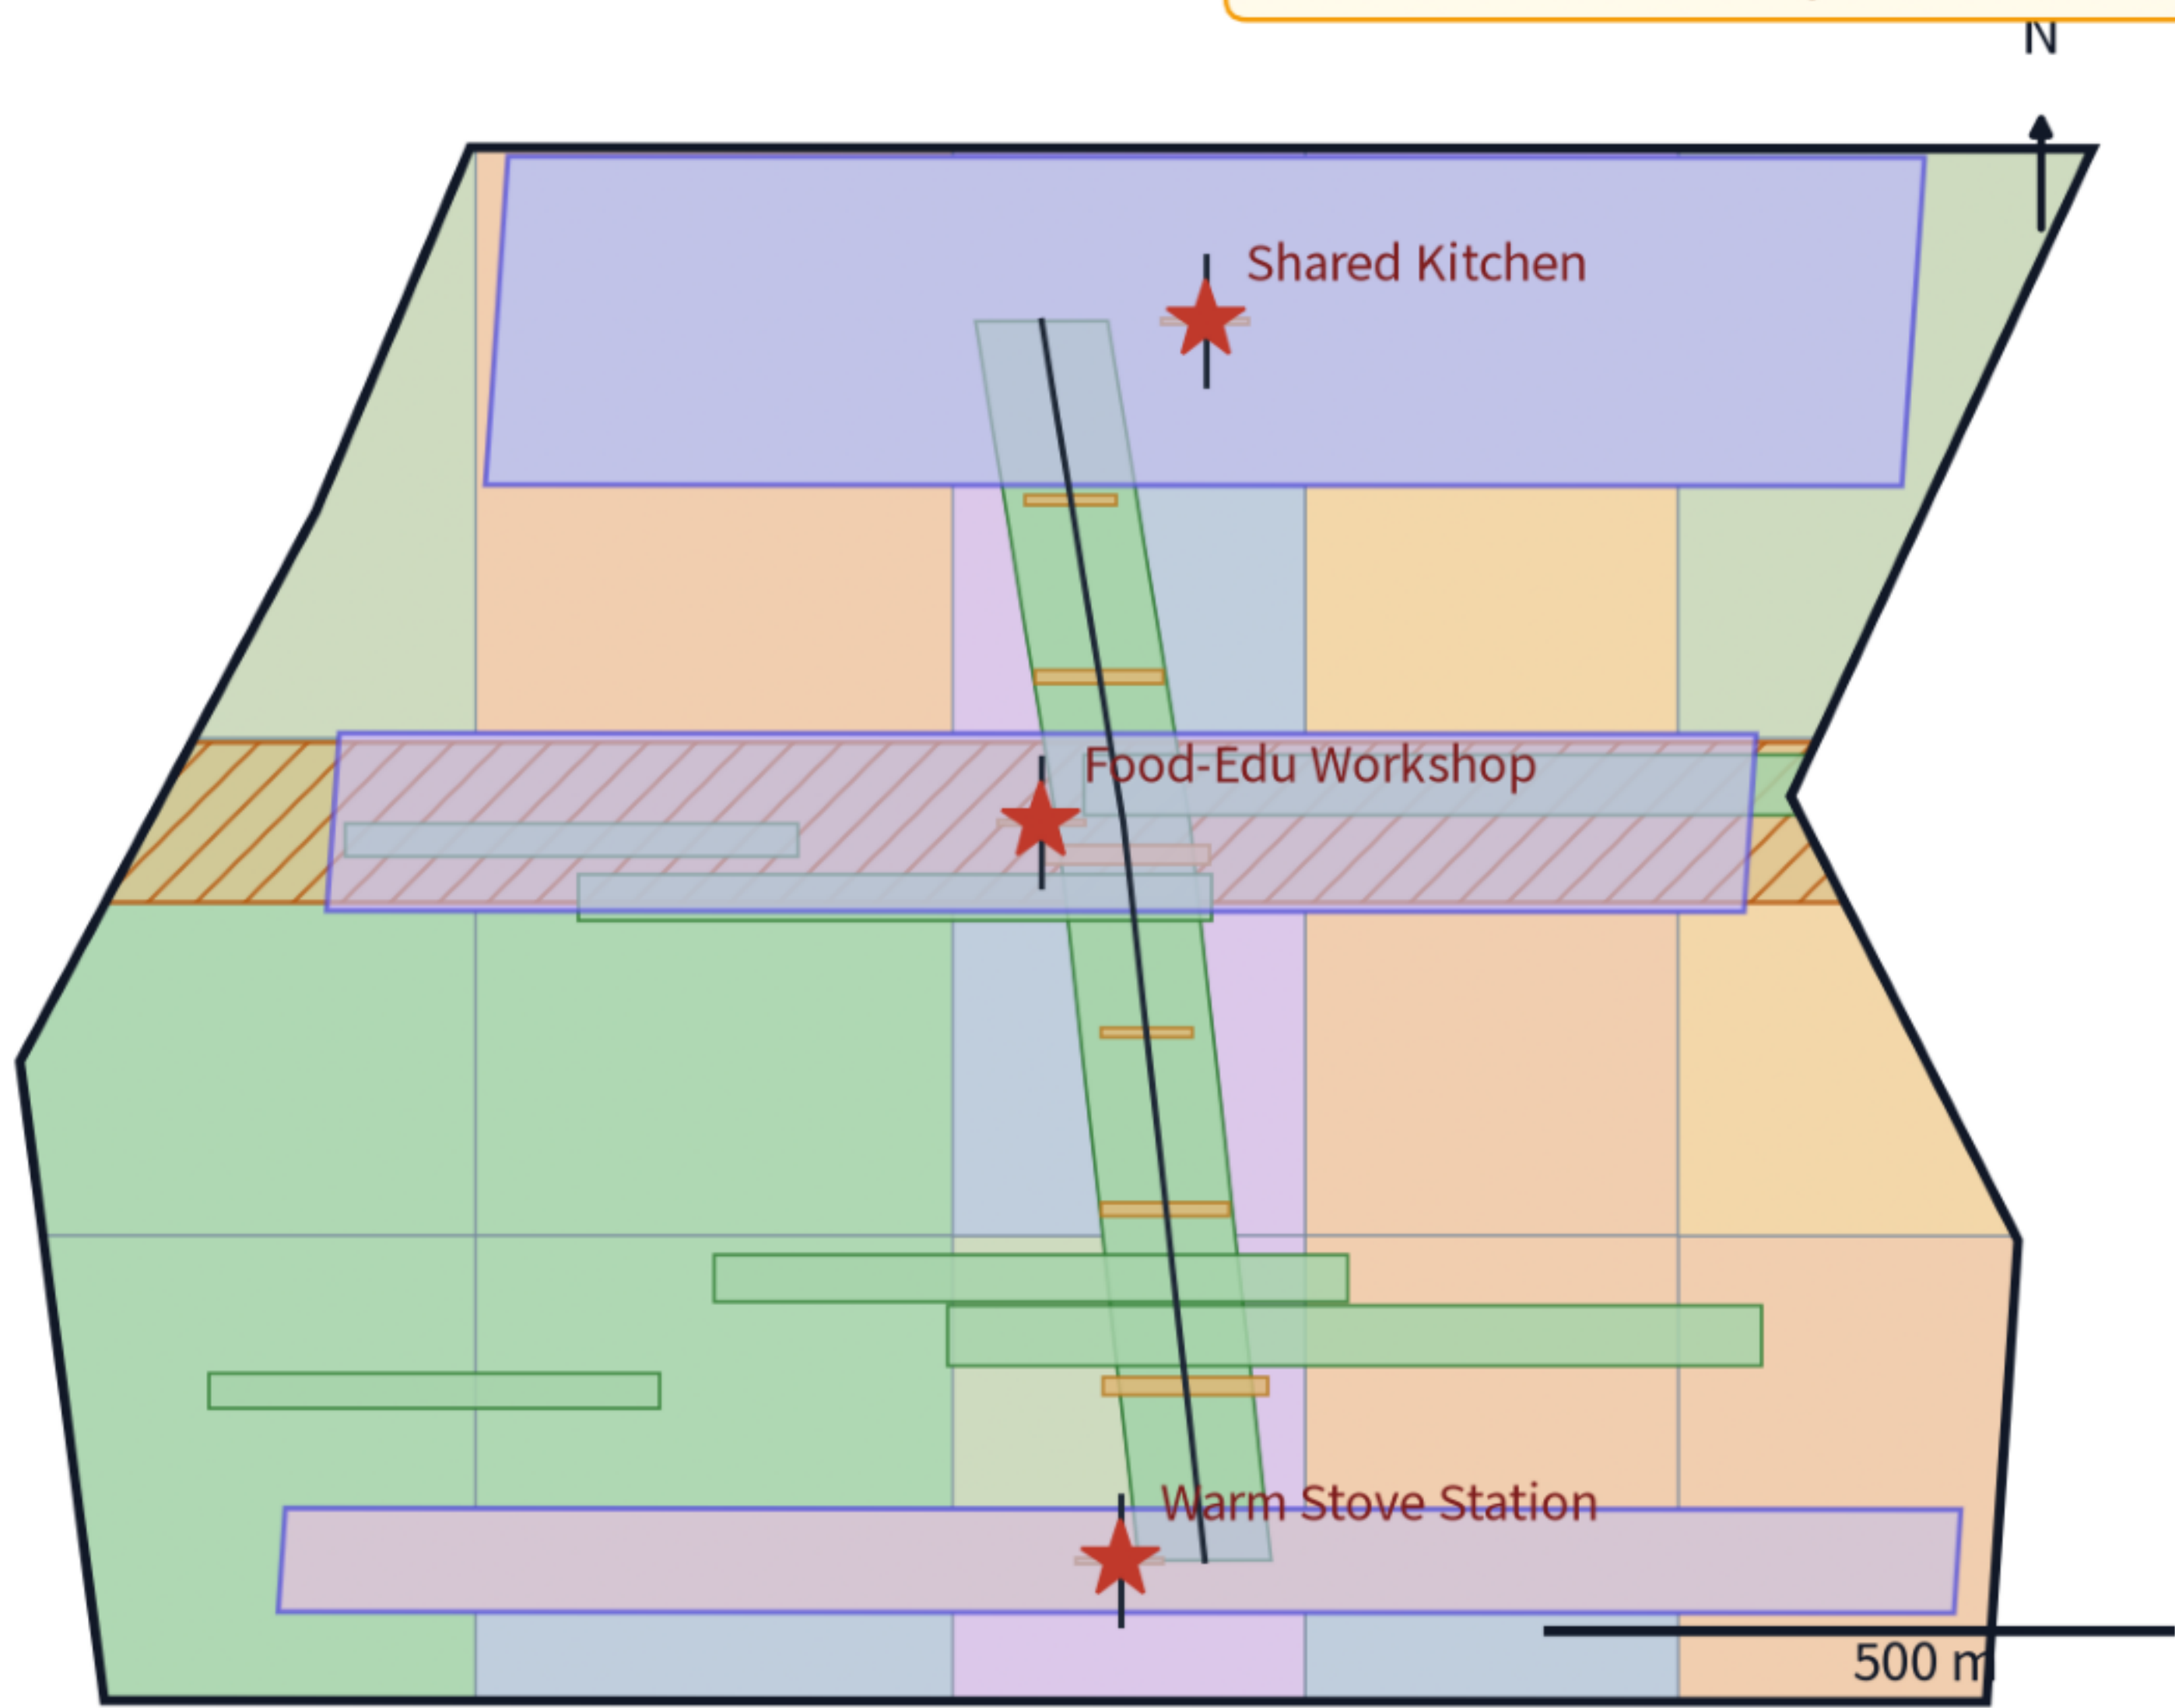

One workshop, one garden, one stove; ten AI scenario cards; three test protocols; anonymised aggregation and human review only; three-tier scopes per official text (approx 43.6 km2 / approx 11.4 km2 / approx 368.4 ha)

PROVISIONAL boundary - not an official redline - recalculate after official data

Overall design overview (provisional)

Overall Design Overview - Community Kitchen & Meal-Service Network (provisional)

PROVISIONAL boundary - not an official redline - recalculate after official data

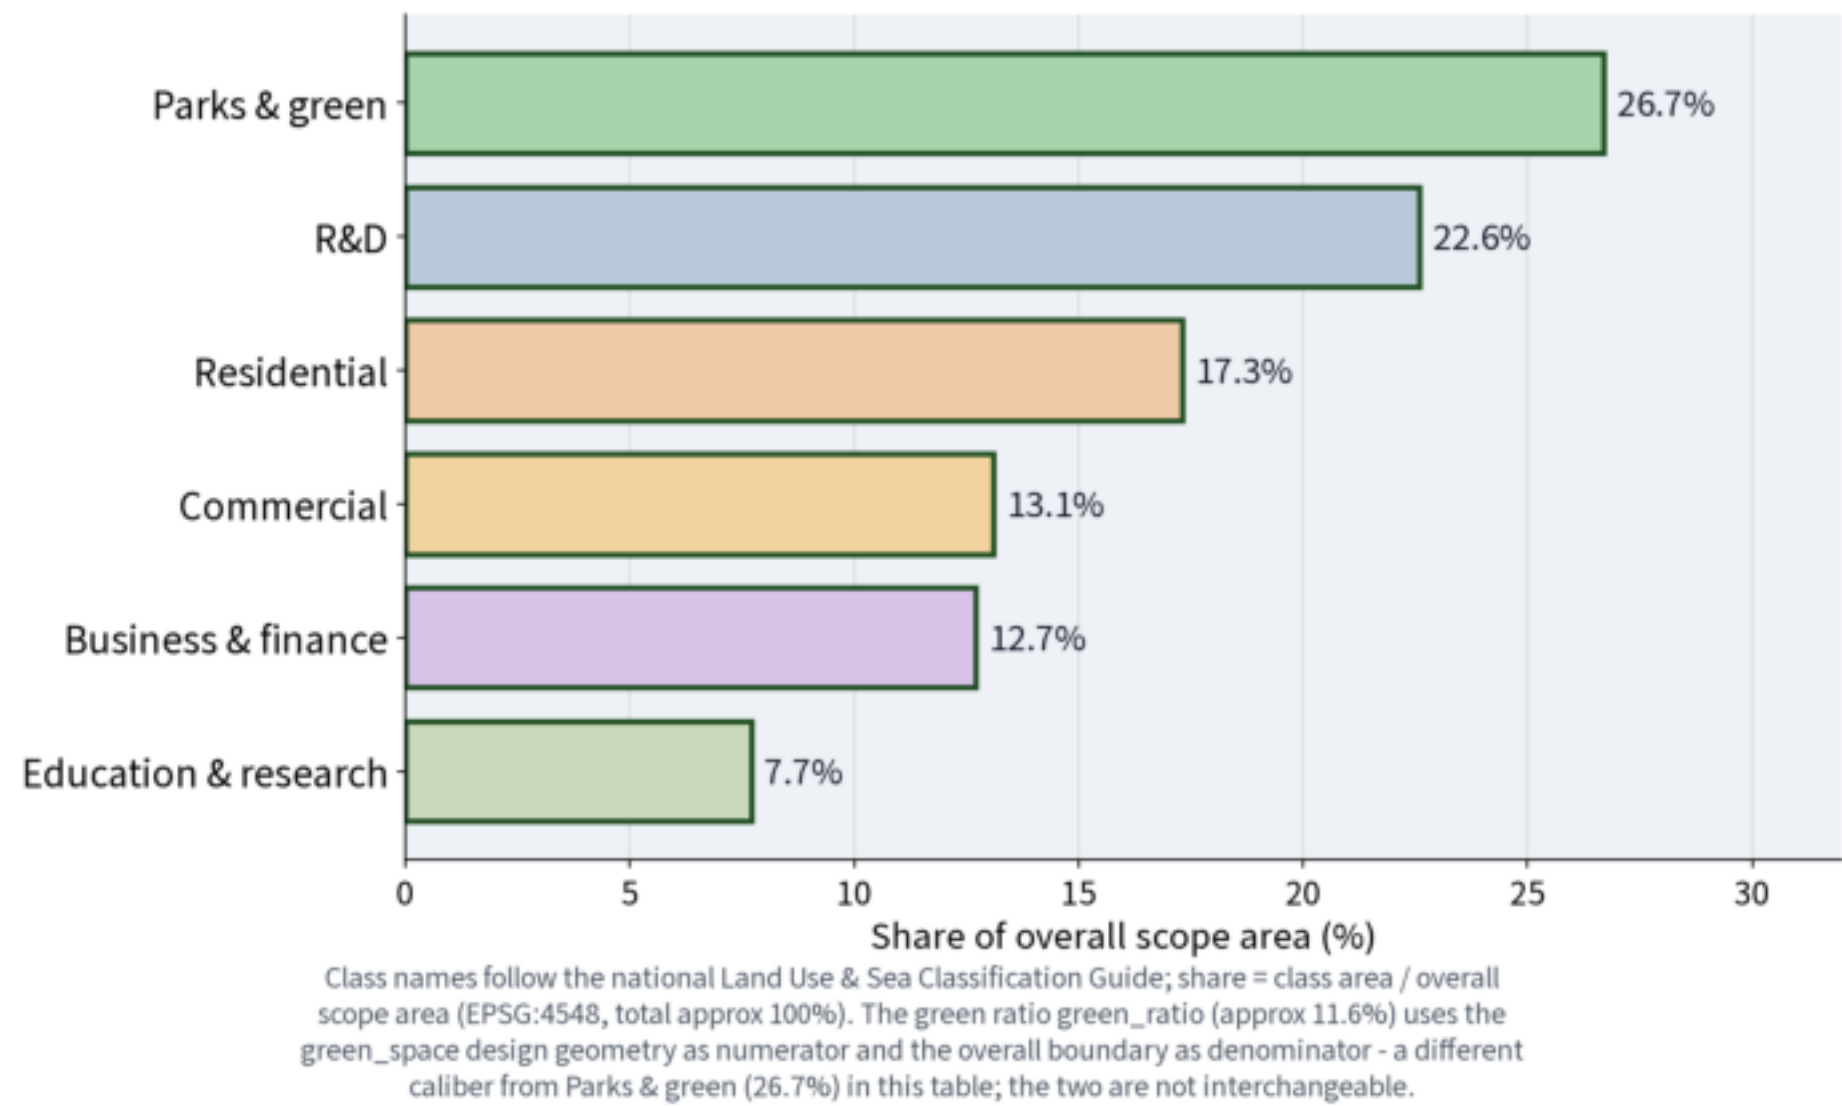

Areas and ratios are rounded concept values; recalculate by the declared formulas (EPSG:4548) after the organizer publishes official boundaries and baseline data.

- Conceptual land-use classes
- Overall design scope (provisional)
 - Key areas (provisional)
 - Green space (concept)
 - Public space / plaza
 - Slow-traffic / delivery routes (concept)
 - AI landmark (conceptual site)
 - Heritage zone (concept)
 - Parks & green
 - R&D
 - Residential
 - Commercial
 - Business & finance
 - Education & research

Conceptual land-use structure (single caliber)

Conceptual Land-Use Structure (single caliber, areas recomputed from land_use.geojson)

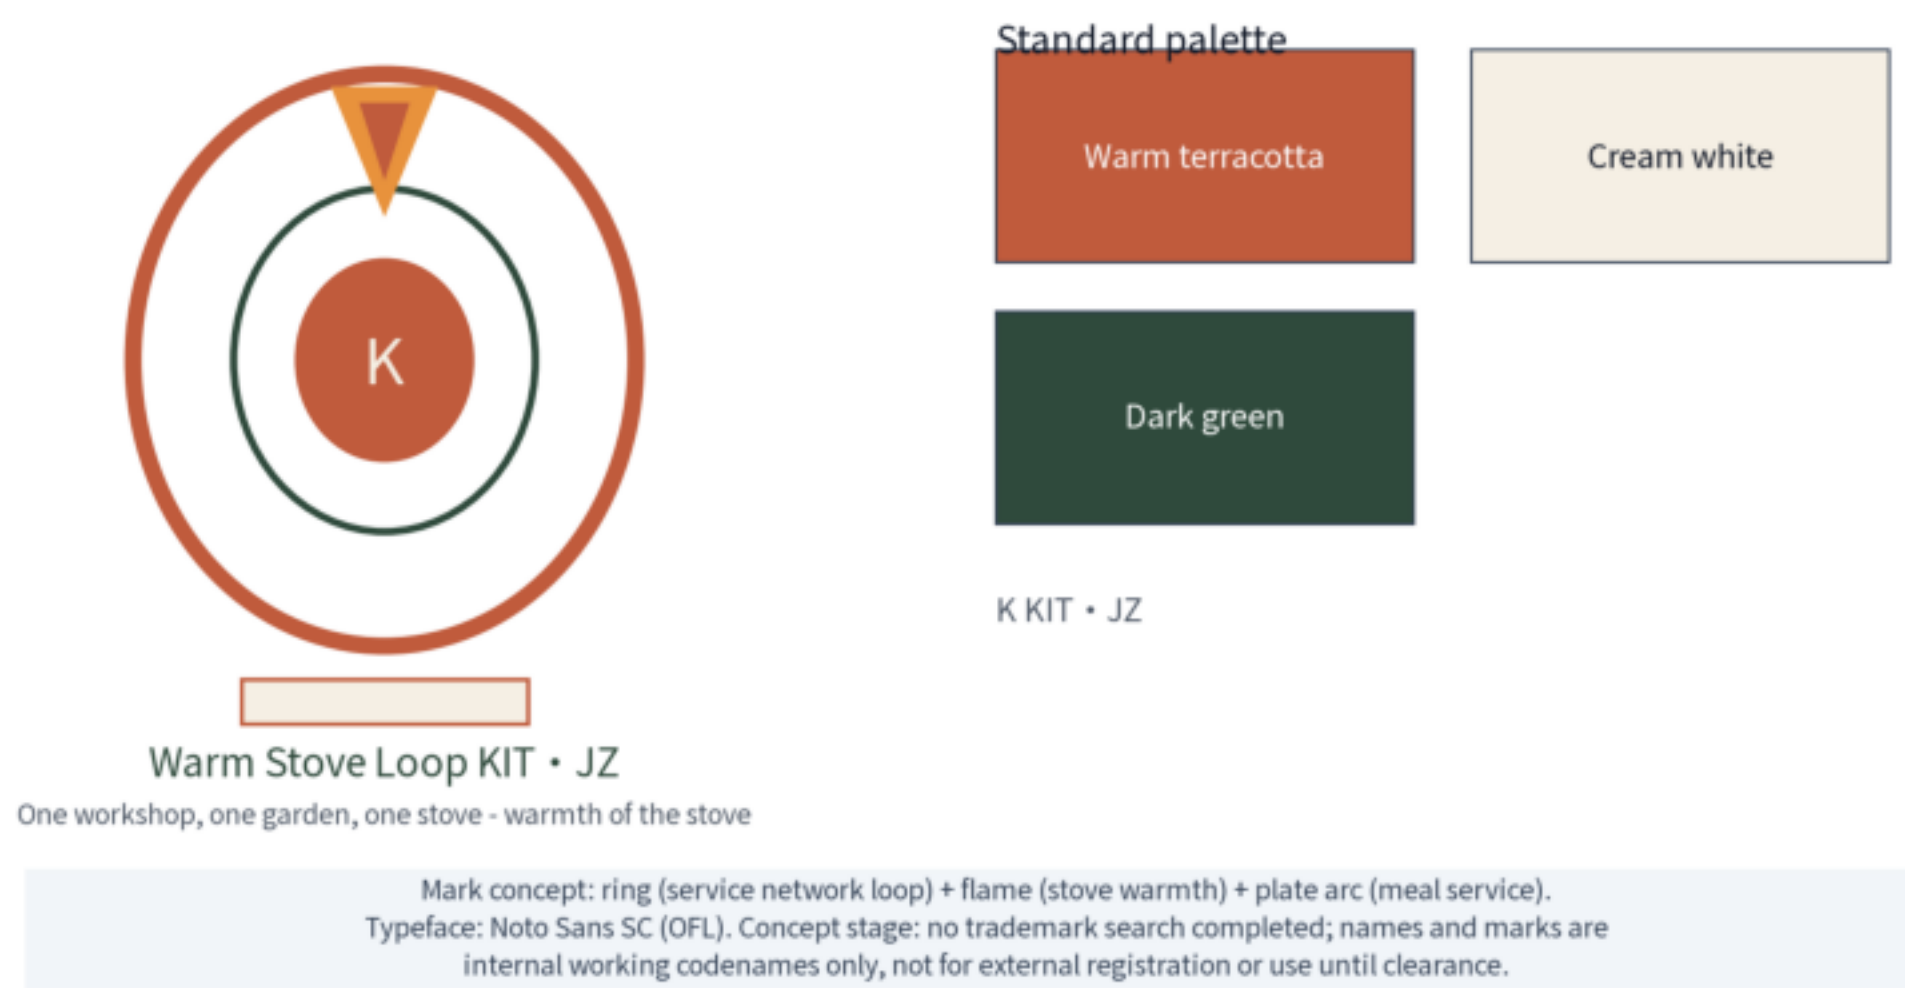

PROVISIONAL boundary - not an official redline - recalculate after official data

Logo & visual identity

Warm Stove Loop KIT • JZ - Logo & Visual Identity (concept)

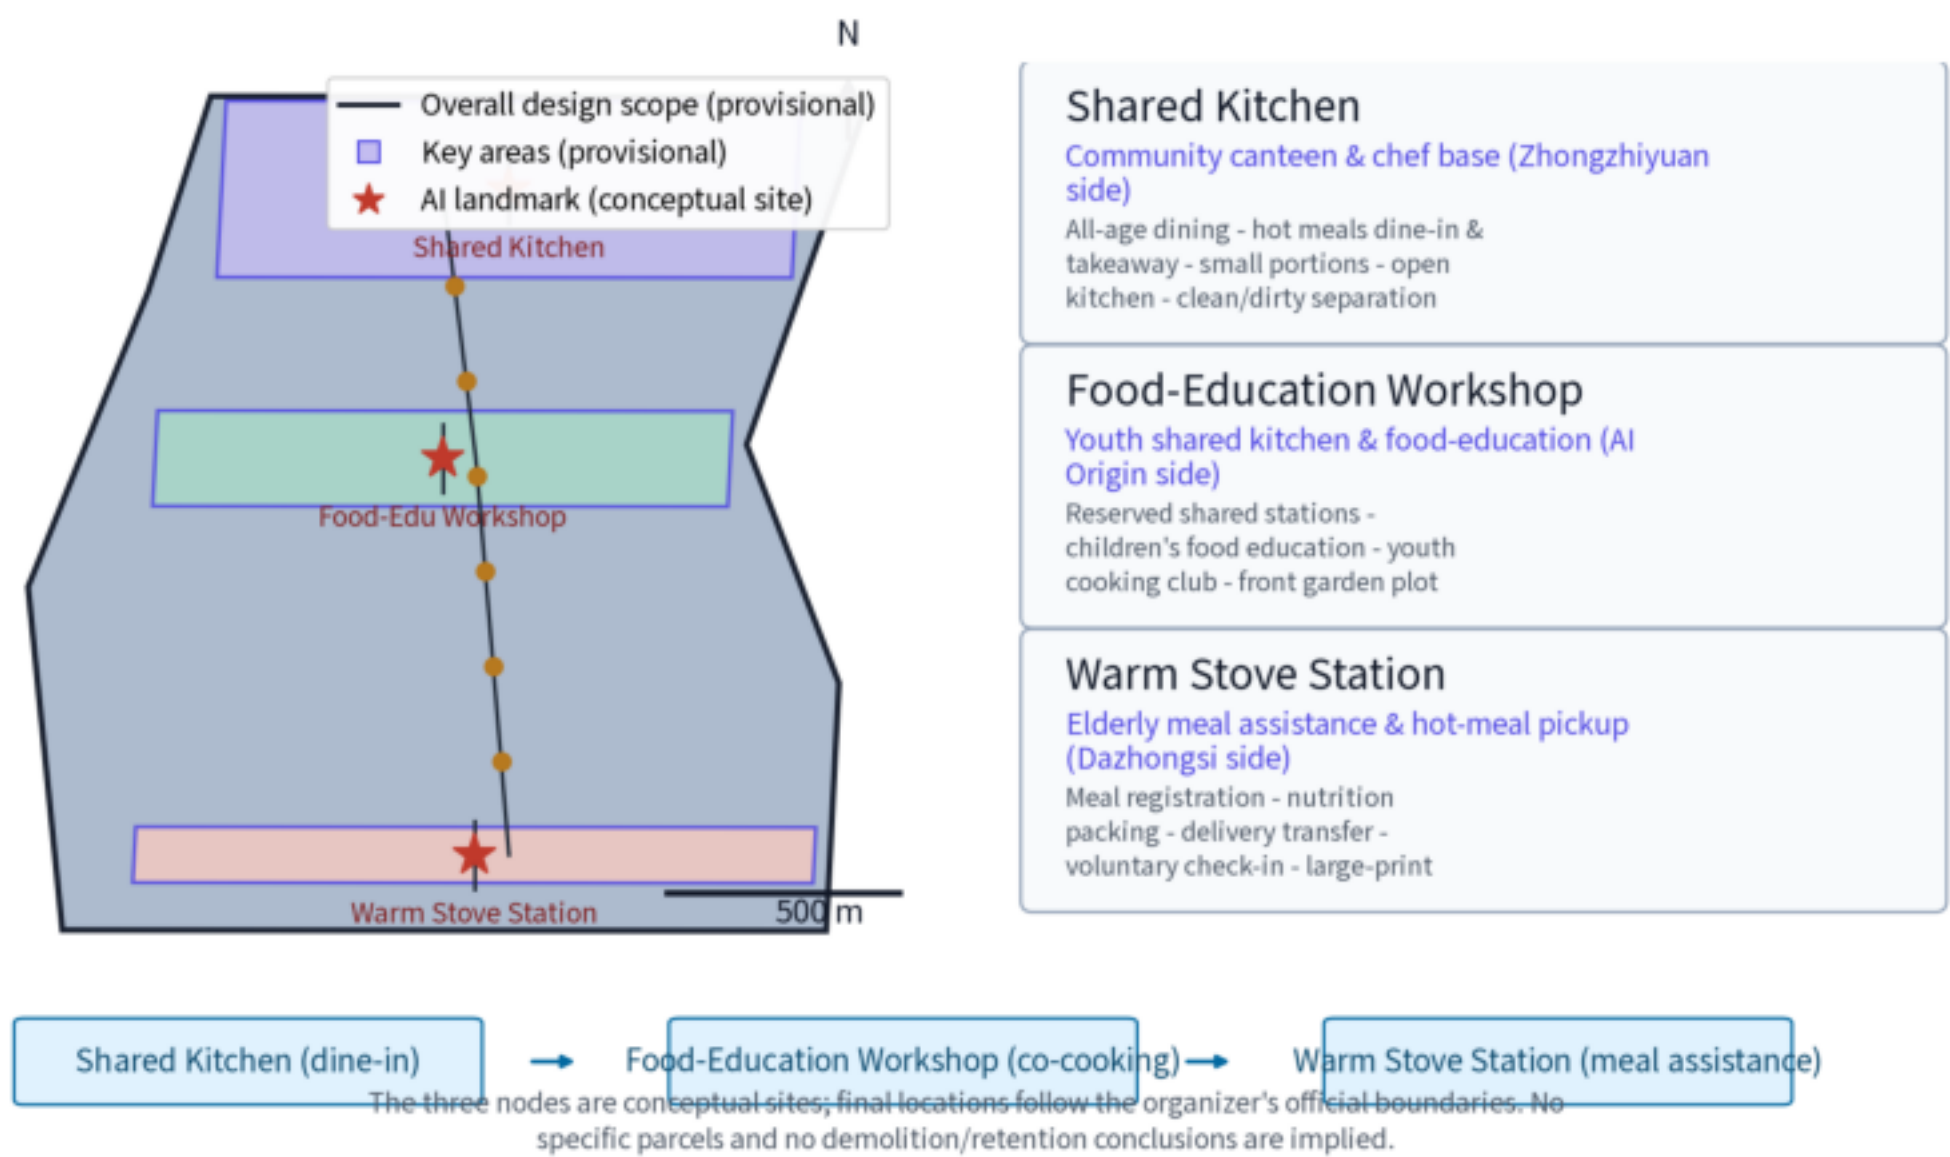

PROVISIONAL boundary - not an official redline - recalculate after official data

Three nodes: index & flow

Three Nodes: Index & Design Tasks

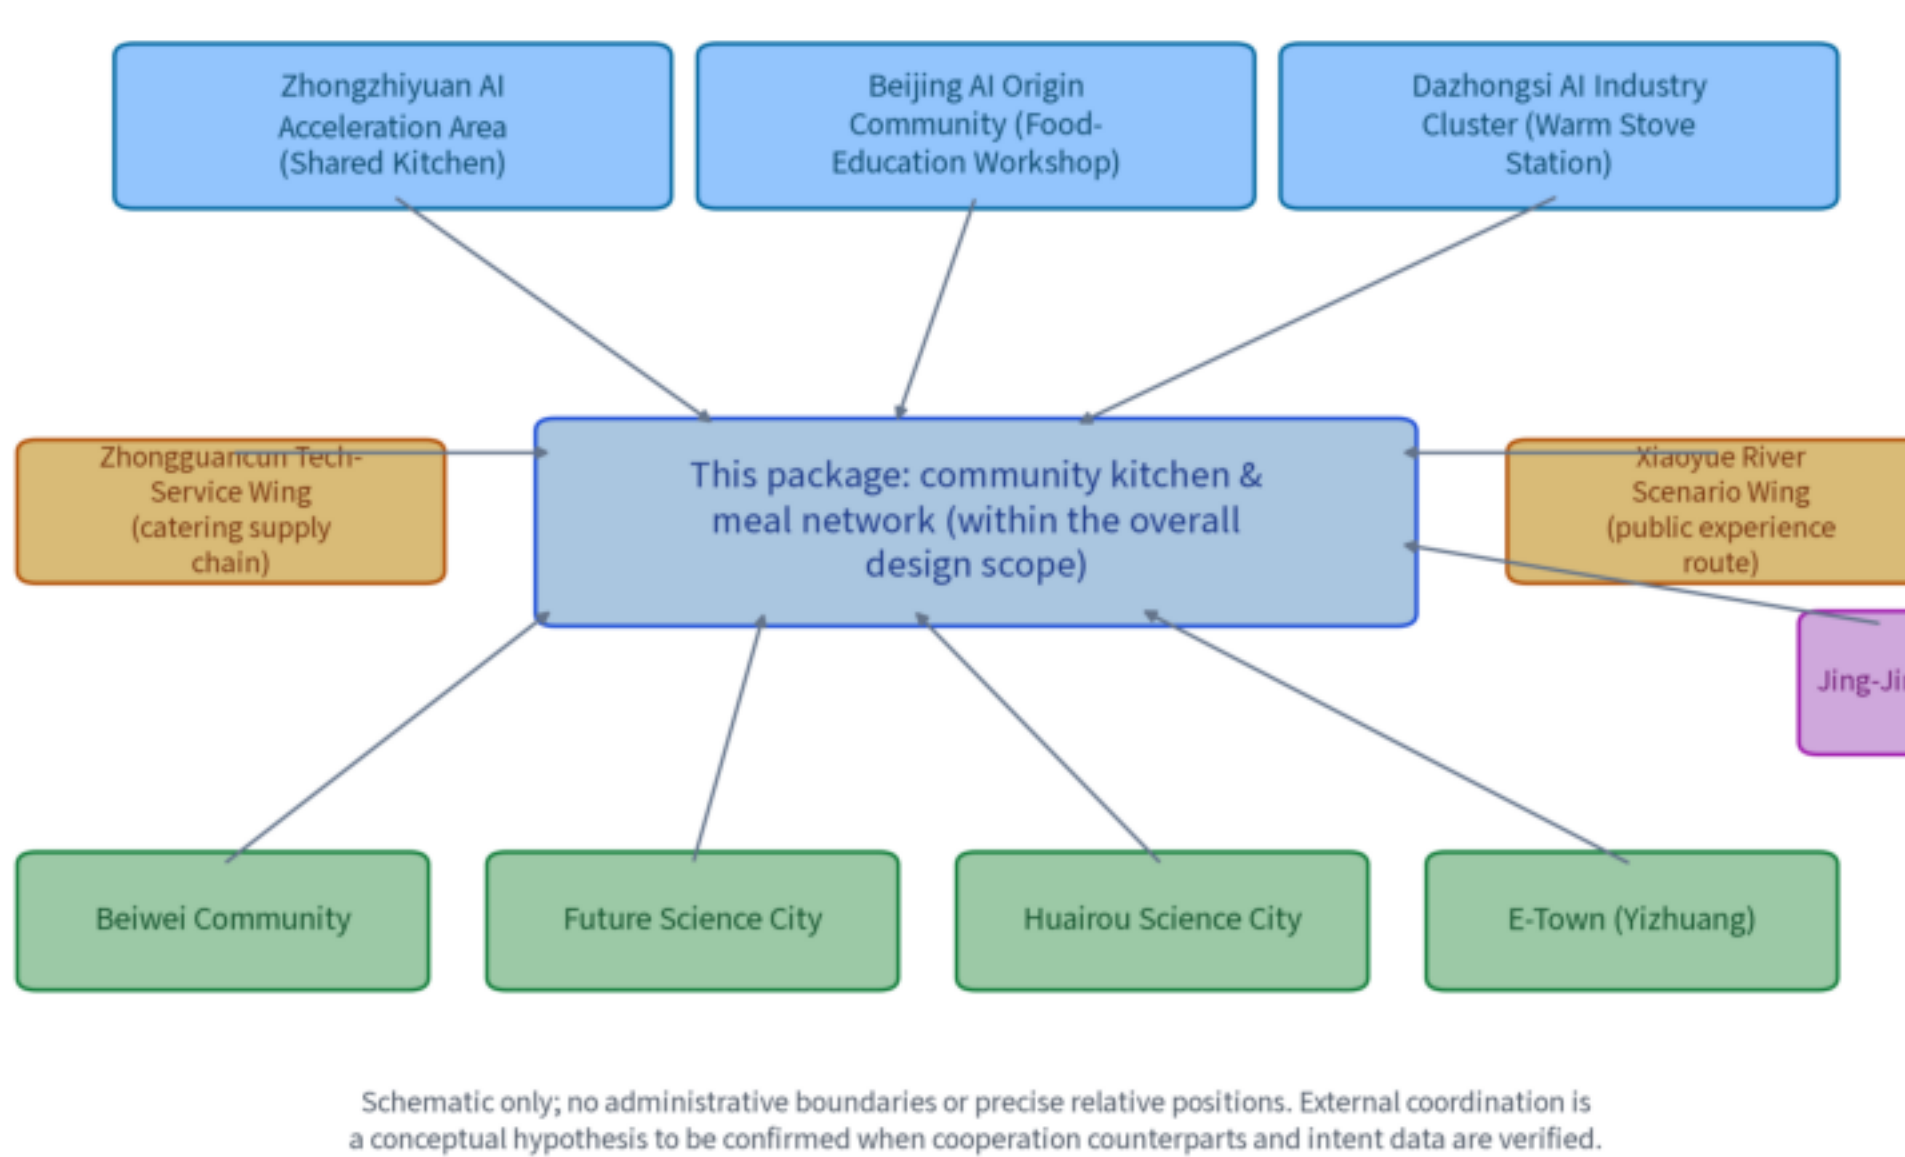

PROVISIONAL boundary - not an official redline - recalculate after official data

Belt positioning & regional coordination (schematic)

Belt-Level Positioning & Regional Coordination (schematic)

PROVISIONAL boundary - not an official redline - recalculate after official data

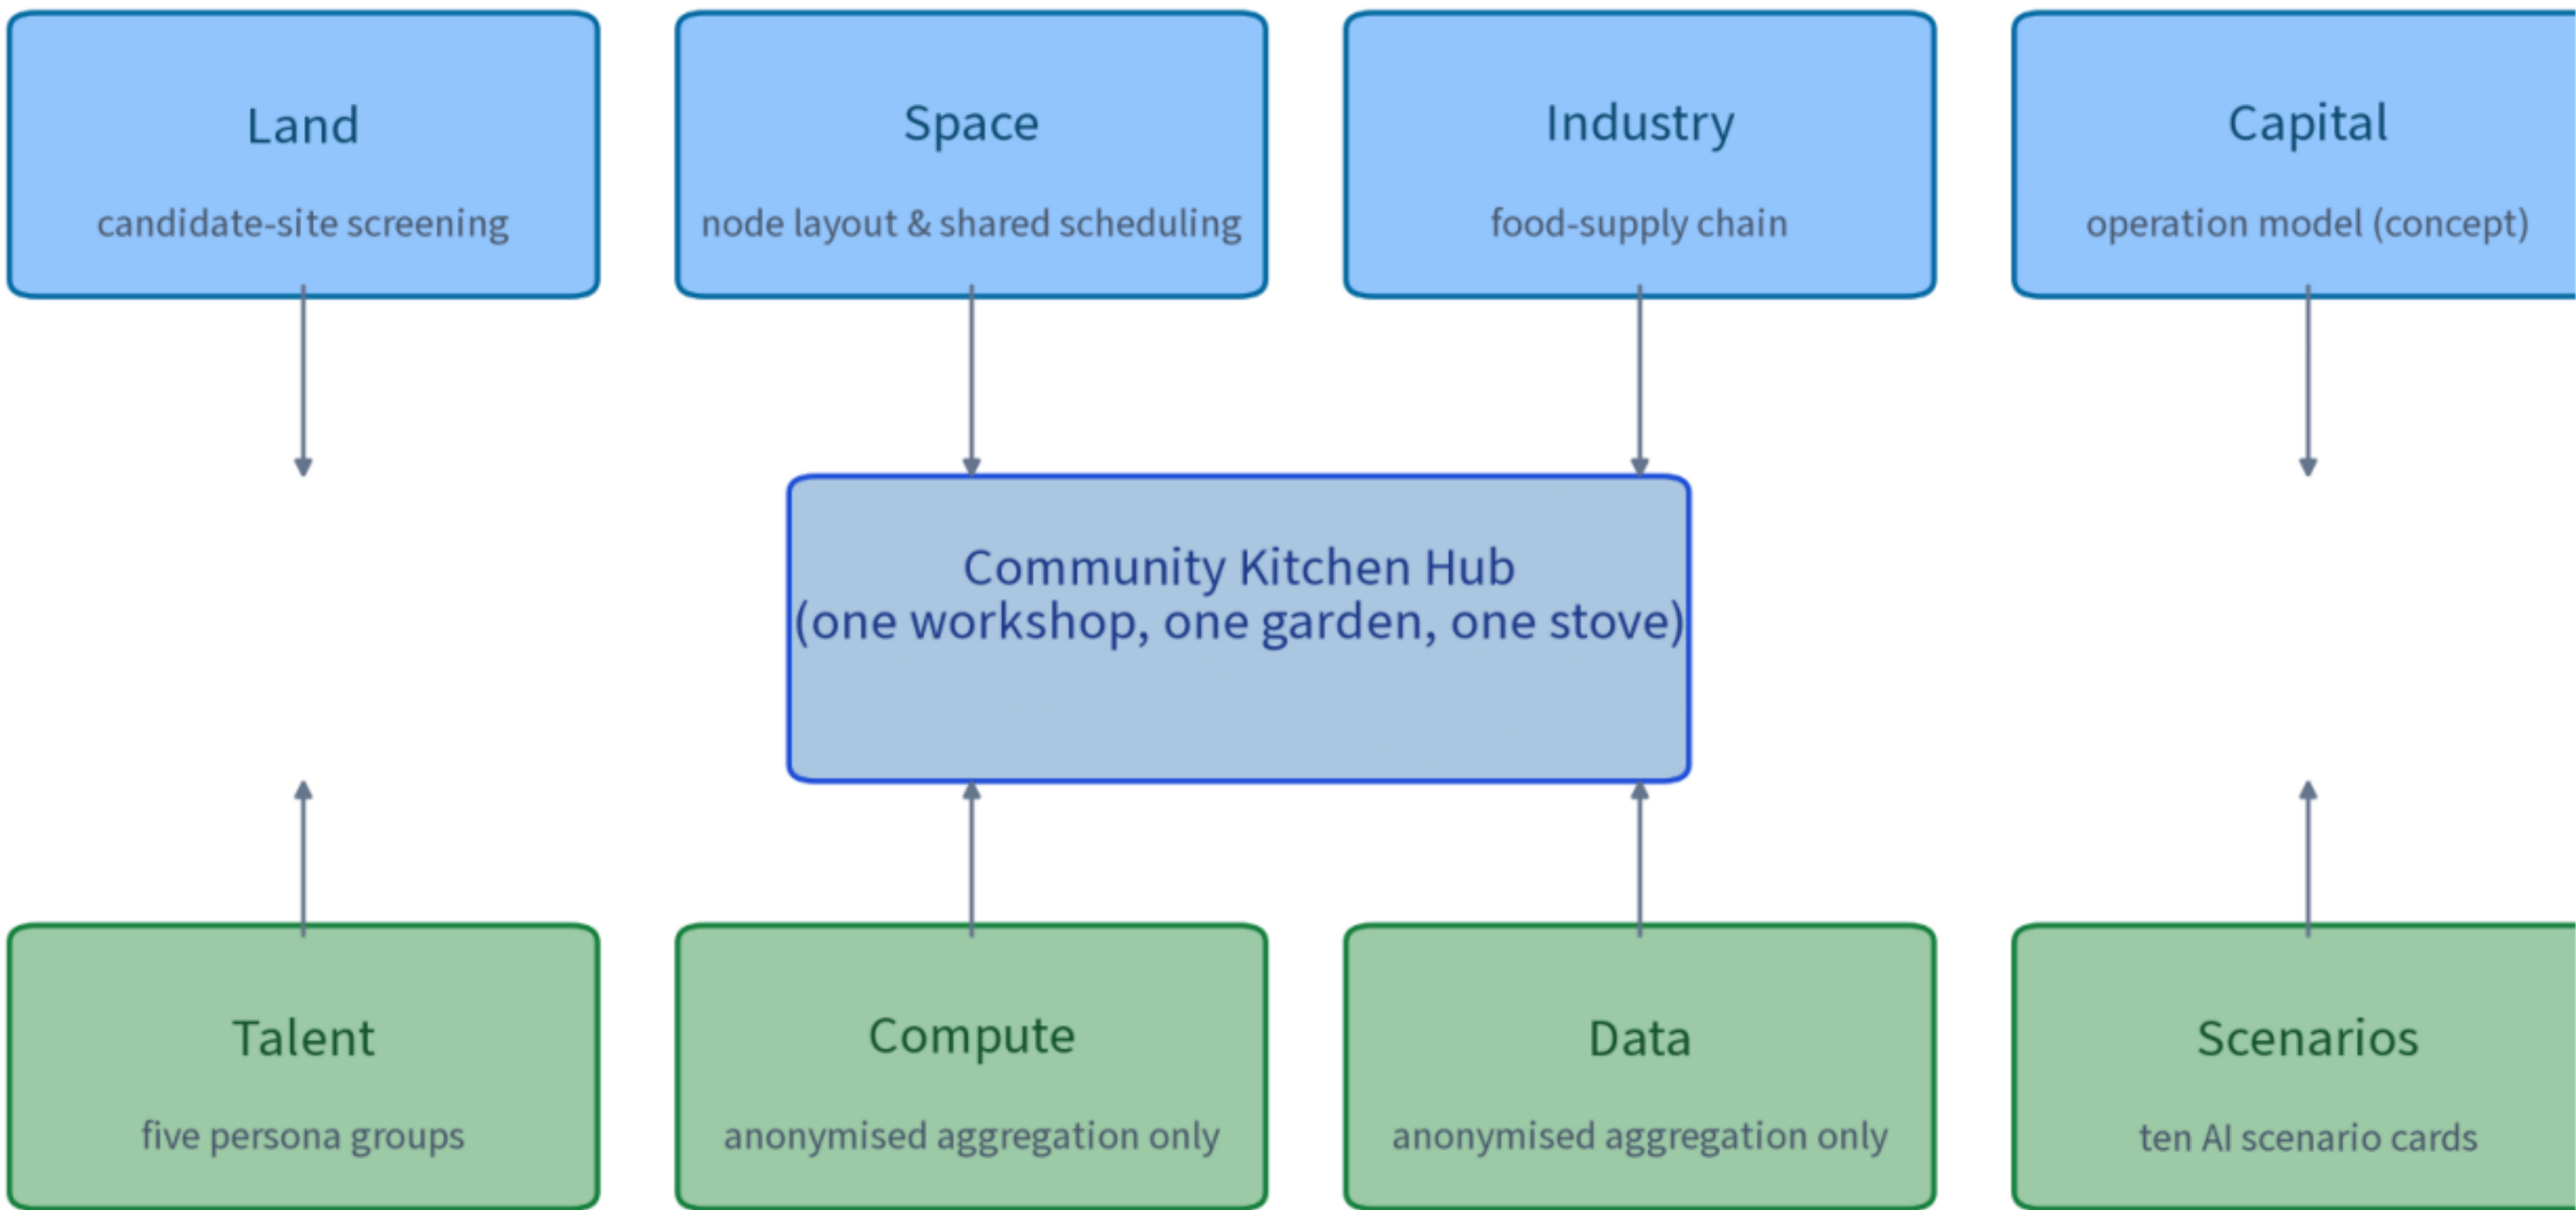

PROVISIONAL boundary - not an official redline - recalculate after official data

Eight-element ecosystem atlas

Eight-Element Ecosystem Atlas: Community Kitchen as the AI-Ecosystem Hub

PROVISIONAL boundary - not an official redline - recalculate after official data

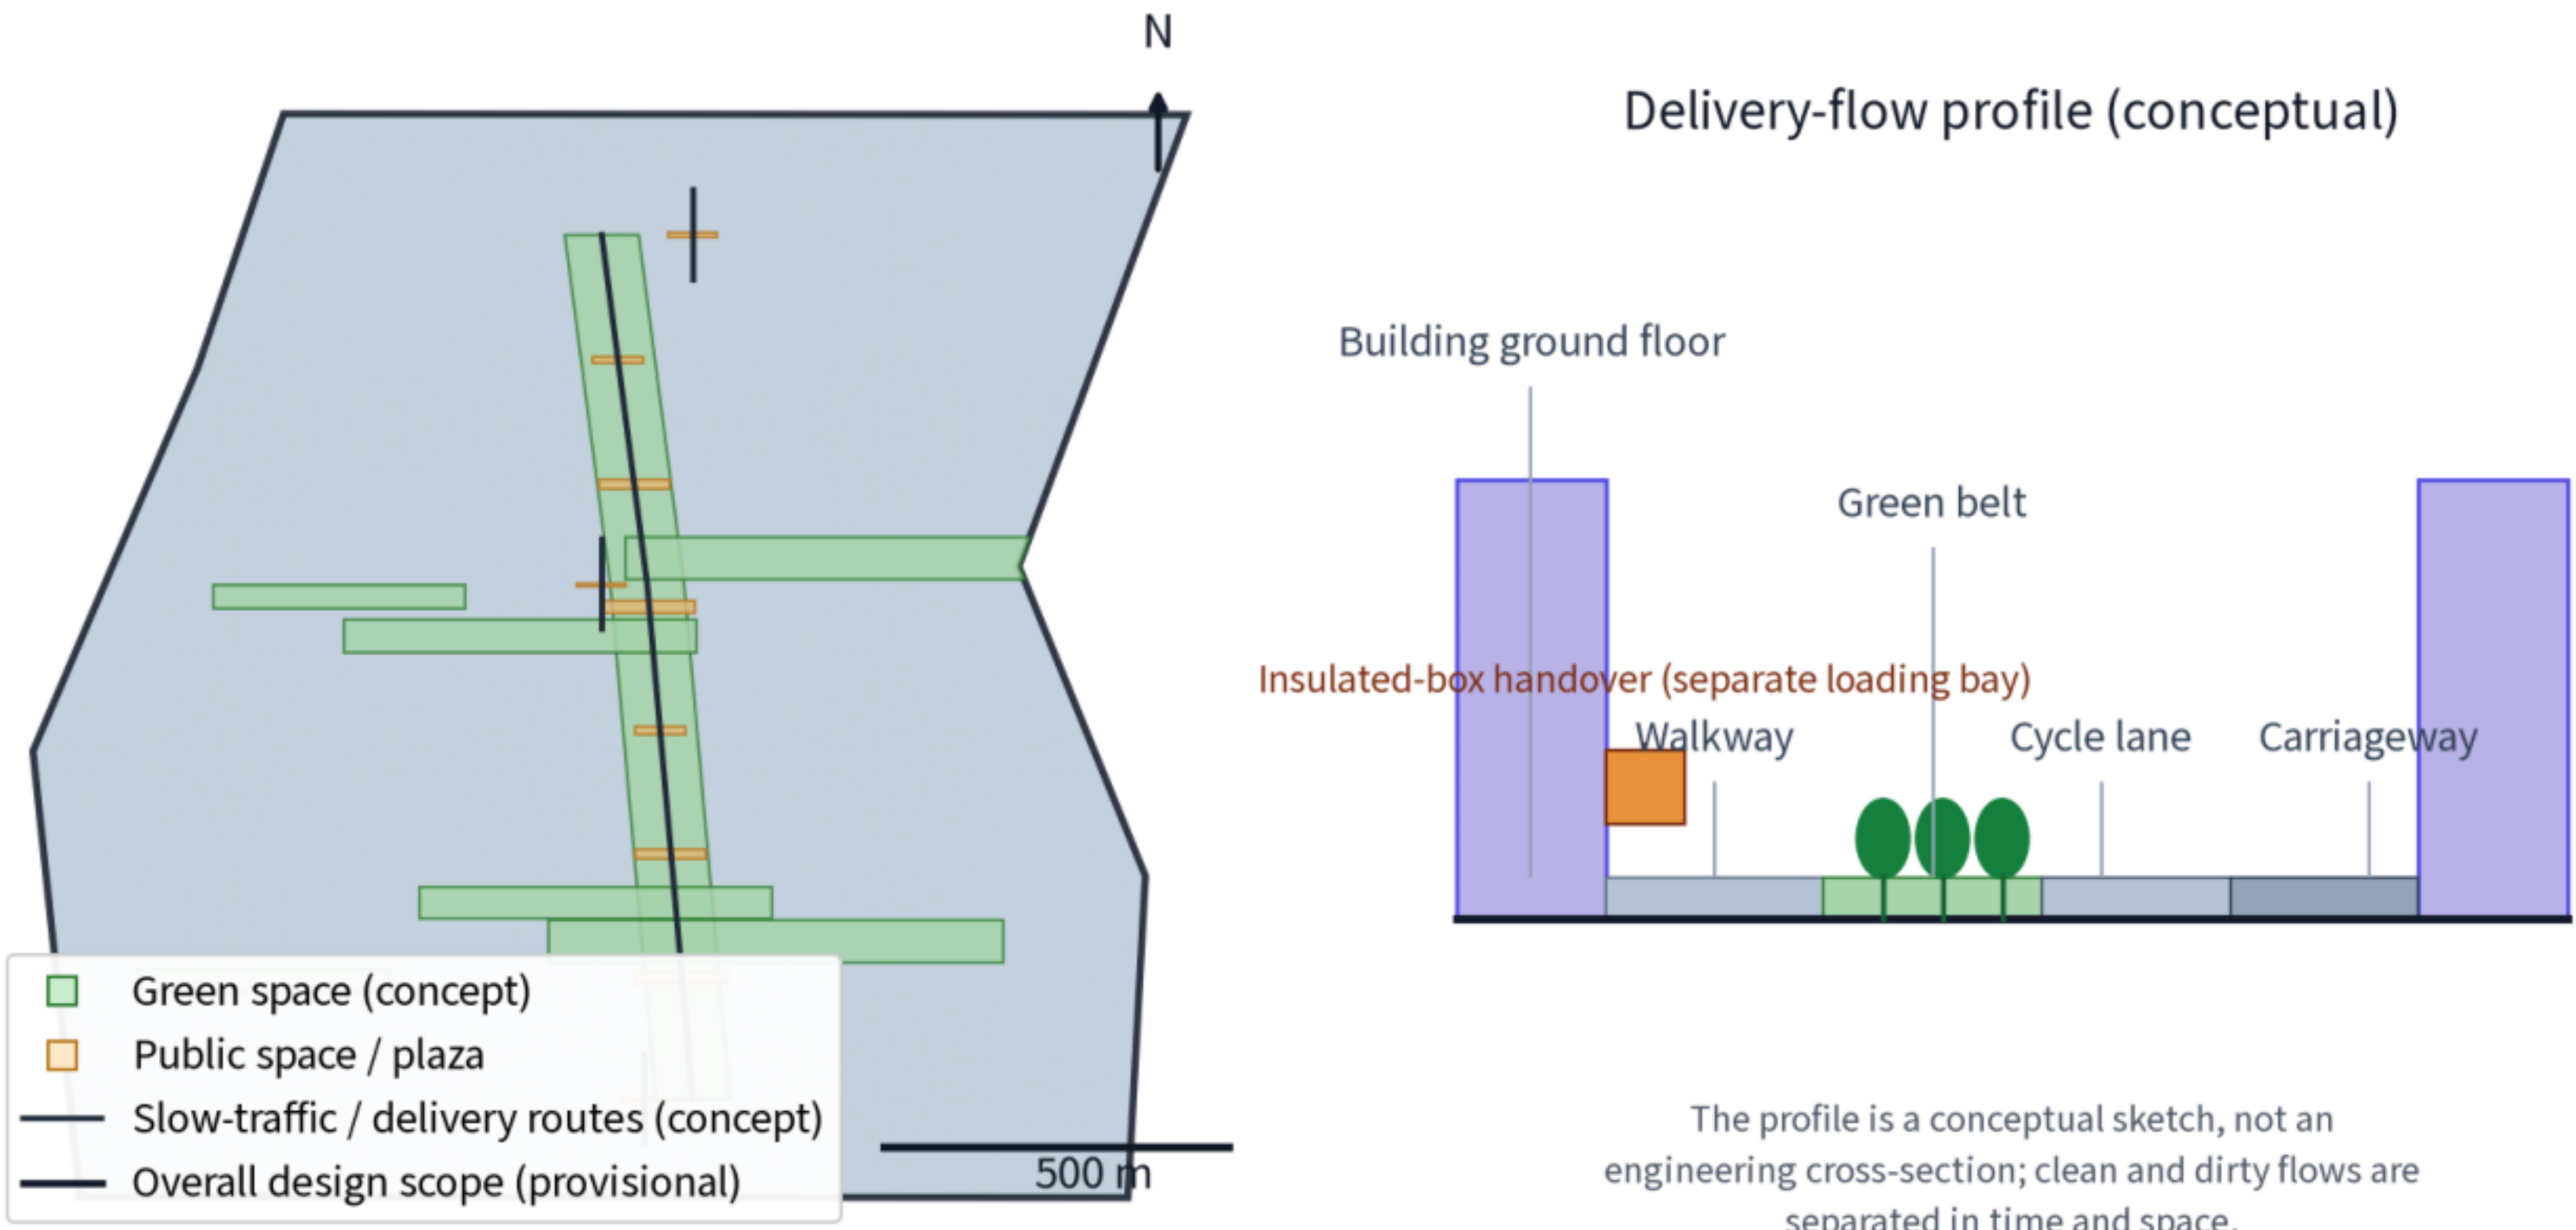

Eight elements interact around the community-kitchen nodes (conceptual atlas); compute and data elements connect through anonymised aggregation only, with no individual-identifying tracking.

Mobility, delivery & blue-green (with profile)

Mobility, Delivery & Blue-Green Network (with delivery-flow profile)

PROVISIONAL boundary - not an official redline - recalculate after official data

Areas and ratios are rounded concept values; recalculate by the declared formulas (EPSG:4548) after the organizer publishes official boundaries and baseline data.

Key metrics (rounded)

- Green ratio 11.6%
- Public-space ratio 0.45%
- Key areas 3
- AI landmarks 3
- Scenario nodes 9
- Land-use zones 27
- Building units 12
- Phases 3
- Annual programs 3
- Global cases 5
- Personas 5
- AI scenario cards 10
- Test protocols 3

Phasing (concept)

- Phase 1: station pilot
- Phase 2: canteen dine-in
- Phase 3: full network

Mechanisms: operation RACI, stop conditions, annual disclosure and resident feedback, developer community and scenario open days, incubation-pilot-rollout conversion ladder
