

# Warm Stove Loop KIT • JZ - Community Kitchen & Meal-Service Network (Concept)

Centennial Jingzhang AI Innovation Belt international call - community-kitchen concept study

PROVISIONAL boundary - not an official redline - recalculate after official data

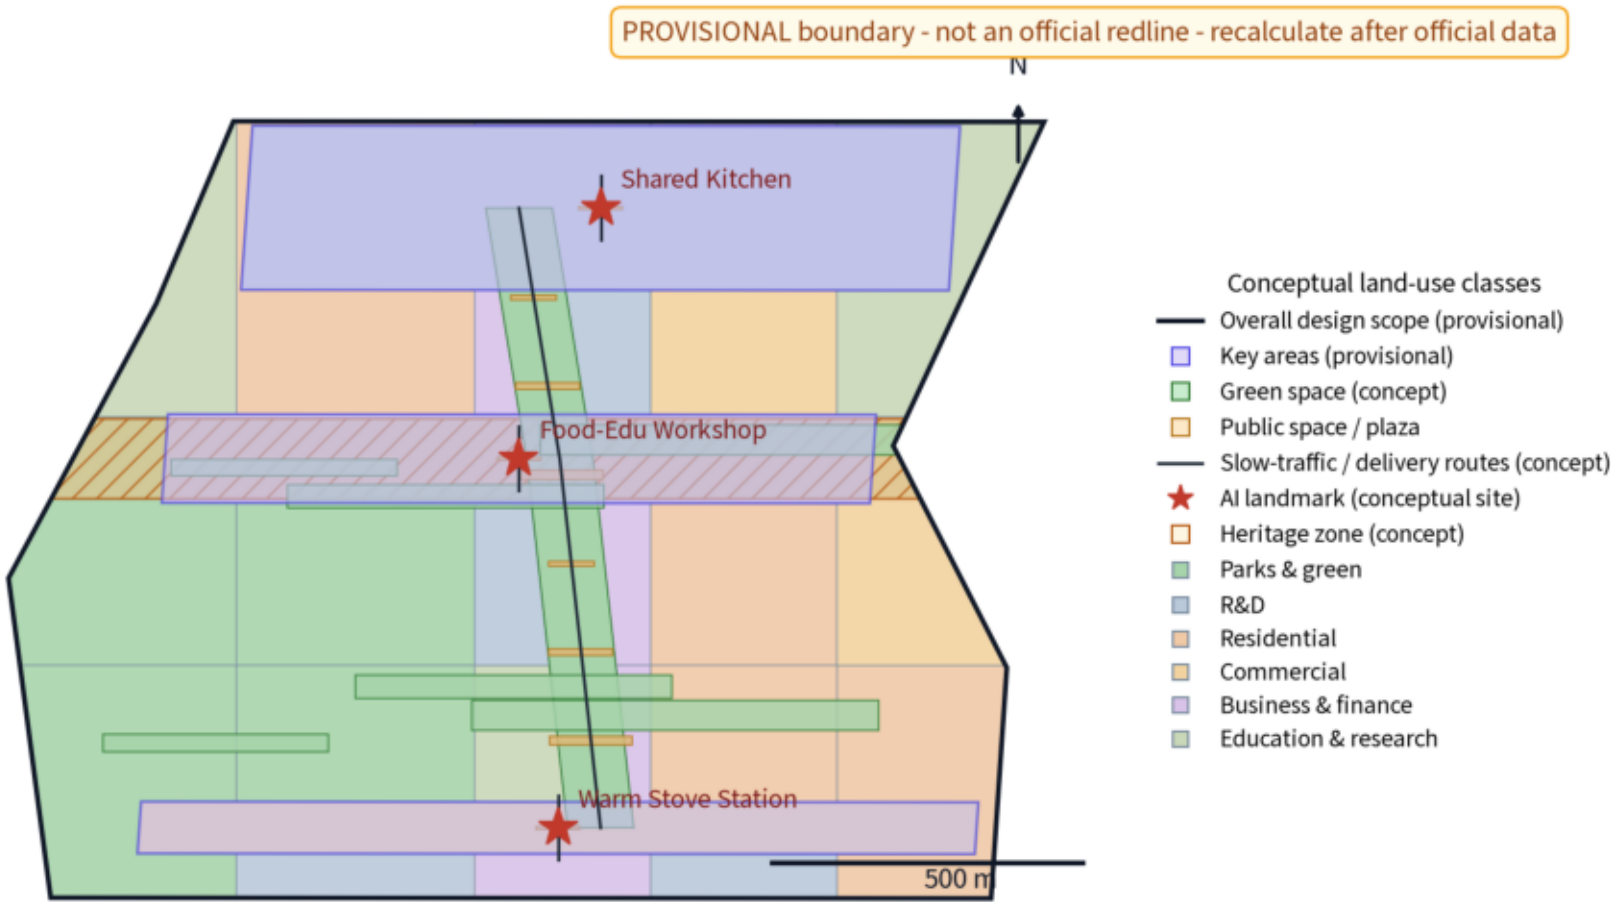

Three-tier scopes (official text caliber): coordinated study approx 43.6 km<sup>2</sup> - overall design approx 11.4 km<sup>2</sup> - key areas approx 368.4 ha total; this package covers the community-kitchen sub-scope within the overall design scope.

Core structure: one workshop, one garden, one stove (Shared Kitchen - Food-Education Workshop - Warm Stove Station); ten AI scenario cards; three test protocols; five mechanism elements

# Overall Design Overview & Land-Use Structure

## Overall design overview (provisional geometry)

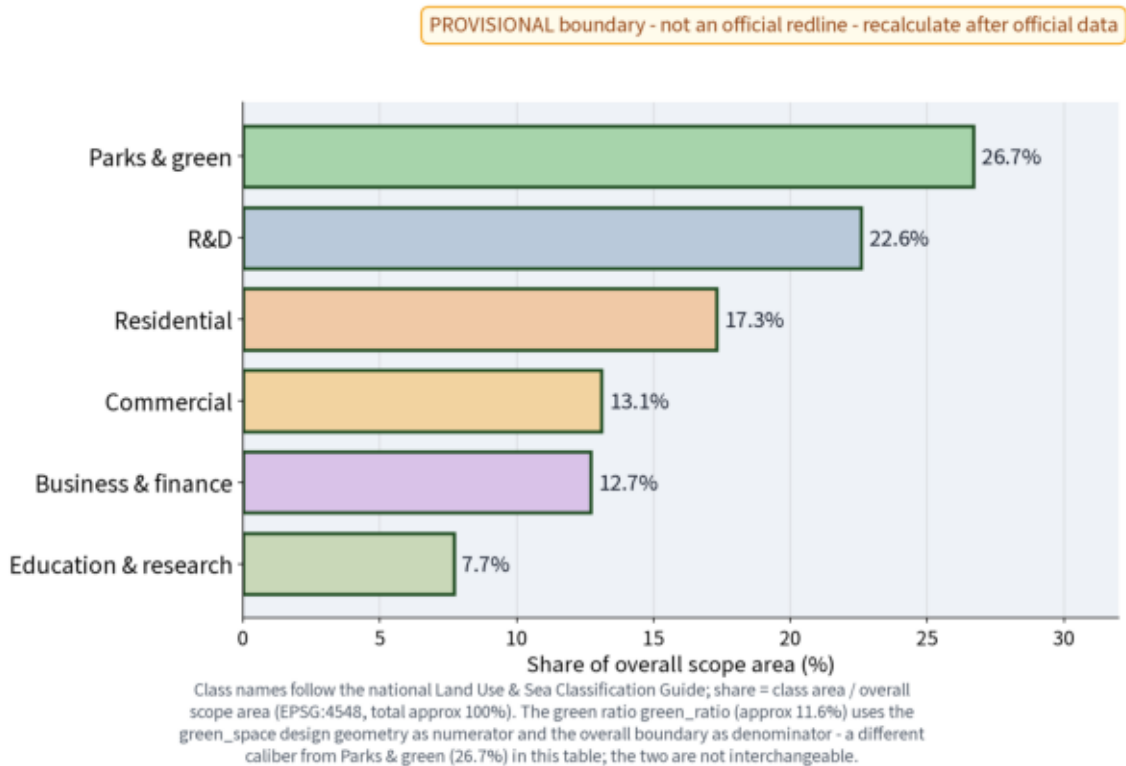

### Overall Design Overview - Community Kitchen & Meal-Service Network (provisional)

Areas and ratios are rounded concept values; recalculate by the declared formulas (EPSG:4548) after the organizer publishes official boundaries and baseline data.

## Conceptual land-use structure (single caliber)

### Conceptual Land-Use Structure (single caliber, areas recomputed from land\_use.geojson)

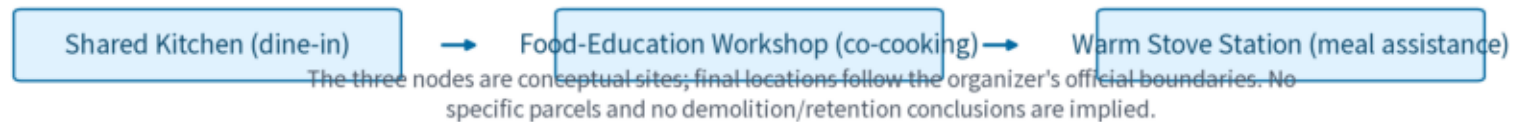

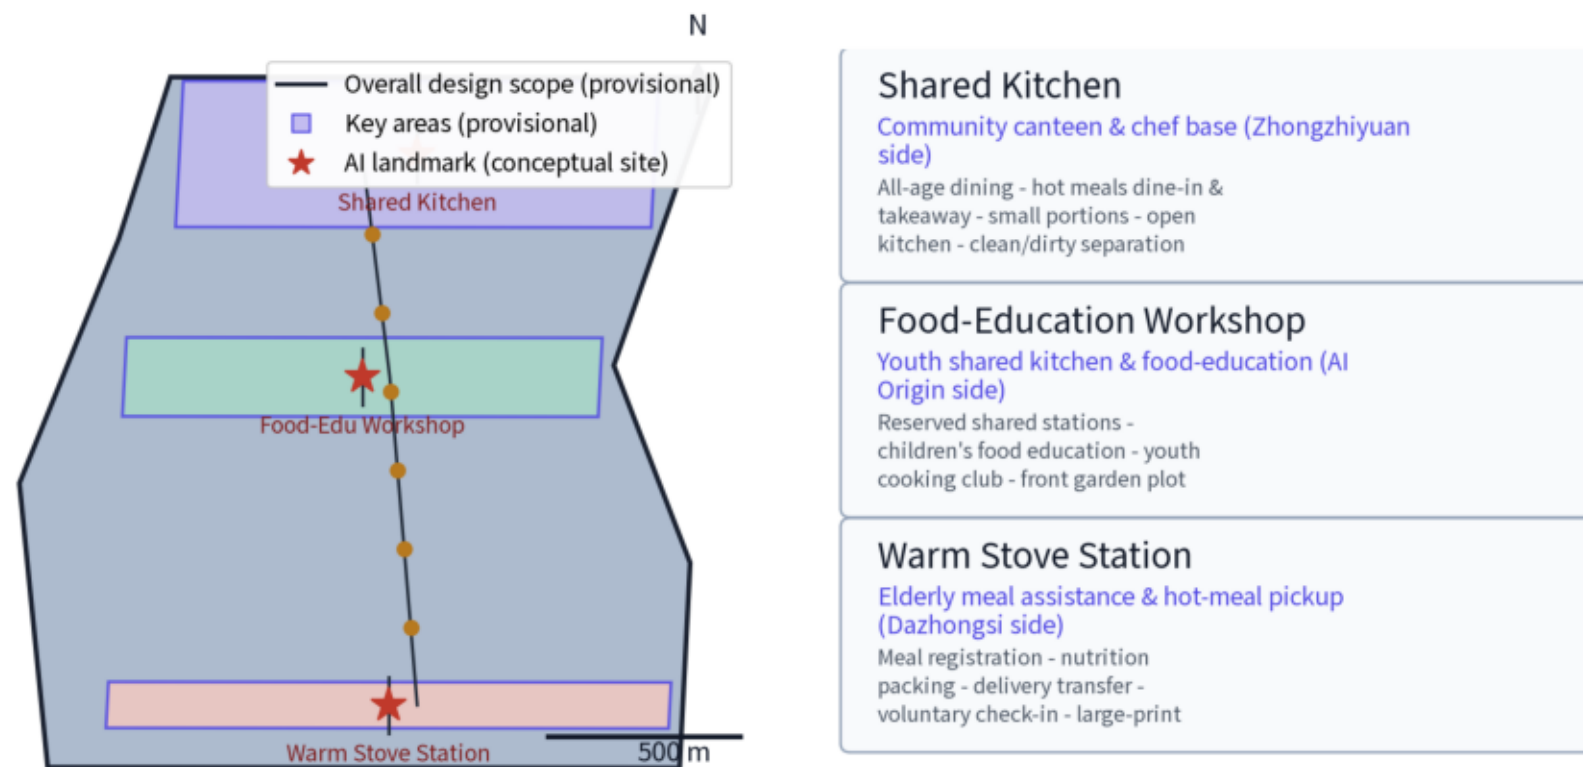

# Three Nodes & Mobility / Delivery / Blue-Green

## Three nodes: index and design tasks

### Three Nodes: Index & Design Tasks

PROVISIONAL boundary - not an official redline - recalculate after official data

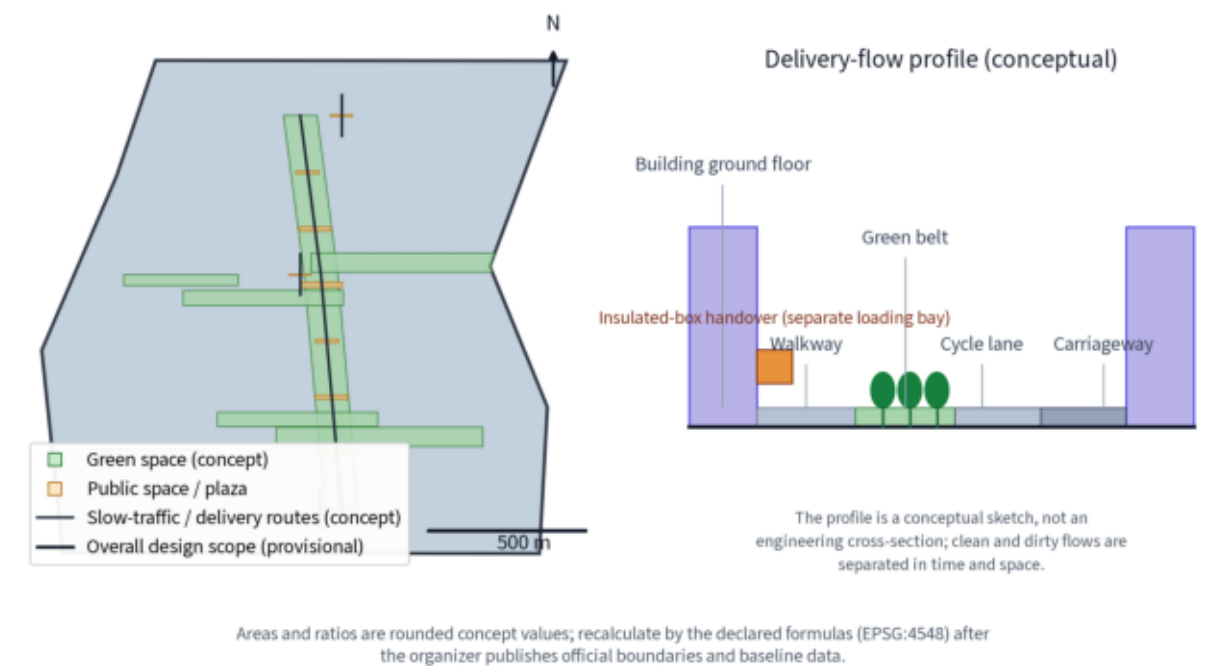

PROVISIONAL boundary - not an official redline - recalculate after official data

## Mobility, delivery & blue-green network

### Mobility, Delivery & Blue-Green Network (with delivery-flow profile)

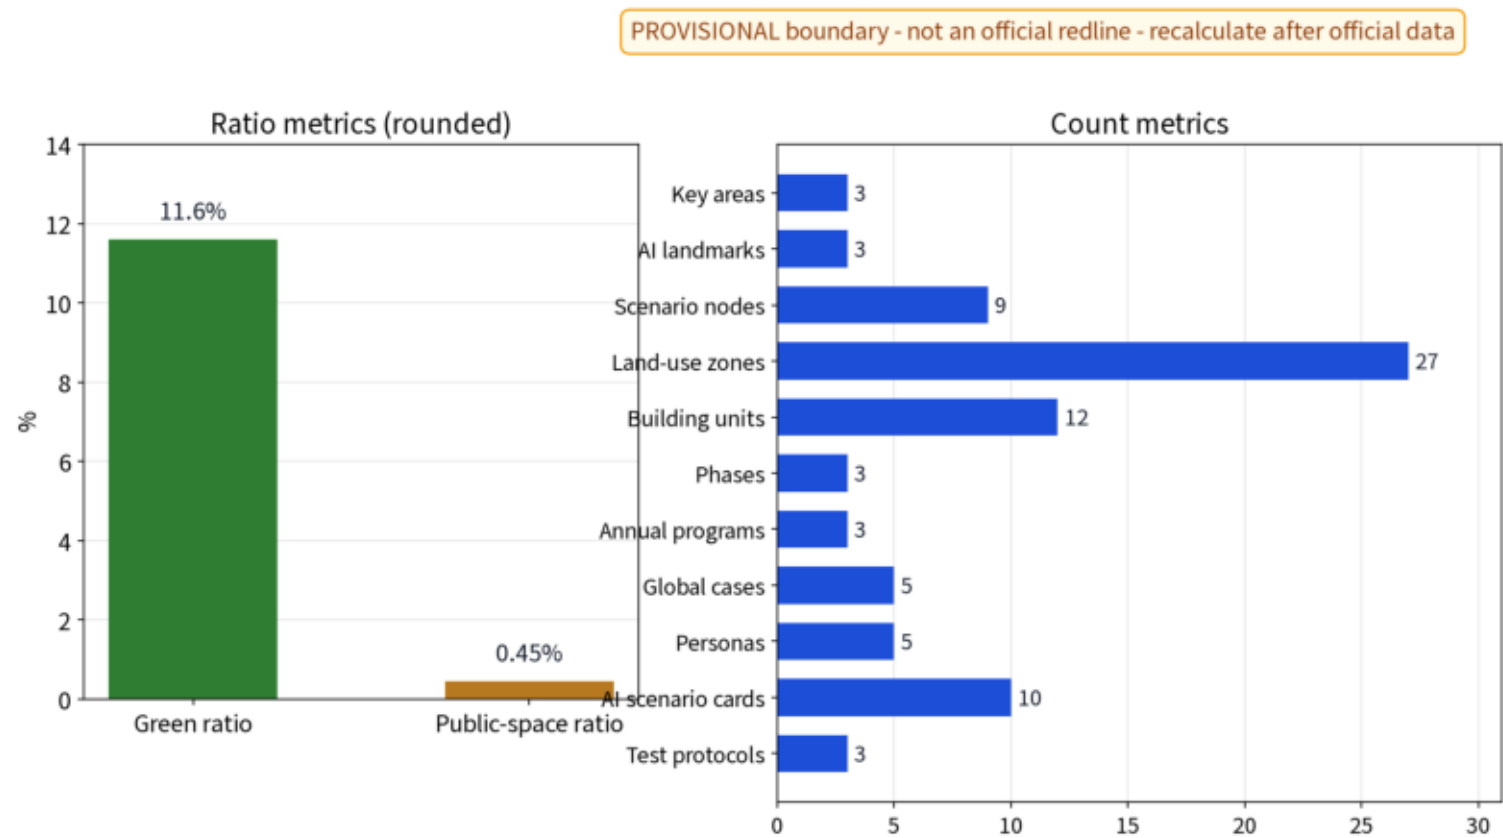

PROVISIONAL boundary - not an official redline - recalculate after official data

# Key Metrics & Regional Coordination

## Key metric evidence (ratios and counts on separate panels)

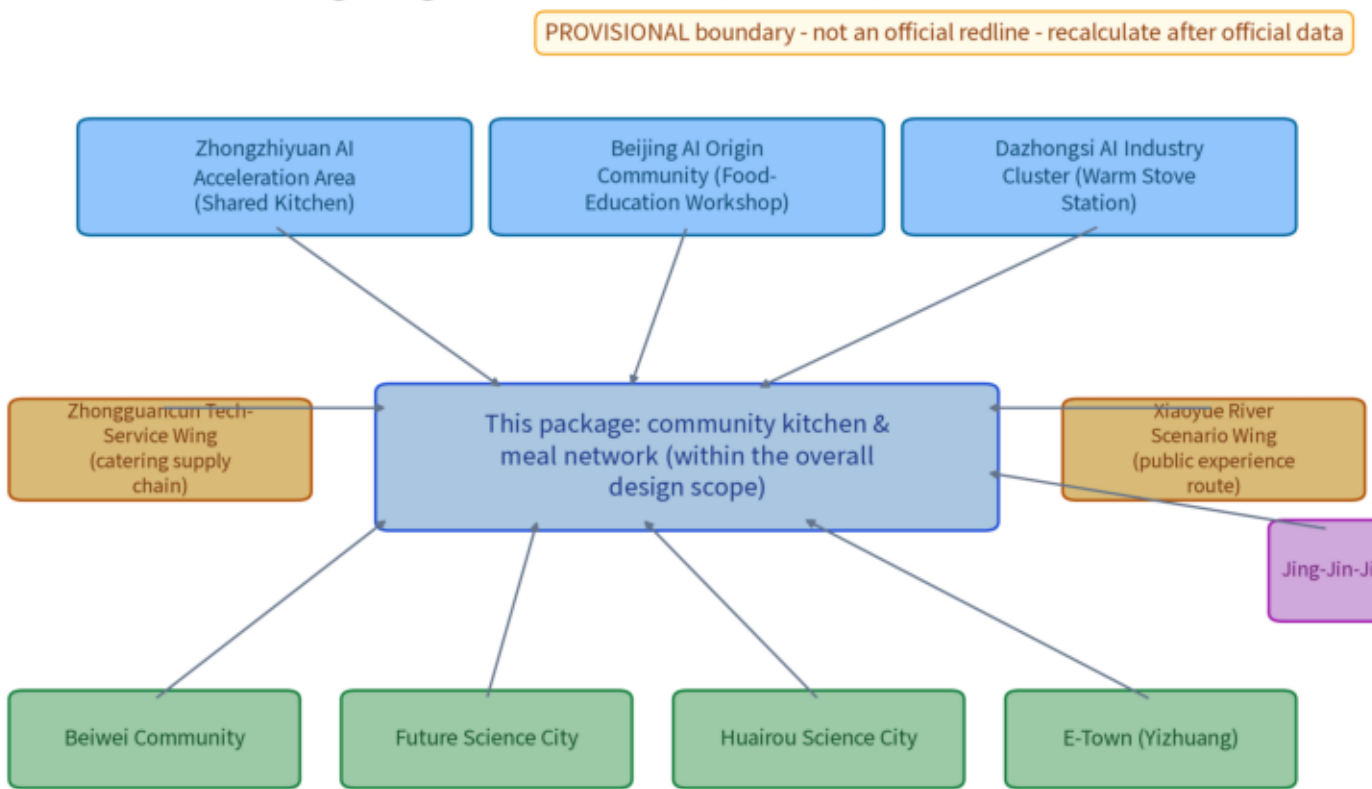

Key Metric Evidence (ratios and counts on separate panels, rounded)

Source: metrics.json and this package's geometry (EPSG:4548); formulas, confidence, use limits and recompute triggers are listed in the metrics table of proposal.md.

## Belt-level positioning & regional coordination (schematic)

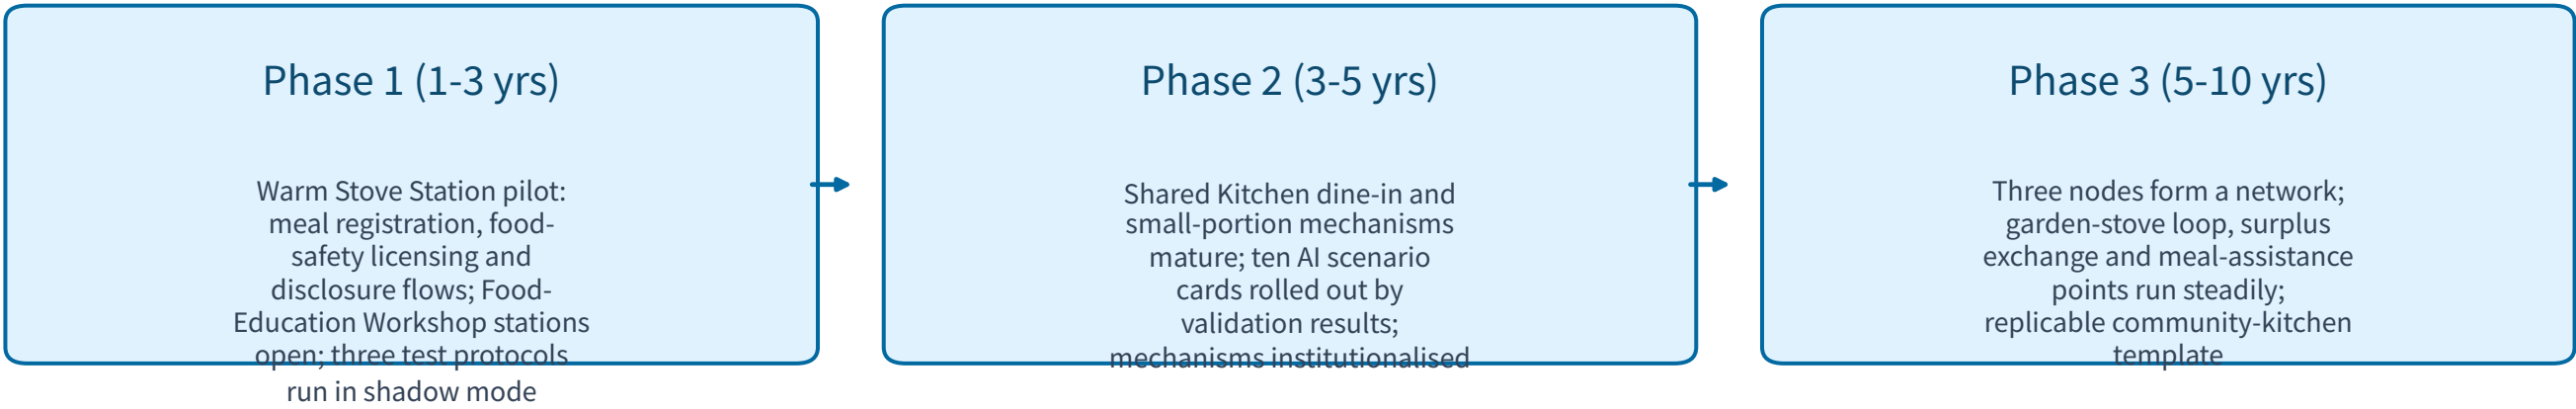

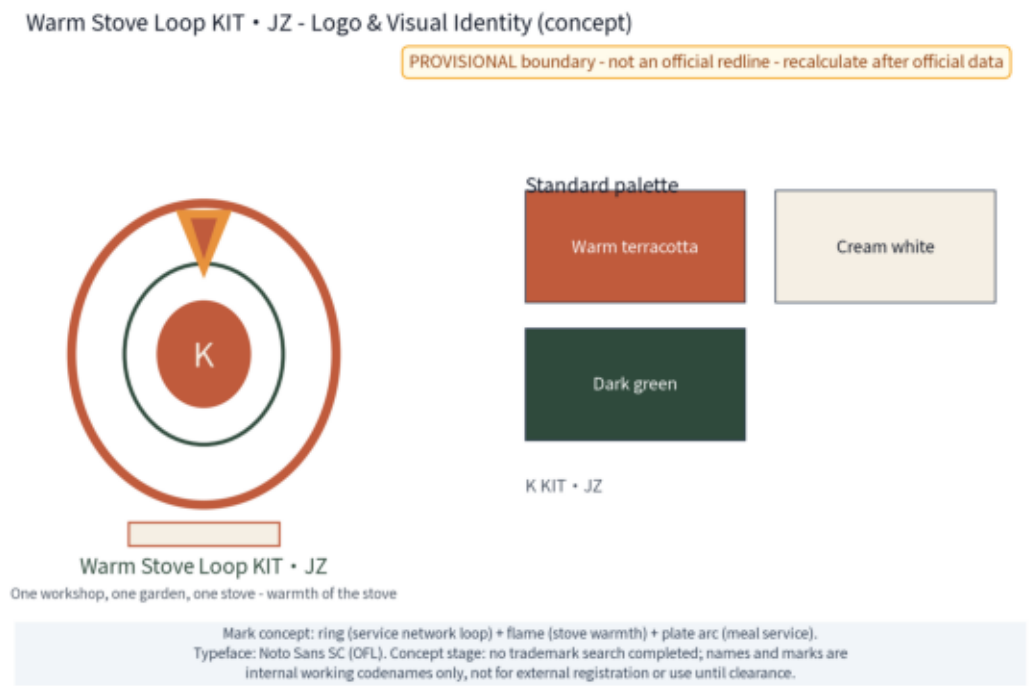

Belt-Level Positioning & Regional Coordination (schematic)

Schematic only; no administrative boundaries or precise relative positions. External coordination is a conceptual hypothesis to be confirmed when cooperation counterparts and intent data are verified.

# Warm Stove Loop KIT • JZ - Logo & Visual Identity (concept) - Phased Implementation

## Warm Stove Loop KIT • JZ - Logo & Visual Identity (concept)

Phasing is a conceptual rhythm, not an implementation commitment; every phase carries stop conditions (licensing, ownership, heritage, municipal capacity) with annual disclosure and resident feedback channels.
