

Jingzhang WeaveLine • Century Track Belt (Concept • A0 Board 1/2)

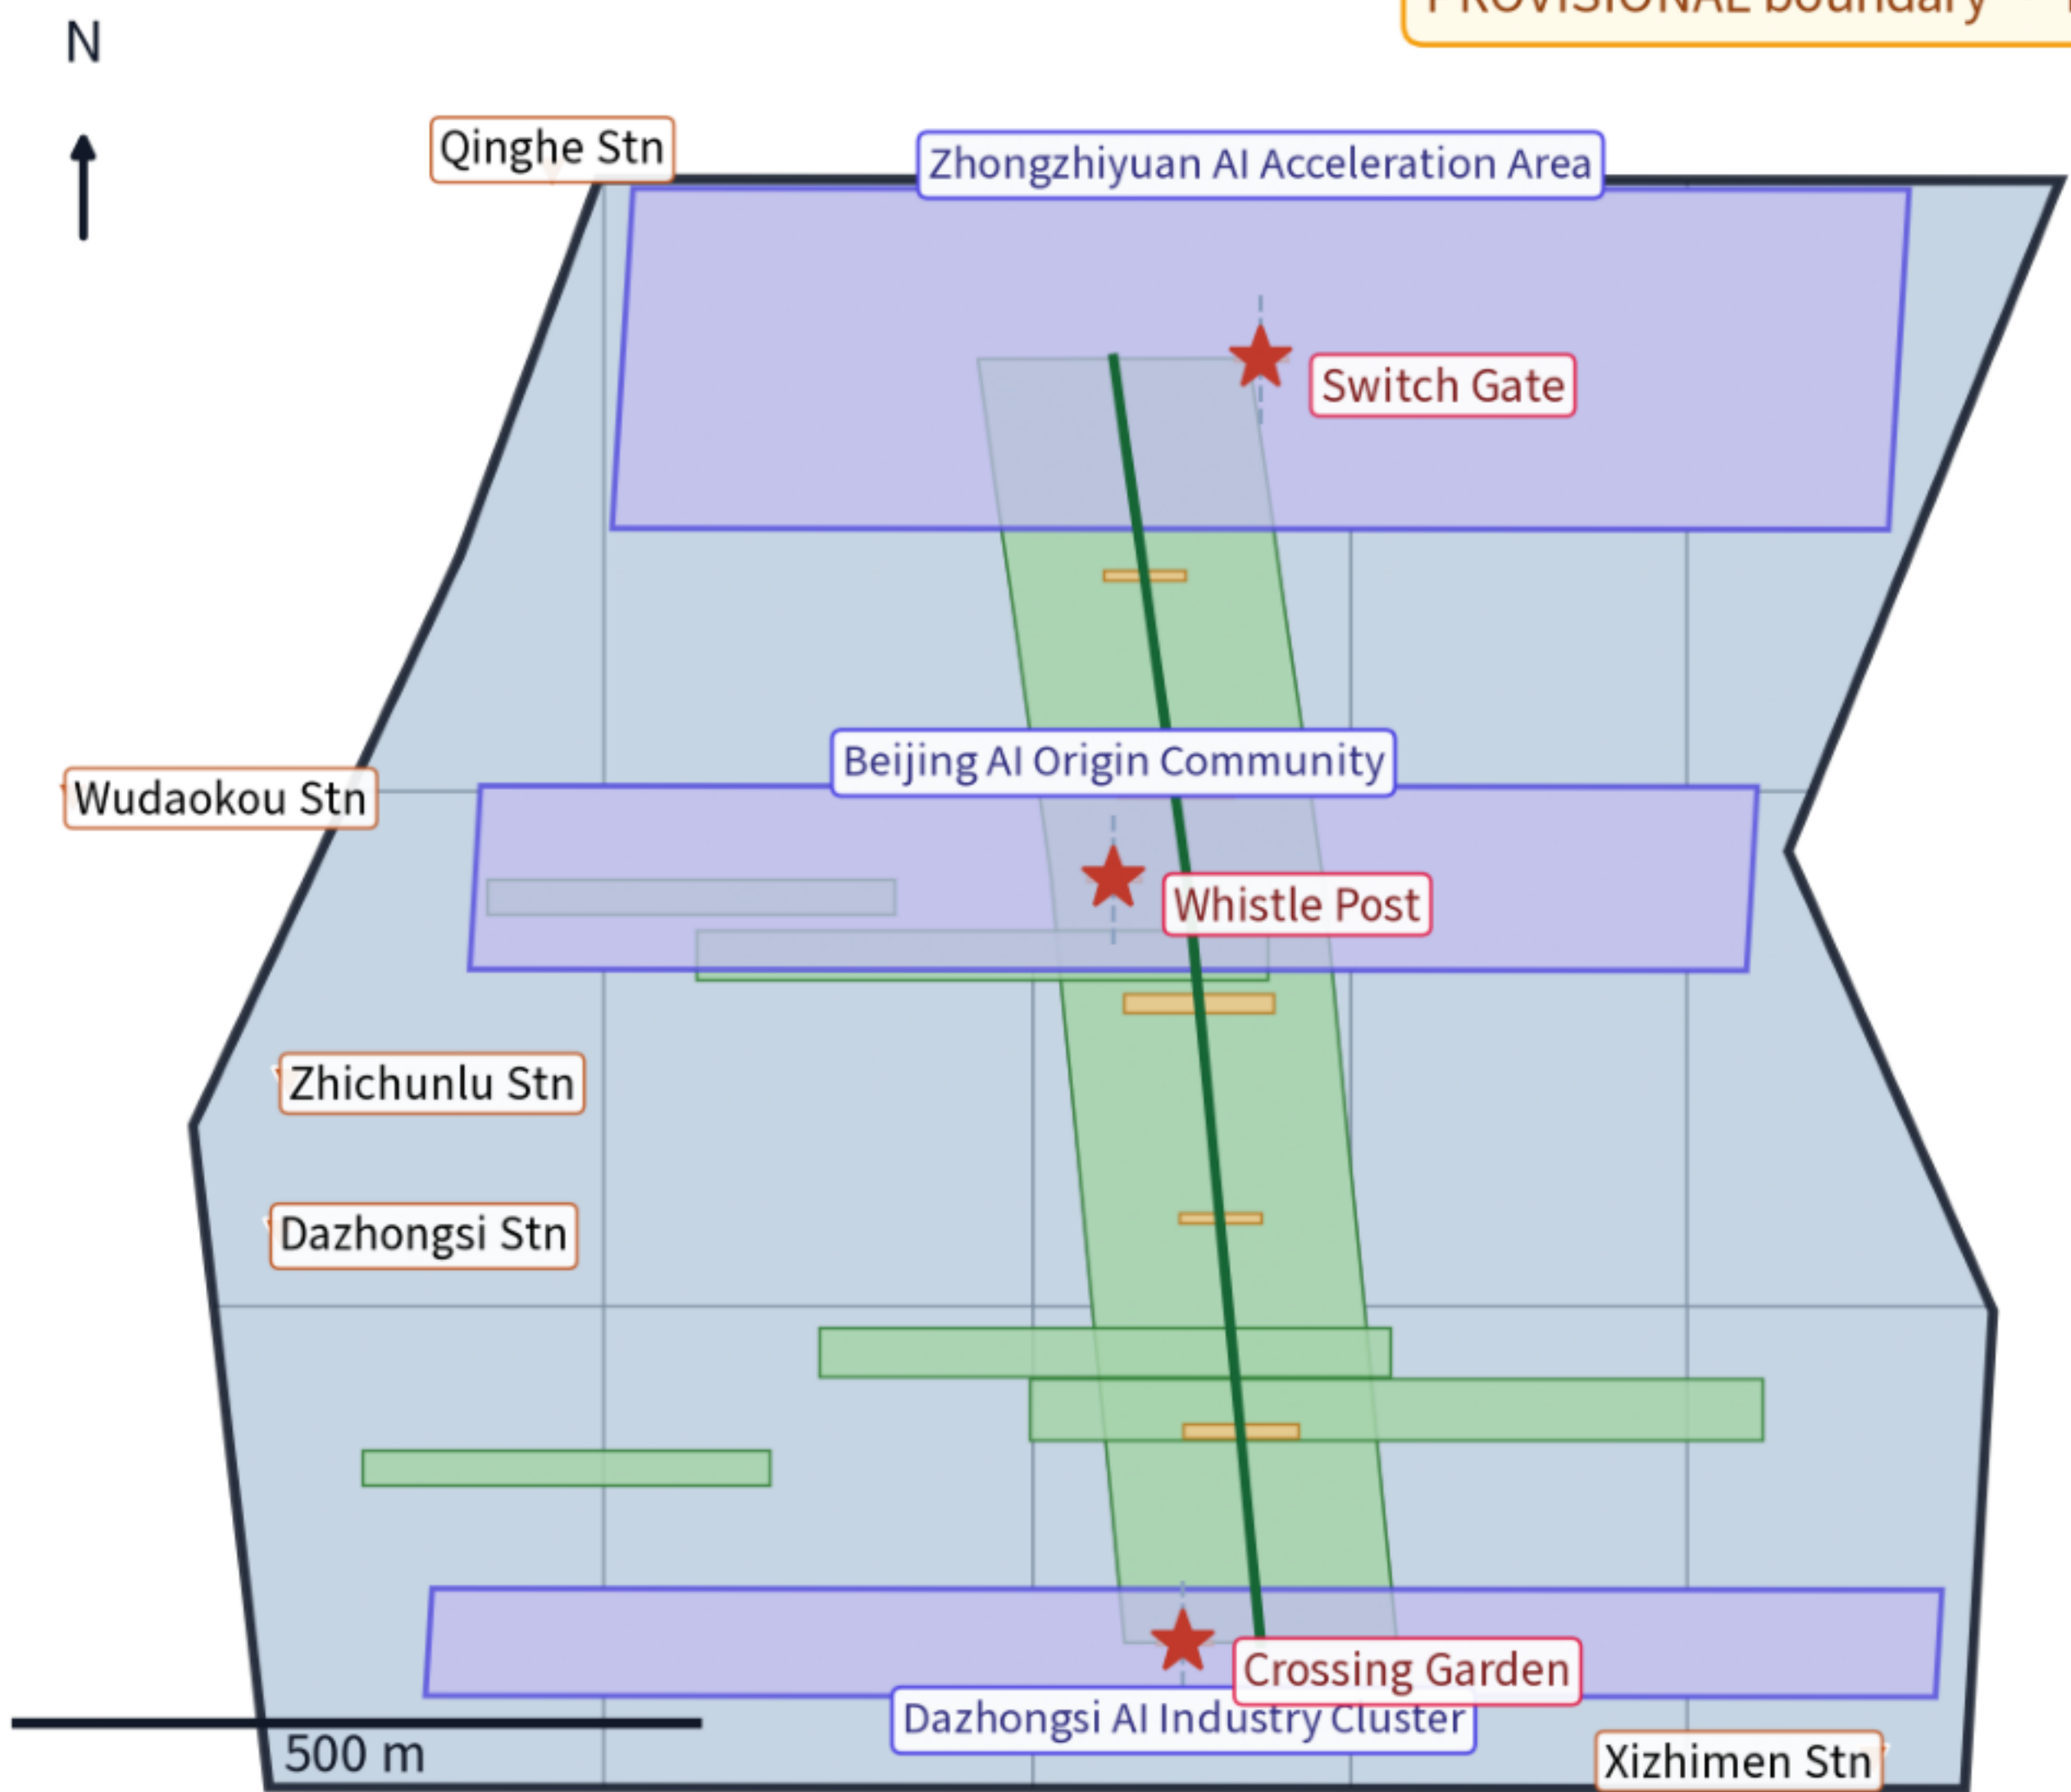

Warp tells history • weft weaves the city • AI threads the seams • three nodes • five AI domains; anonymized aggregation and human review only; three-tier scopes per official wording ($\approx 43.6\text{ km}^2$ / $\approx 11.4\text{ km}^2$ / $\approx 368.4\text{ ha}$)

PROVISIONAL boundary • not an official redline • recalculate after official data

Overall design overview (provisional)

Overall Design Overview — Jingzhang WeaveLine • Century Track Belt (provisional)

PROVISIONAL boundary • not an official redline • recalculate after official data

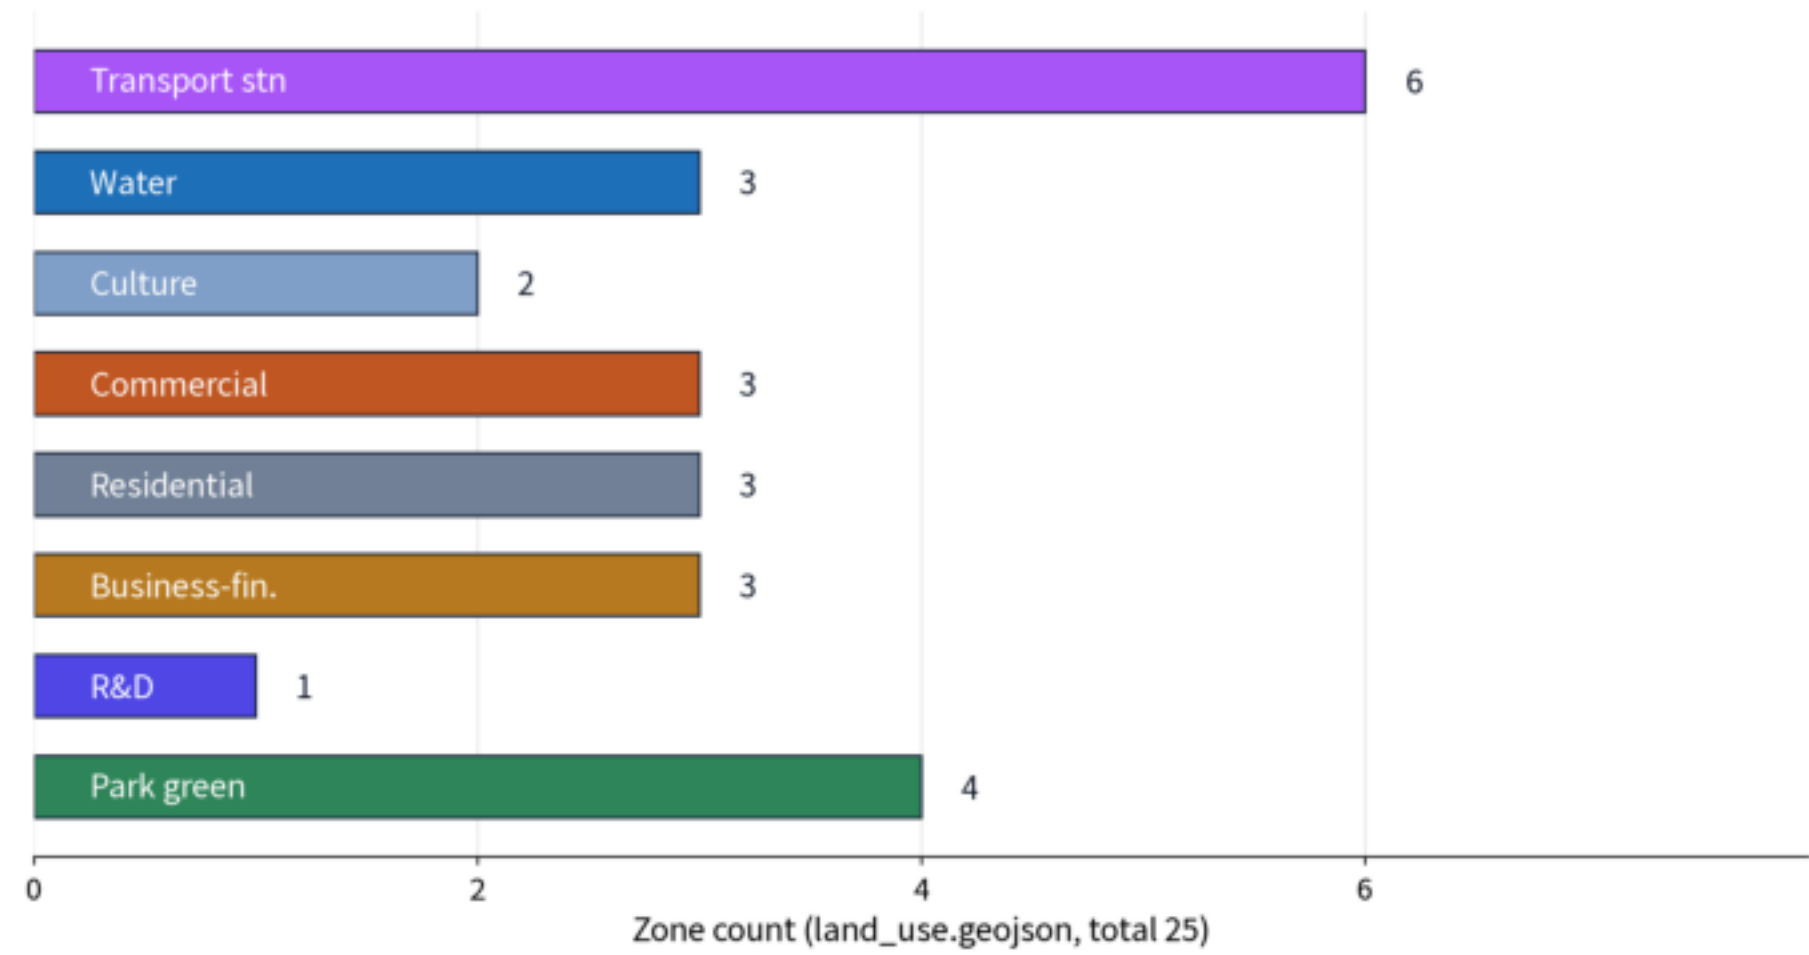

- Overall design scope (provisional)
- Concept land use (by class)
- Green space (concept)
- Public space
- Three key areas (provisional)
- Slow-traffic spine (concept)
- Rail stations (public names)
- AI landmark (concept point)

Three-tier scopes (official wording): coordinated study $\approx 43.6\text{ km}^2$ • overall design $\approx 11.4\text{ km}^2$ • key areas $\approx 368.4\text{ ha}$ total; this package covers a sub-scope inside the overall design scope; all geometry is a provisional concept model, recomputed after official data is published.

Conceptual land-use structure

Conceptual Land-Use Structure (single caliber: zone counts)

PROVISIONAL boundary • not an official redline • recalculate after official data

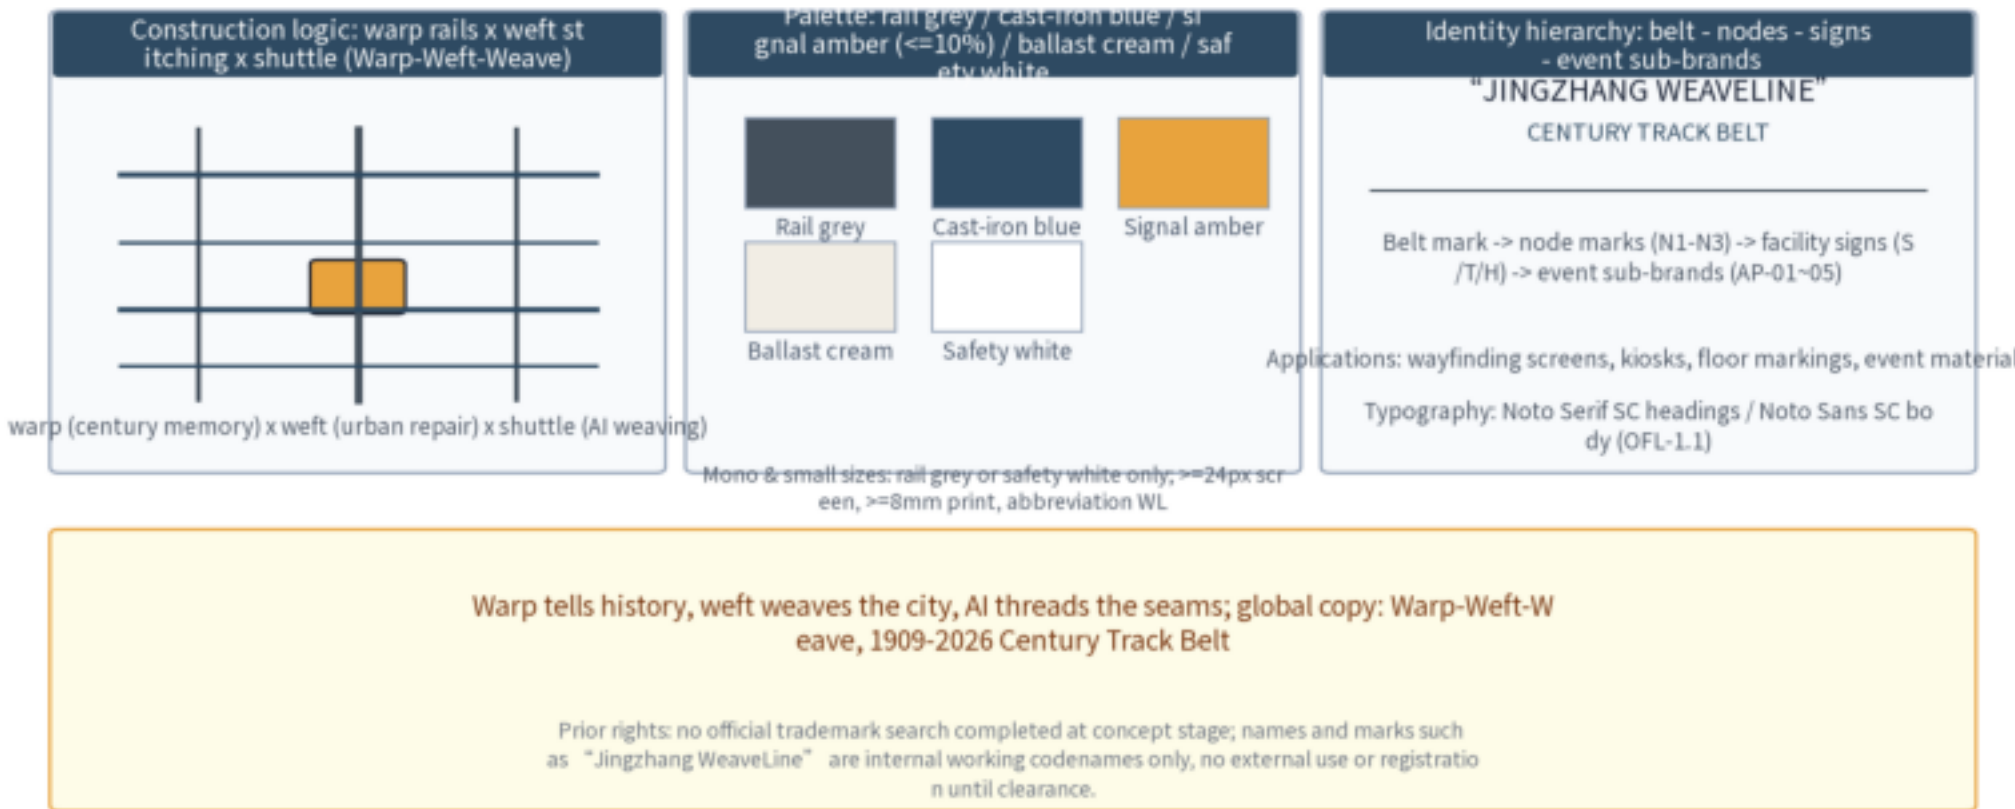

Land-use class names follow the current national Land Use & Sea Classification Guide; the share table in the land chapter (e.g. 1401 park green 27%, integers rounded) uses one caliber; this chart shows zone counts of the same layer; both differ from the green ratio (green_space layer caliber) and are not mutually derivable; recomputed after official data.

Logo & visual identity

Brand Visual Identity Direction (concept • internal working codename)

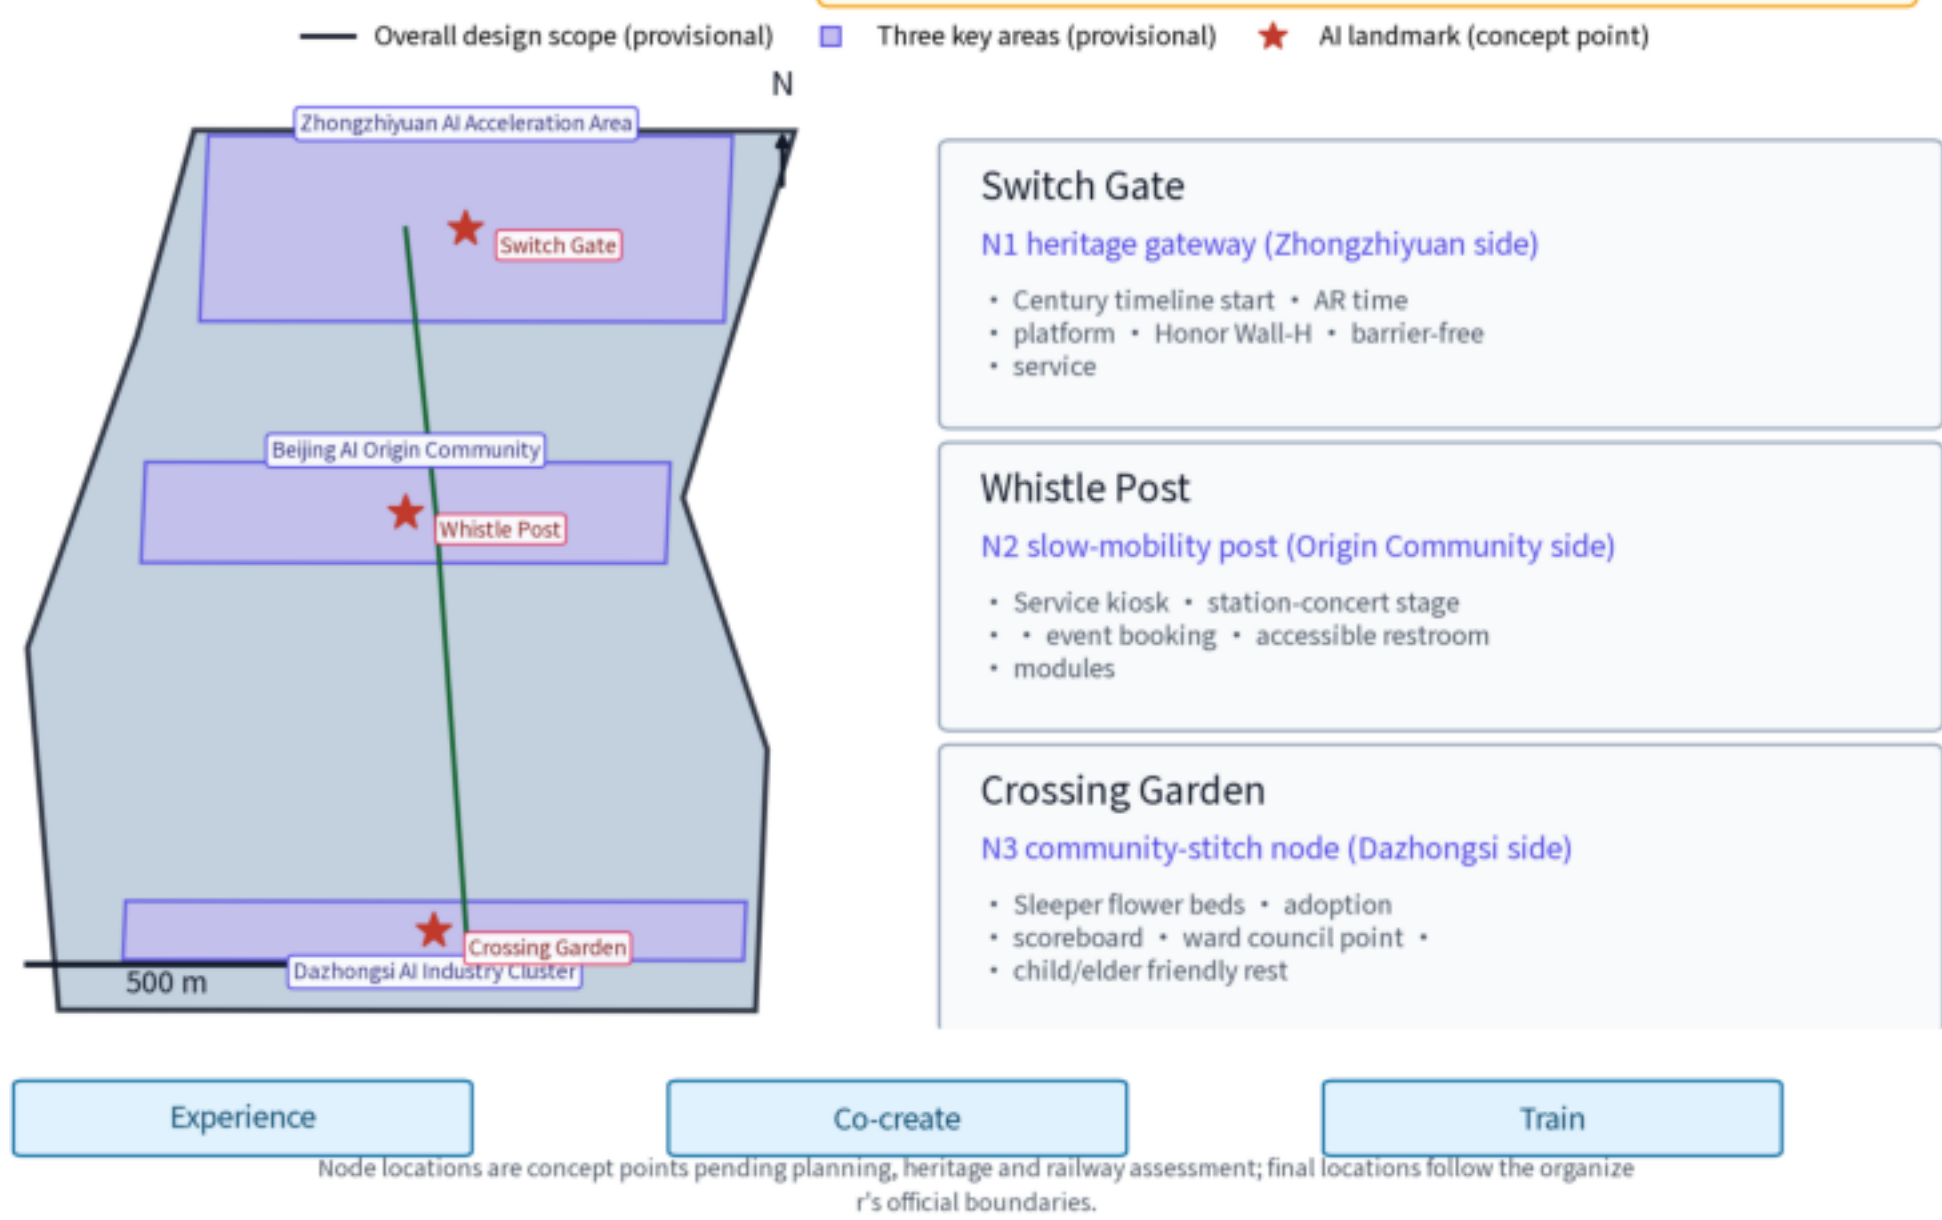

PROVISIONAL boundary • not an official redline • recalculate after official data

Three nodes: index & flow

Three Key Areas & Three-Node Index (concept points)

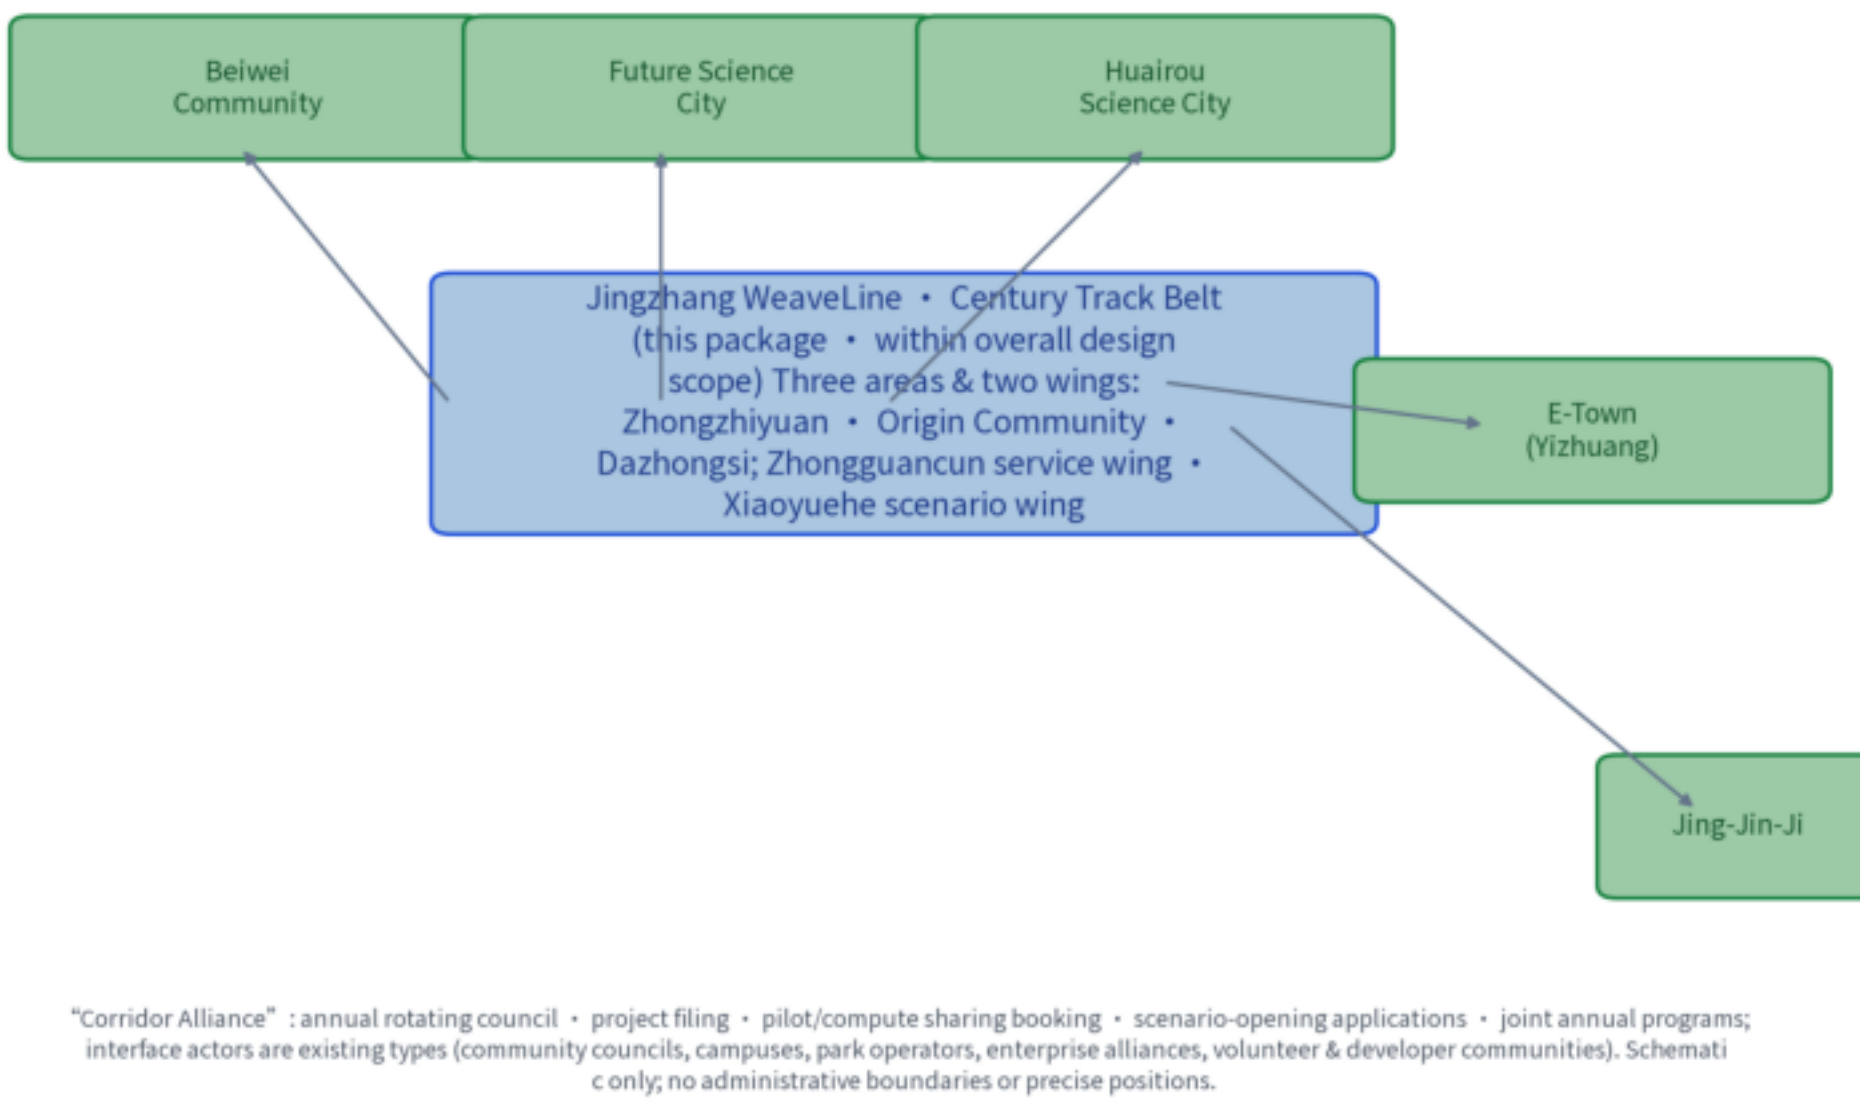

PROVISIONAL boundary • not an official redline • recalculate after official data

Regional synergy (schematic)

Regional Synergy Mechanism (concept • Corridor Alliance)

PROVISIONAL boundary • not an official redline • recalculate after official data

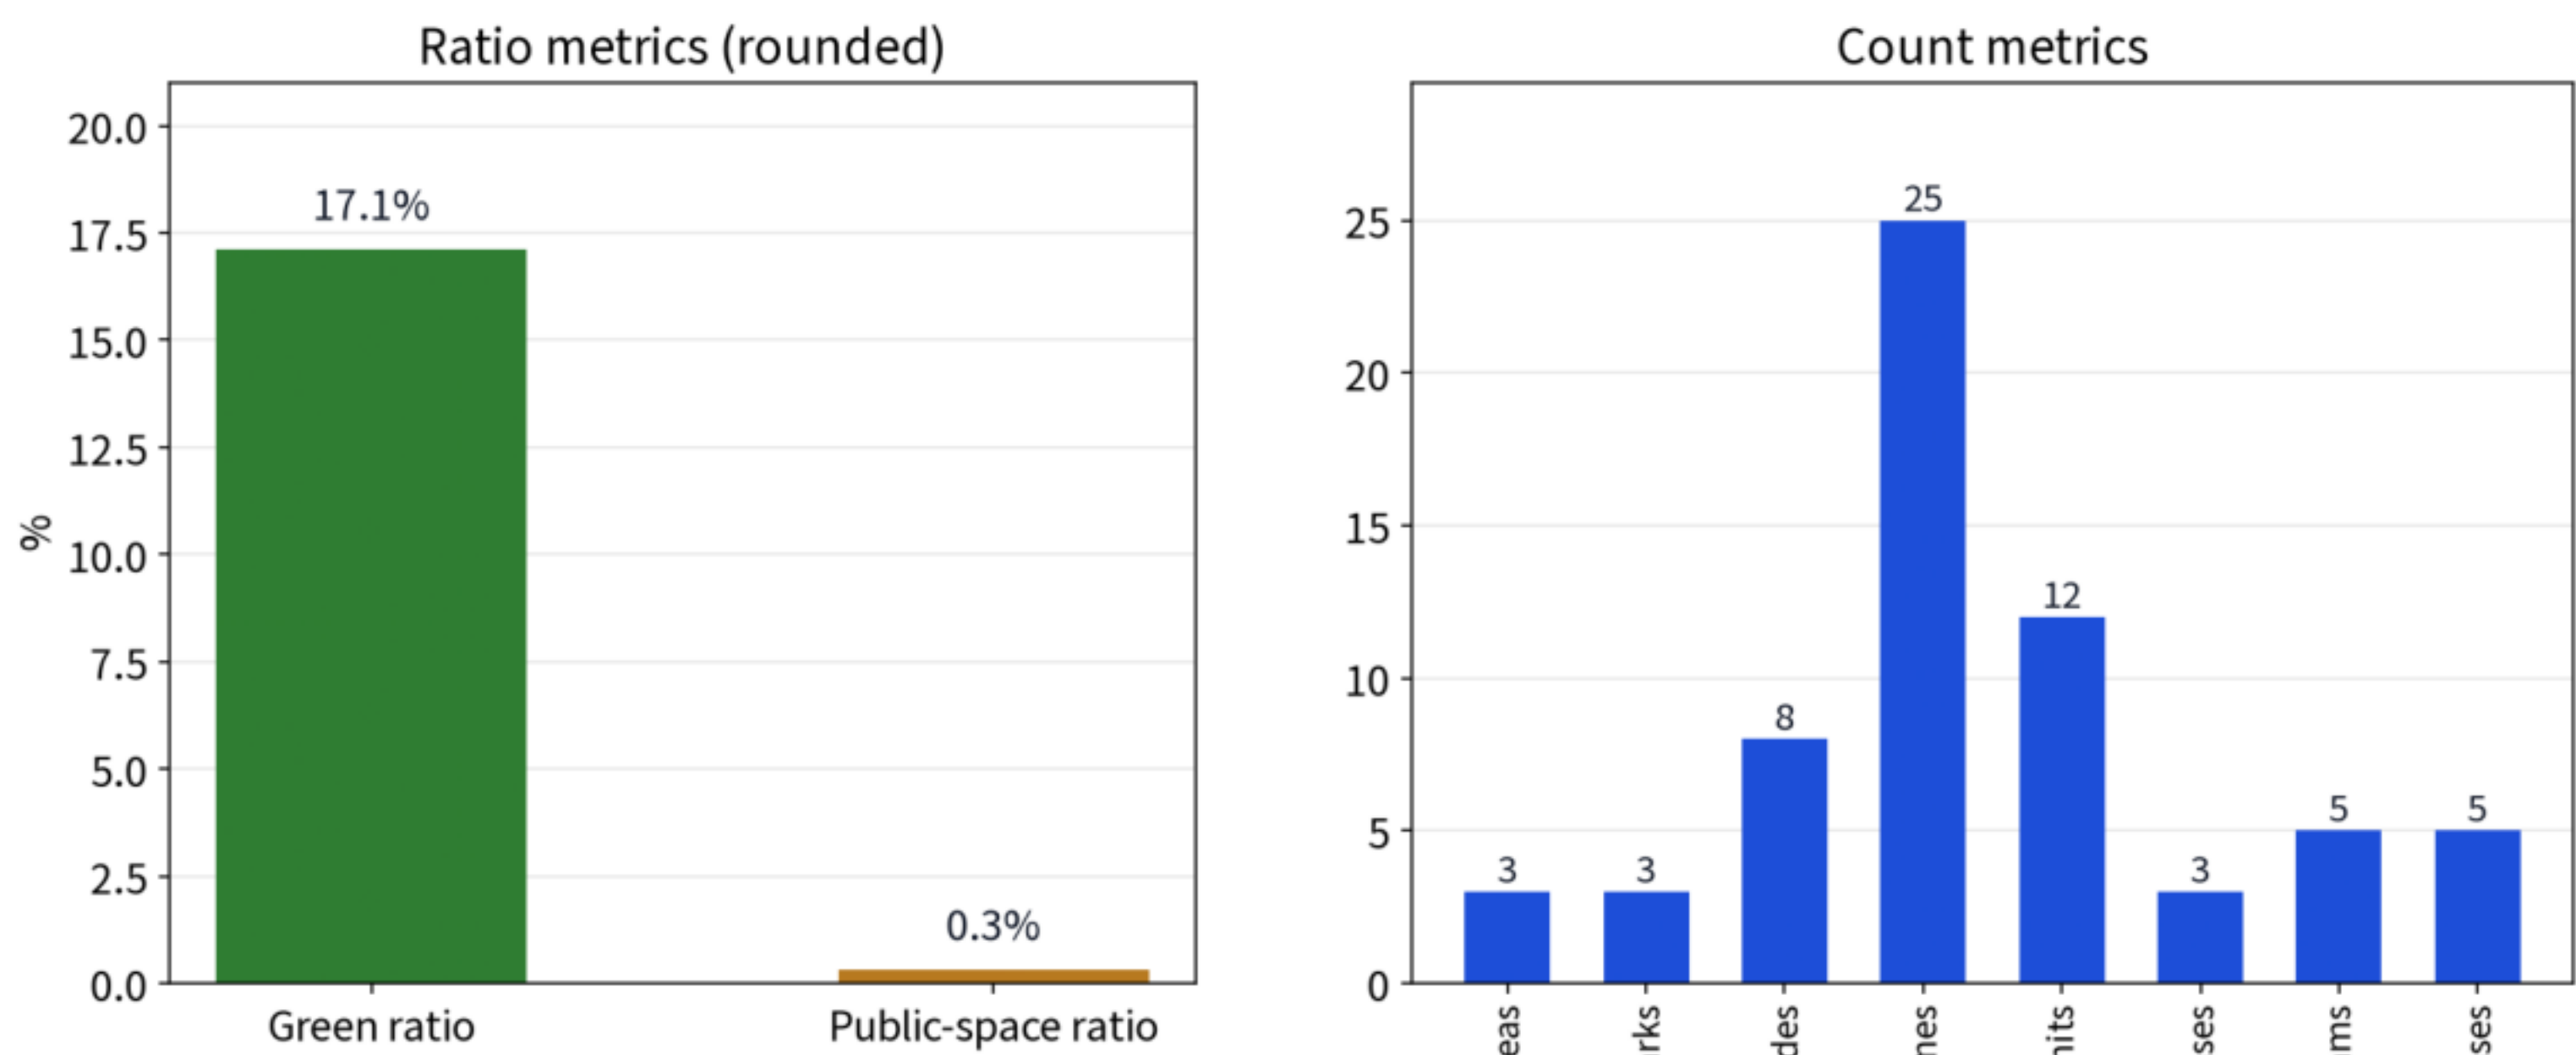

Jingzhang WeaveLine — Design Depth: Nodes • Land Use • Mobility (A0 Board 2/2)

PROVISIONAL boundary • not an official redline • recalculate after official data

Key metric evidence (ratios and counts on separate axes)

Key Metric Evidence (ratios and counts on separate axes, rounded)

PROVISIONAL boundary • not an official redline • recalculate after official data

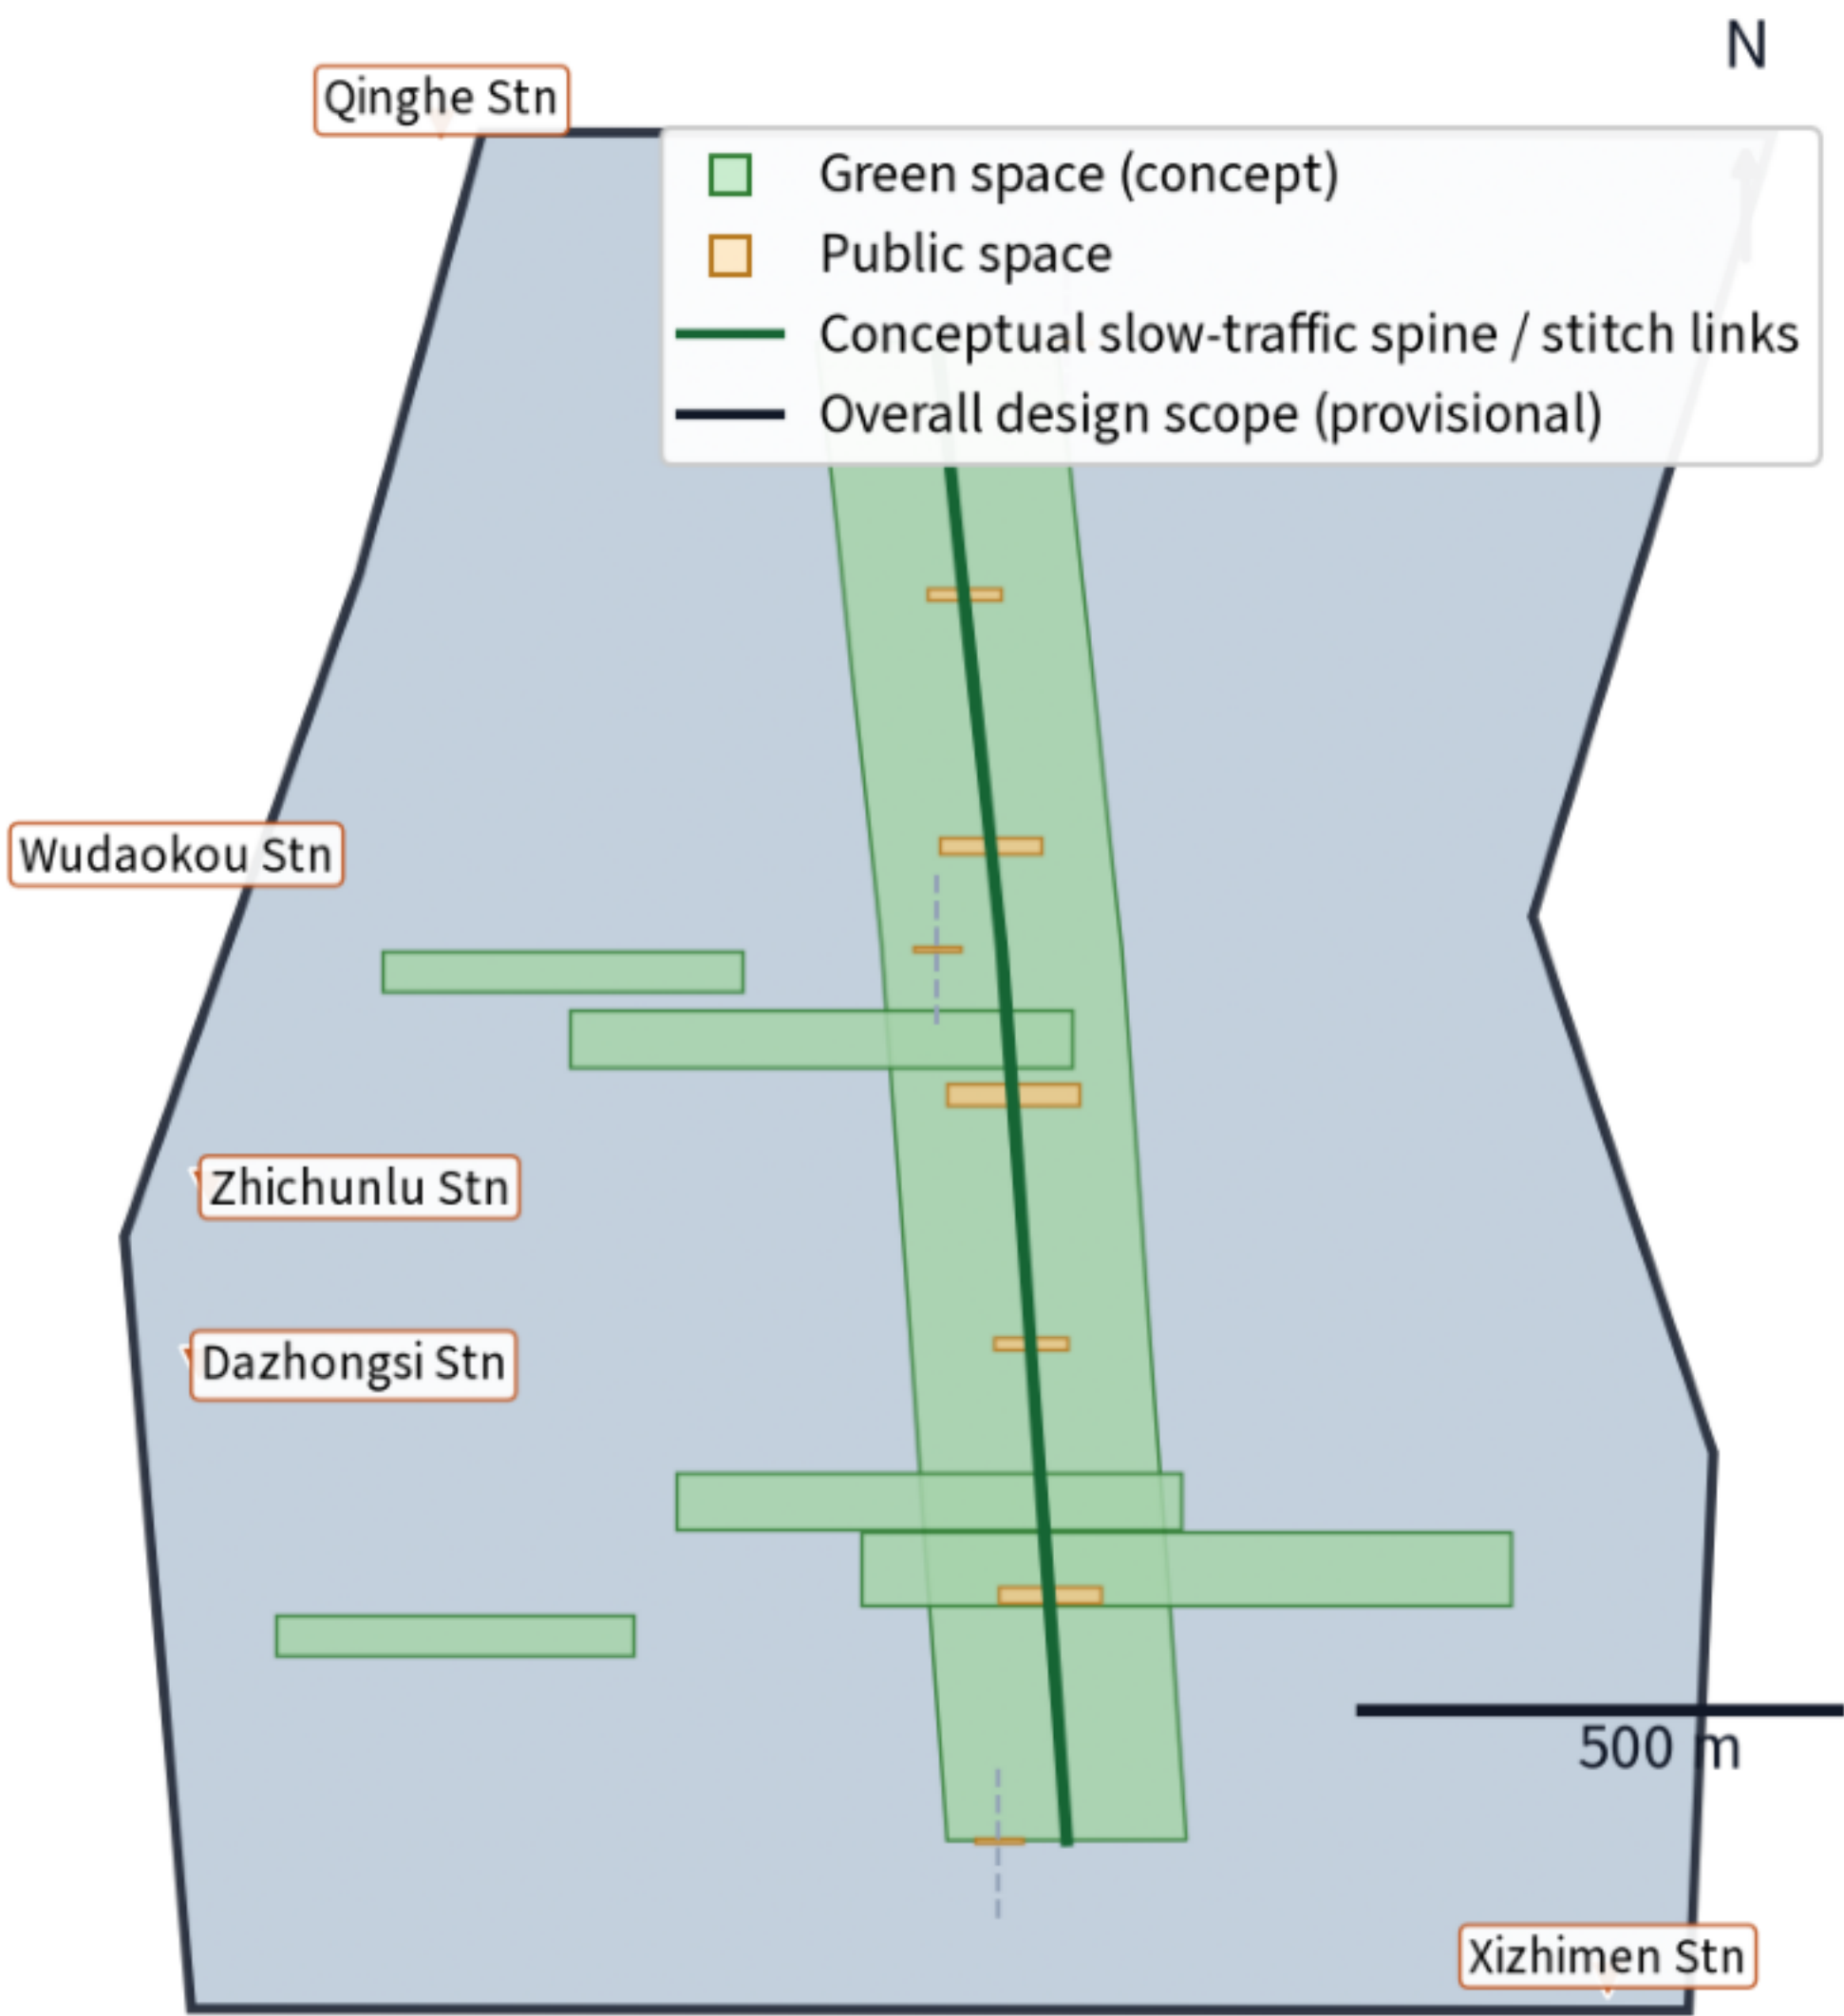

Calibre: green_ratio ≈ 17.1% is the green-space geometry layer caliber, distinct from the land-use 1401 park-green 27% share (not mutually derivable); ratios and counts are on separate axes; all values are provisional concept figures with formulas, confidence and recompute triggers in proposal.md and metrics.json, recomputed after official data is published. Also persona_count=5, scenario_card_count=10, industry_test_scenario_count=3 (see proposal tables and metrics.json).

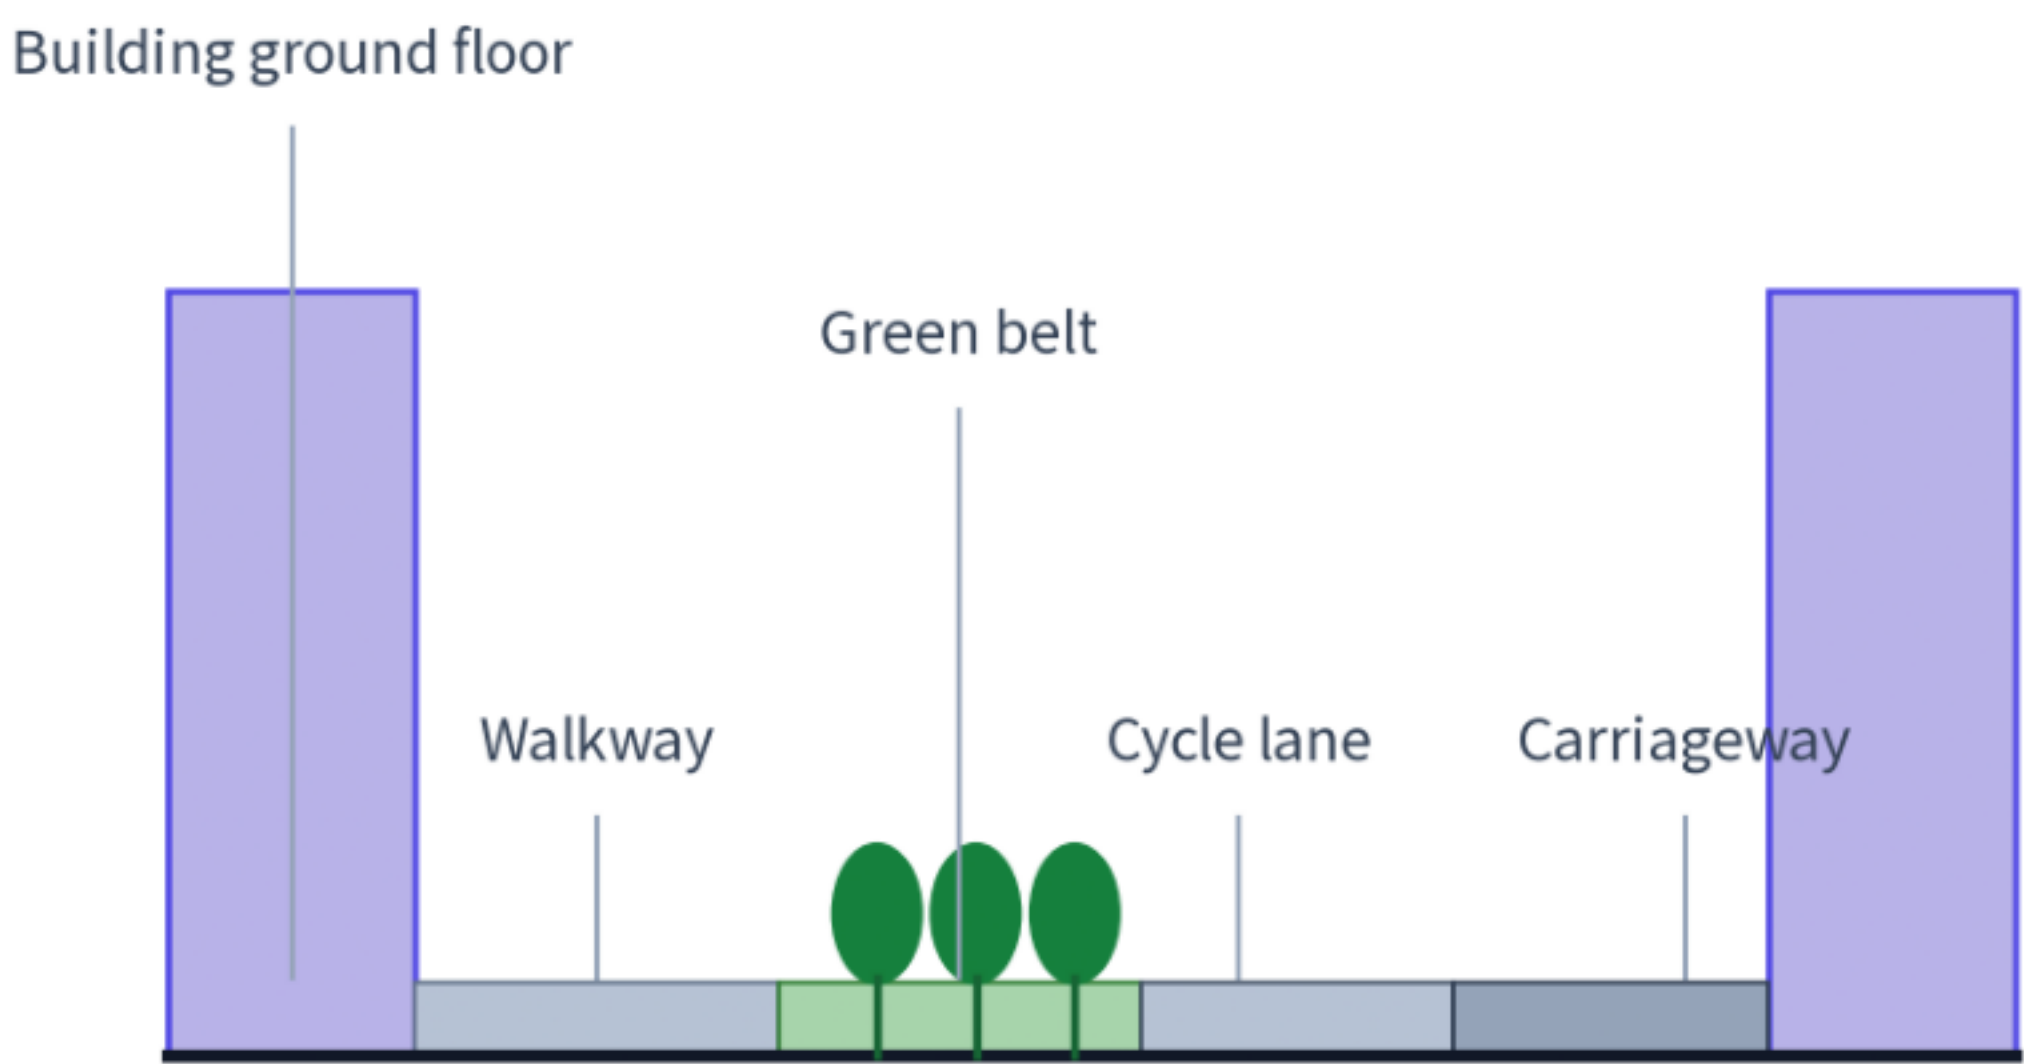

Mobility & blue-green (with section)

Slow Mobility & Blue-Green Network (with street section)

PROVISIONAL boundary • not an official redline • recalculate after official data

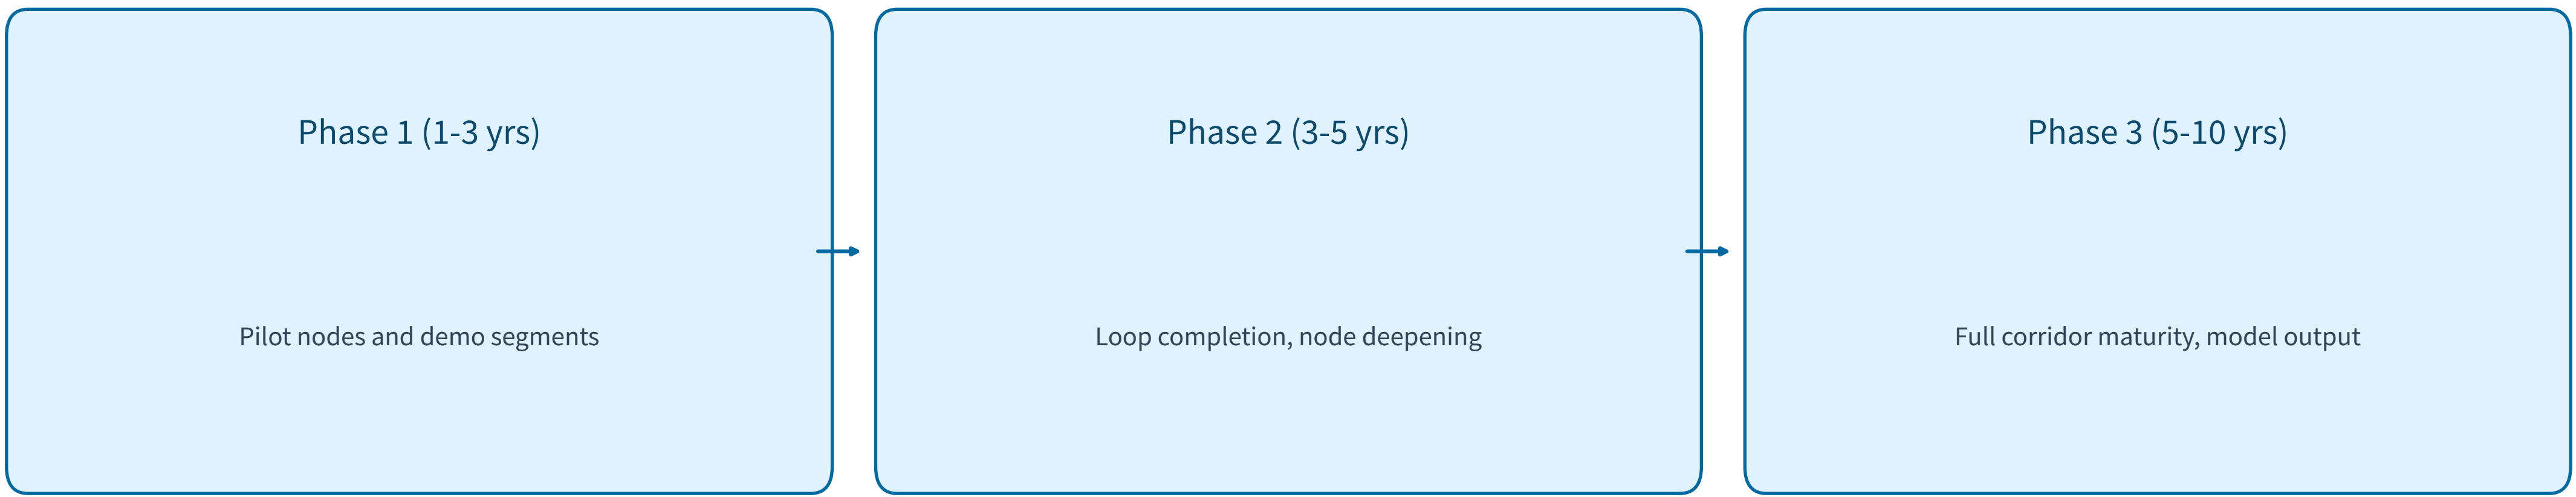

Street section (conceptual)

The section is a conceptual sketch, not an engineering cross-section; under-viaduct space uses the reversible component library.

Phasing and key mechanisms (concept)

Three-tier scopes (official wording): coordinated study ≈43.6 km² • overall design ≈11.4 km² • key areas ≈368.4 ha total; this package covers a sub-scope inside the overall design scope; all geometry is a provisional concept model, recomputed after official data is published.

Mechanisms: lean RACI (government coordinates / campus collaborates / enterprises operate / community oversees / volunteers backstop) • phase gates • stop & exit conditions • annual public disclosure and resident feedback channels
