

Waterfront AI ecological restoration + innovation living room + dual-use public space (concept)

Three tiers (announced)

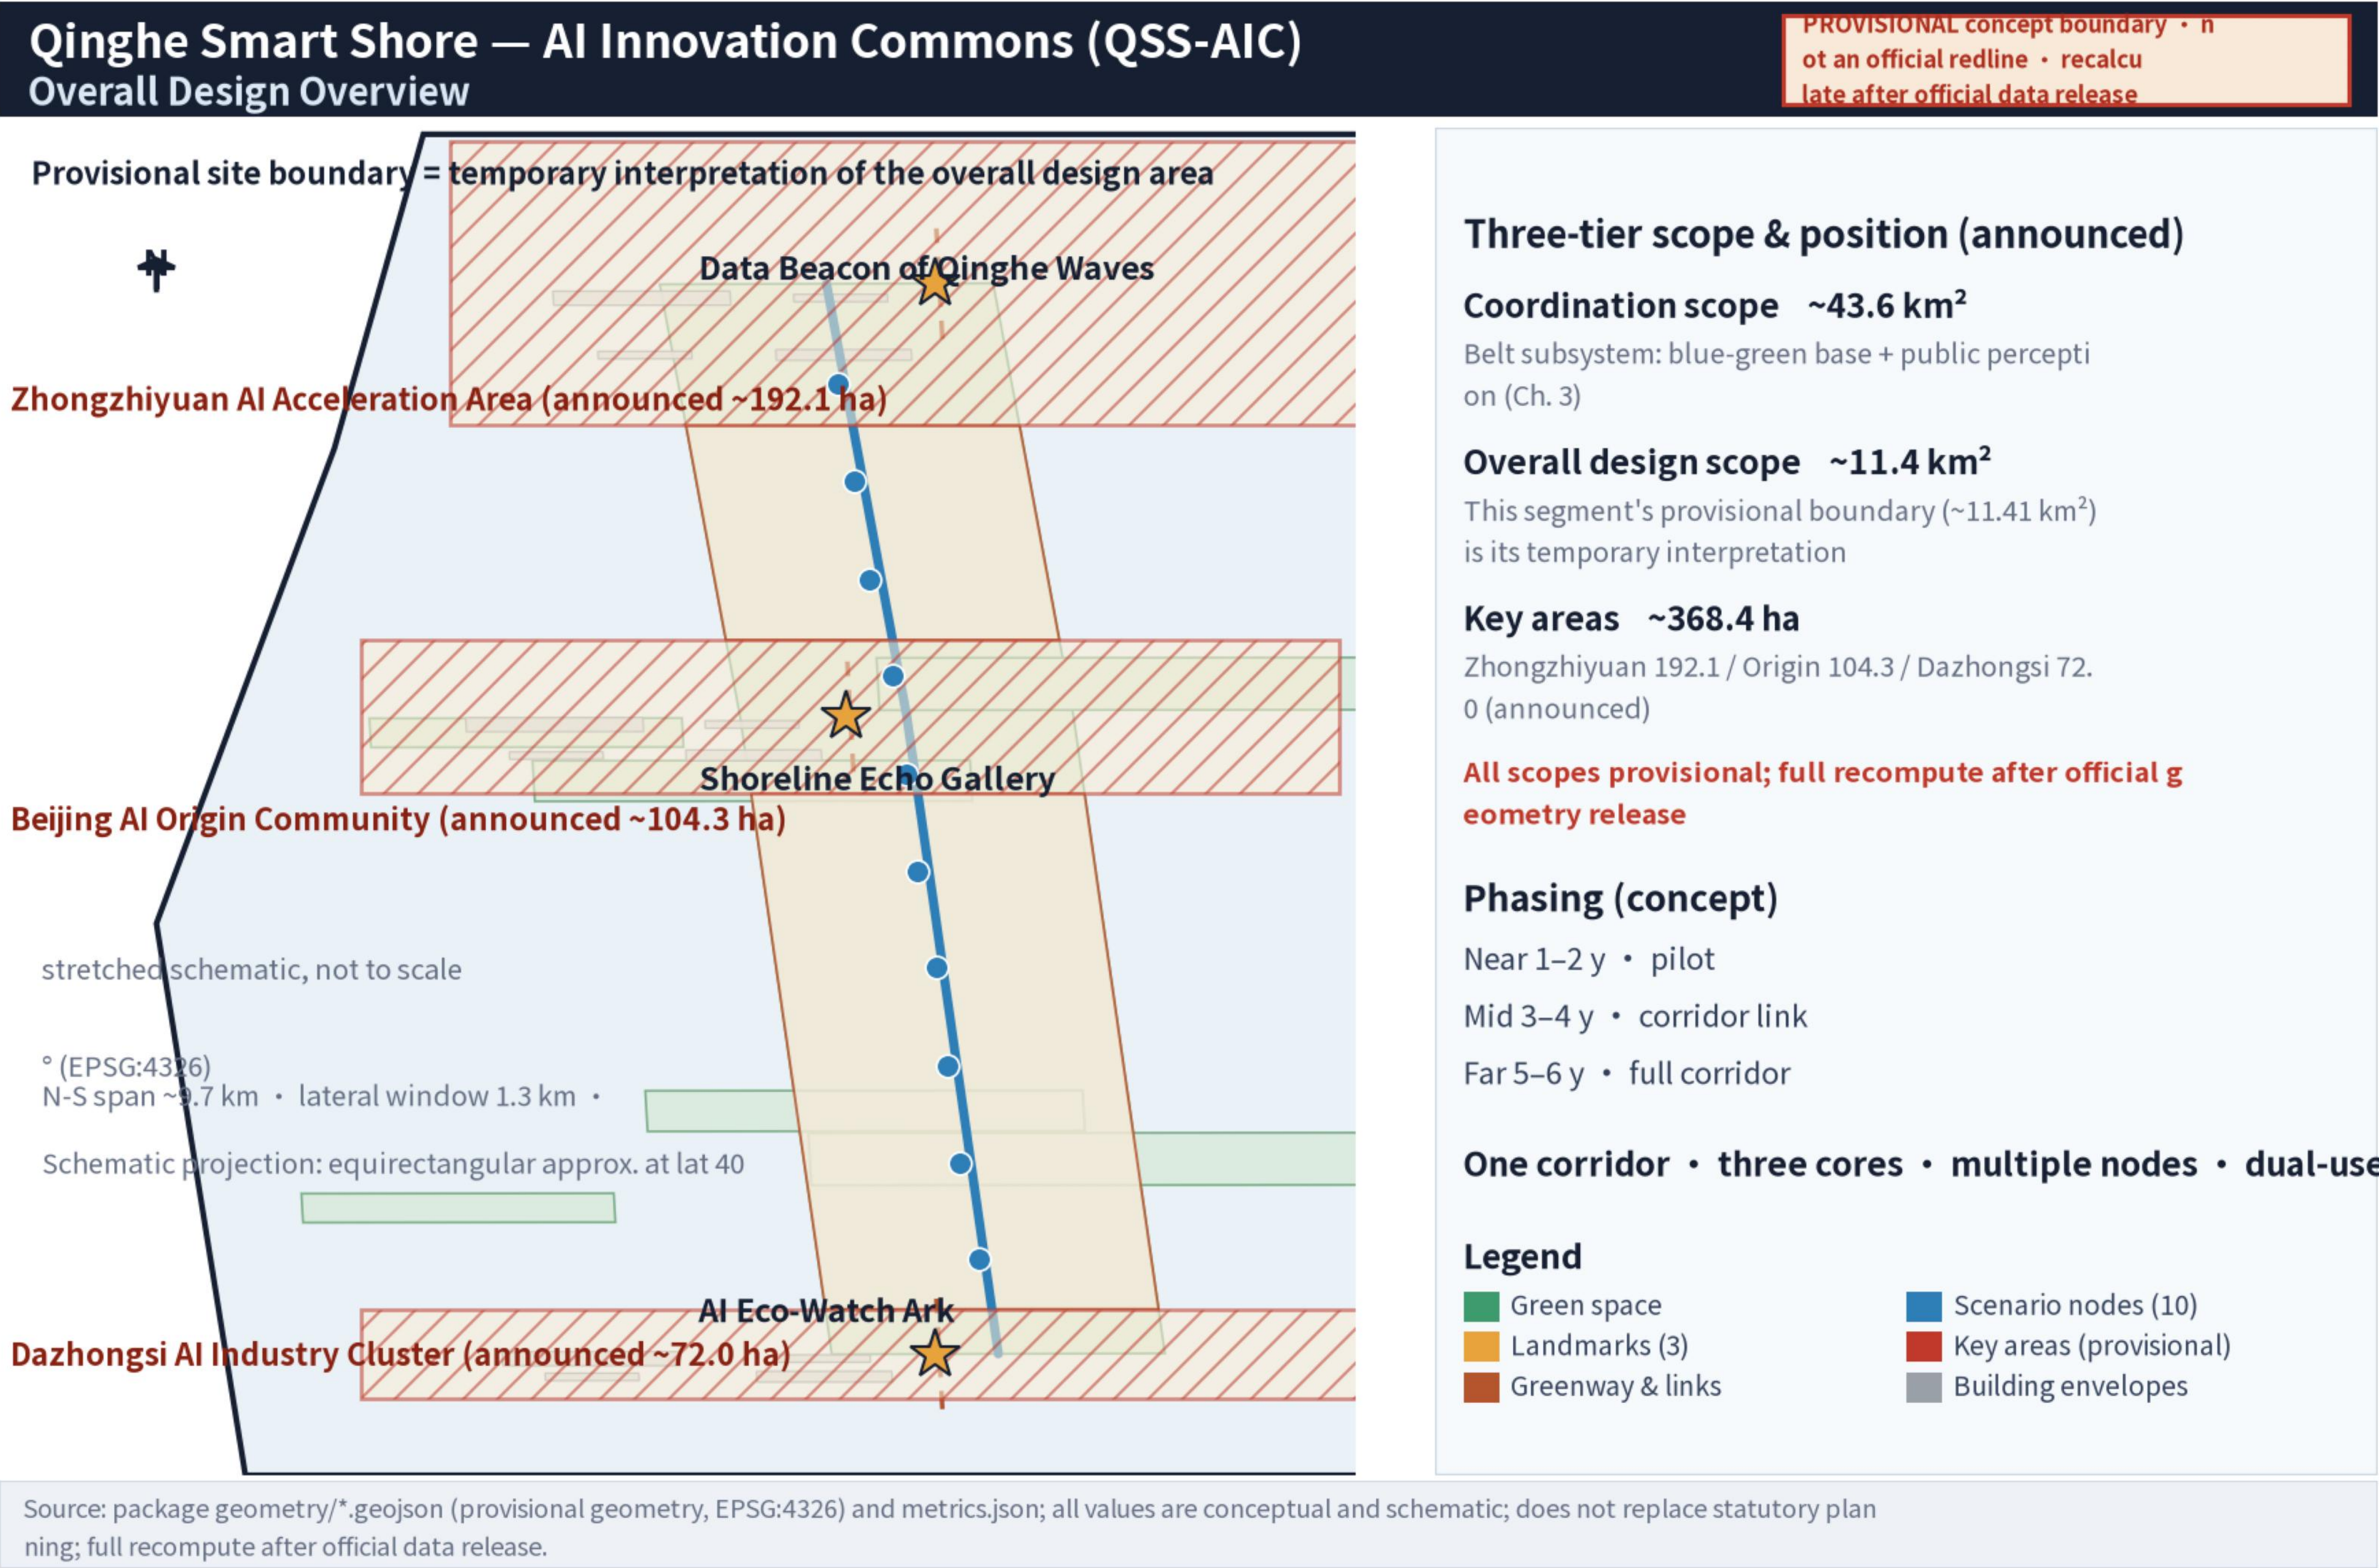

Coordination scope ~43.6 km²
Belt subsystem: blue-green base + public perception
Overall design scope ~11.4 km²
This segment's provisional boundary ~11.41 km²
Key areas ~368.4 ha
Zhongzhiyuan 192.1 / Origin 104.3 / Dazhongsi 72.0
Geometry provisional; full recompute after official release

Phasing (concept)

Near 1–2 y
Pilot: scenario test + station sample + programs launch
Mid 3–4 y
Corridor link: greenway + bridge concept studies
Far 5–6 y
Full corridor: blue-green completion + regular operation

Core idea

"Waterfront as Commons": shared blue-green infrastructure, open scenario data, low-threshold public space – one corridor, three cores, multiple nodes; a full conceptual.
