

Youth Co-Creation Loop YOUTH.JZ - Youth Innovation Community & Youth-Friendly Public Service Network (Concept)

Centennial Jingzhang AI Belt international call - Youth-
friendly public space track (concept study)

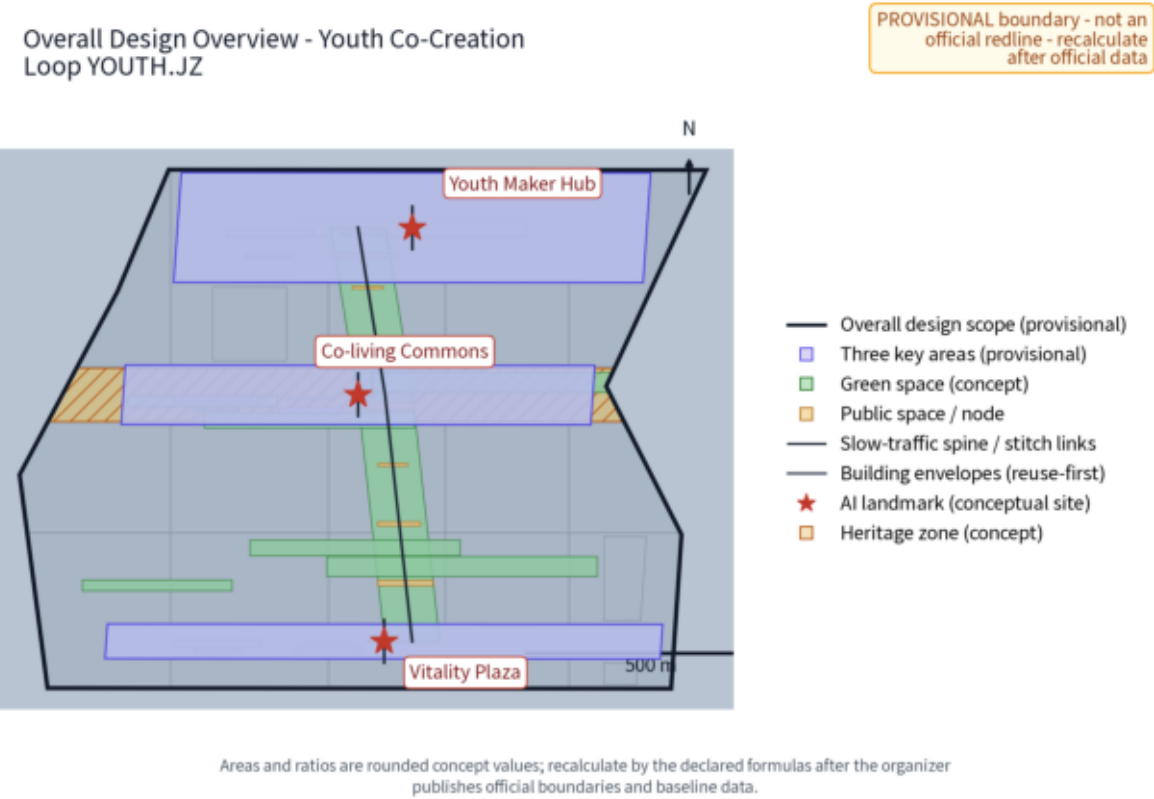

PROVISIONAL boundary - not an official redline - recalculate after official data

Three-tier scopes (official text caliber): coordinated study approx. 43.6 km² - overall design approx. 11.4 km² - key areas approx. 368.4 ha total; this package covers the youth-friendly specialty sub-scope within the overall design scope.

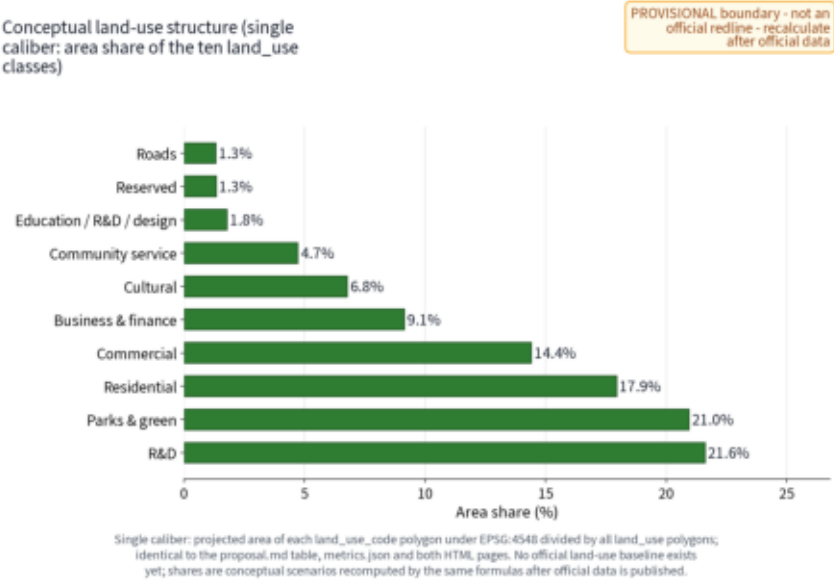

The land-use figure and table use one single caliber (area share of the ten land_use classes); green_ratio/public_space_ratio are the green_space / public_space geometry scope - different objects.

Overall Design Overview & Land-Use Structure

Overall design overview (provisional geometry)

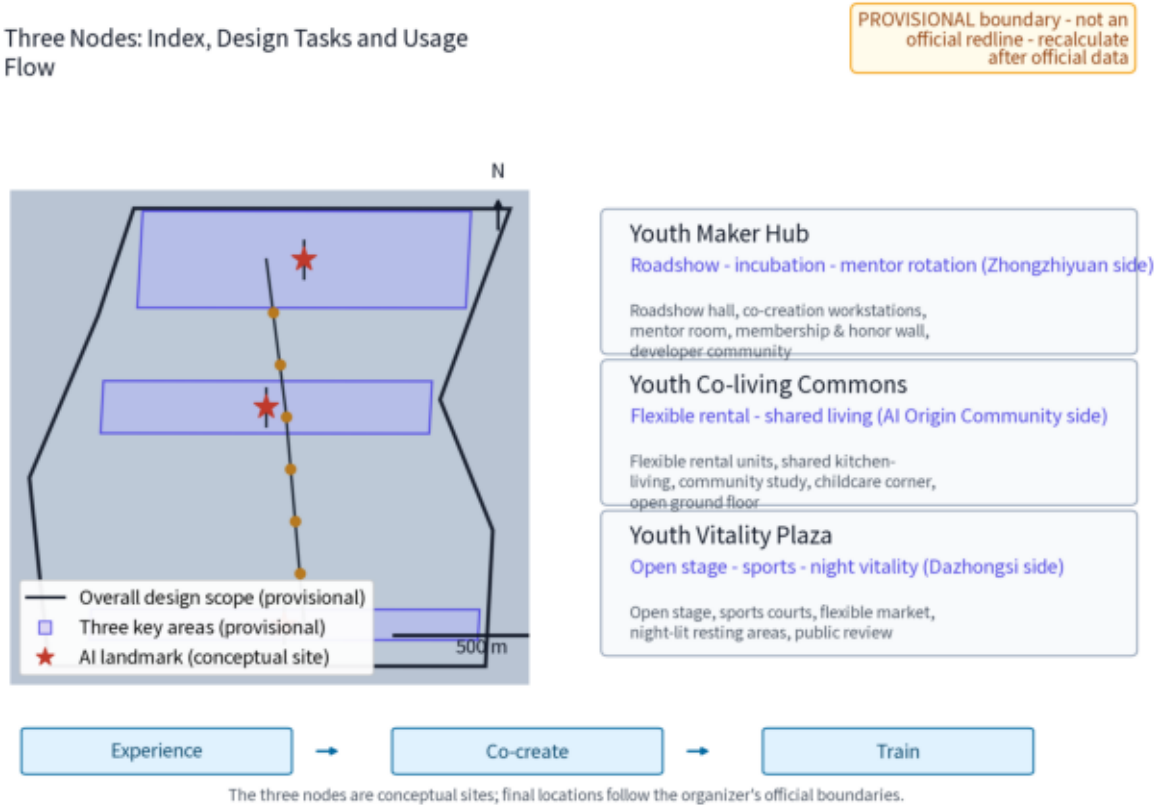

Conceptual land-use structure (single caliber)

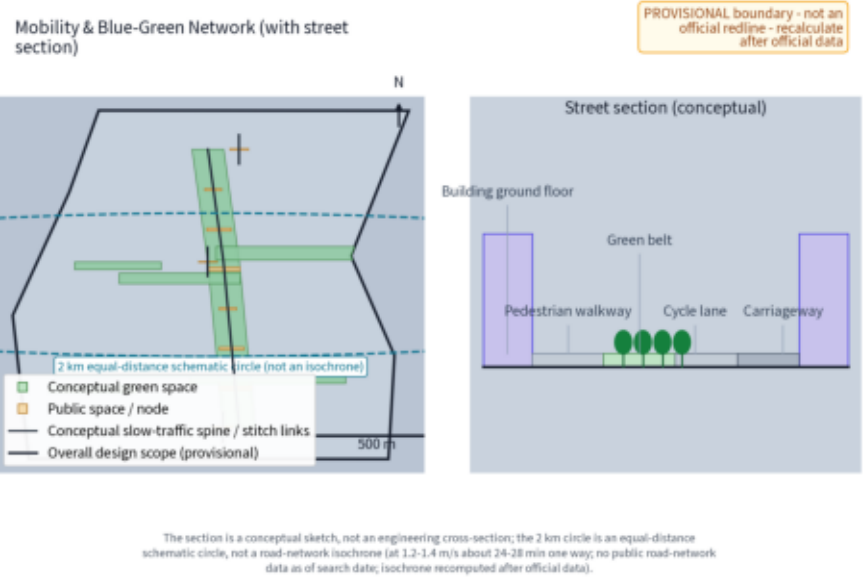

Three Nodes & Mobility Blue-Green

Three nodes: index and design tasks

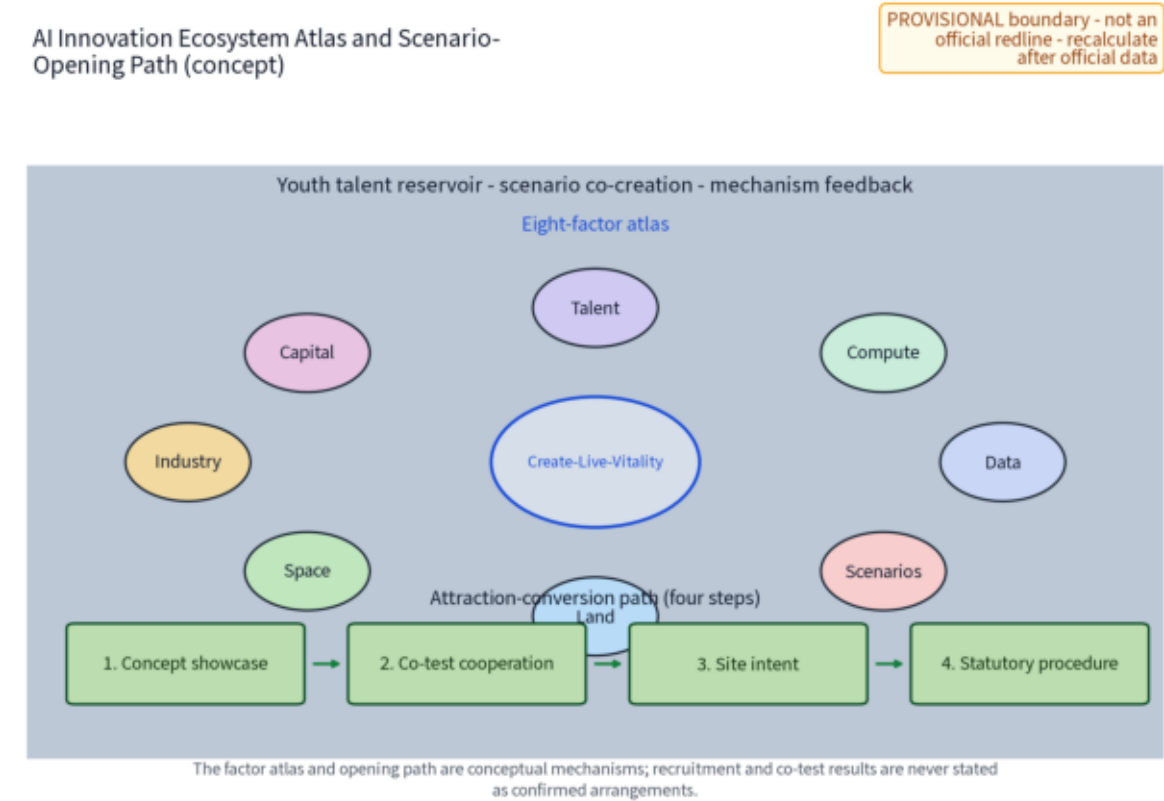

Mobility & blue-green network

AI Ecosystem & Scenario Cards

AI innovation ecosystem atlas and opening path

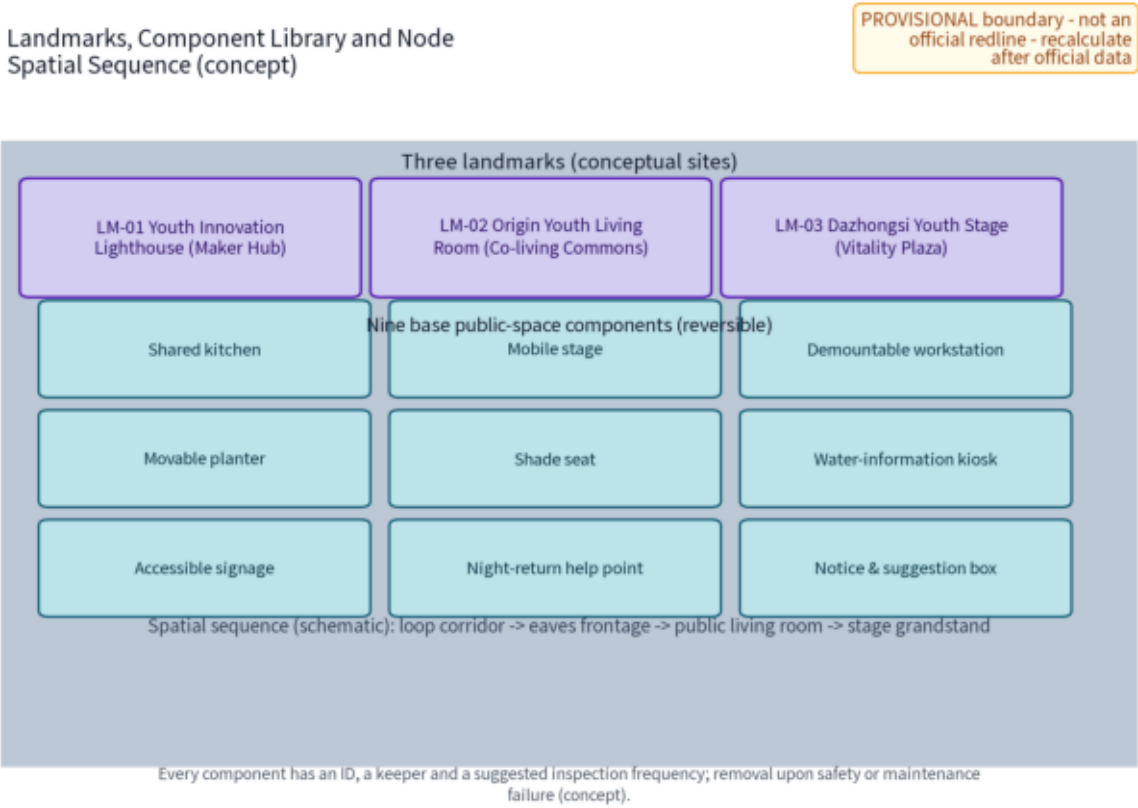

Ten scenario cards and three industry test cards

Component Library & Operation Flow

Landmarks, component library and node sequence

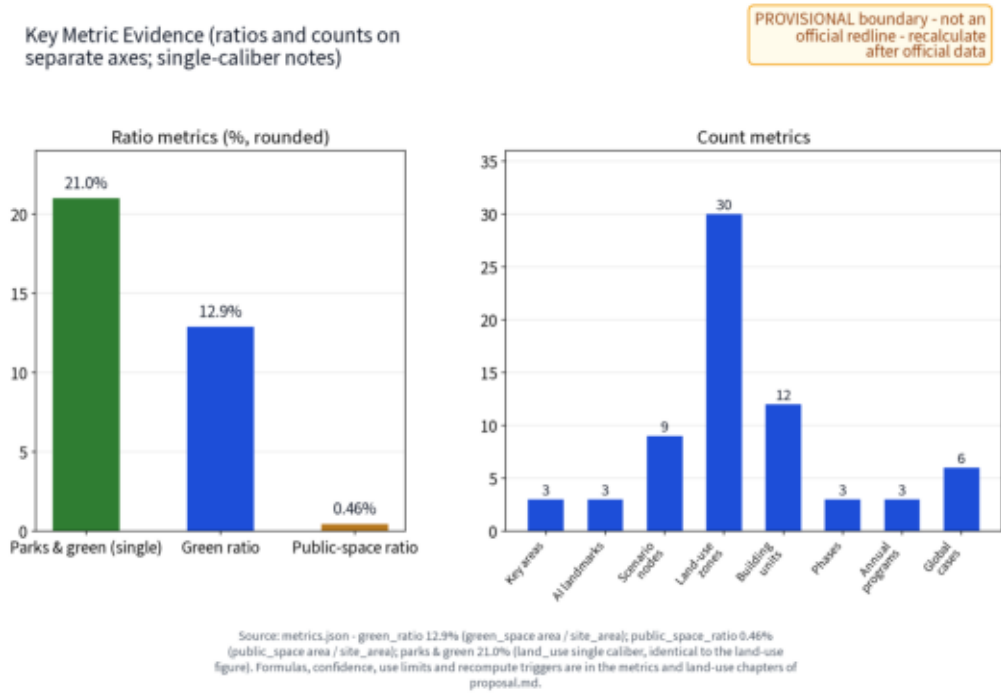

Operation flow and annual program brands

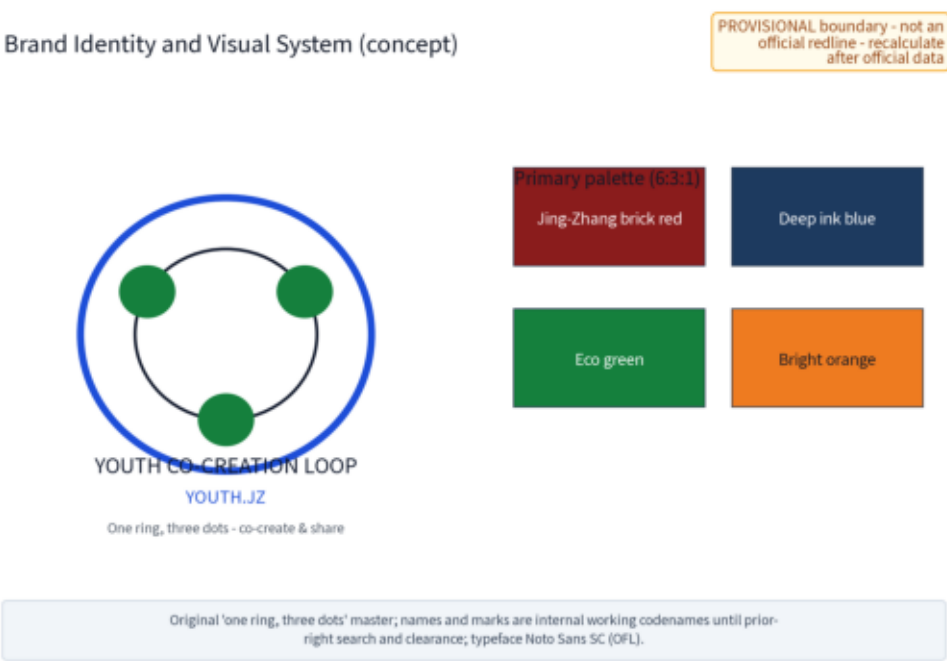

Key Metrics & Brand Identity - Phased Implementation

Key metric evidence (ratios and counts on separate axes)

Brand identity and visual system (concept)

Phasing (concept): near (1-3 yrs) pilot start -> mid (3-5 yrs) network completion -> far (5-10 yrs) loop maturity and brand; every phase gate includes qualitative cost review, ownership confirmation, public review and stop/exit conditions; KPI baselines follow the co-test baseline flow (calibrated after official baseline data).

PROVISIONAL boundary - not an official redline - recalculate after official data
