

Zhichun Road Smart-Core: Station-City Integration

& AI Mobility Services (Concept)

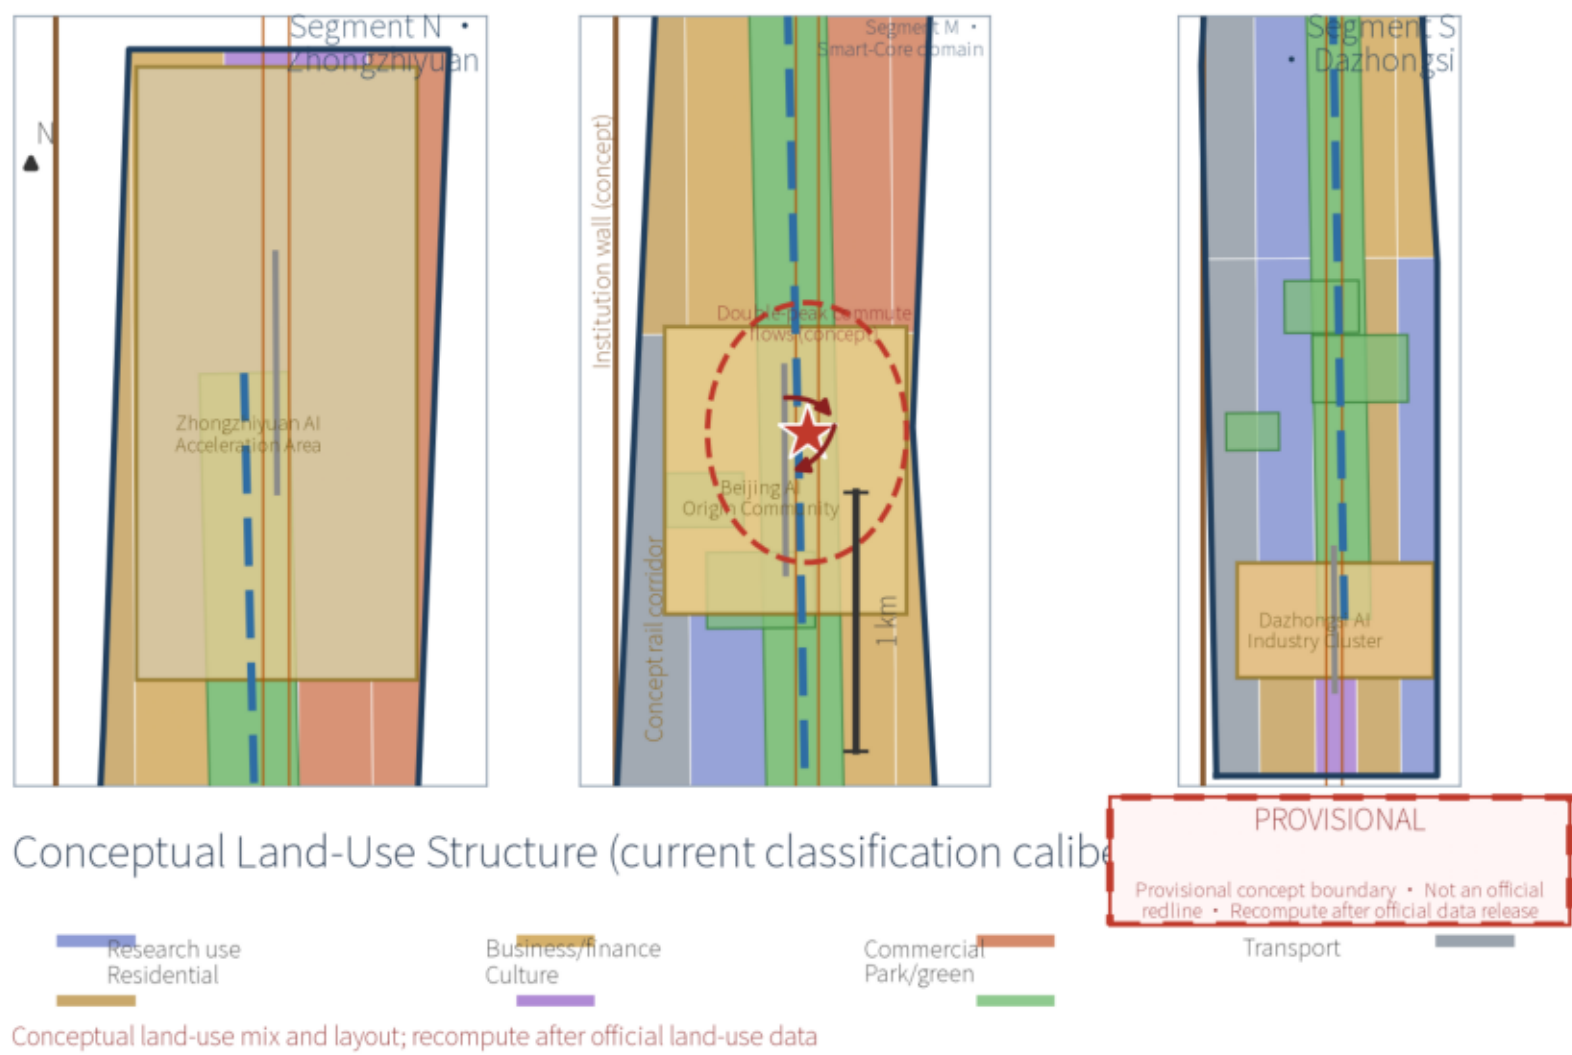

Centennial Jing-Zhang AI Innovation Belt International Design Call · Concept Proposal | Official three-tier scope: ~43.6 km² / ~11.4 km² / ~368.4 ha (this package's su
PROVISIONAL: concept boundary, not an official redline; recompute when official data is released

Contents: three-tier scope / overall design / land use / N1-N3 chain & official key areas / mobility & blue-green / metrics (ratio vs count) / synergy loops. Concept only;

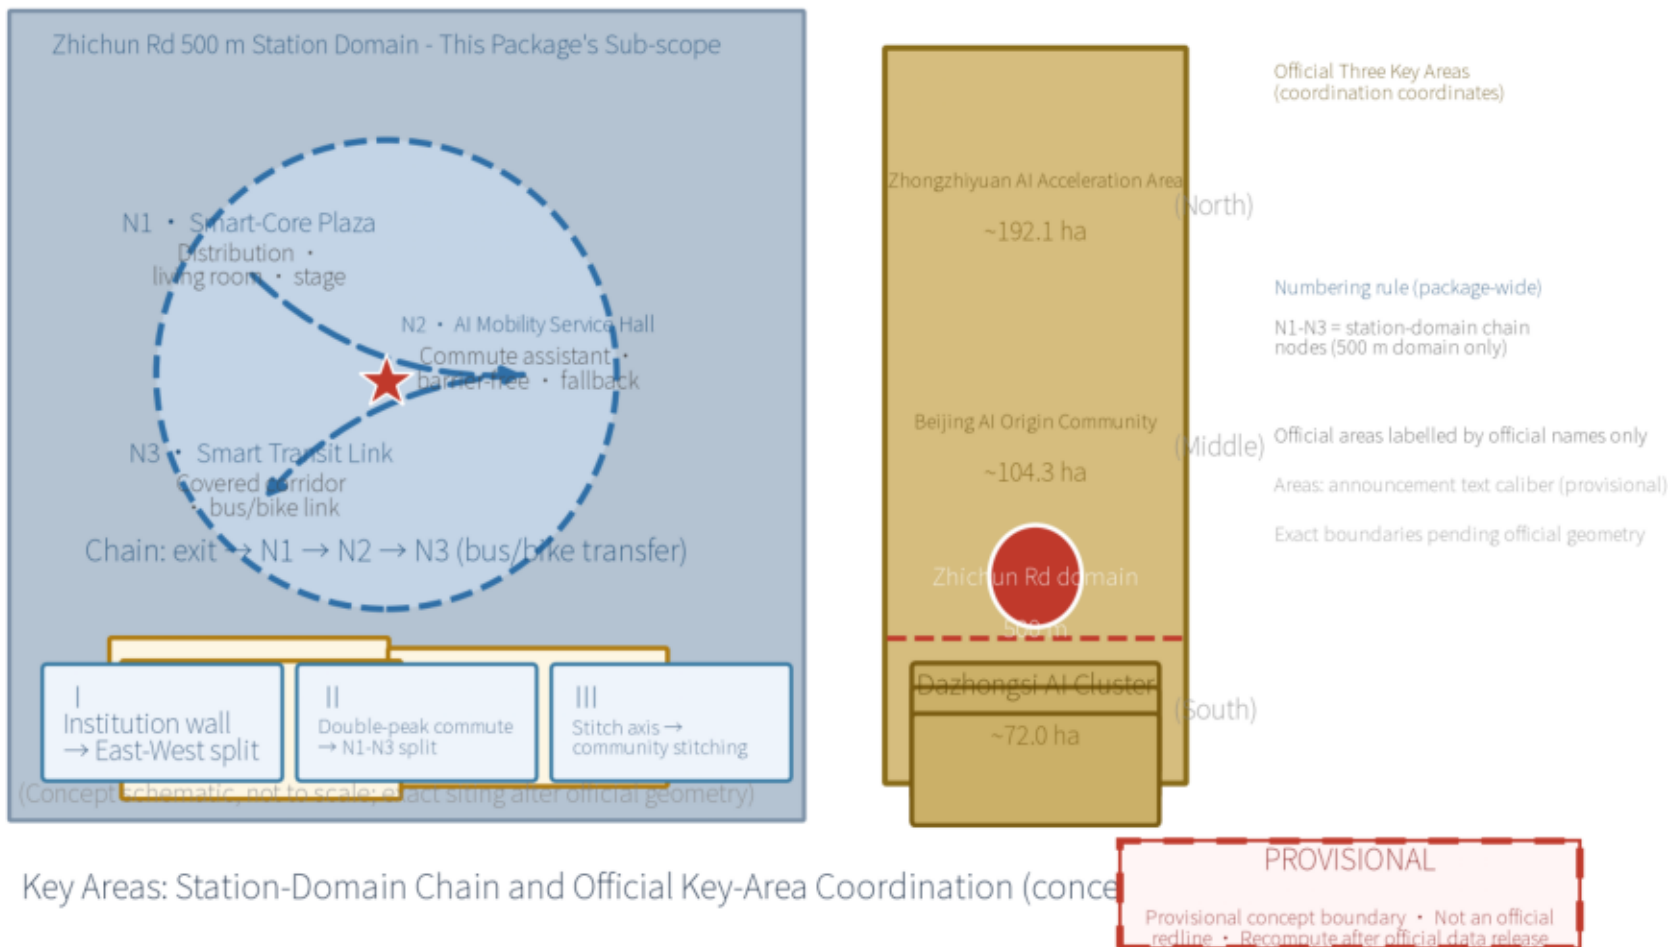

Overall Design Scope Overview

Land-Use Structure (Concept)

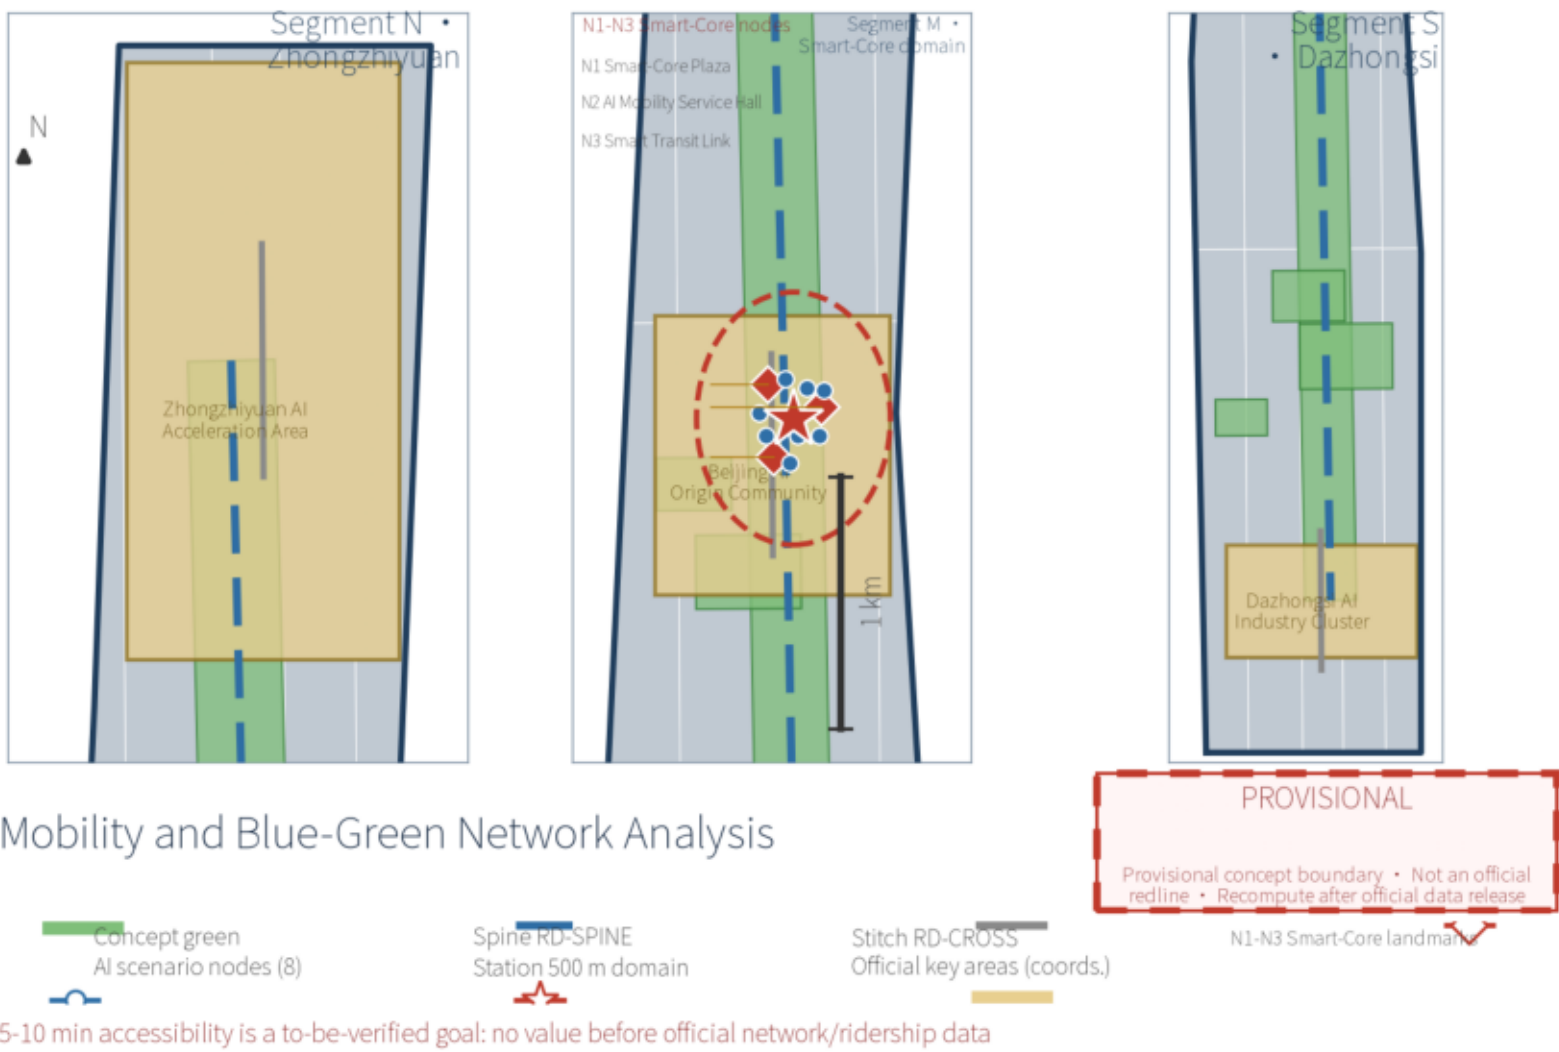

Key Areas & N1-N3 Nodes

Key Areas: Station-Domain Chain and Official Key-Area Coordination (conceptual)

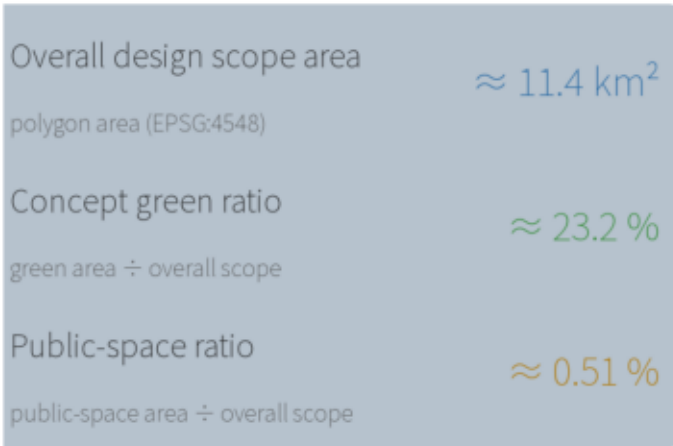

N1-N3 = station-domain chain nodes only; official key areas by official names; modular reversible facilities with AI interfaces reserved; site mechanisms: institution wall—East-West split / double-peak commute—time-split / stitch axis—community stitching

Mobility & Blue-Green Network

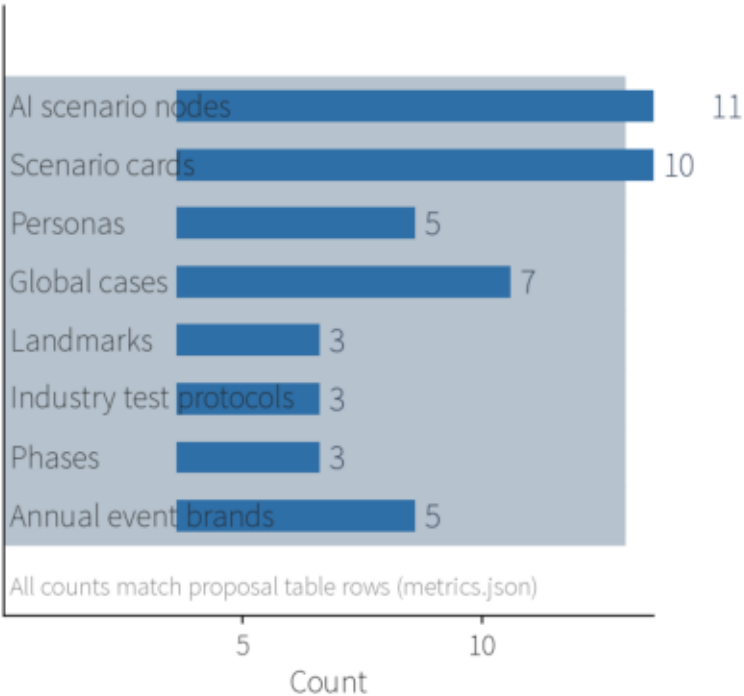

Key Metrics Evidence

i. Area & Ratio Indicators (separate axis)

ii. Count Indicators (separate axis; ratios and counts never share one axis)

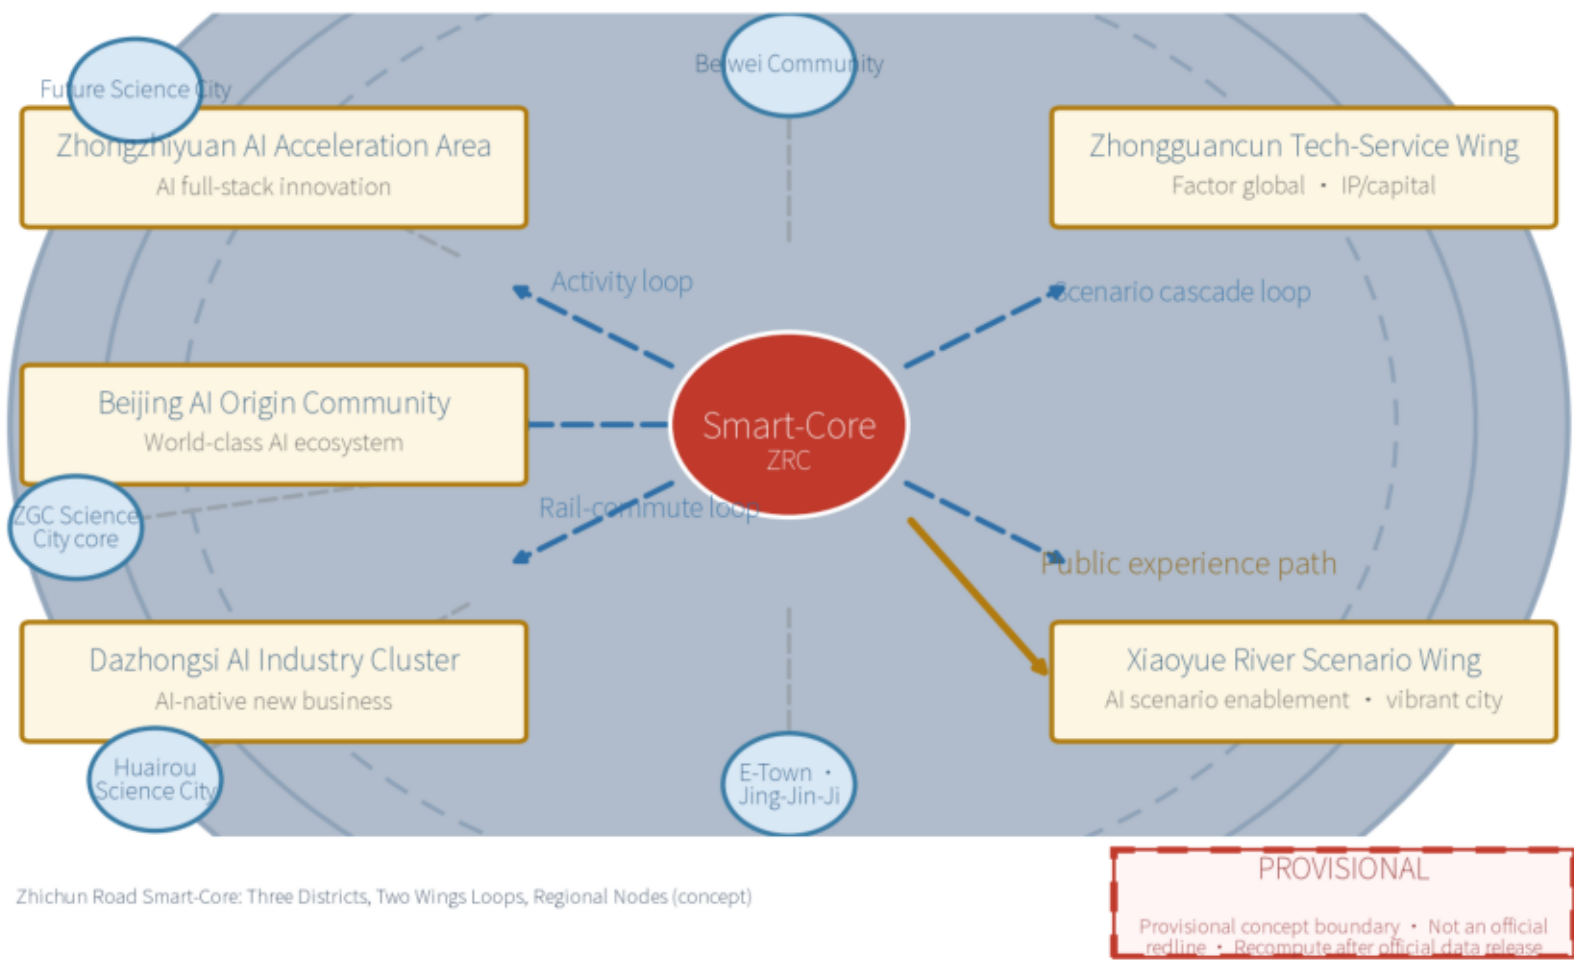

Key Metrics Evidence Chart (concept caliber, provisional)

Confidence: area=medium / ratios=low / counts=high (geometry-recomputable)
Recompute trigger: uniform recalculation after official geometry/network/ridership release

PROVISIONAL
Provisional concept boundary · Not an official redline · Recompute after official data release

Three Districts, Two Wings Loops

All concept suggestions • statutory procedures for cross-district coordination • two-wing scenario-opening-list mutual recognition
