

AI Spine · Jingzhang AI Innovation Belt

Intelligent Rebirth of a Century-Old Railway

Project Overview

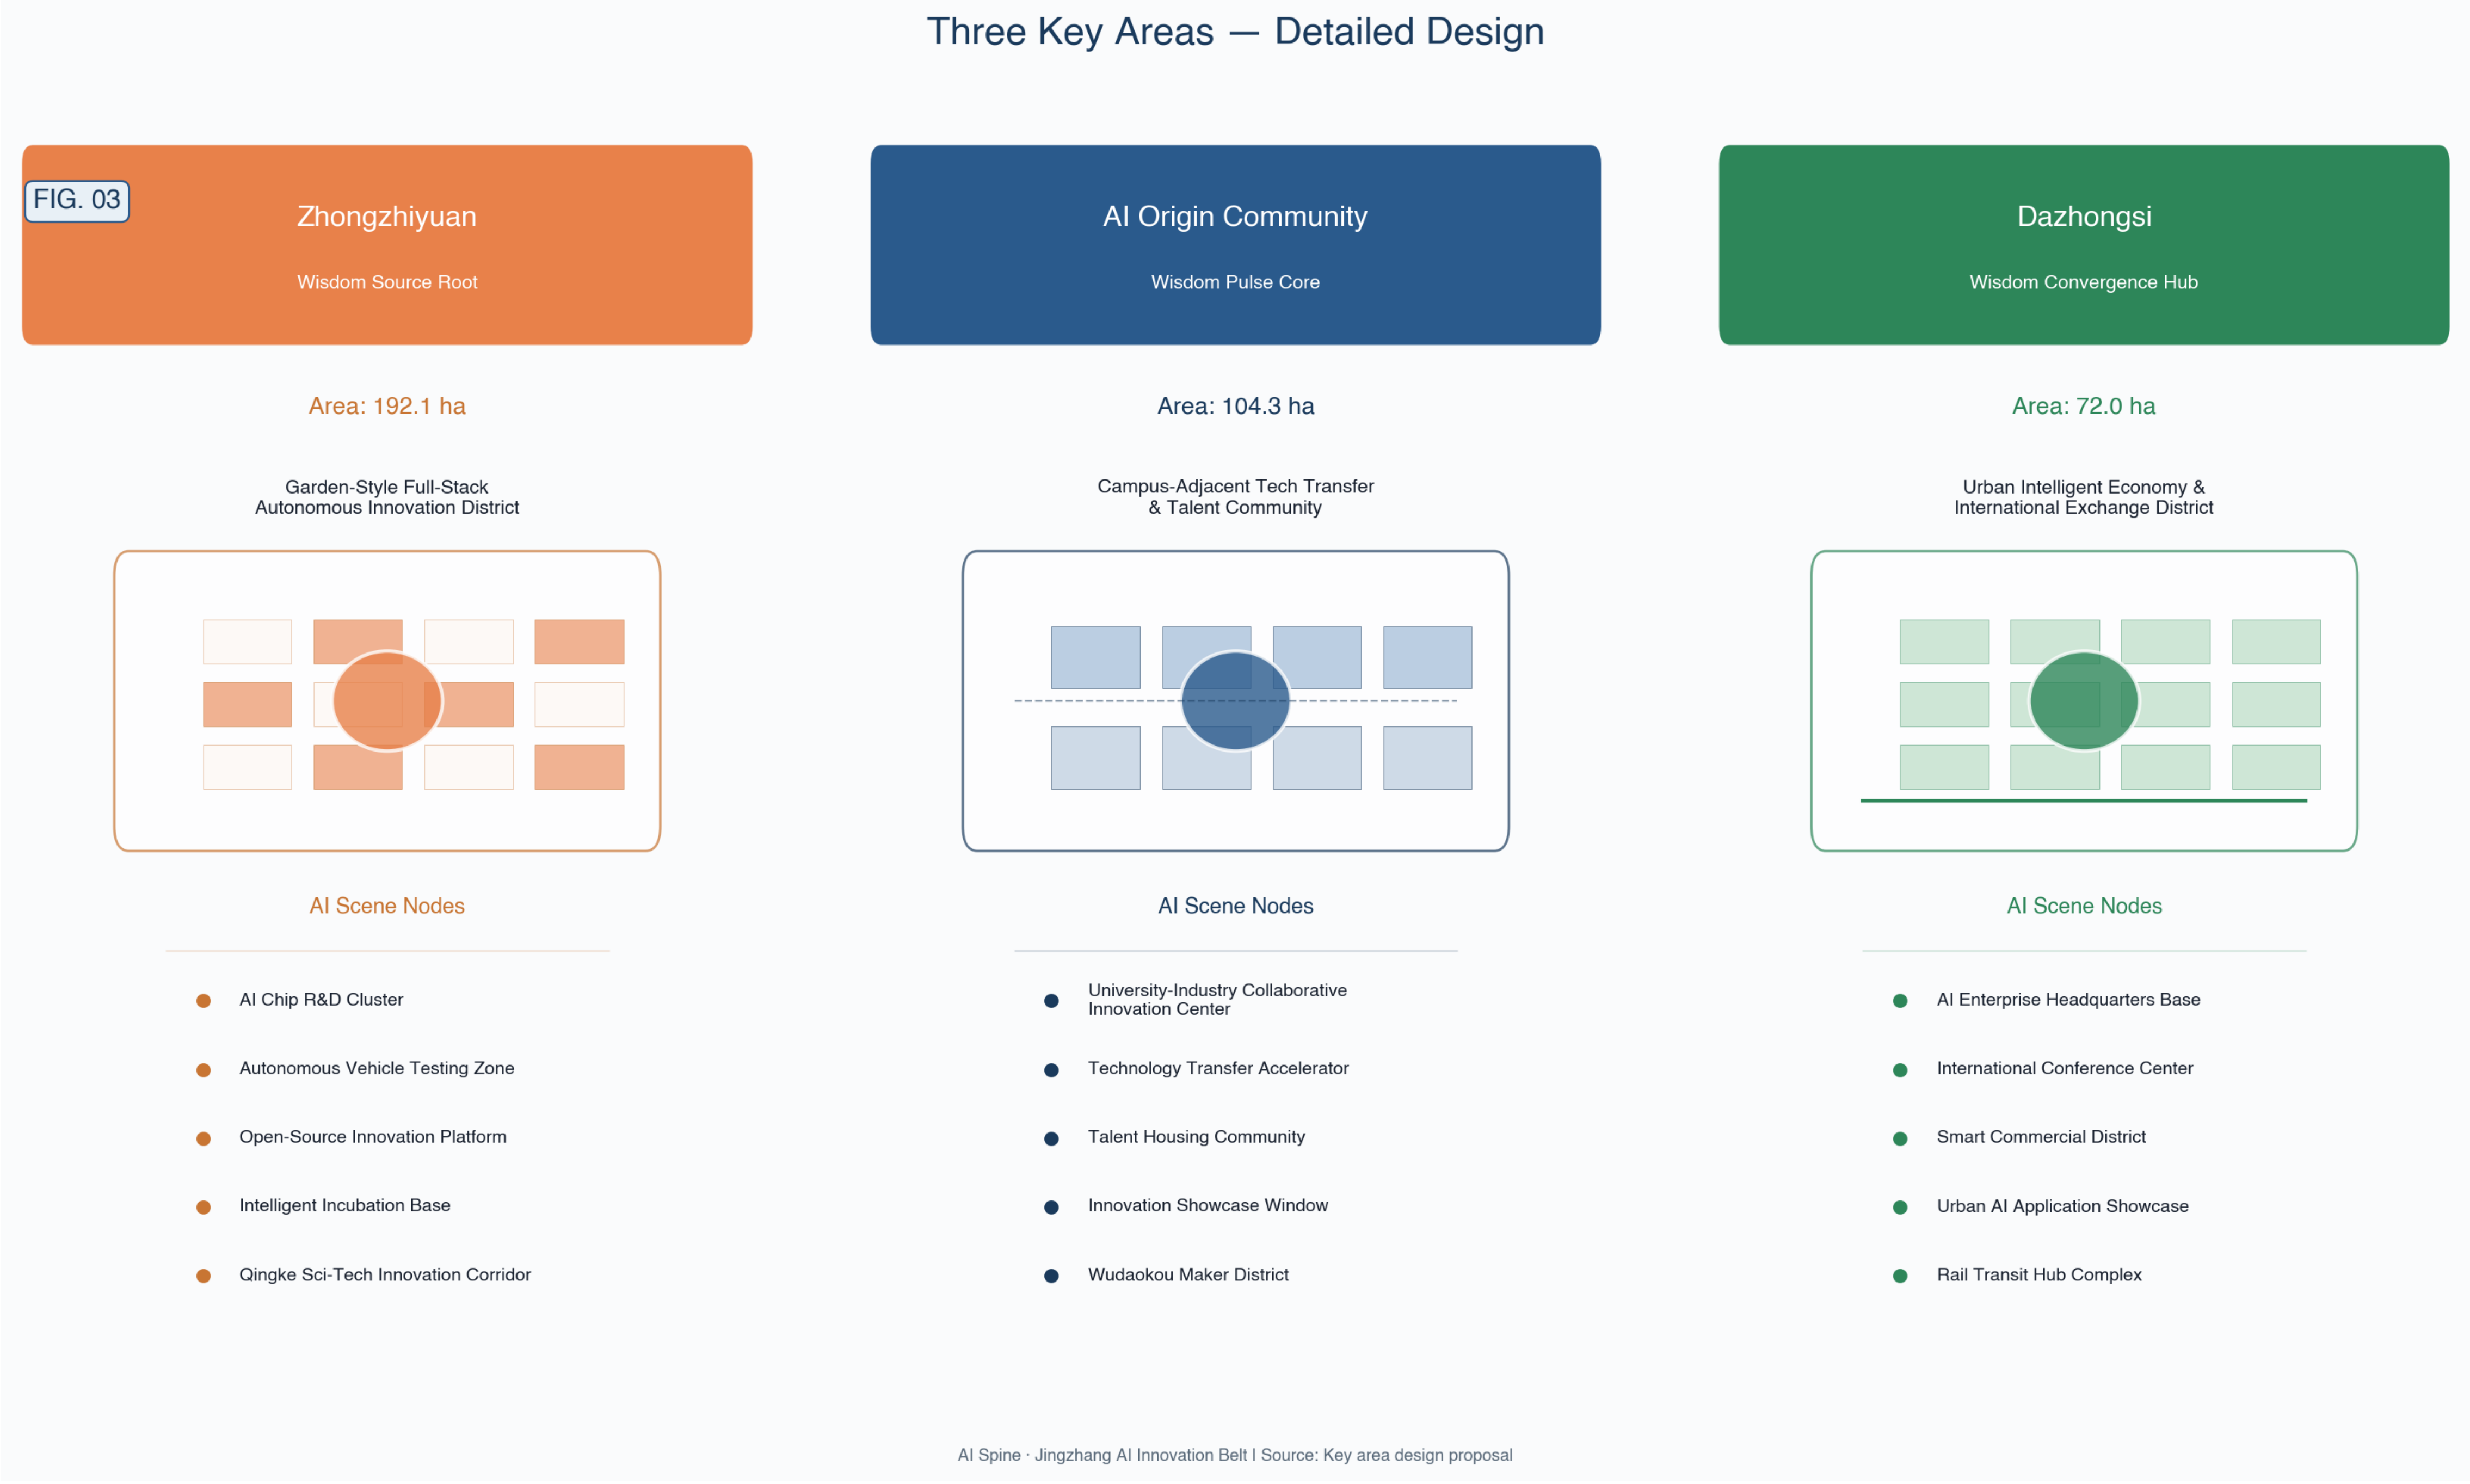

This proposal transforms the historic Jingzhang Railway corridor into an AI-native urban spine. The "One Spine, Three Vertebrae, Two Wings" framework links Zhongzhiyuan AI Acceleration Area, AI Origin Community, and Dazhongsi AI Industry Cluster, integrating century-old heritage with cutting-edge AI innovation culture.

Three Key Areas & Mobility System

Key Area Detailed Design

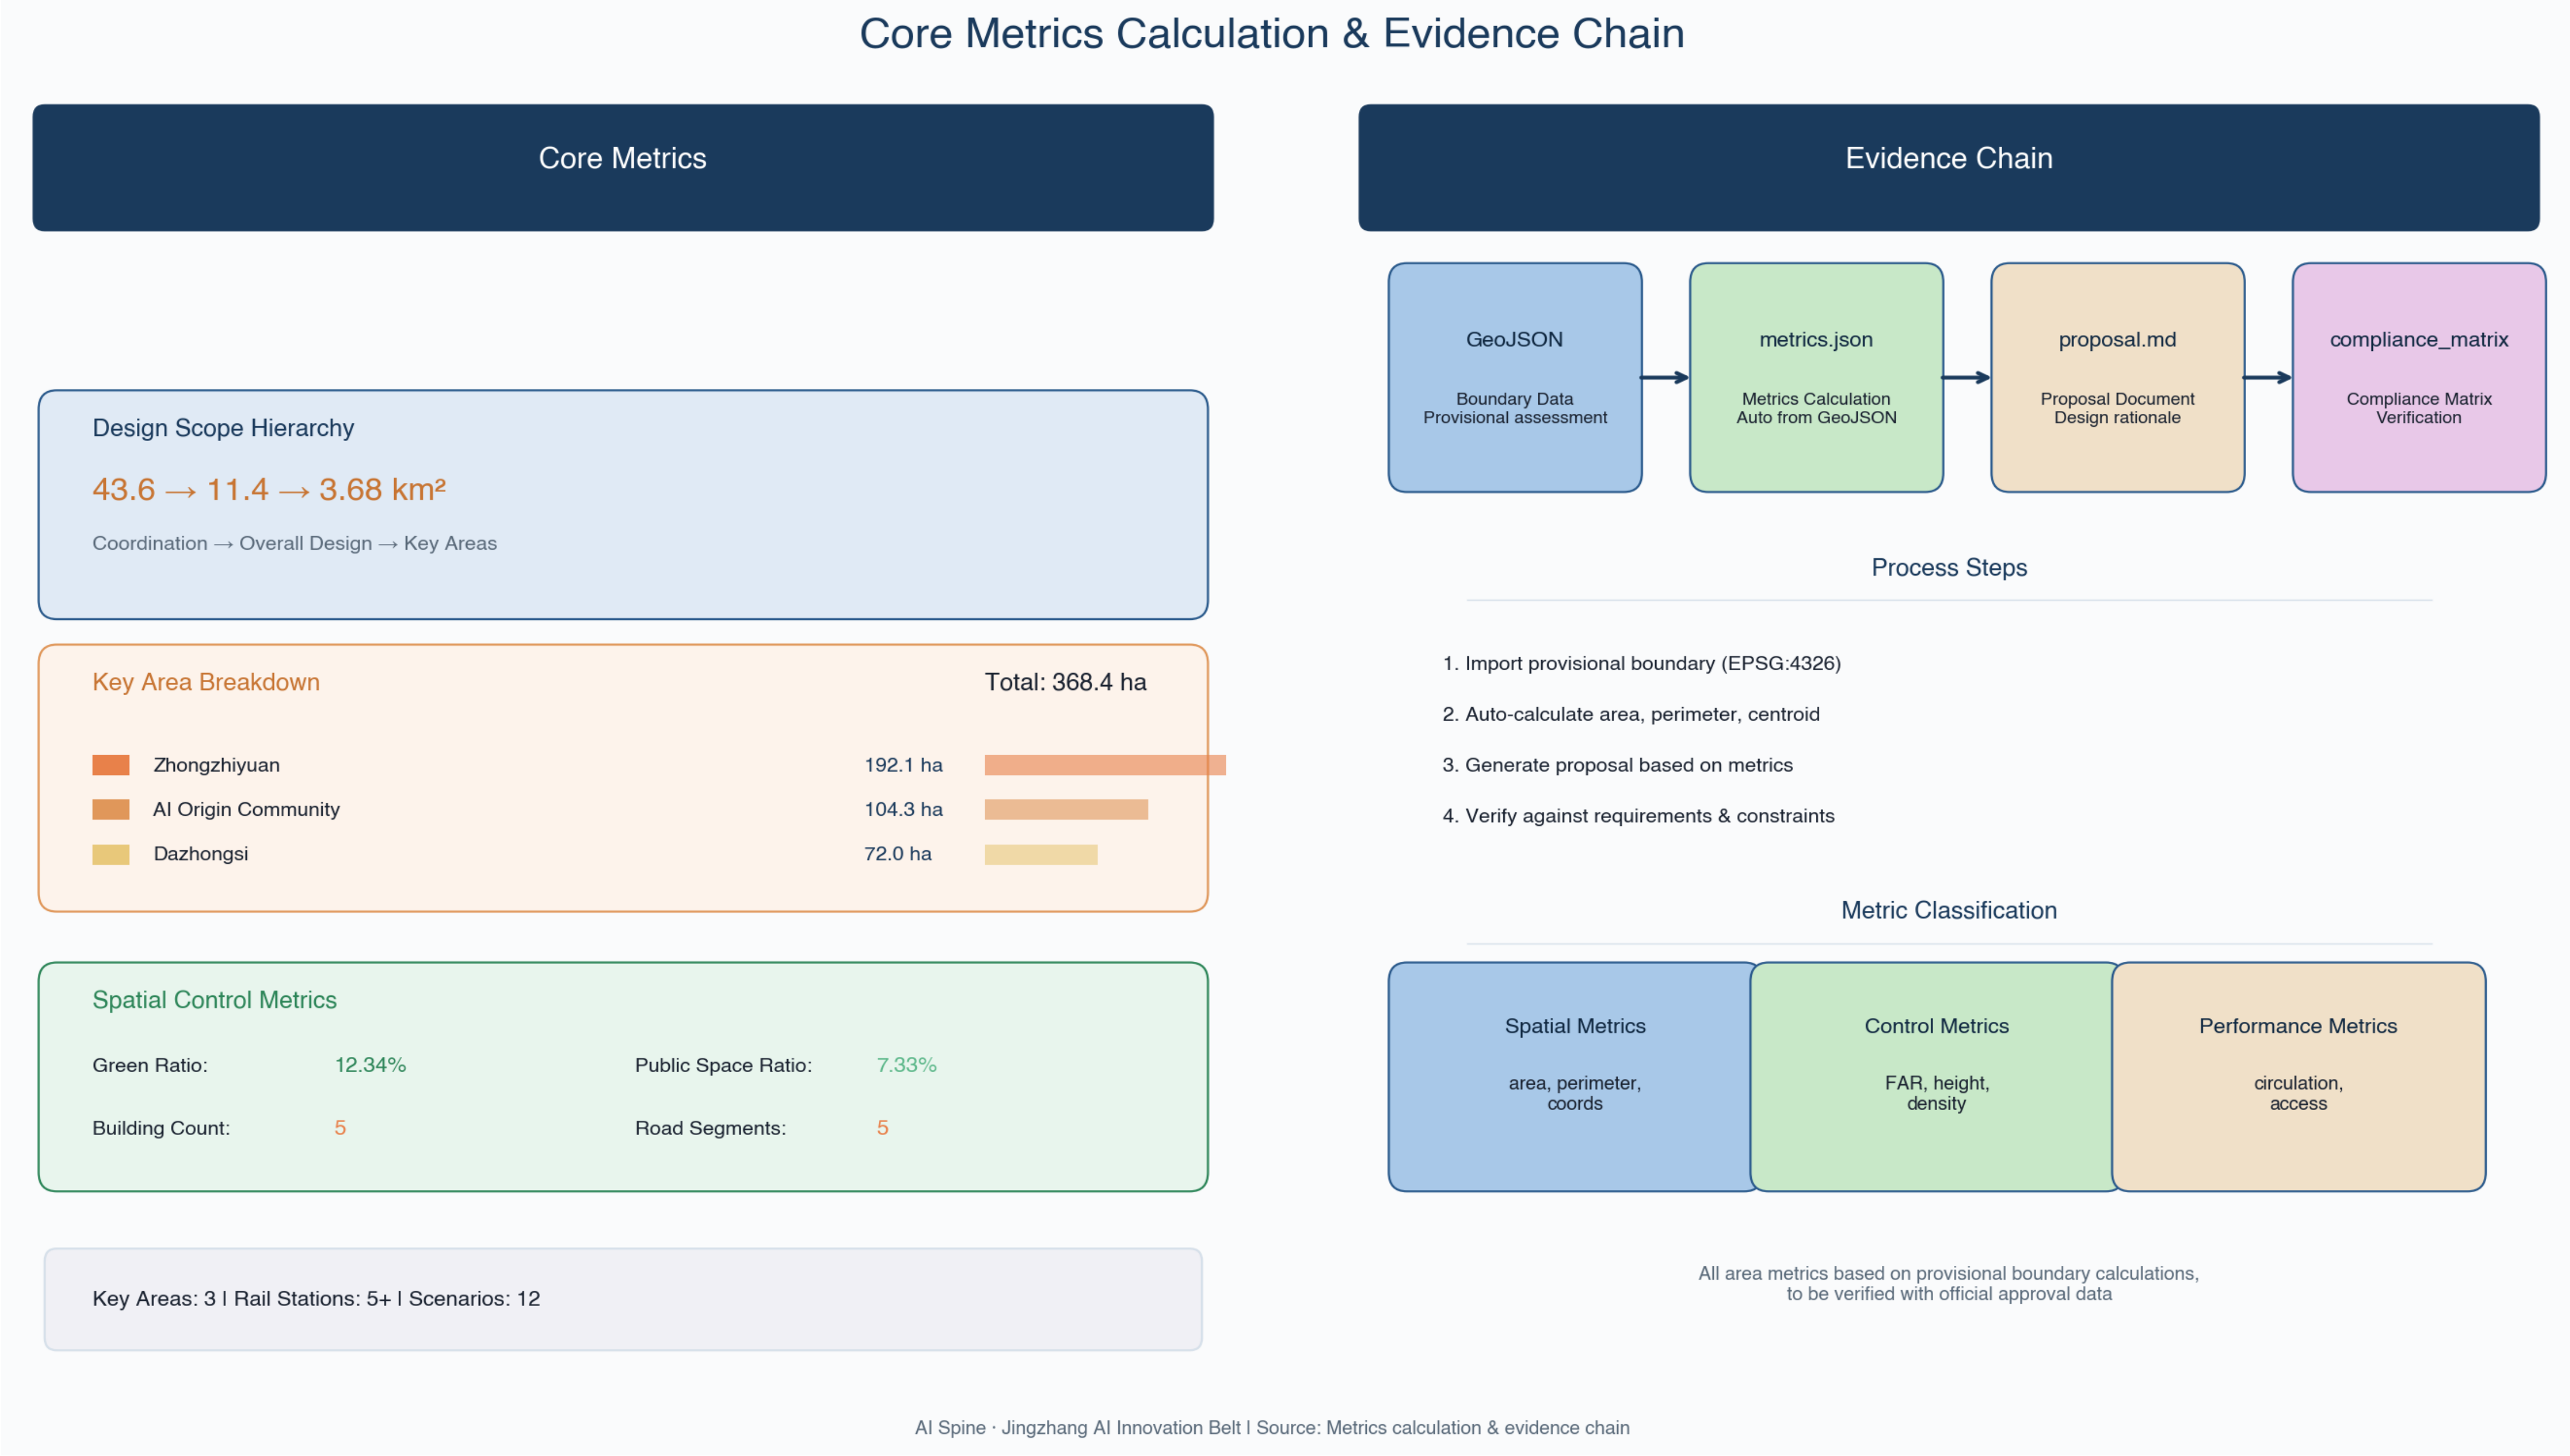

Three key areas (total 368.4 ha) receive detailed design: Zhongzhiyuan (192.1 ha, garden-style innovation district), AI Origin Community (104.3 ha, campus-adjacent tech transfer), and Dazhongsi (72.0 ha, urban intelligent economy). Each zone hosts five AI scene nodes for a total of 15 innovation scenarios.

Metrics, Evidence & Compliance

Core Metrics & Evidence Chain

All 16 quantitative metrics are traceable through an evidence chain from GeoJSON boundary data through automated calculations to the compliance matrix. The design depth matrix covers 15 items across planning, architecture, landscape, and transportation dimensions.

Compliance Summary

Category	Requirements	Status
Scope Requirements	6	All met
Industry & Ecosystem	5	All met
Public Space & Transport	8	All met
Cultural & Operational	4	All met

Disclaimer: All area metrics are based on provisional boundary calculations and must be verified with official approval data. This proposal uses community-display-only license.
