

## ONE CORRIDOR, FOUR IDENTITY THRESHOLDS

FIG 01

## Evidence before siting: overview map

Textual scopes, provisional geometry, participant design and matter-specific legal necessity remain visibly separate.

PROVISIONAL CONCEPT · NOT A REDLINE

MINIMUM-AUTH

FIG 02

Land use is not the answer; the threshold section is

The complete partition exists for topology and recalculation. The real urban-design unit is a legible service journey.

| M0                     | M1                         | M2                    | M3                       |
|------------------------|----------------------------|-----------------------|--------------------------|
| OPEN ACCESS            | EPHEMERAL SESSION          | ATTRIBUTE PROOF       | IDENTIFIED ACT           |
| no real-world identity | one-off tokens, no linkage | necessary result only | only at a confirmed step |

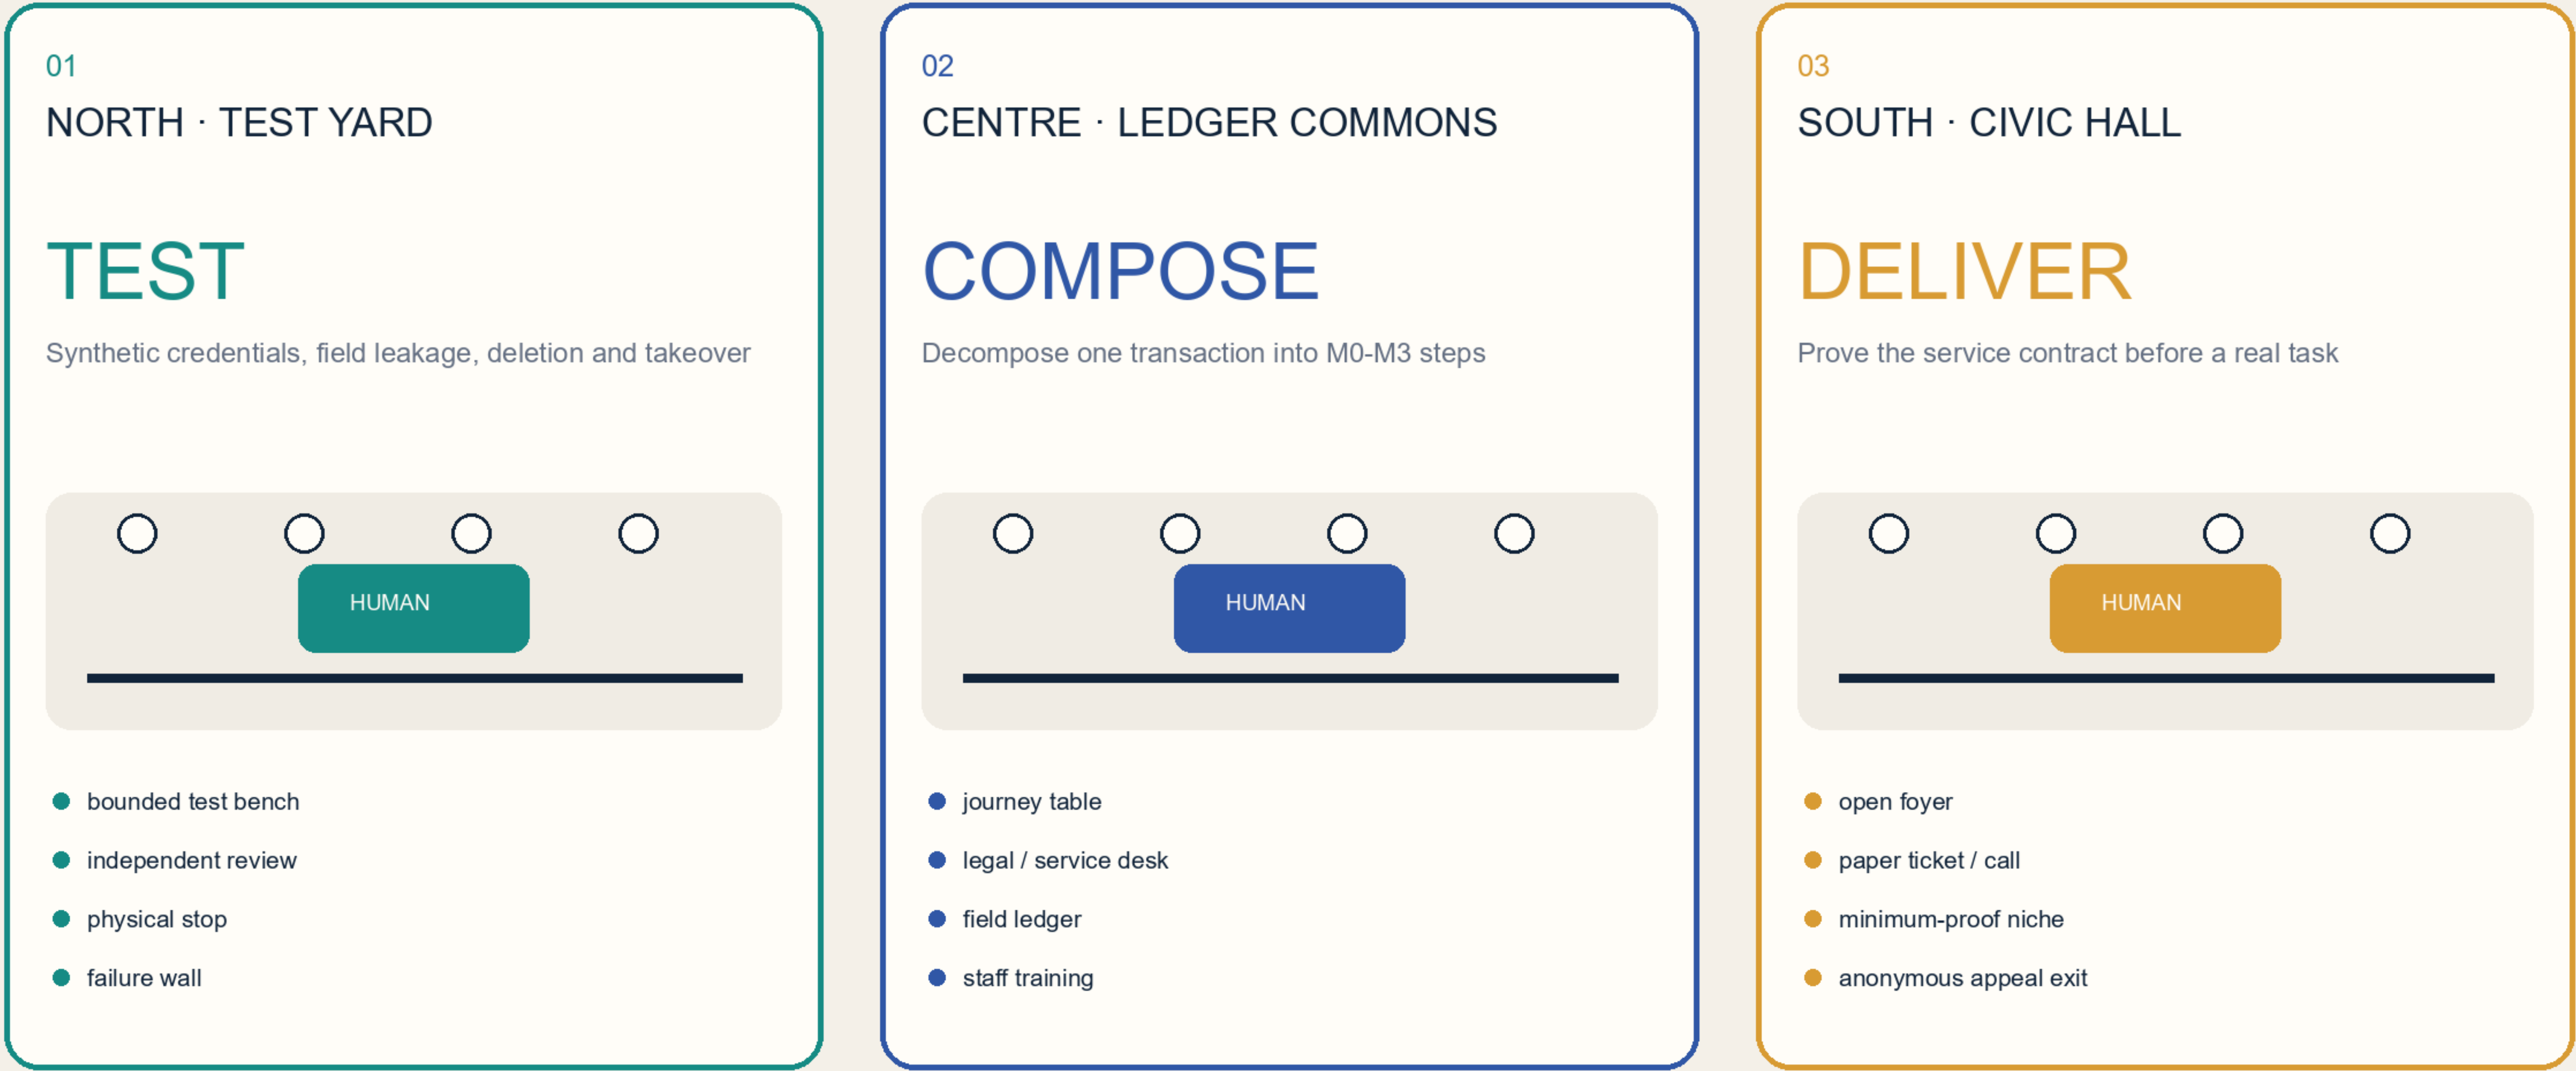

THREE AREAS AS TEST, COMPOSE AND DELIVER INTERFACES

FIG 03

Key areas: test, compose and deliver accountability

Three temporary rectangles express roles only. Each starts with staffed and paper service before digital identity is considered.

North uses synthetic data to test fields and deletion; centre decomposes transactions; south compares staffed, paper and digital routes. All three geometries are provisional.

MINIMUM-AUTH

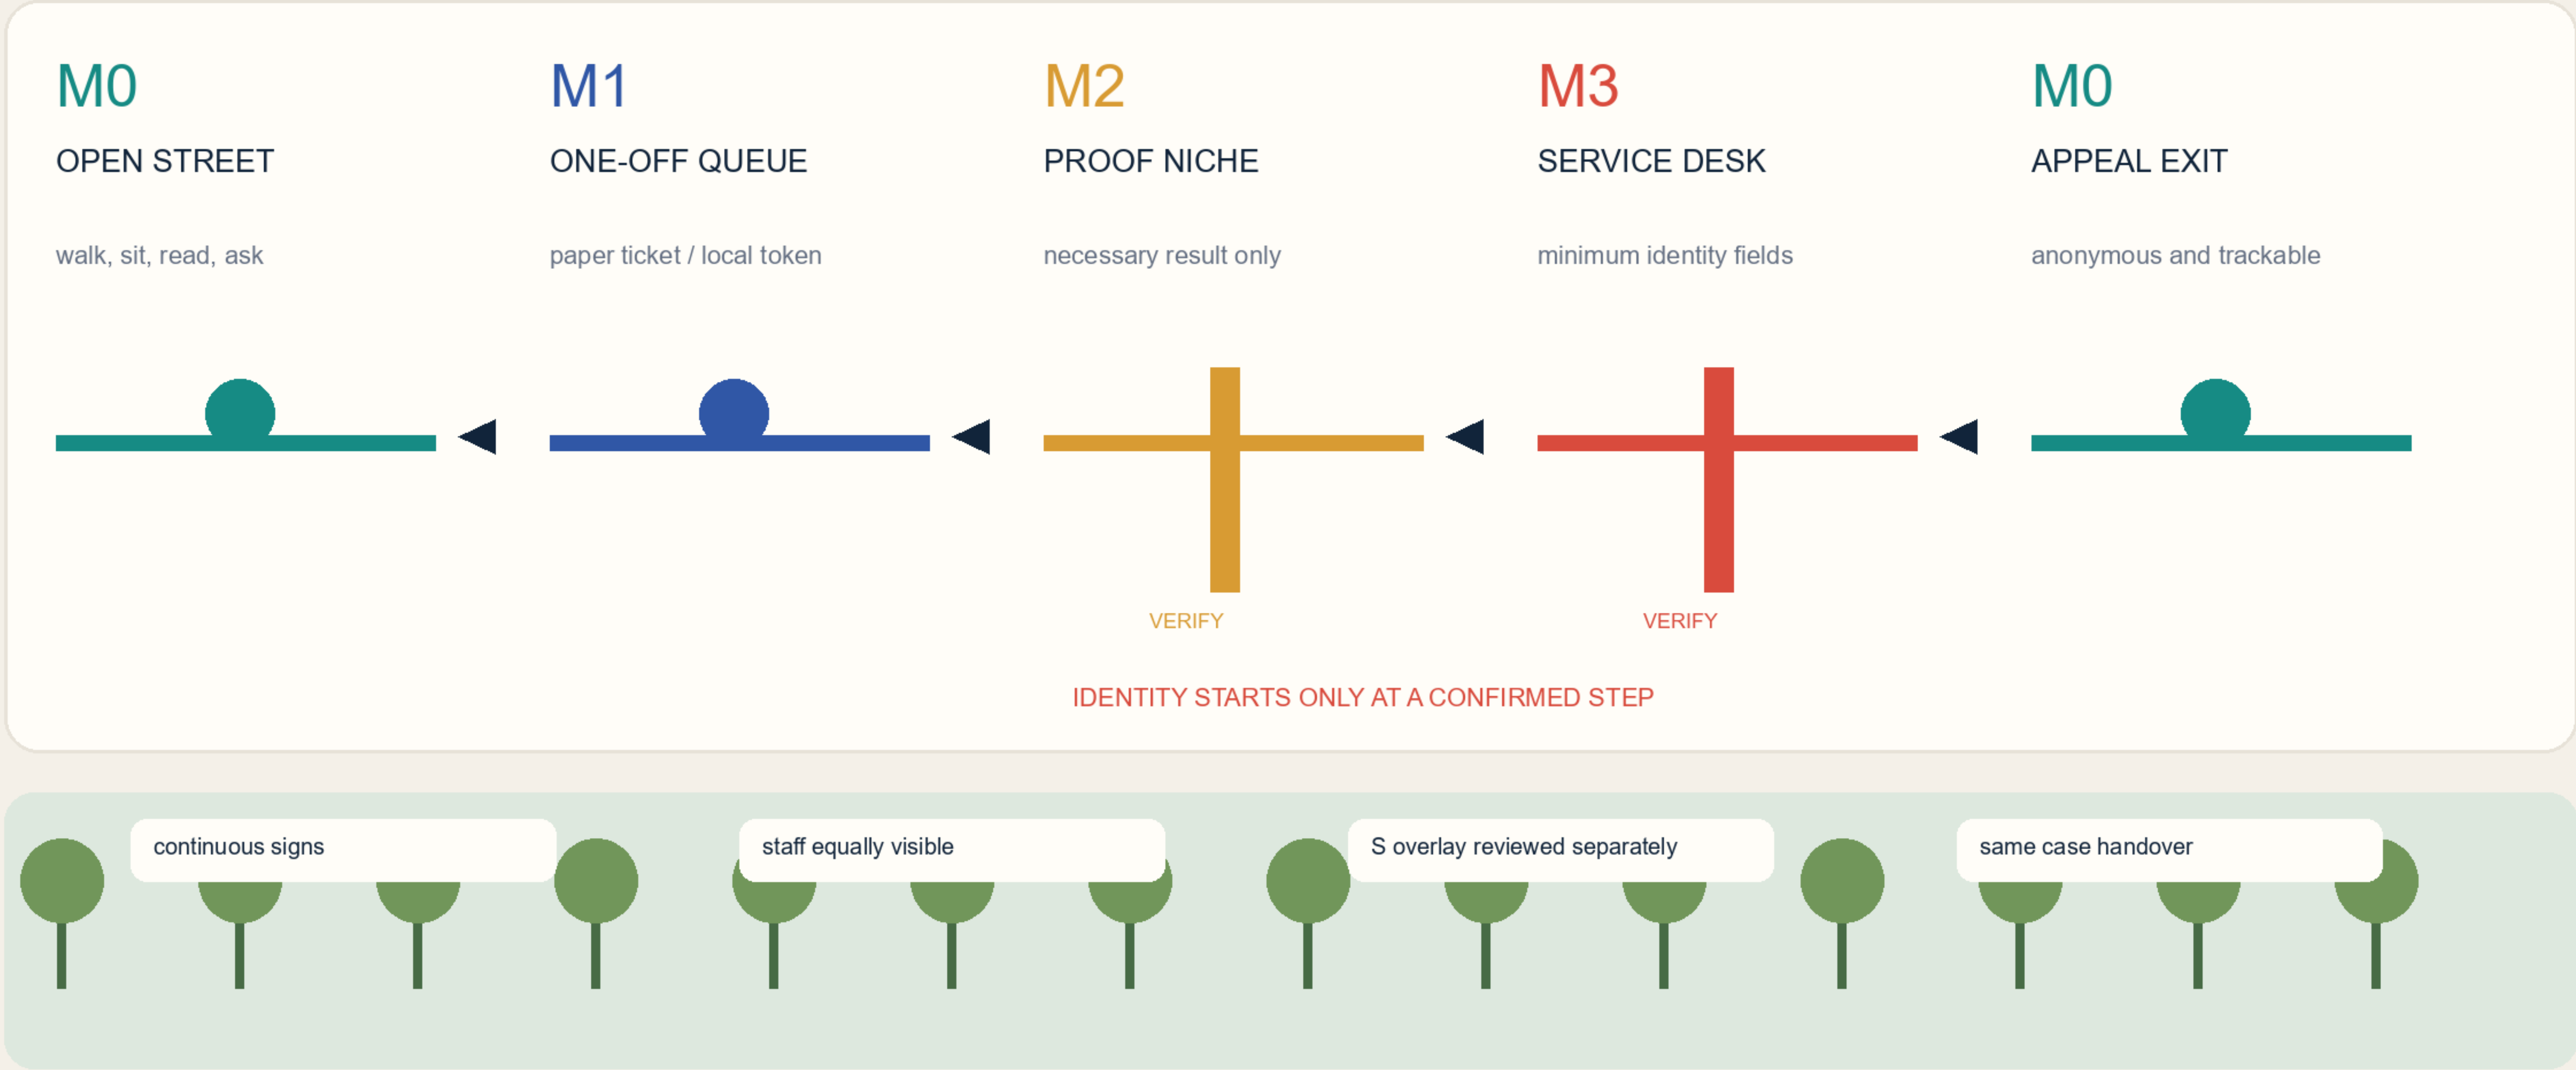

PUBLIC SPACE BEFORE IDENTIFICATION

FIG 04

Walking and blue-green public space: identity is not a barrier

The section draws where identity may begin. Passage, advice, queueing and appeal stay at M0/M1; only confirmed acts reach M2/M3.

M0 keeps movement and help open; M1 holds one task; M2 returns a necessary attribute; M3 identifies only at a confirmed act. The S overlay cuts across all levels.

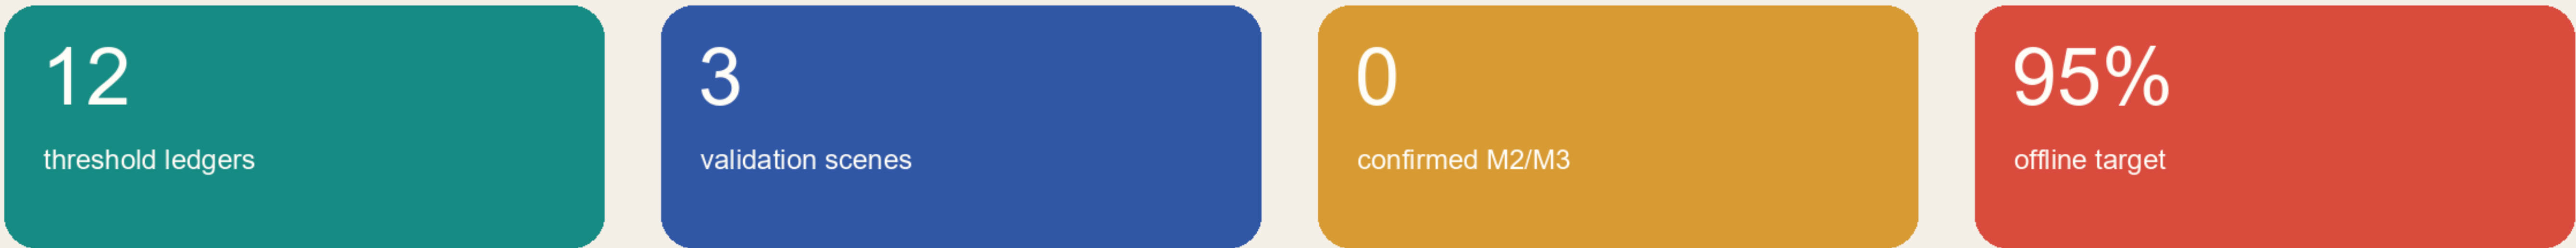

FIELD LEDGER AND EVIDENCE GATES

FIG 05

Core metrics and evidence: no composite score

Each measure can fail independently. Geometry, fields, deletion, staffing and legal confirmation cannot disappear into an average.

Of twelve ledgers, three validation scenes use synthetic data and nine serve daily public tasks. Zero M2/M3 gates are confirmed. No accountable entity, matter-specific legal review, permission, staffing and appeal owner means no deployment.
