

THE REN LINE — Board 1/2 Overall structure

A human-AI double-heading belt · conceptual · provisional boundary

Site overview: one spine, two tracks, nine switches, three stations

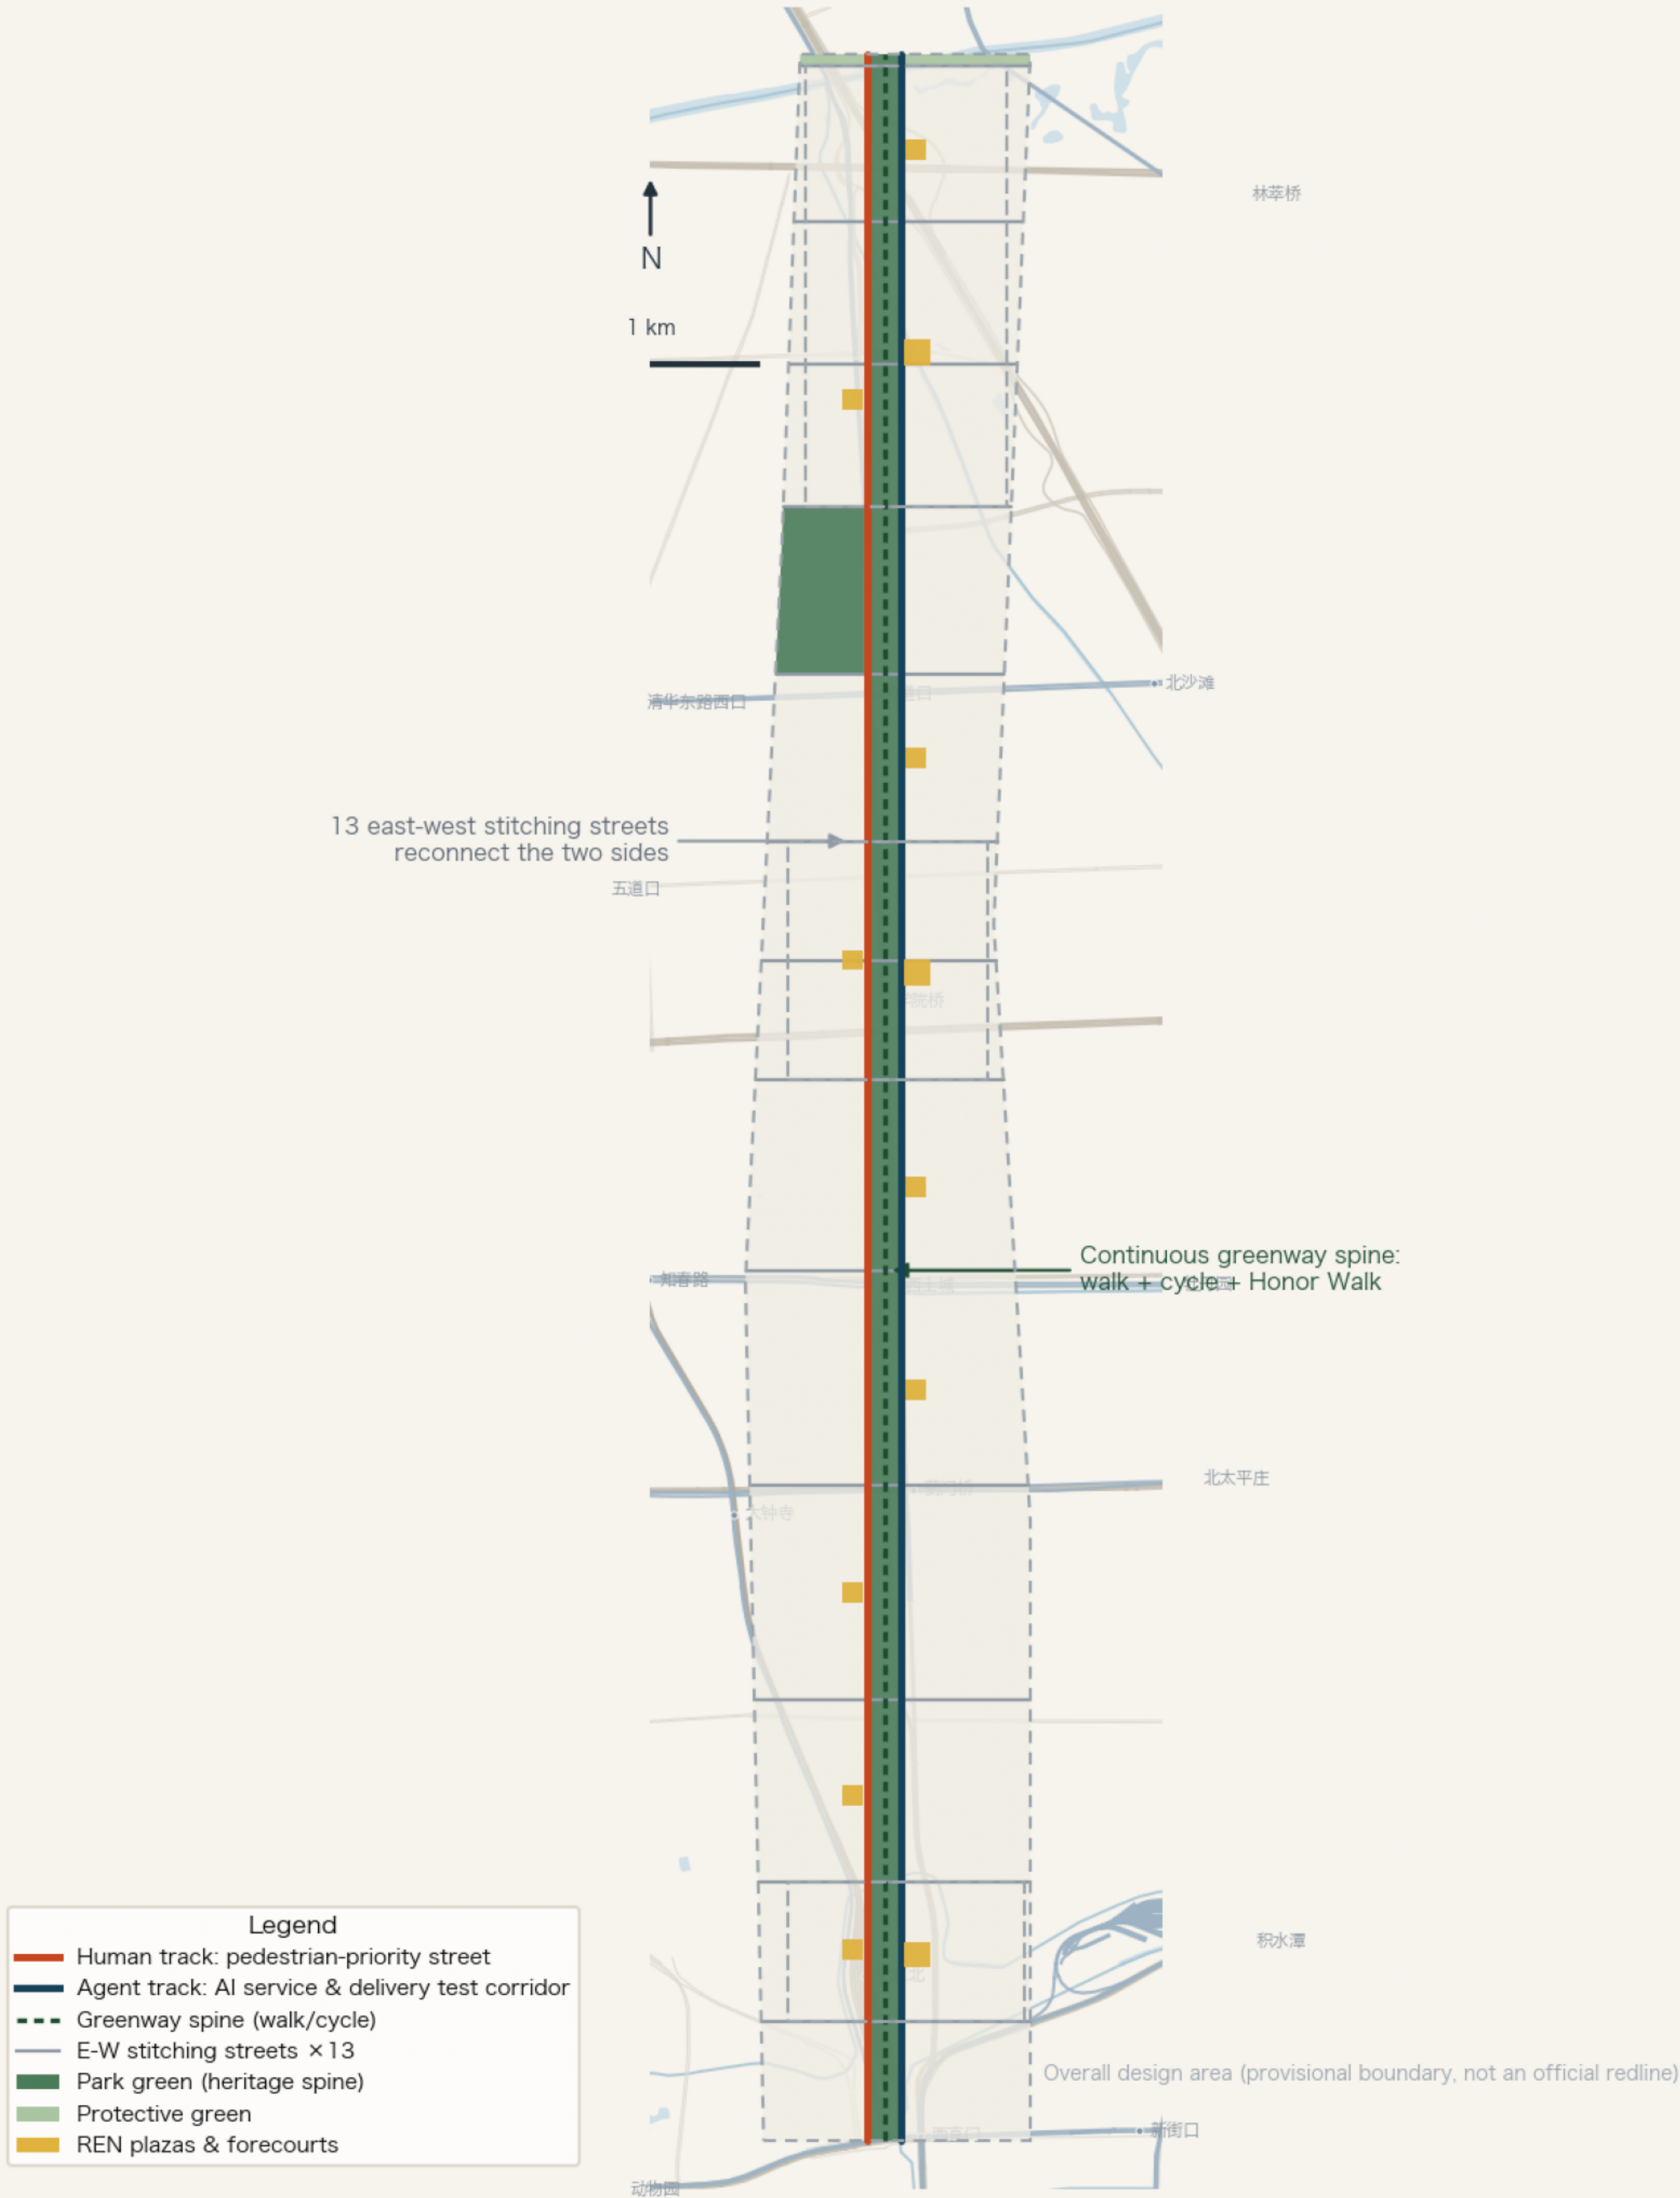

"The REN Line" — overall spatial structure of human-AI push-pull traction · conceptual

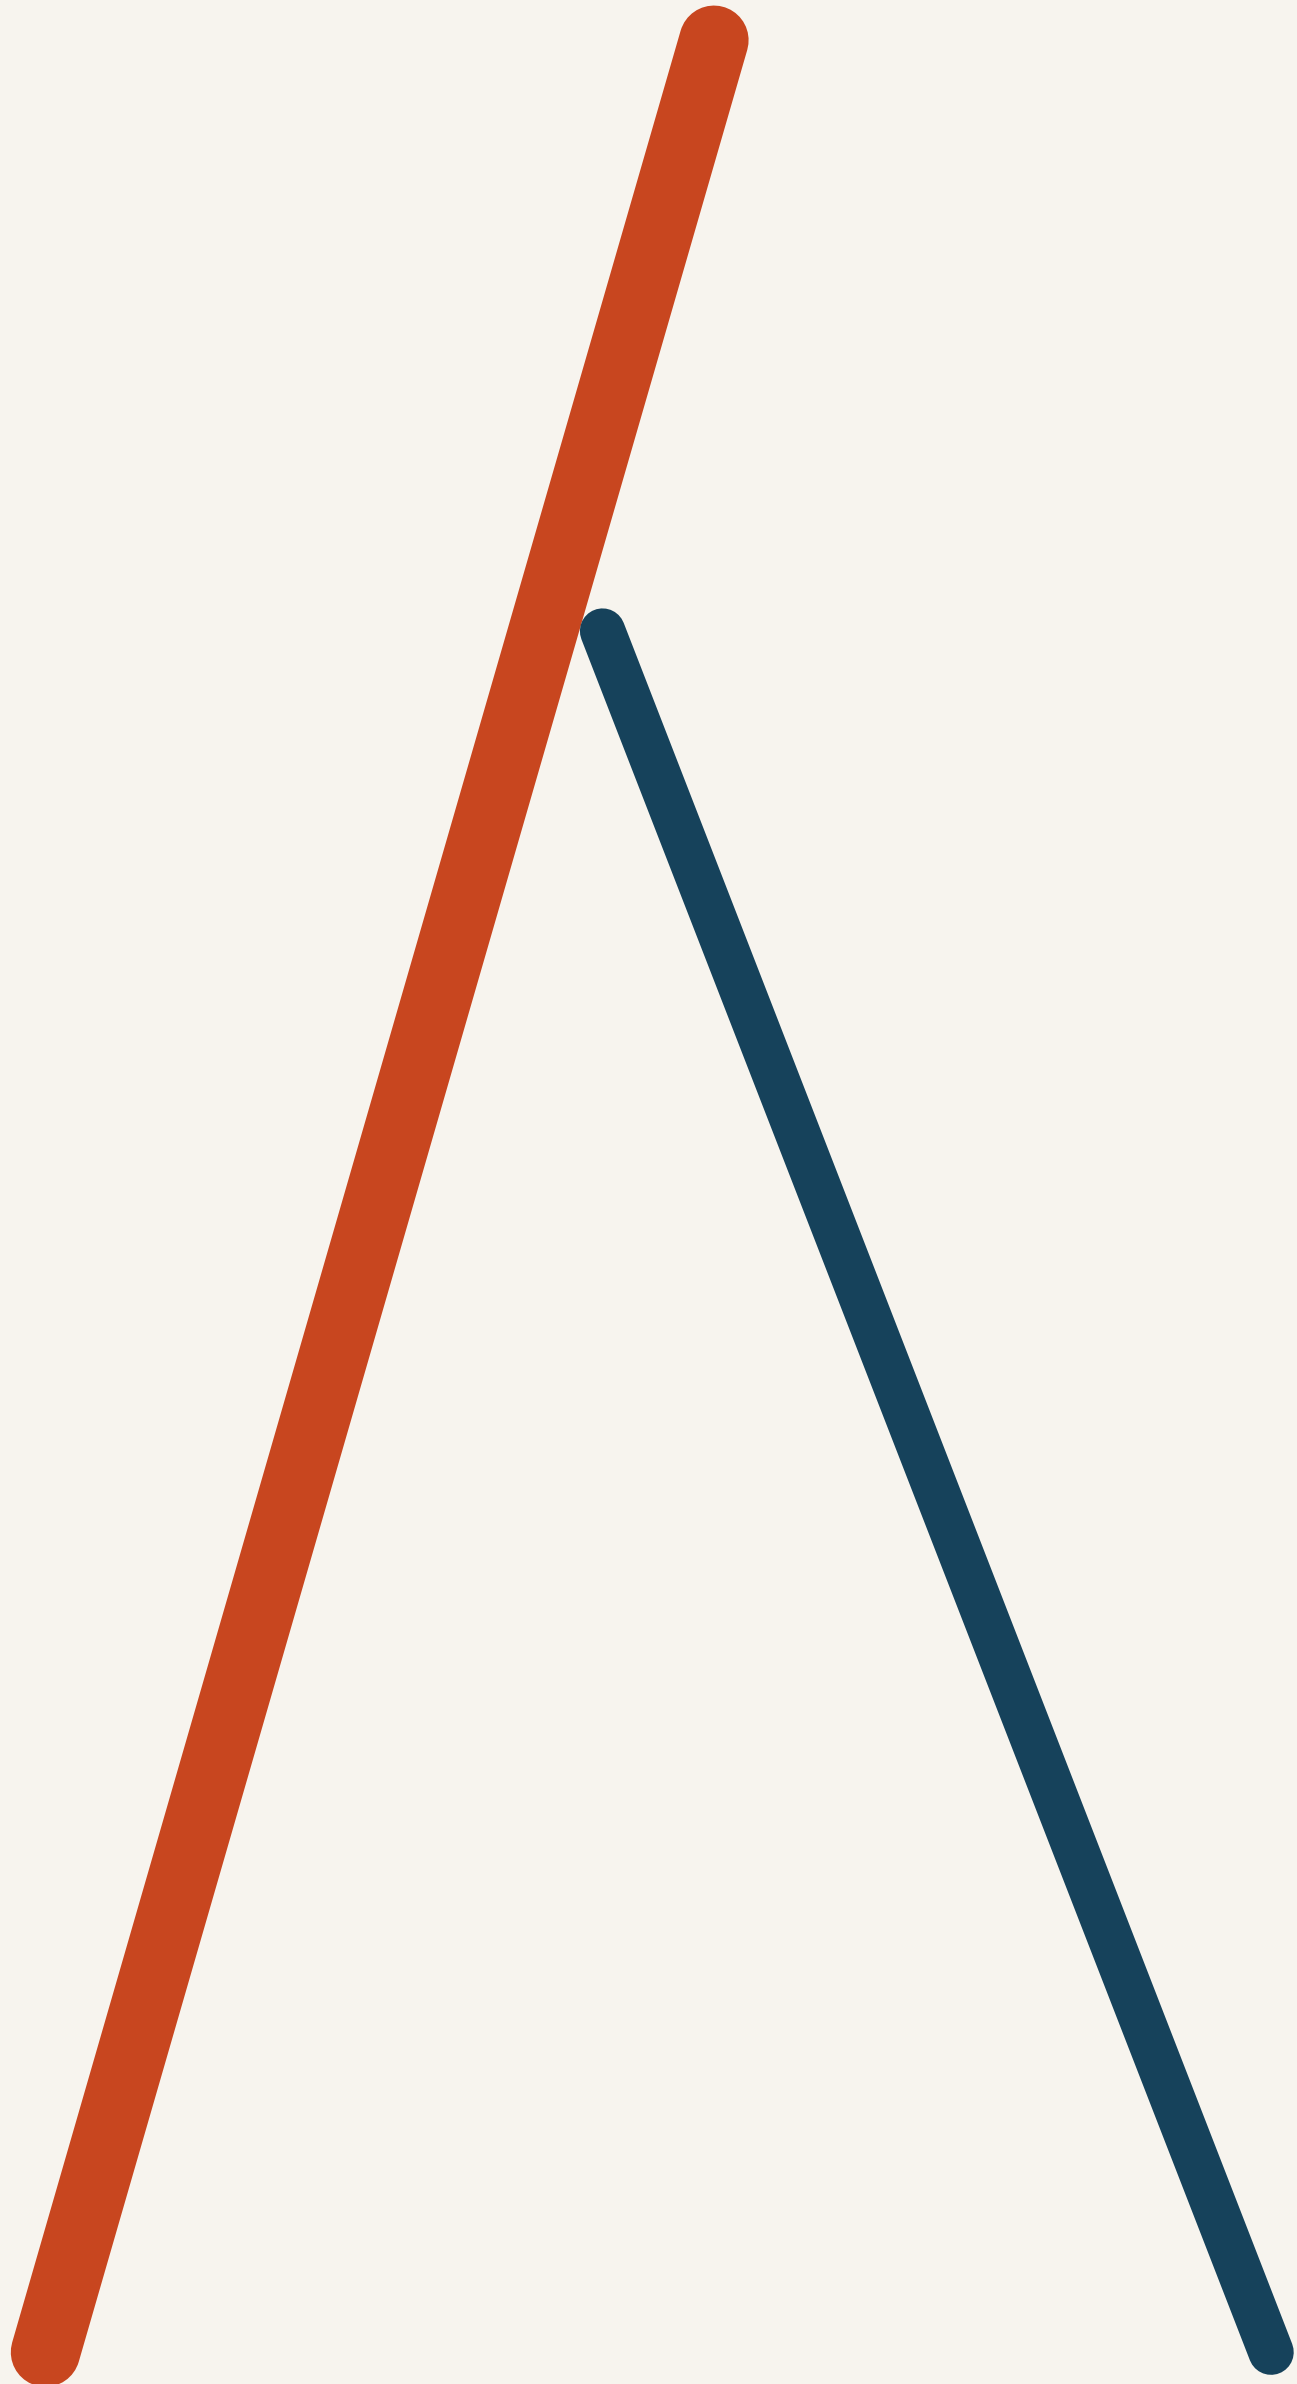

Source: this package geometry/"geojson & metrics.json (recomputed in EPSG:4548). Base map © OpenStreetMap contributors (ODbL), simplified extract for context only. Boundary is a maintainer-regist

Mobility & blue-green public space composite system

Twin tracks, continuous green spine, 13 stitches — humans and agents meet at REN switches · conceptual

Source: this package geometry/"geojson & metrics.json (recomputed in EPSG:4548). Base map © OpenStreetMap contributors (ODbL), simplified extract for context only. Boundary is a maintainer-regist

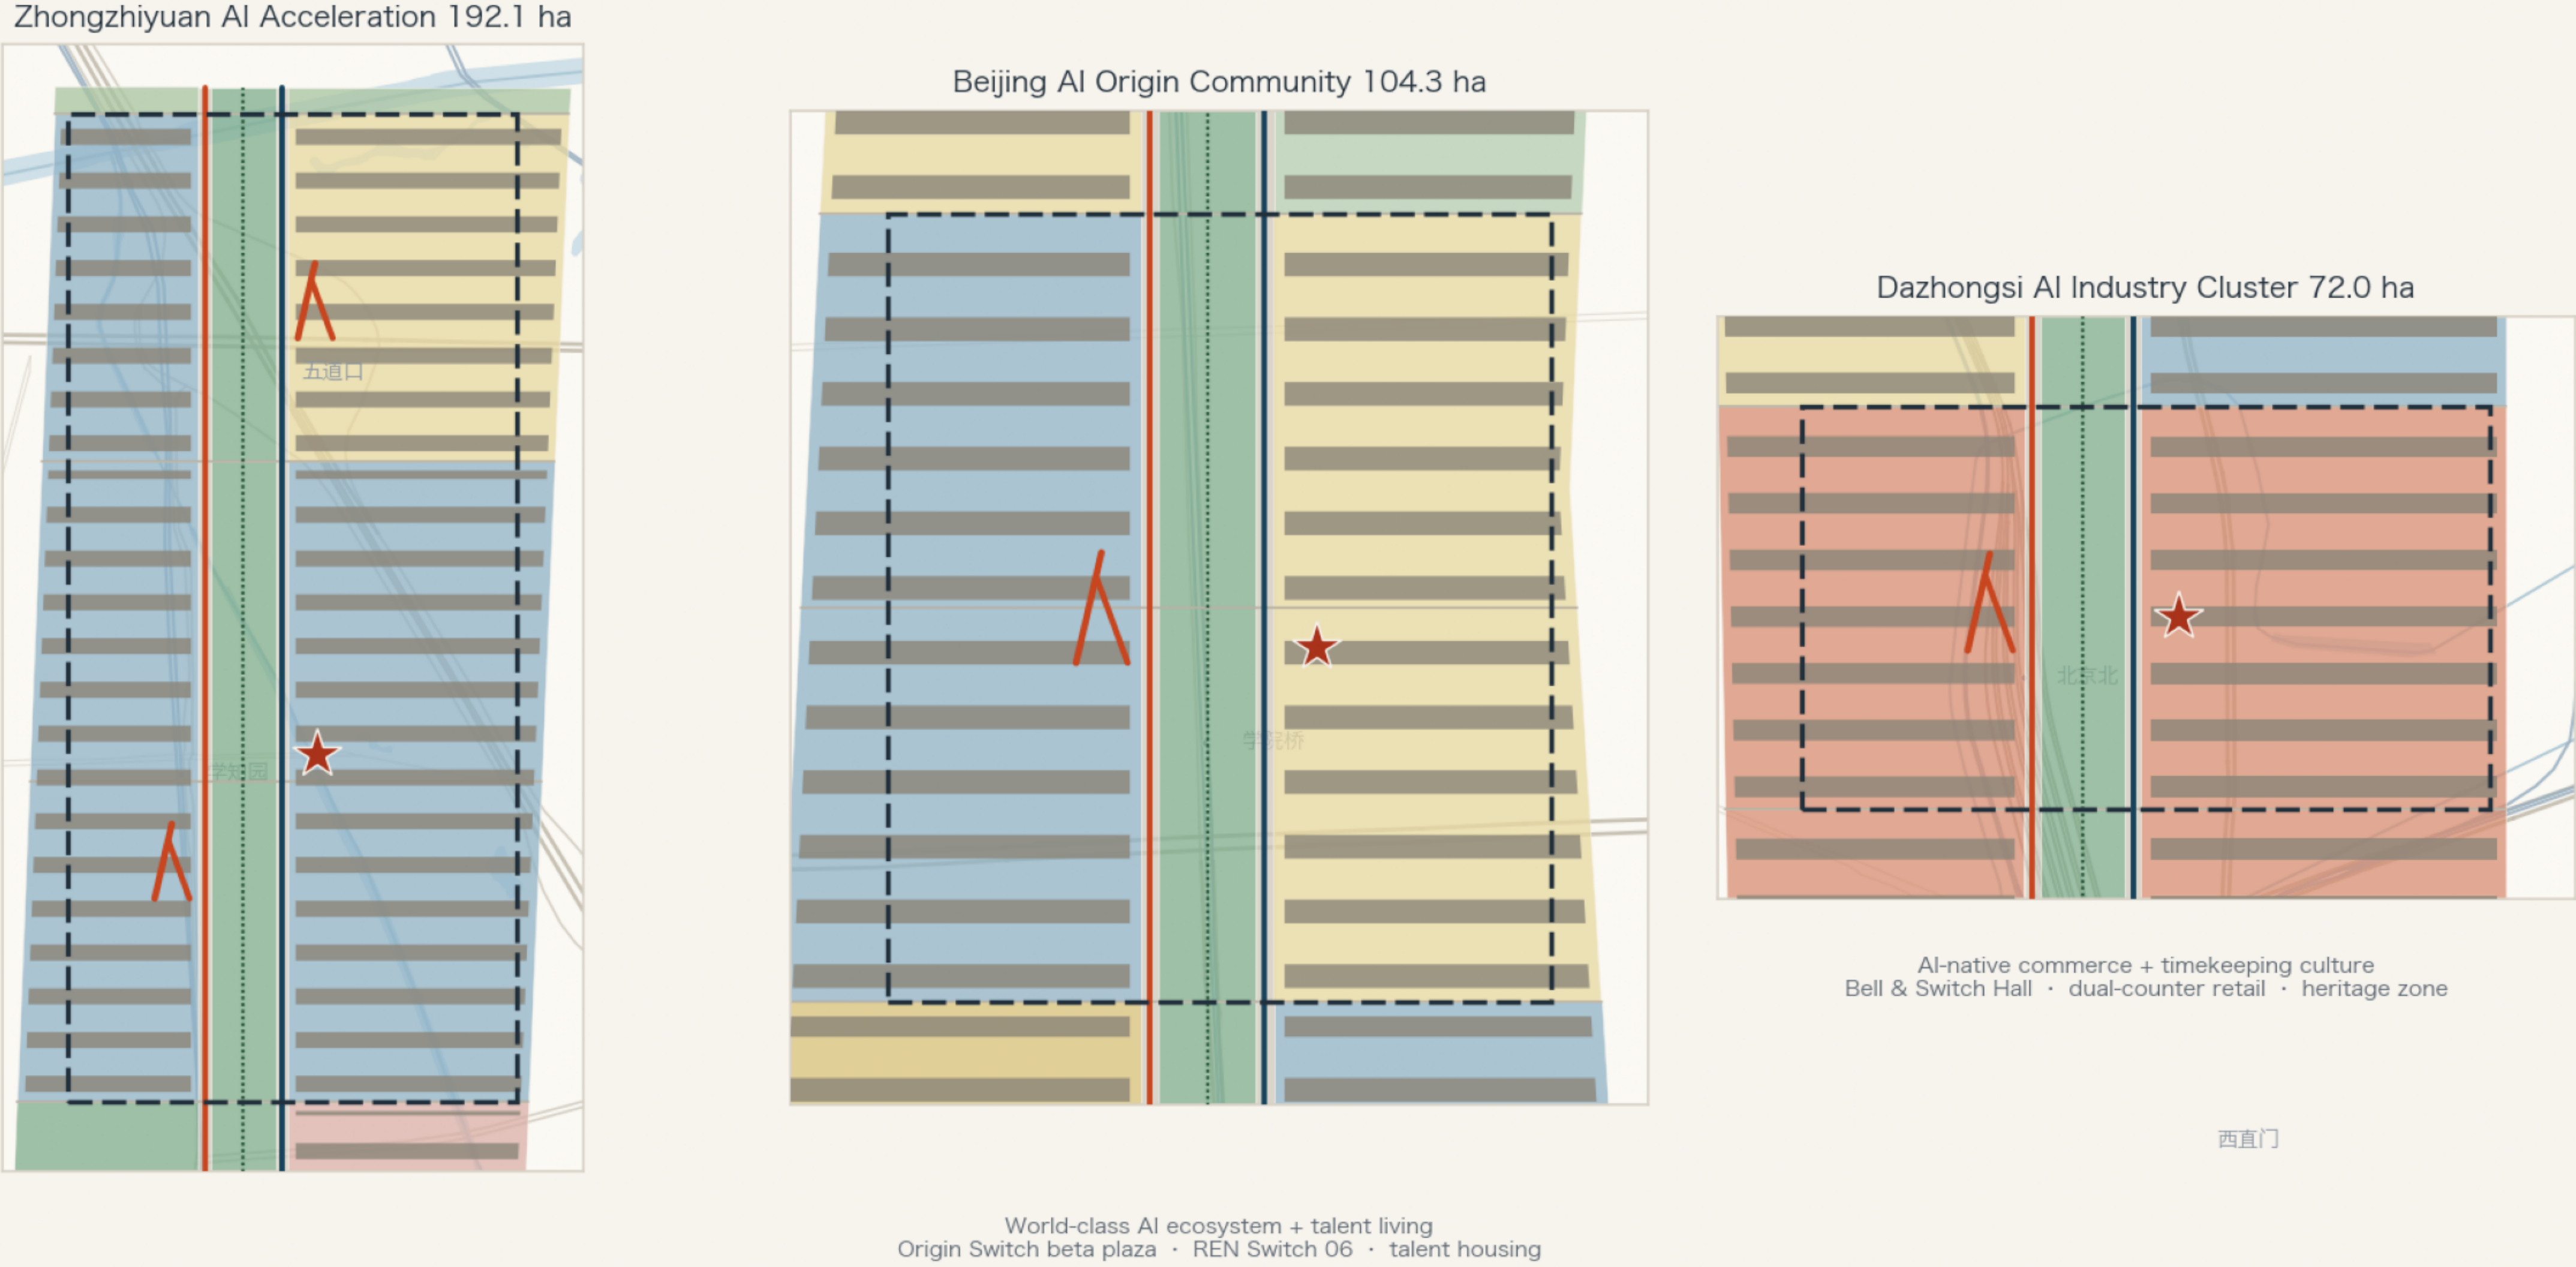

AI pushes · human pulls

THE REN LINE — Board 2/2 Land use • key areas • metrics

Three key areas: detailed design index

North to south: Zhongzhiyuan → Origin Community → Dazhongsi · implementation-depth urban design (conceptual)

Full-stack independent innovation + AI governance
Traction Tower · REN Switch · accelerator clusters

Concept footprints (non-statutory)

Human track

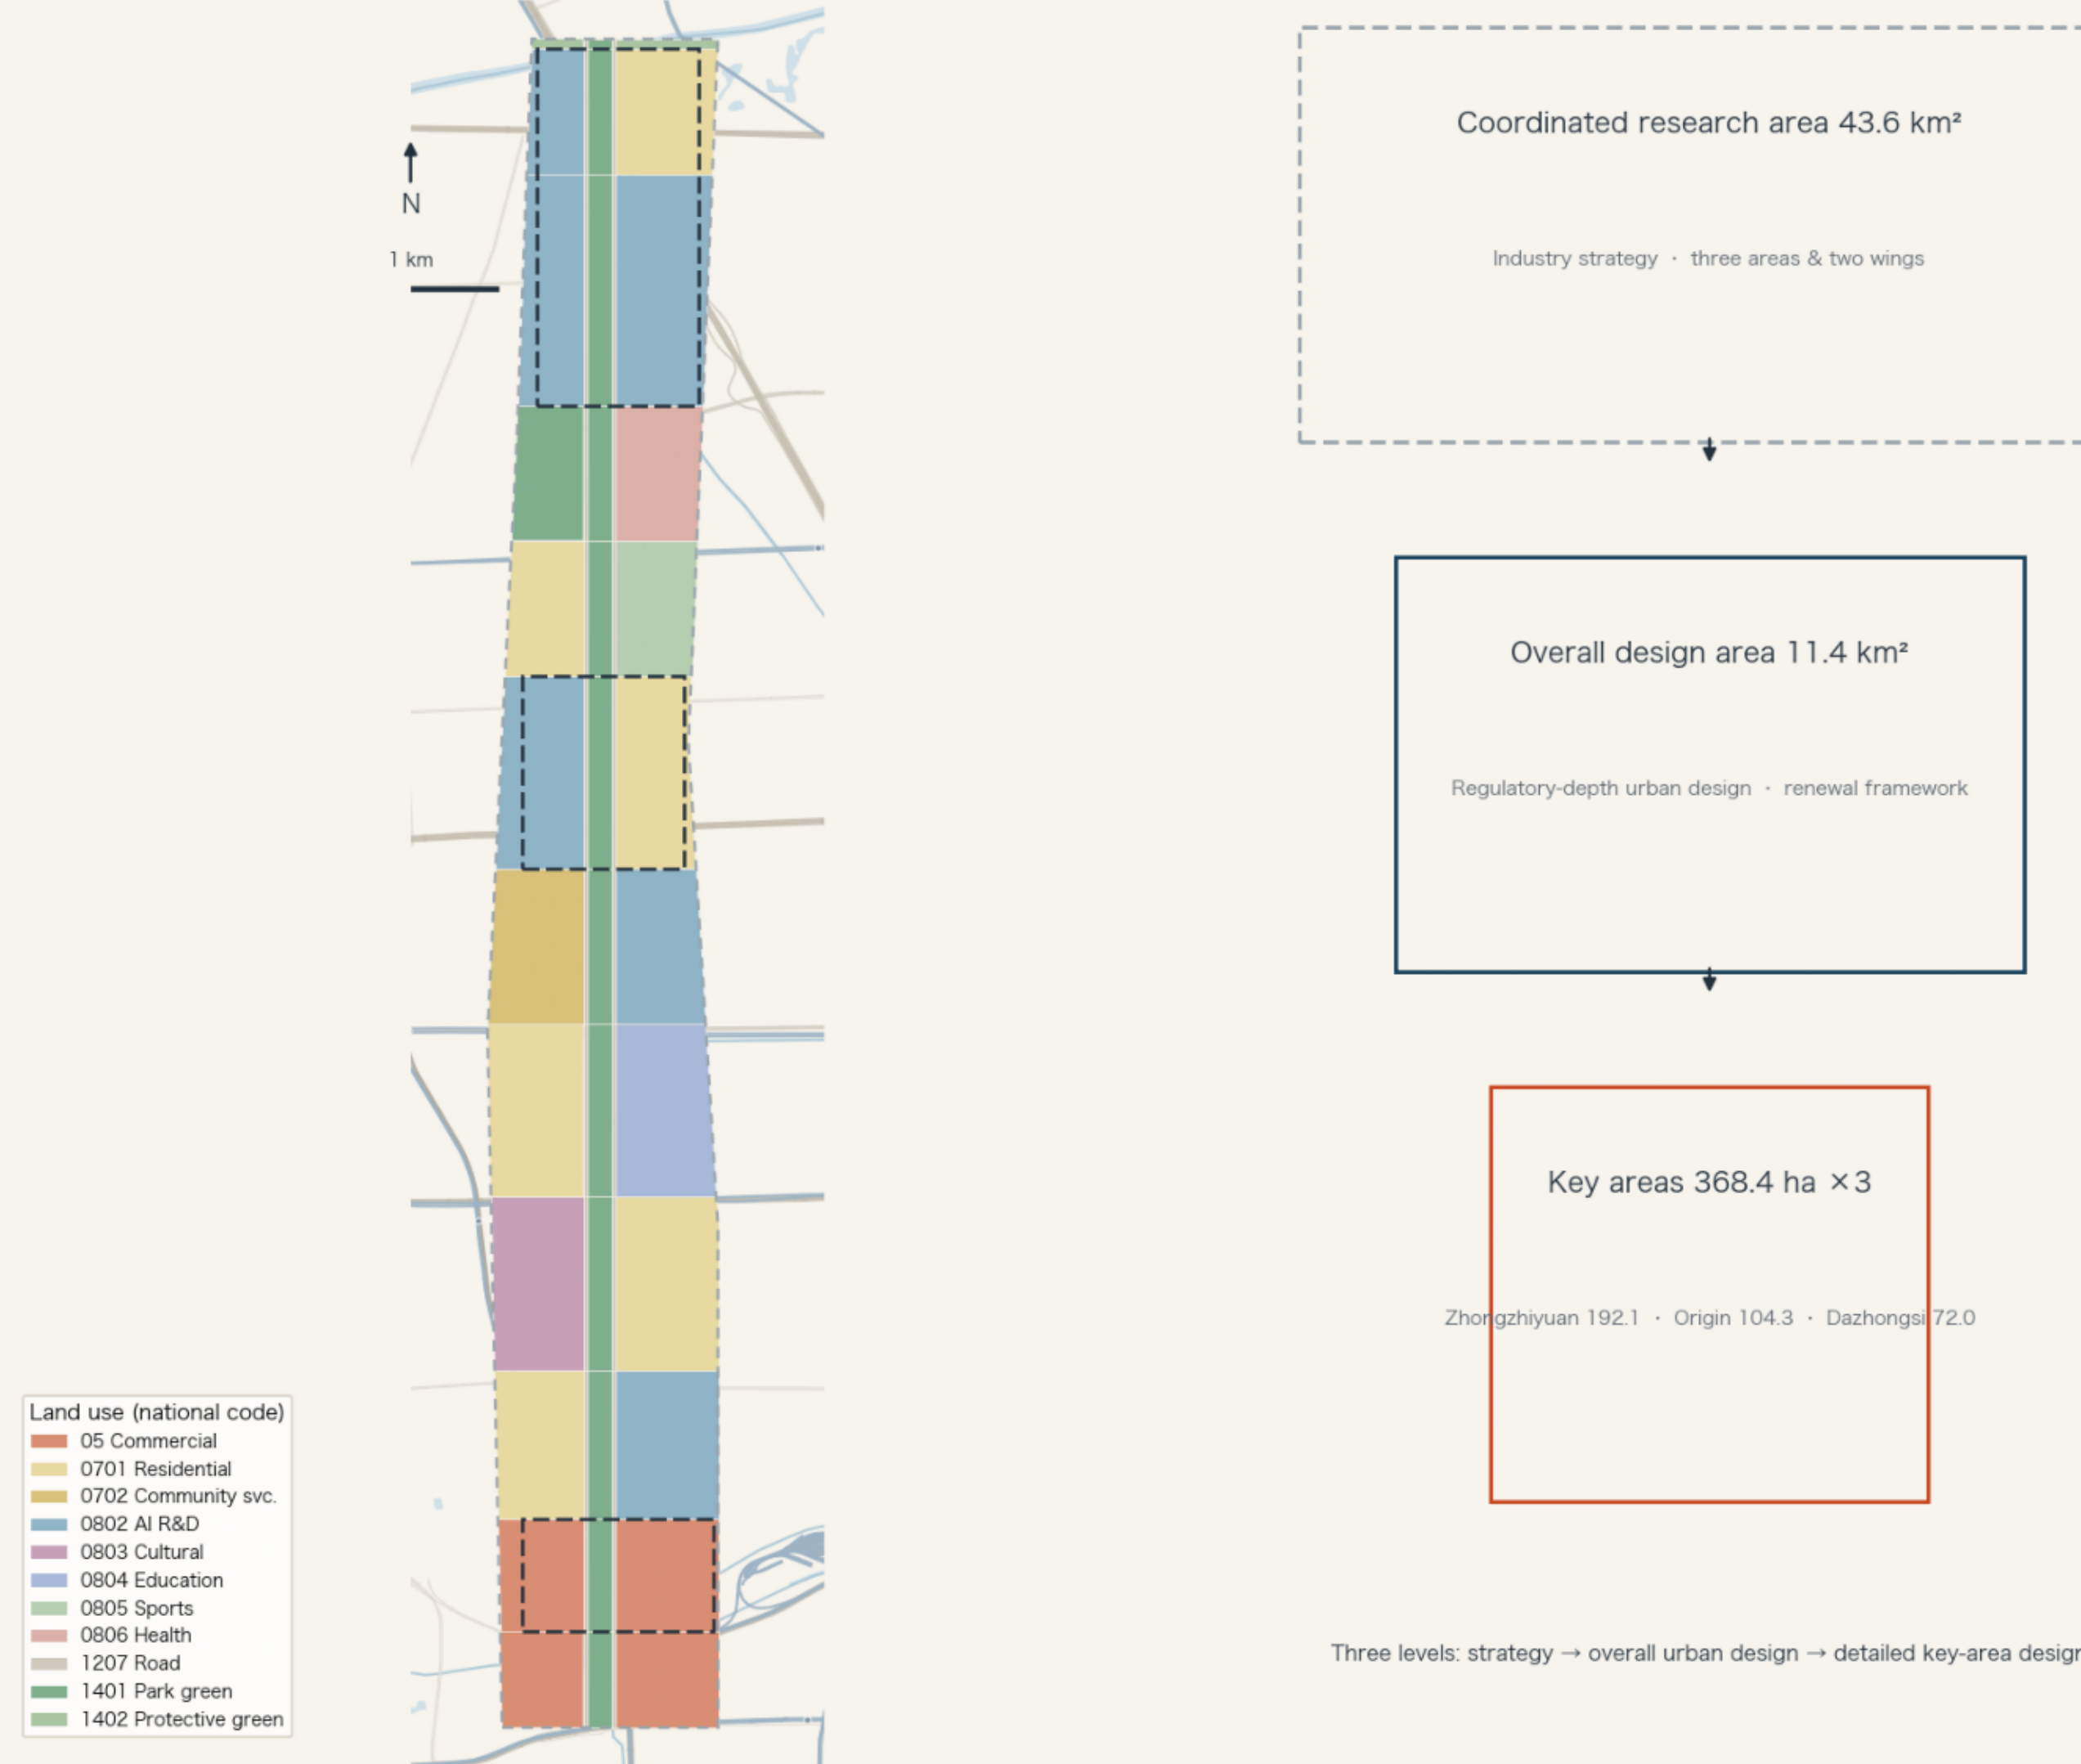

Agent track

Provisional key-area bounds

Source: this package geometry/geosjon & metrics/jsn (recomputed in EPSG:4548). Base map © OpenStreetMap contributors (ODBL), simplified extract for context only. Boundary is a maintainer-registered provisional constraint, not an official redline. All content is a conceptual suggestion. ♦ by Claude Code

Land-use structure & three-level scope framework

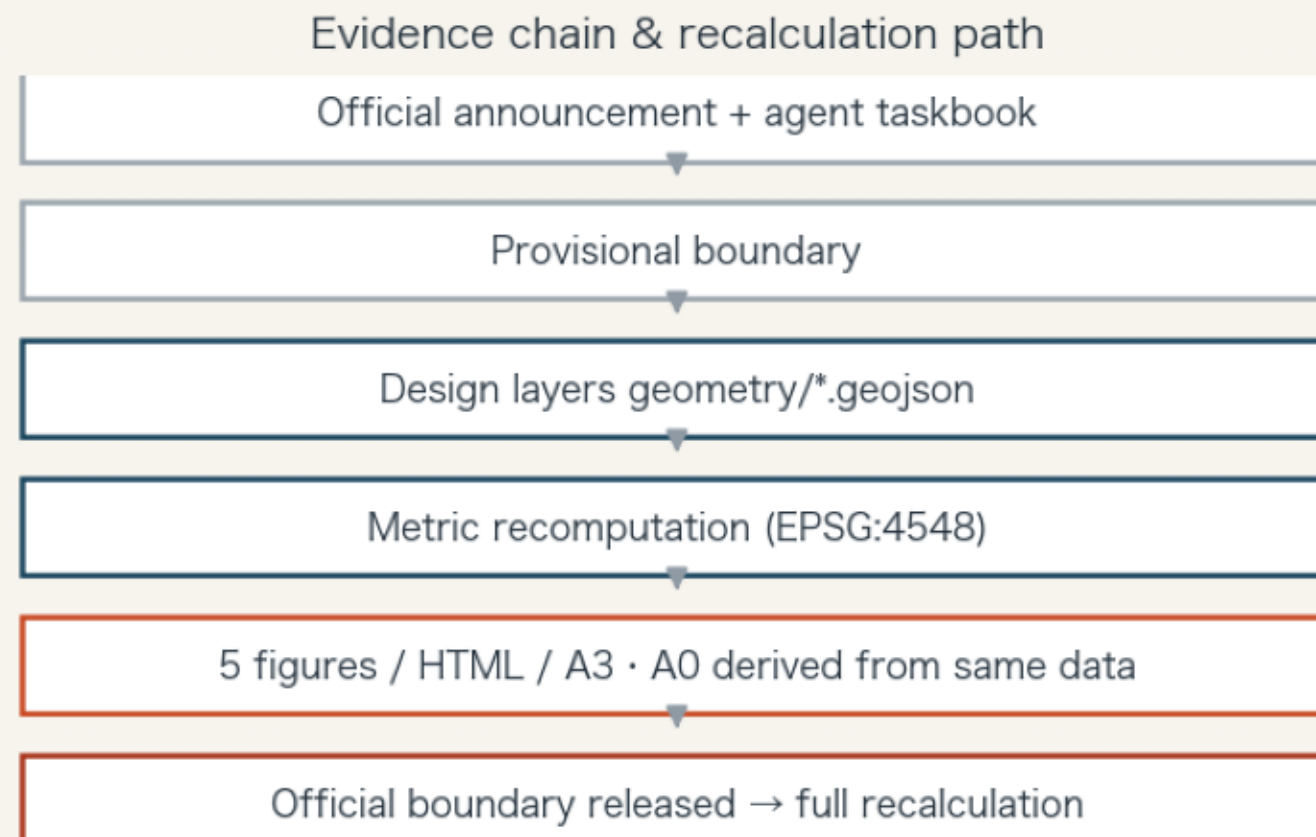

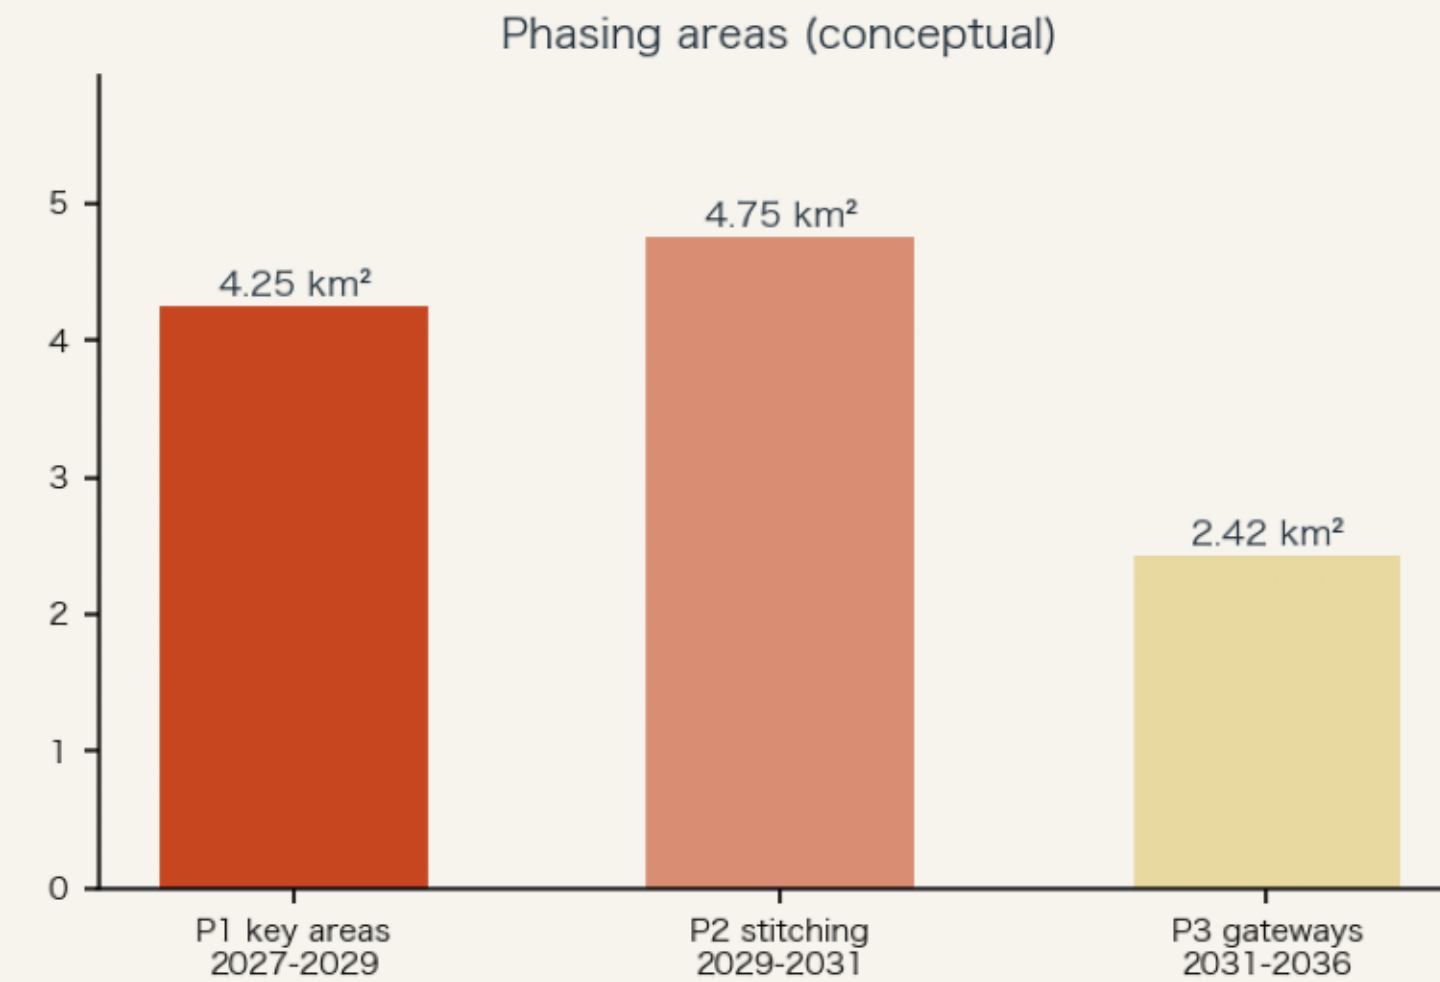

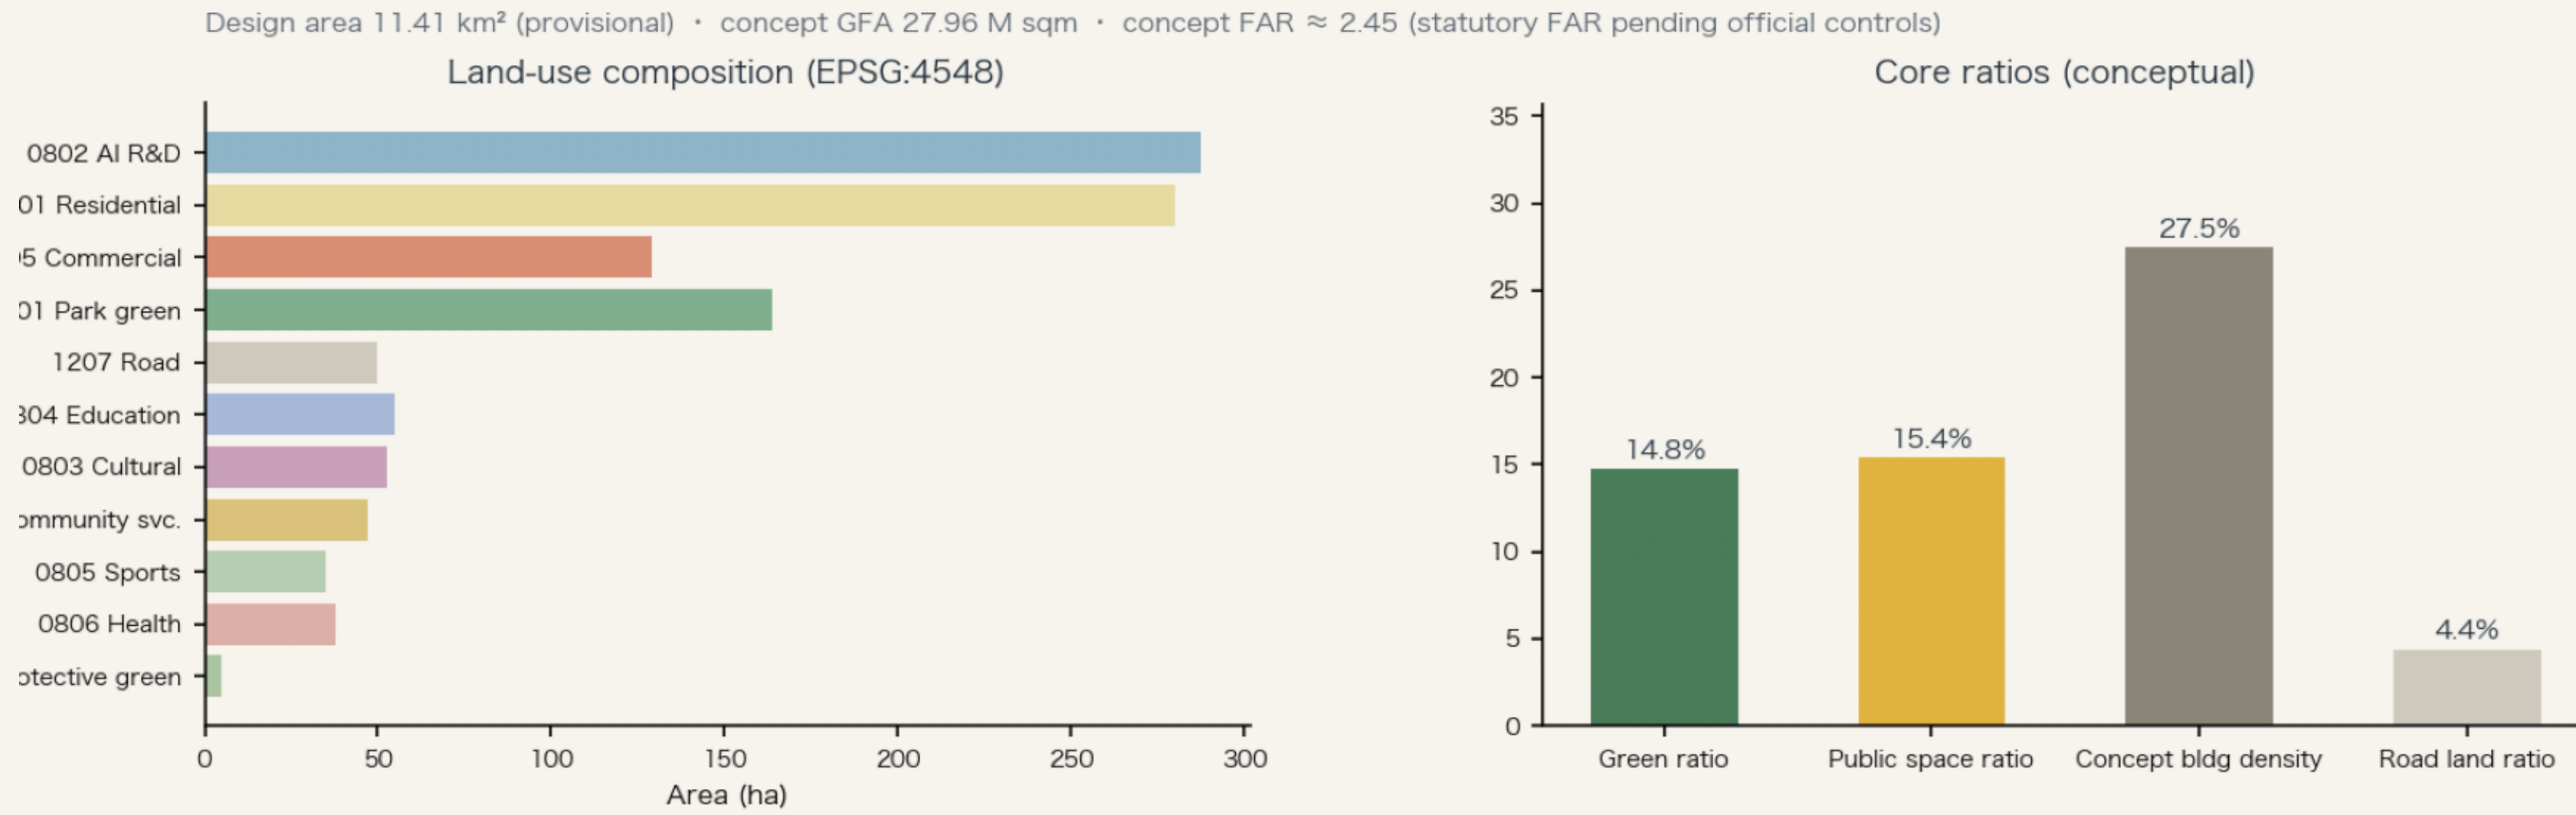

Complete gap-free land-use partition of the overall design area + scope cascade · conceptual

Source: this package geometry/geojson & metrics.json (recomputed in EPSG:4548). Base map © OpenStreetMap contributors (ODbL), simplified extract for context only. Boundary is a maintainer-registered provisional constraint, not an official redline. All content is for informational purposes only.

Core metrics recomputation & evidence chain

Every number is recomputable from geometry/*.geojson in EPSG:4548; all values conceptual, none statutory

Source: this package geometry/*_geojson & metrics.json (recomputed in EPSG:4548). Base map © OpenStreetMap contributors (ODbL), simplified extract for context only. Boundary is a maintainer-registered provisional constraint, not an official redline. All conte
