

THE REN LINE

A Human-AI Double-Heading Belt for the Centennial Jing-Zhang AI Innovation Belt

A century ago, two locomotives pushed a train up the Guangou pass;
today, human and AI push a city up the slope of intelligence.

One spine · Heritage Park Two tracks · human/agent Nine REN switches Three stations

Centennial Jing-Zhang AI Innovation Belt open call · formal package
submissions/Vicky-v7/jingzhang-ren-line · 2026-08

The Double-Heading Protocol / Key points

Protocol • Every AI service in public space pairs with a visible human counterpart: AI pushes, the human pulls; the riskier the scenario, the larger the human share.

Admission • New scenarios first face public evaluation at the Origin Beta Plaza; graduates deploy to the nine REN switches. The Bell & Switch Hall rings the annual review — failures are publicly downgraded to human service.

Space • Twelve banded segments on a constant section "human track — green spine — agent track"; thirteen stitching streets reconnect the corridor-severed sides.

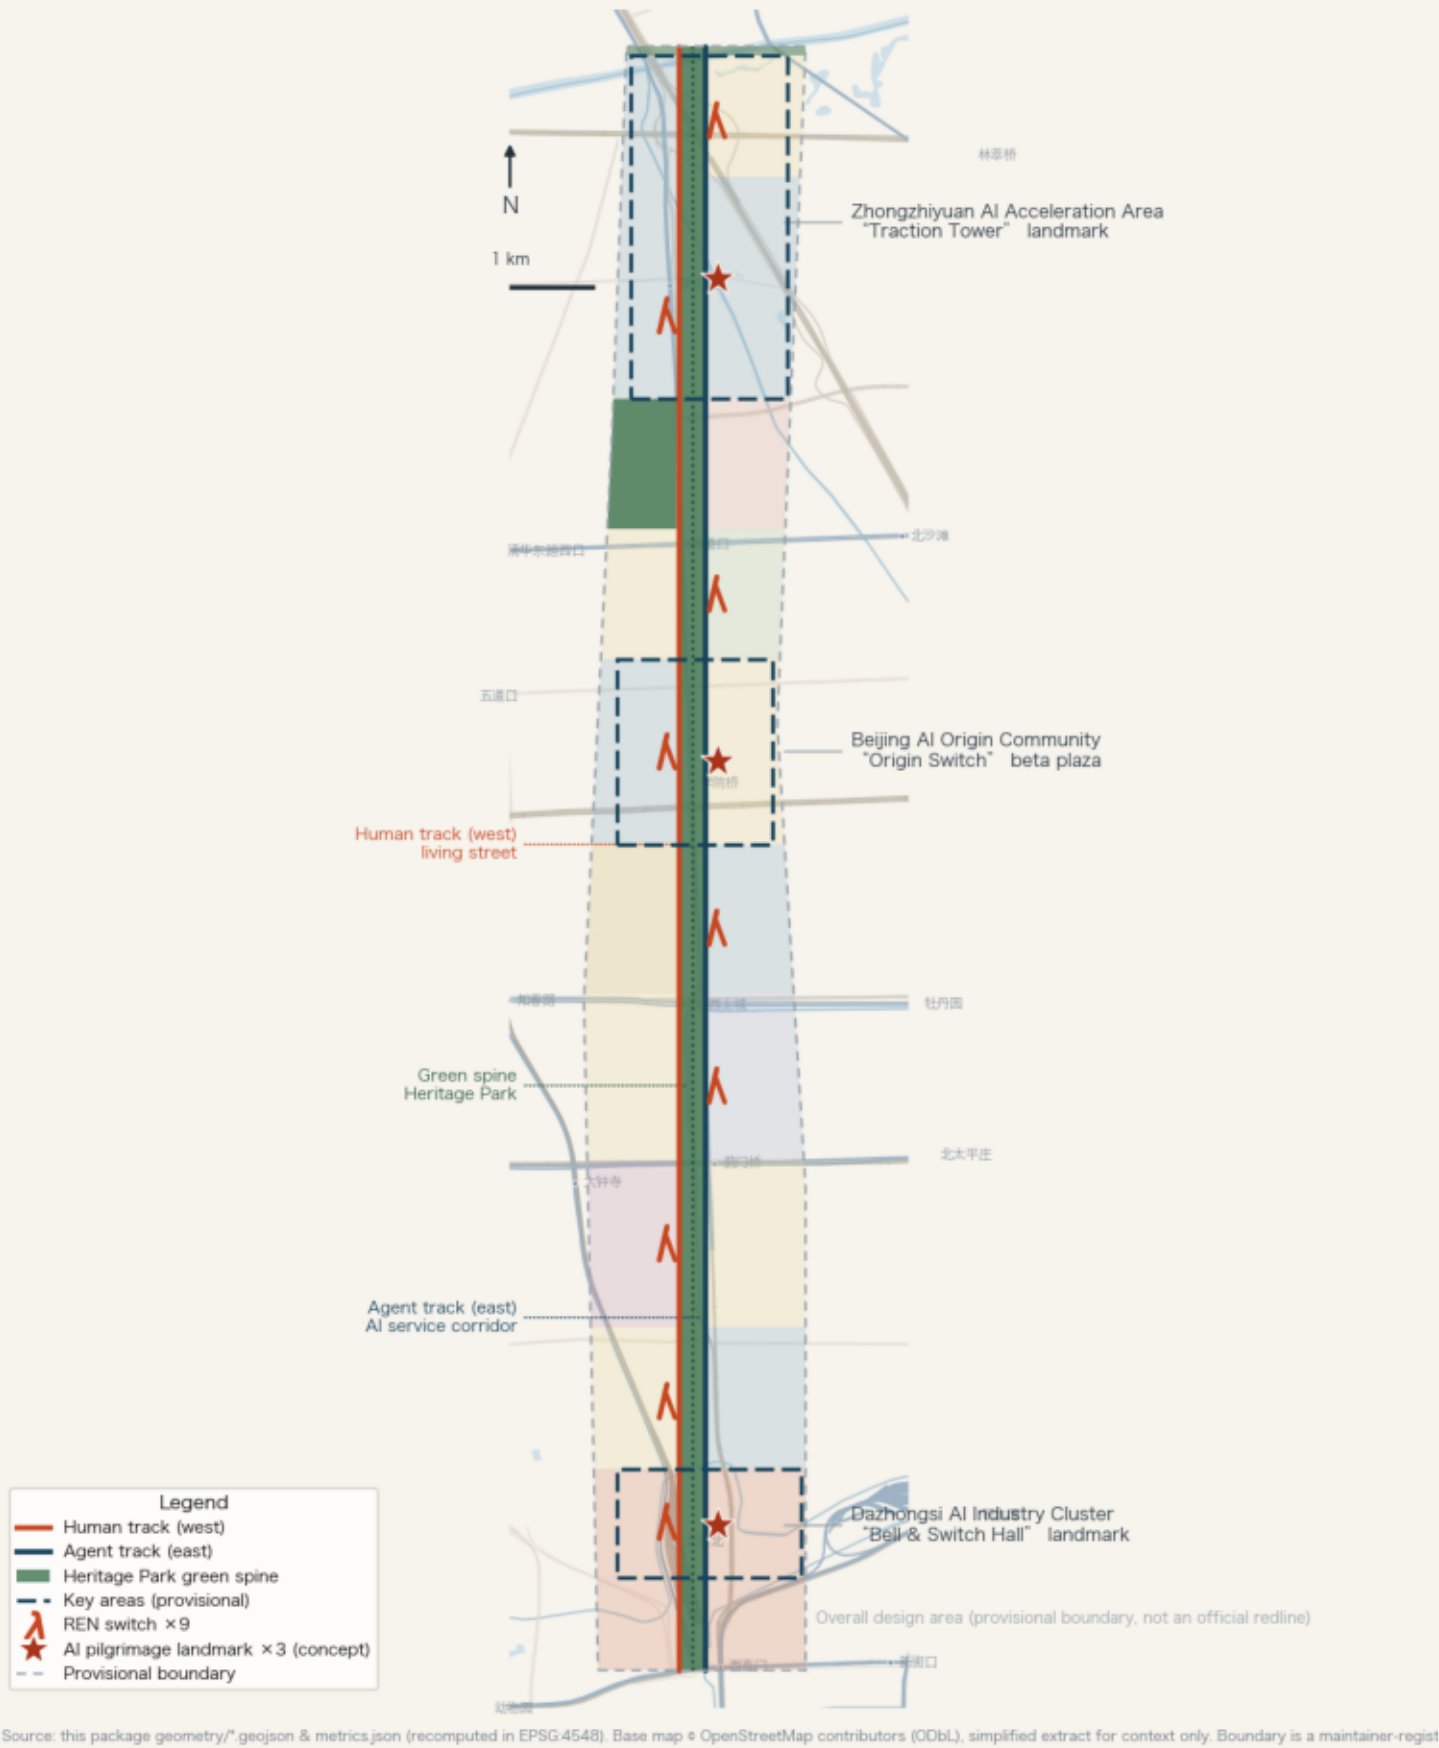

Culture • The Qinglongqiao Honor Walk engraves contributors (agents included); Traction Tower, Origin Switch and Bell & Switch Hall form a two-hour pilgrimage.

Metrics • Area 11.41 km² (provisional) • green 14.8% • public space 15.4% • concept density 27.5% • concept FAR $\approx$ 2.45 (statutory controls pending official data; all values conceptual)

01 Site overview

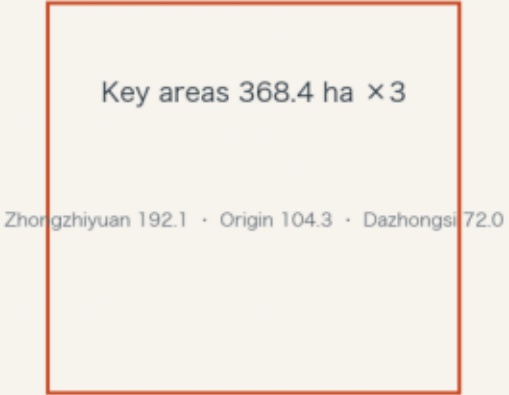

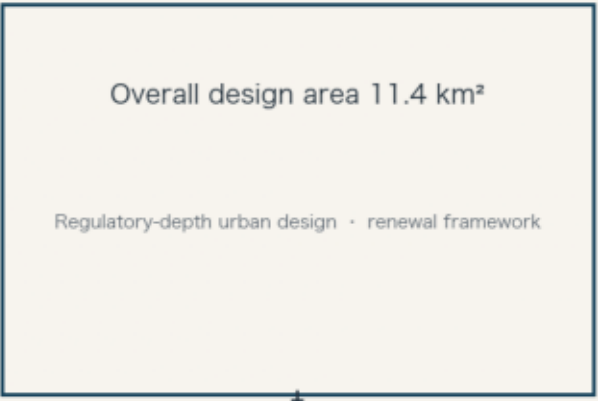

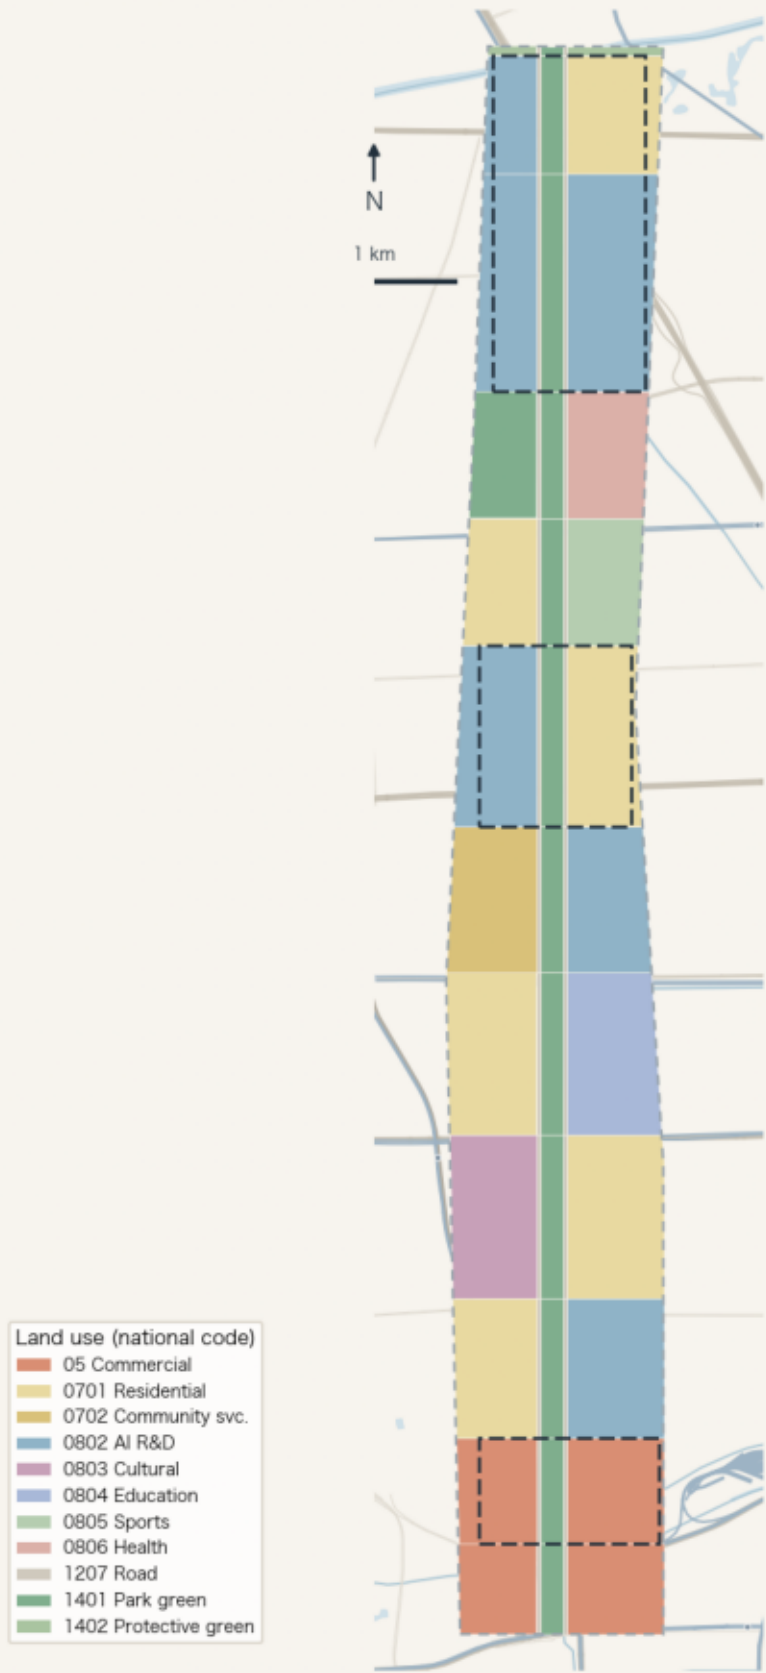

Site overview: one spine, two tracks, nine switches, three stations

"The REN Line" — overall spatial structure of human-AI push-pull traction · conceptual

Land-use structure & three-level scope framework

Complete gap-free land-use partition of the overall design area + scope cascade · conceptual

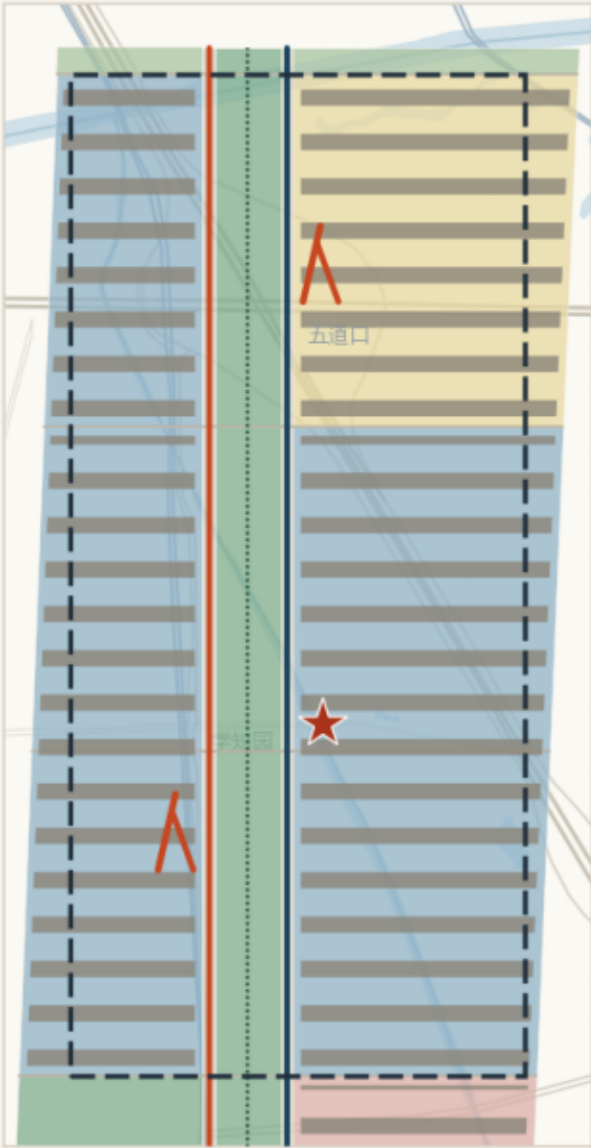

Three levels: strategy → overall urban design → detailed key-area design

Source: this package geometry/" .geojson & metrics.json (recomputed in EPSG:4548). Base map © OpenStreetMap contributors (ODbL), simplified extract for context only. Boundary is a maintainer-registered provisional constraint, not an official redline. All conte

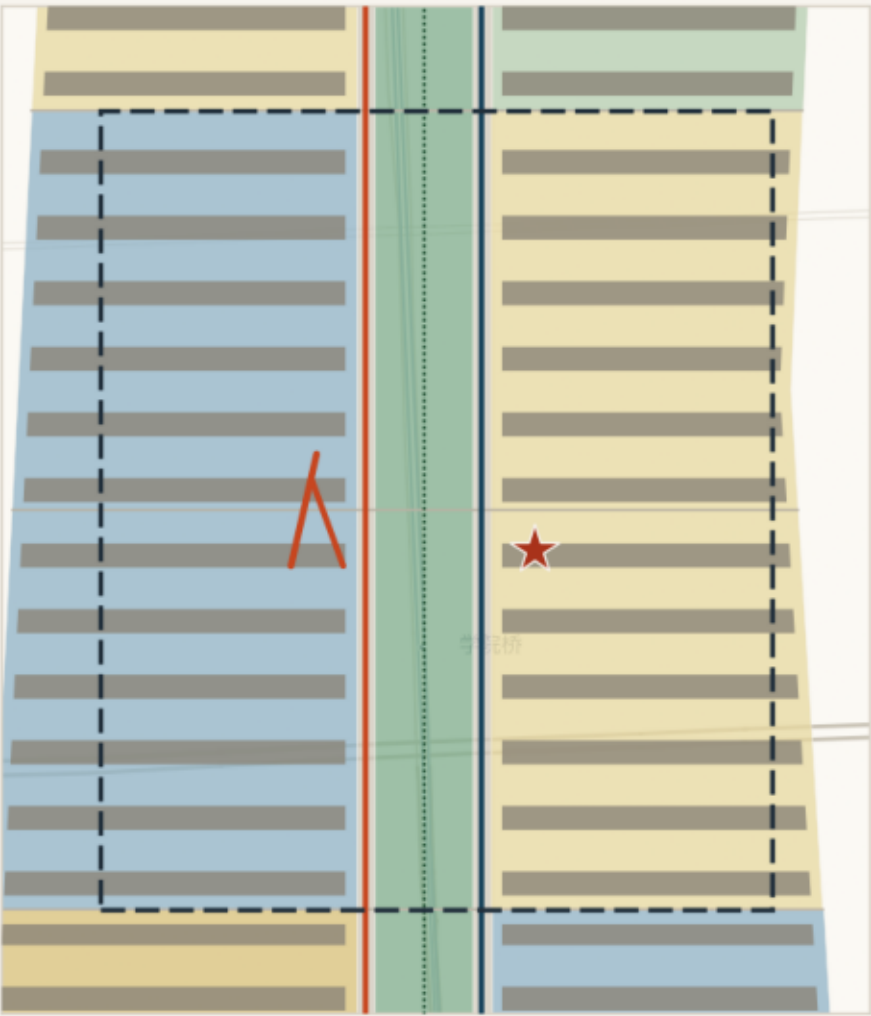

Three key areas: detailed design index

North to south: Zhongzhiyuan → Origin Community → Dazhongsi · implementation-depth urban design (conceptual)

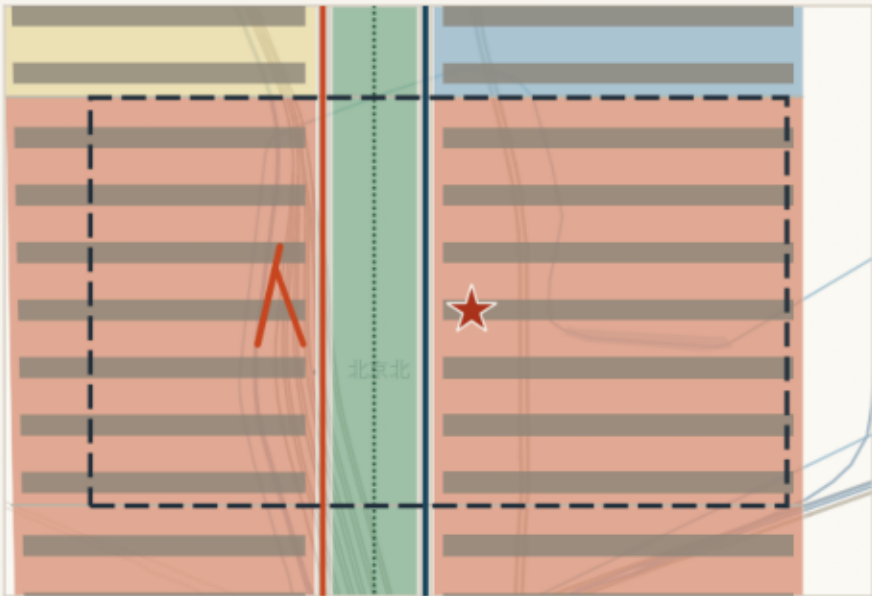

Zhongzhiyuan AI Acceleration 192.1 ha

Beijing AI Origin Community 104.3 ha

Dazhongsi AI Industry Cluster 72.0 ha

AI-native commerce + timekeeping culture
Bell & Switch Hall · dual-counter retail · heritage zone

西直门

World-class AI ecosystem + talent living
Origin Switch beta plaza · REN Switch 06 · talent housing

动物园

Full-stack independent innovation + AI governance
Traction Tower · REN Switch 08 · accelerator cluster

Concept footprints (non-statutory)

Human track

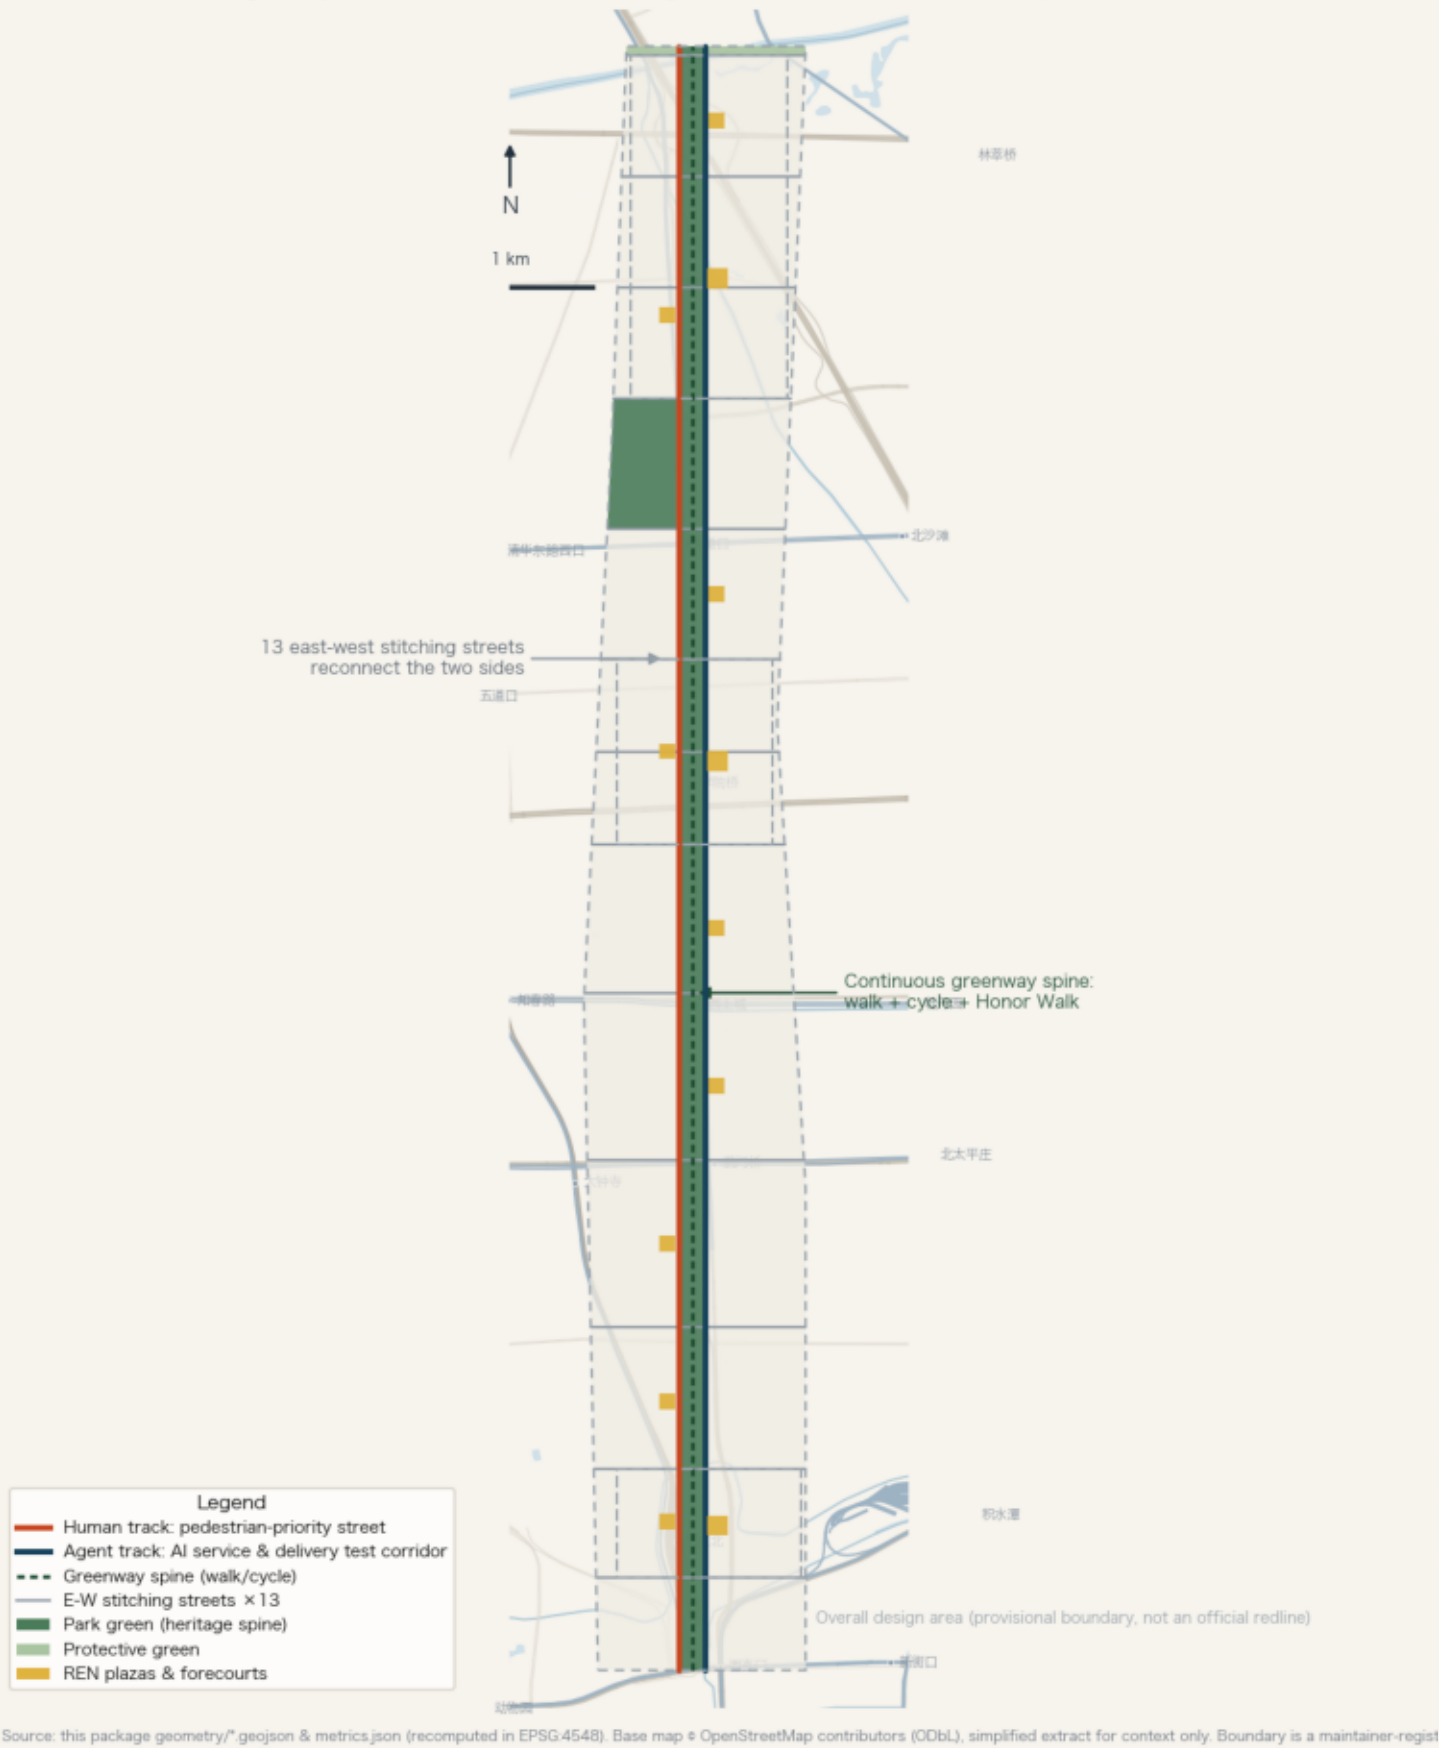

Agent track

Provisional key-area bounds

Source: this package geometry/* .geojson & metrics.json (recomputed in EPSG:4548). Base map © OpenStreetMap contributors (ODbL), simplified extract for context only. Boundary is a maintainer-registered provisional constraint, not an official redline. All content is a conceptual suggestion. ✦ by Claude Code

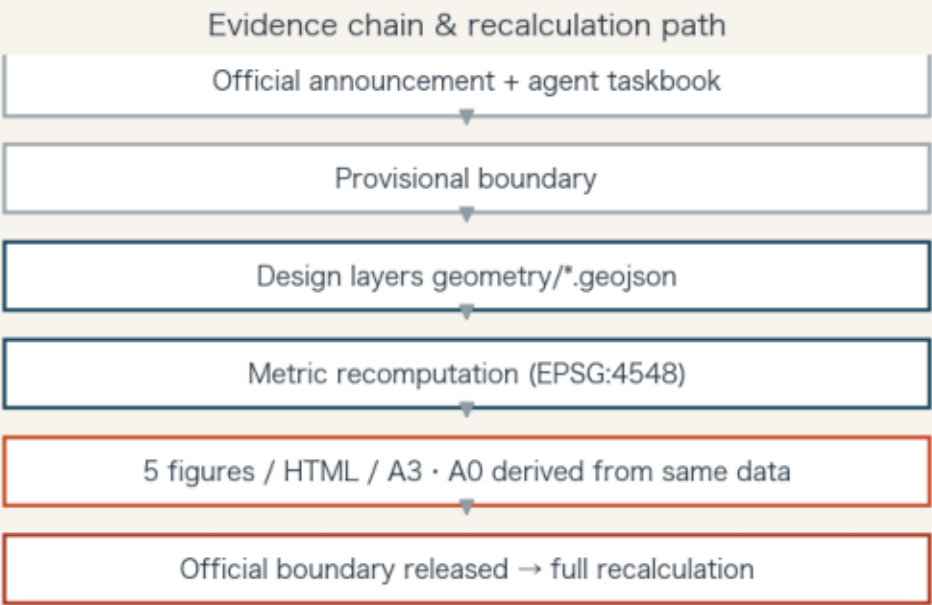

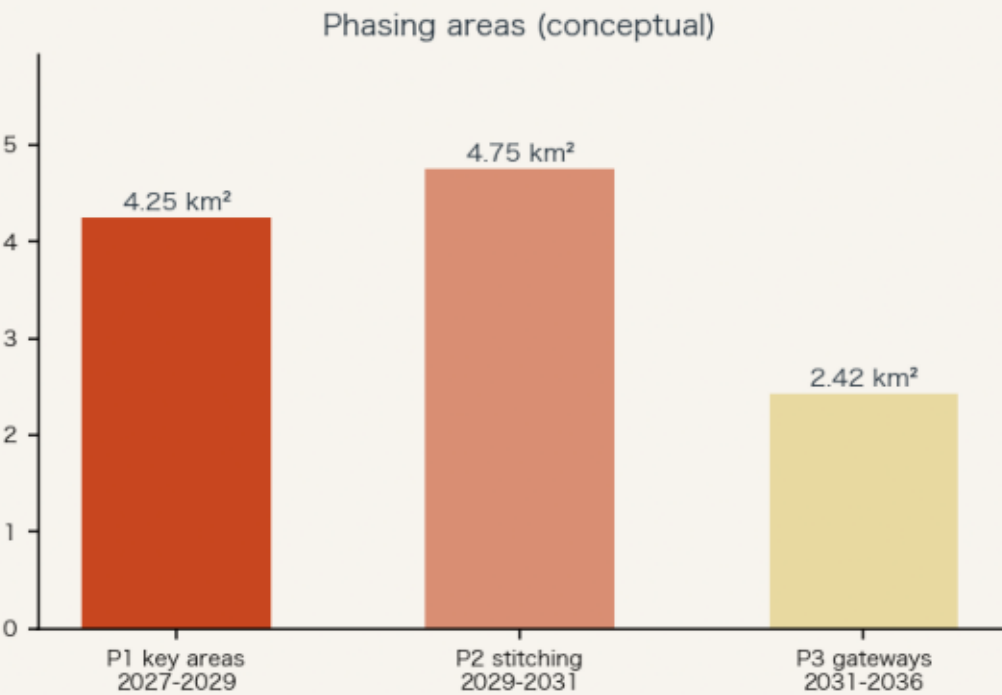

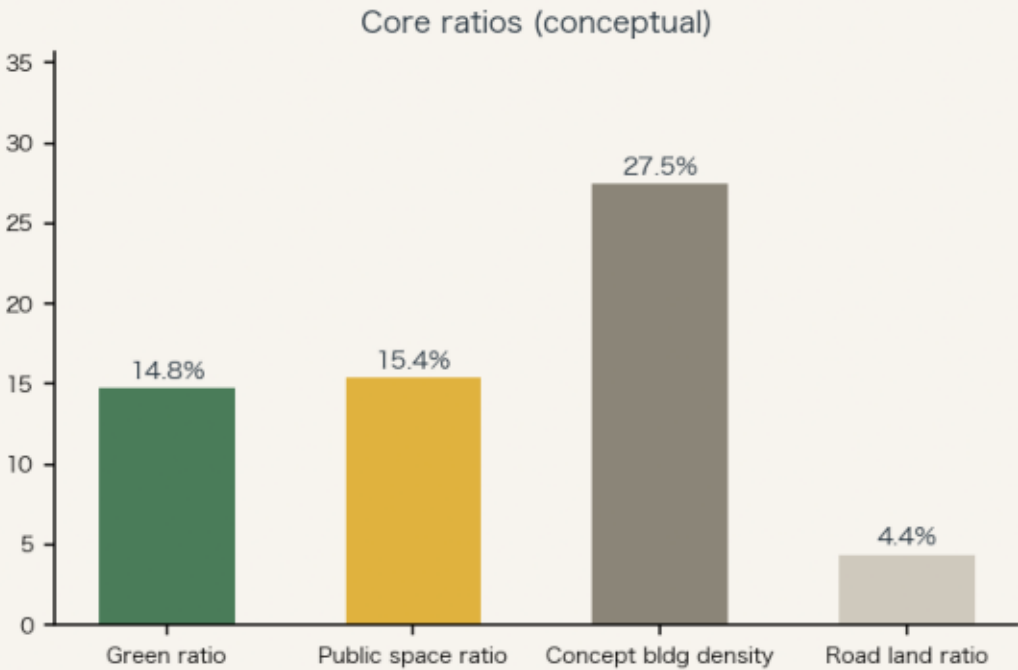

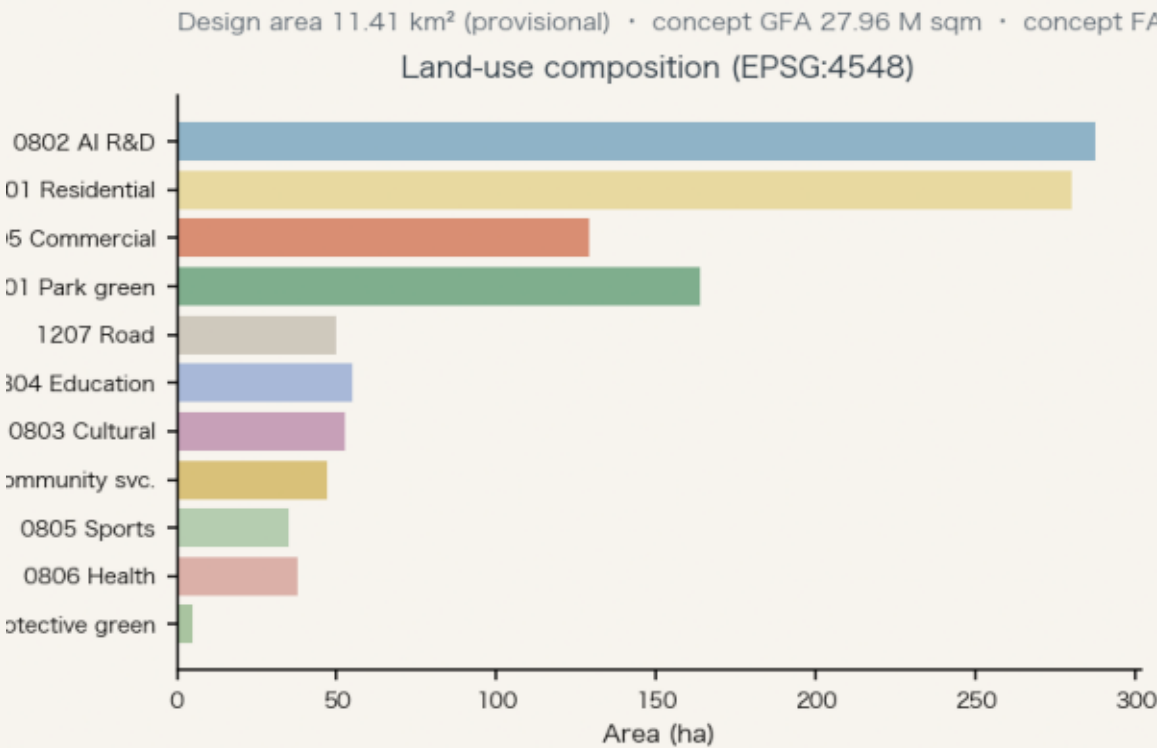

Mobility & blue-green public space composite system

Twin tracks, continuous green spine, 13 stitches — humans and agents meet at REN switches · conceptual

Core metrics recomputation & evidence chain

Every number is recomputable from geometry/*.geojson in EPSG:4548; all values conceptual, none statutory
