

JINGZHANG AI ARTERY

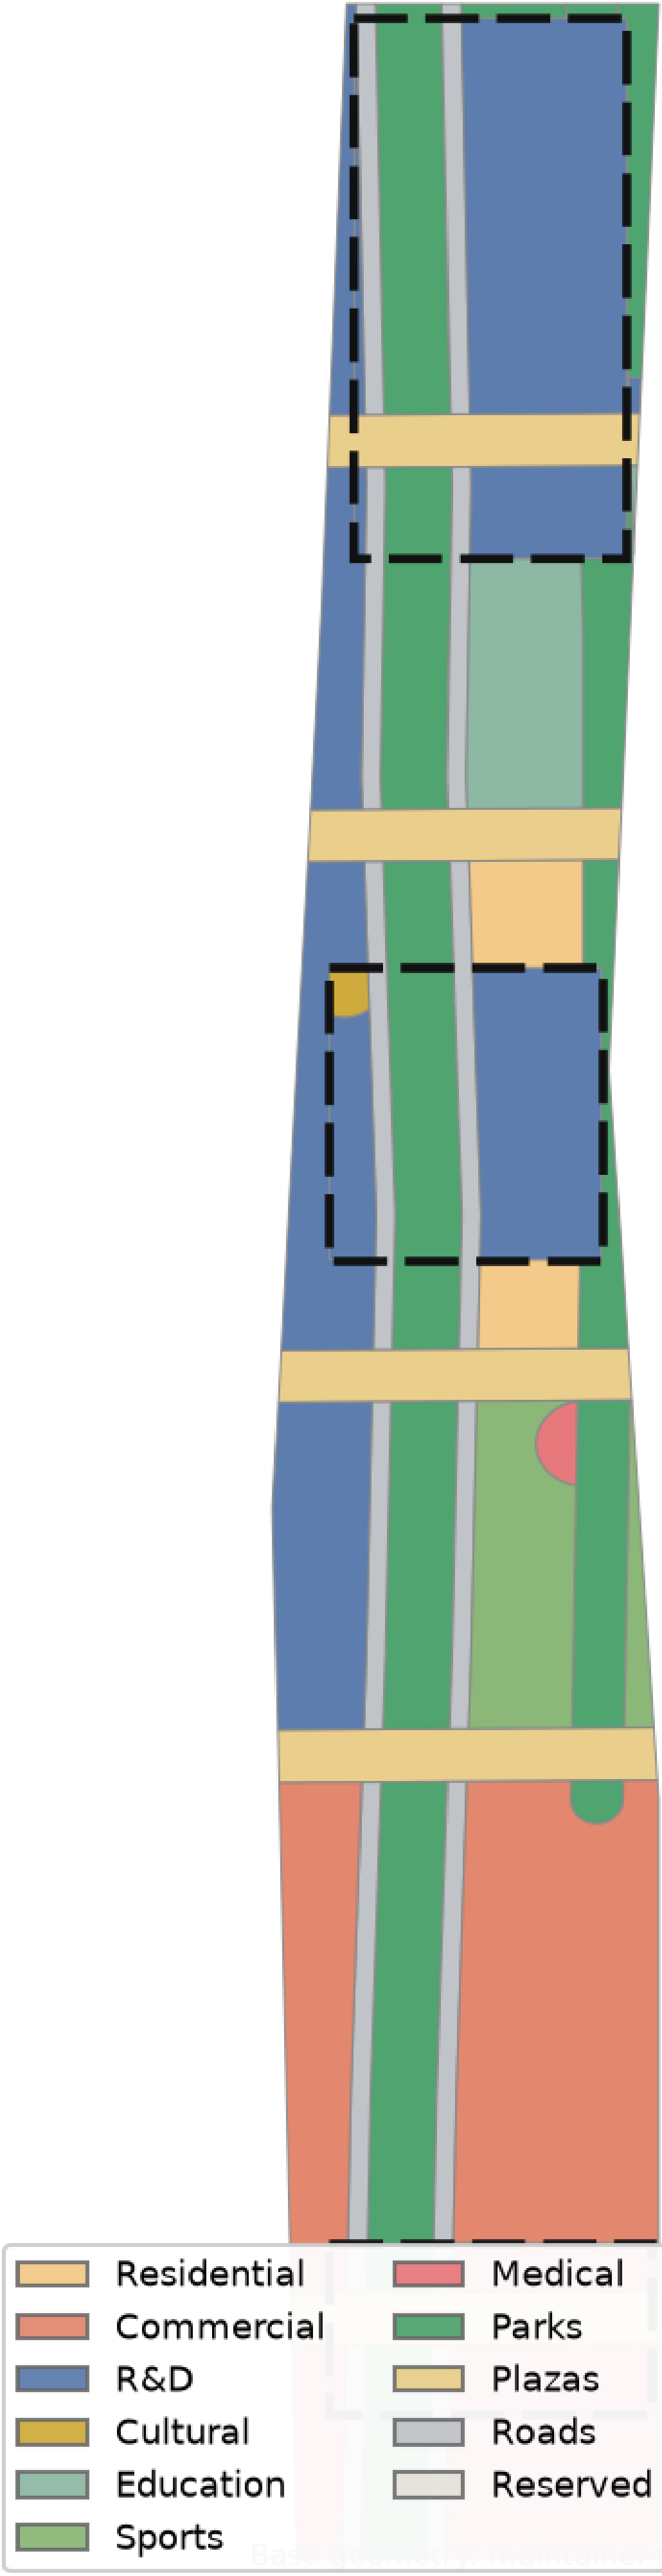

Centennial Jing-Zhang AI Innovation Belt — Overall Concept

registered provisional boundary (for generation, display and self-check only; not an official redline or precise-area basis) | EPSG:4326 | areas recomputed in EPSG:4548

- One artery, three cores, two wings, five bridges
- Five-station narrative & logo direction (switchback × neural pulse)
- Provisional boundary drawn faint/dashed; design intent is the protagonist

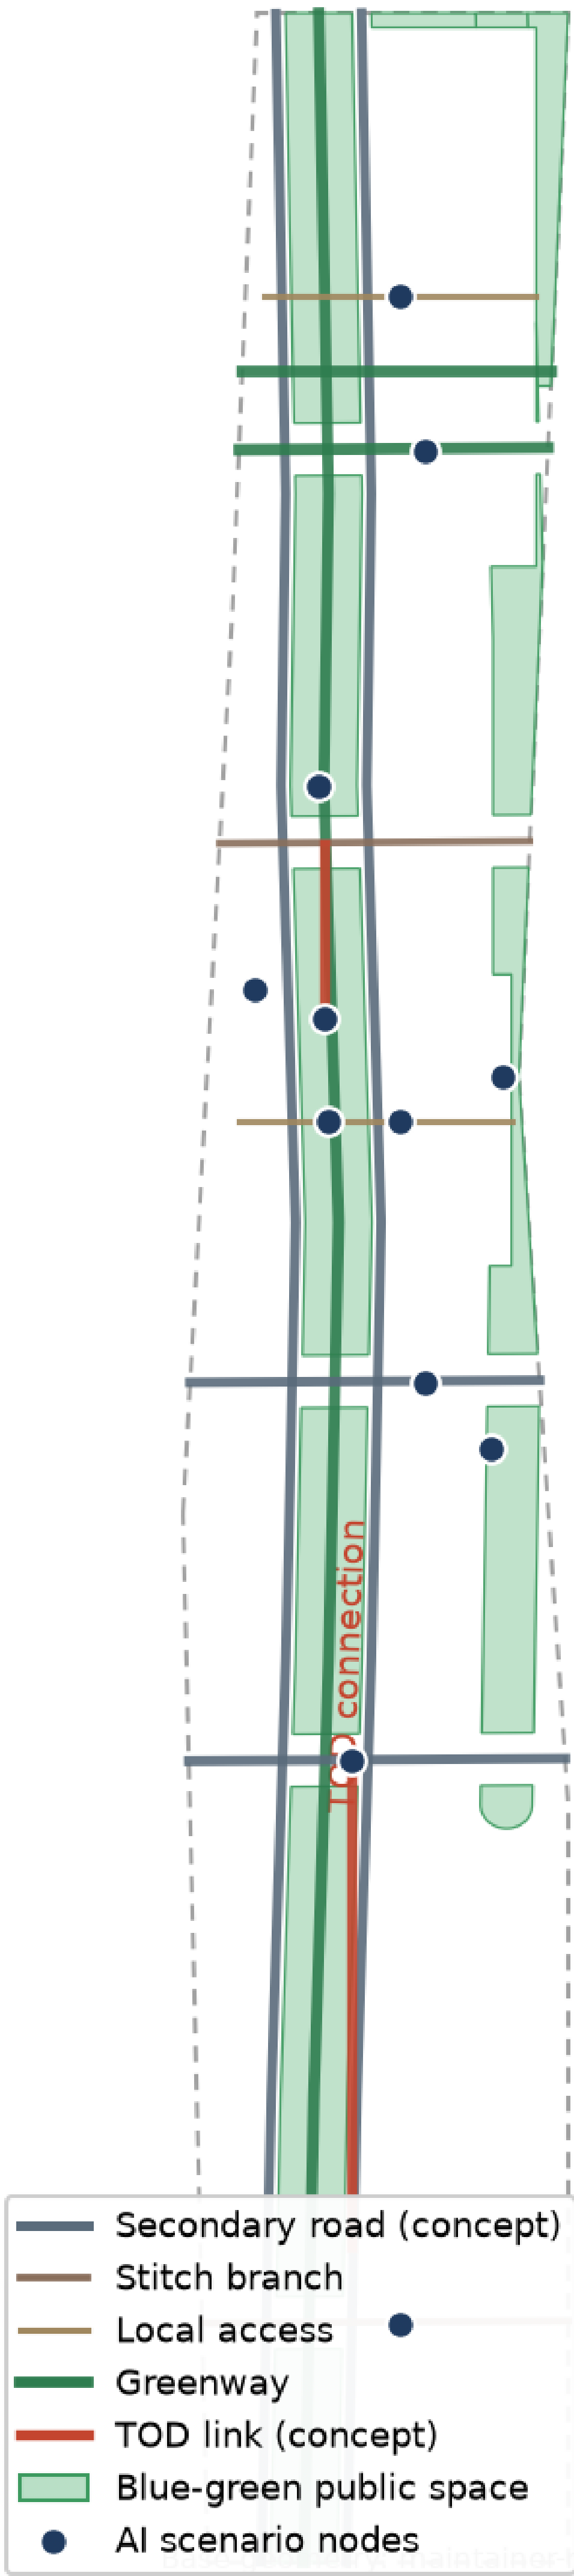

Land-Use Structure — One Artery, Three Cores, Two Wings, Five Stations

registered provisional boundary (for generation, display and self-check only; not an official redline or precise-area basis) | EPSG:4326 | areas recomputed in EPSG:4548

- 58 partitions, full coverage, no overlaps (EPSG:4548)
- Mix: parks 23.7% / R&D 23.5% / commercial 22.0% / roads 10.1%
- R-R-D method framework + reserved flexibility
- FAR/height/density status=unknown

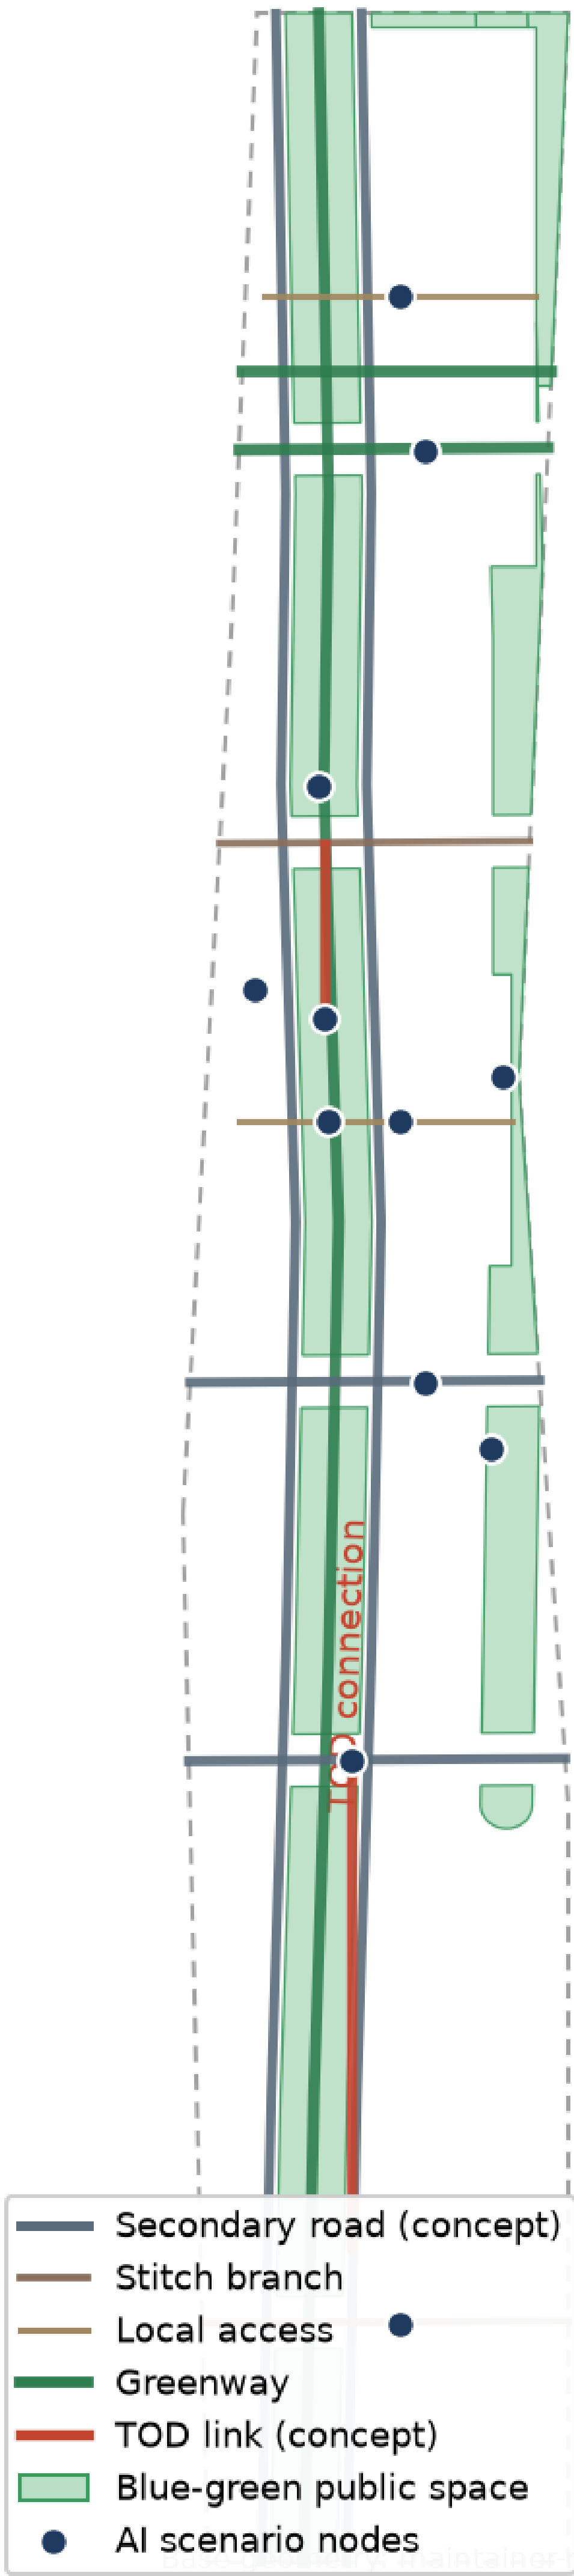

Mobility, Slow Traffic and Blue-Green Public Space System

registered provisional boundary (for generation, display and self-check only; not an official redline or precise-area basis) | EPSG:4326 | areas recomputed in EPSG:4548

- Jingzhang Avenue + five stitches + greenway network
- Two TOD axes (Dazhongsi/Wudaokou, concept)
- Innovation / talent / new-infrastructure facilities
- Redlines and capacities await specialist studies

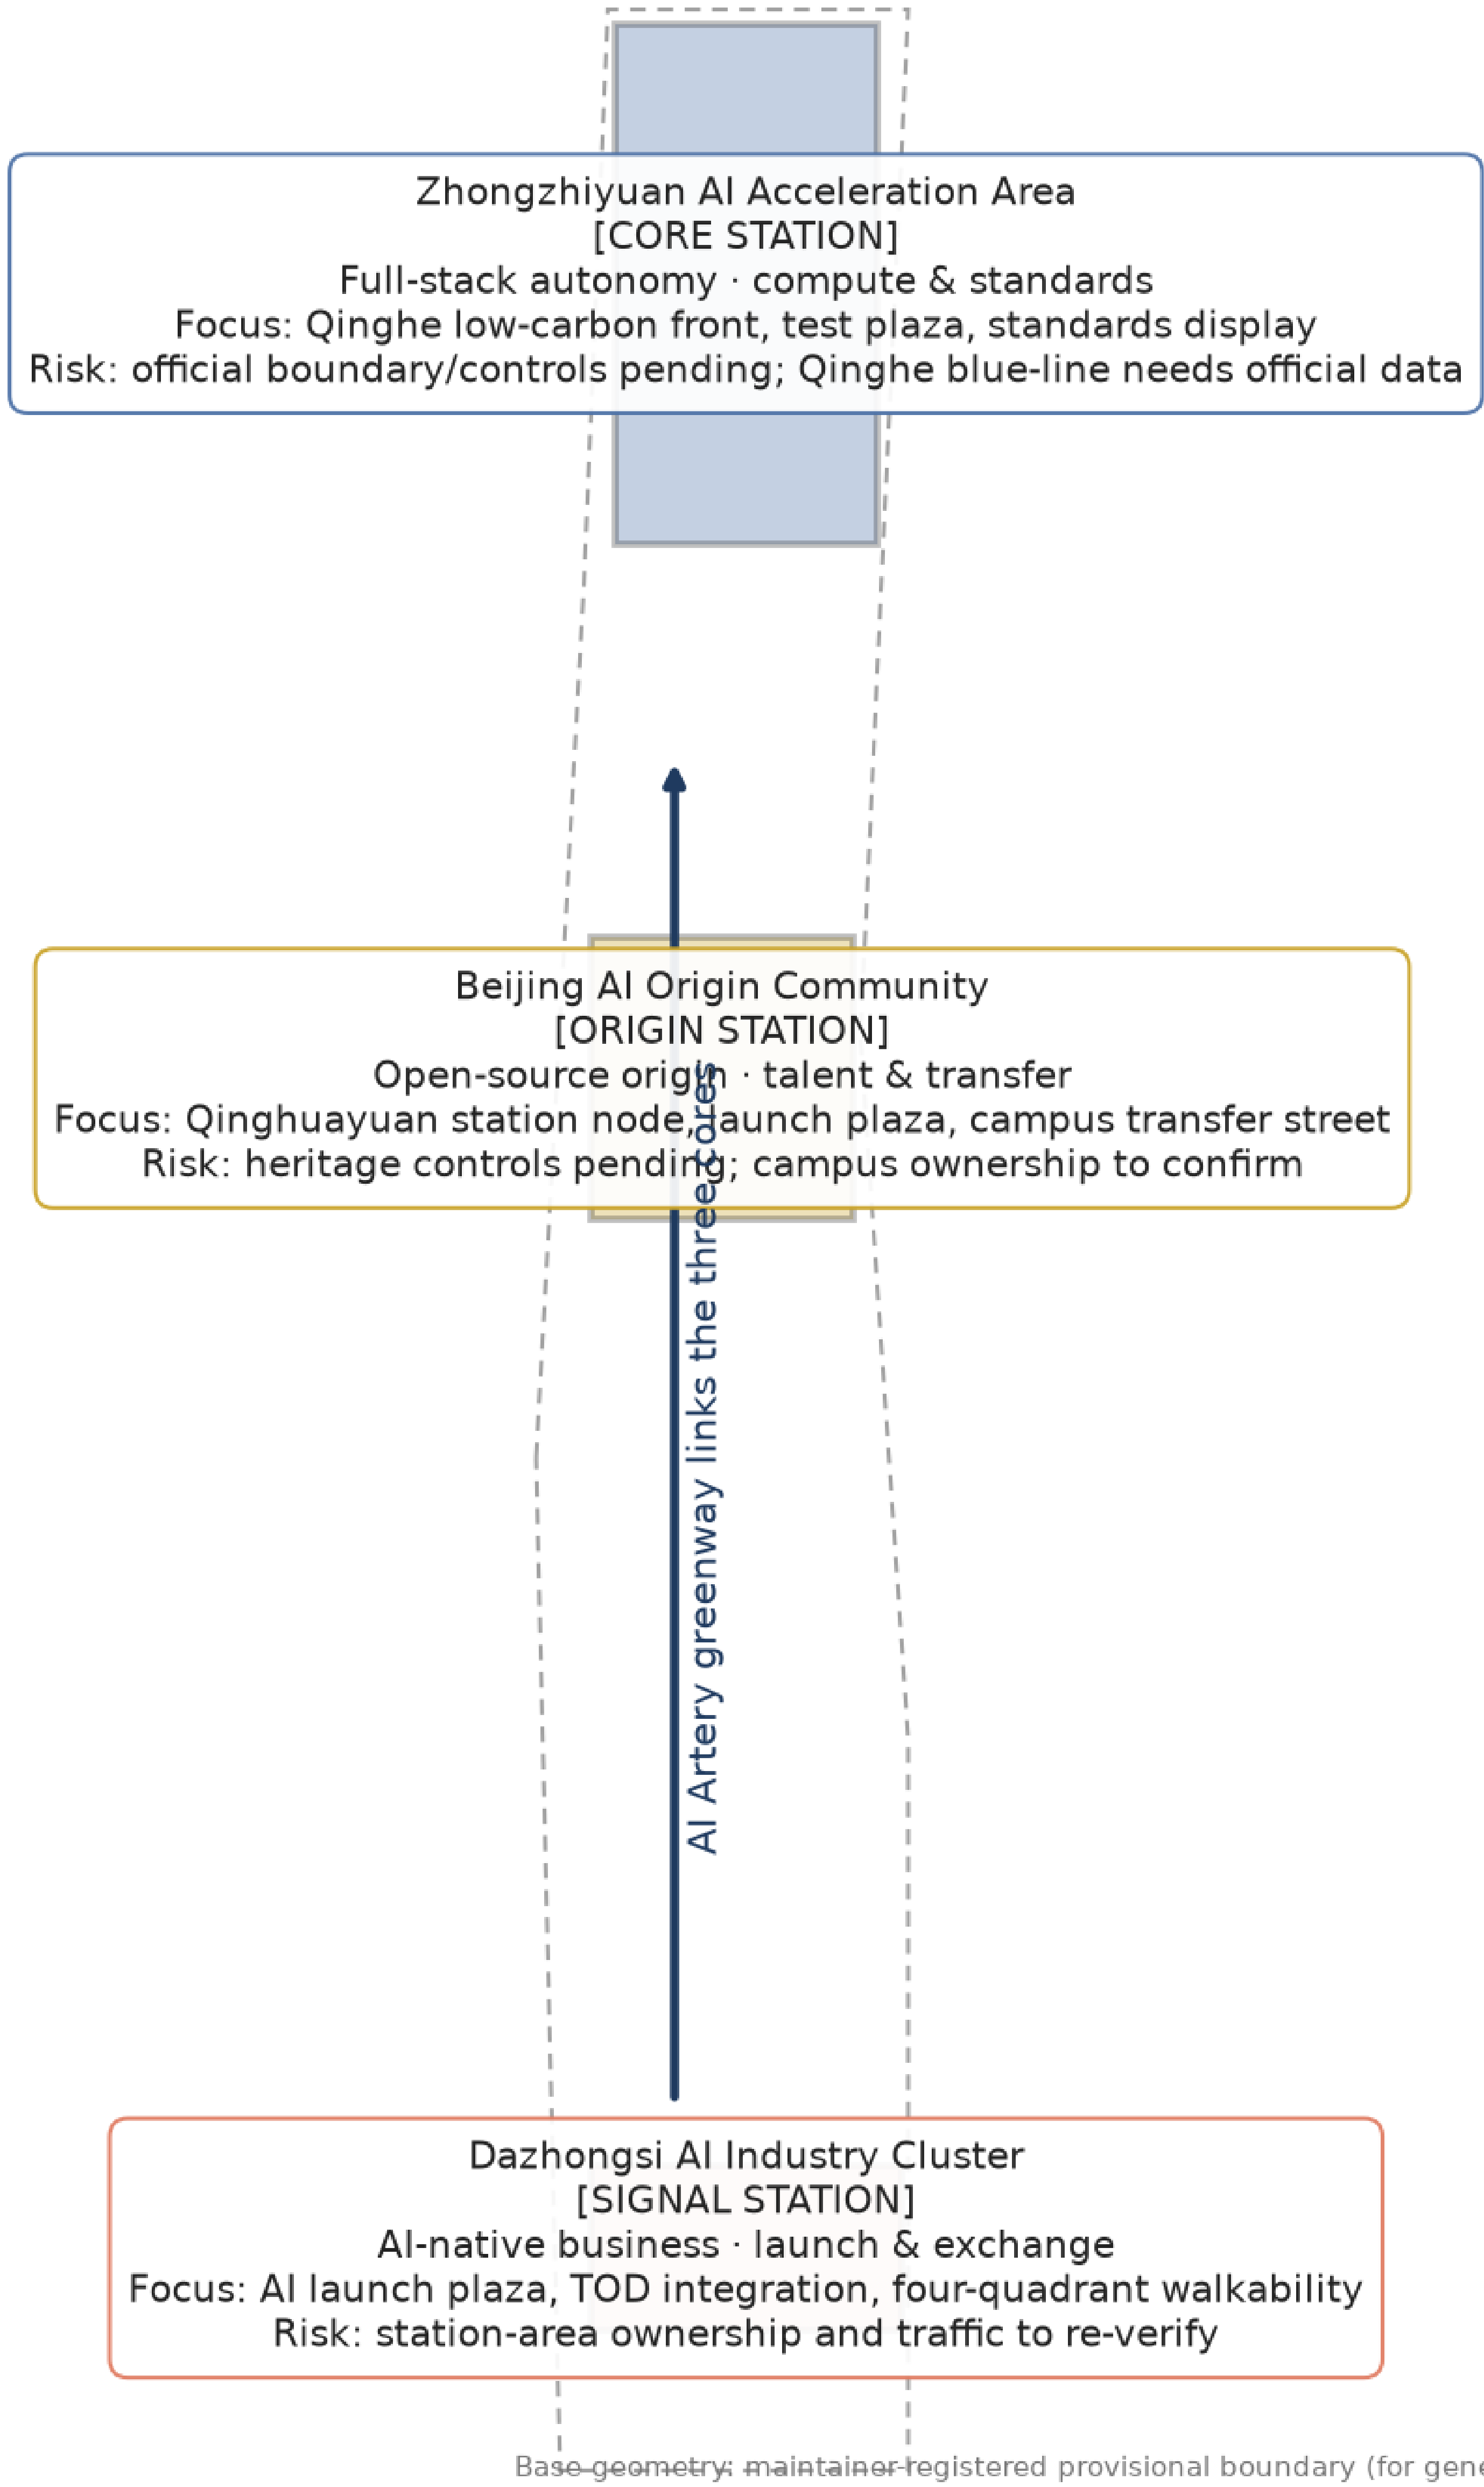

Mobility, Slow Traffic and Blue-Green Public Space System

registered provisional boundary (for generation, display and self-check only; not an official redline or precise-area basis) | EPSG:4326 | areas recomputed in EPSG:4548

- Themed segments: low-carbon N / open-source M / AI-native S
- Green 270.2 ha (23.7%) + public space 121.7 ha (10.7%)
- Component library: kiosk / dev bench / test promenade / honor wall
- Qinghe & Xiaoyuehe riverside innovation fronts

Three Key Areas — Detailed Design Index

- CORE STATION: test plaza + standards governance
- ORIGIN STATION: heritage node + transfer street
- SIGNAL STATION: launch plaza + quadrant walkability
- Provisional polygons: directional design

JINGZHANG AI ARTERY

Centennial Jing-Zhang AI Innovation Belt — Overall Concept

registered provisional boundary (for generation, display and self-check only; not an official redline or precise-area basis) | EPSG:4326 | areas recomputed in EPSG:4548

- 12 scenario cards (4 test) + 12 nodes
- 5 personas & scenario-space-operation mapping
- 12 concept renewal projects + 3 phases
- Annual event system & long-term operation

Core Metrics, Recalculation and Evidence Chain

Overall design area 1141.3 ha (provisional) geometry/site_boundary.geojson EPSG:4548 recalc	Green ratio 23.7% geometry/green_space.geojson green union / site area	Public-space ratio 10.7% geometry/public_space.geojson public union / site area	Concept buildings 110 buildings geometry/buildings.geojson concept footprints, not statutory
AI scenario nodes 12 nodes geometry/scenario_nodes.geojson one per scenario card	Renewal projects 12 items proposal.md concept list, not a commitment	Key areas 3 areas geometry/key_areas.geojson announced 368.4 ha (provisional)	Pilgrimage landmarks 3 landmarks proposal.md Renzi Wall · Origin Ring · Signal Bell

Evidence chain: GeoJSON partition → EPSG:4548 recalculation → metrics.json → five figures → A3/A0 → visual/index.html
Self-check: DETERMINISTIC VALIDATION / SPATIAL REVIEW / VISUAL PACKAGING / PROFESSIONAL EVIDENCE (local gates)
Note: official FAR, height and density controls are missing; kept status=unknown until official data arrive

- Three metric classes: spatial / official controls / operational
- EPSG:4548 chain & four-gate self-check
- 22 compliance items + 9 standards + 15 depth items
- Risk & missing-data lists (risk.json / assumptions.json)
