

01 Design Basis and Source List

02 Three-Level Scope Framework and Diagnosis

03 Overall Concept and Spatial Structure

04 Detailed Design of the Three Key Areas

05 Mobility and Blue-Green Public Space

06 Land Use, Building Scale and R-R-D Strategy

07 Renewal Projects and Phasing

08 Metrics and Compliance Matrix

09 AI Scenarios, Data Governance and Risk

JINGZHANG AI ARTERY
Centennial Jing-Zhang AI Innovation Belt — Overall Concept

- Basis: official announcement + agent taskbook + site package
- Sources: all registered in sources.json, formal vs background tiers
- Boundary: provisional boundary not an official redline / precise-area basis
- Self-check: four local gates passed (self_check.json)

Land-Use Structure — One Artery, Three Cores, Two Wings, Five Stations

- Three levels: 43.6 km² research / 11.4 km² overall / 368.4 ha key areas
- Logic: strategy → spatial plan → detailed verification
- 58 land-use partitions, full coverage, no gaps/overlaps (EPSG:4548)
- Provisional gap: full recalculation once official polygons arrive

JINGZHANG AI ARTERY
Centennial Jing-Zhang AI Innovation Belt — Overall Concept

- Concept: one artery, three cores, two wings, five bridges, networked nodes
- Five stations: CORE / ORIGIN / SIGNAL / EXCHANGE / SCENARIO
- Naming & logo: switchback × neural-pulse dual symbol
- Synergy loop: origin → acceleration → validation → launch → capital

Three Key Areas — Detailed Design Index

- Zhongzhiyuan [CORE]: full-stack autonomy, test plaza + Qinghe front
- Origin Community [ORIGIN]: open-source origin, heritage node + transfer street
- Dazhongsi [SIGNAL]: AI-native business, launch plaza + walkability
- Provisional polygons: scale and intensity are directional only

Mobility, Slow Traffic and Blue-Green Public Space System

- Jingzhang Avenue E/W + five stitches + park greenway
- Qinghe & Xiaoyuehe greenways + two TOD axes (concept)
- Green ratio 23.7% / public-space ratio 10.7% (concept recalc)
- Concept alignments only; redlines await transport studies

Land-Use Structure — One Artery, Three Cores, Two Wings, Five Stations

- 110 concept buildings, ~25.4 ha footprint, ~1.14M m² concept volume (low confidence)
- Statutory FAR/height/density remain status=unknown
- R-R-D method: retain heritage, renovate inefficiency, add modestly, reserve
- Type mapping: R&D→labs, residential→talent apartments

Core Metrics, Recalculation and Evidence Chain

Overall design area 1141.3 ha (provisional) geometry/site_boundary.geojson EPSG:4548 recalc	Green ratio 23.7% geometry/green_space.geojson green union / site area	Public-space ratio 10.7% geometry/public_space.geojson public union / site area	Concept buildings 110 buildings geometry/buildings.geojson concept footprints, not statutory
AI scenario nodes 12 nodes geometry/scenario_nodes.geojson one per scenario card	Renewal projects 12 items proposal.md concept list, not a commitment	Key areas 3 areas geometry/key_areas.geojson announced 368.4 ha (provisional)	Pilgrimage landmarks 3 landmarks proposal.md Renzi Wall · Origin Ring · Signal Bell

Evidence chain: GeoJSON partition → EPSG:4548 recalculation → metrics.json → five figures → A3/A0 → visual/index.html
Self-check: DETERMINISTIC VALIDATION / SPATIAL REVIEW / VISUAL PACKAGING / PROFESSIONAL EVIDENCE (local gates)
Note: official FAR, height and density controls are missing; kept status=unknown until official data arrive

- 12 conceptual renewal projects JZ-01~JZ-12 with dependencies and phases
- Phase 1 starts with light facilities and operations, no major approvals
- Policy: coordination / space supply / scenario opening / data / participation
- Annual events: dev conference / test race / Artery Week / Signal Bell Night

Core Metrics, Recalculation and Evidence Chain

Overall design area 1141.3 ha (provisional) geometry/site_boundary.geojson EPSG:4548 recalc	Green ratio 23.7% geometry/green_space.geojson green union / site area	Public-space ratio 10.7% geometry/public_space.geojson public union / site area	Concept buildings 110 buildings geometry/buildings.geojson concept footprints, not statutory
AI scenario nodes 12 nodes geometry/scenario_nodes.geojson one per scenario card	Renewal projects 12 items proposal.md concept list, not a commitment	Key areas 3 areas geometry/key_areas.geojson announced 368.4 ha (provisional)	Pilgrimage landmarks 3 landmarks proposal.md Renzi Wall · Origin Ring · Signal Bell

Evidence chain: GeoJSON partition → EPSG:4548 recalculation → metrics.json → five figures → A3/A0 → visual/index.html
Self-check: DETERMINISTIC VALIDATION / SPATIAL REVIEW / VISUAL PACKAGING / PROFESSIONAL EVIDENCE (local gates)
Note: official FAR, height and density controls are missing; kept status=unknown until official data arrive

- Three metric classes: spatial recalc / official controls (unknown) / operational KPIs
- EPSG:4548 chain: GeoJSON → metrics.json → figures → A3/A0 → HTML
- Compliance: all announcement tasks + agent.1~agent.6
- 9 standards, 15 depth items complete

JINGZHANG AI ARTERY
Centennial Jing-Zhang AI Innovation Belt — Overall Concept

- 12 scenario cards incl. 4 test-and-validation (SC-01~SC-04, SC-12)
- 5 personas: developers / founders / students / residents / visitors
- 3 landmarks: Renzi Wall / Origin Ring / Signal Bell
- Data minimization + human review + accessibility floor + clearance
