

FIGURE

□ All boundaries are provisional (inferred from announcement text), not official; recompute all indicators once official geometry is released

Fig.6 Composite index: projects / heritage corridor / road hierarchy / key areas / nodes / AI touchpoints (300 m service radius) / phasing

Centennial Railway Narrative × Agent New Infrastructure — Open-Call Urban Design, Jingzhang AI Innovation Belt

11.413 km²

Overall design area (≈ 11.4 announced)

3.693 km²

Three key areas total (≈ 368.4 ha)

12 polygons

Land-use grid (3x4 provisional)

58.78 km

Road centerlines (11 recalculated)

Boundary note: all boundaries and derived metrics are provisional (agent-inferred from announcement text), not official; concept_far = unknown; all indicators will be recalculated once official geometry and regulatory conditions are released. This is an open co-creation proposal, not a substitute for formal planning. Figure labels are in Chinese; see [proposal.en.md](#) for full English correspondence.
