

SITE ANALYSIS / 场地分析

A01

DERIVE THE PURPOSE FROM SITE CONFLICTS

Every reading produces a spatial action; provisional geometry supports structure, not false precision.

01

LONGITUDINAL HERITAGE

Rail direction, sheds, tracks and signals form a century-long memory, yet often remain a linear backdrop.

02

LATERAL DISCONNECTION

East-west daily movement crosses the corridor without a shared threshold for walking, cycling, access and shelter.

03

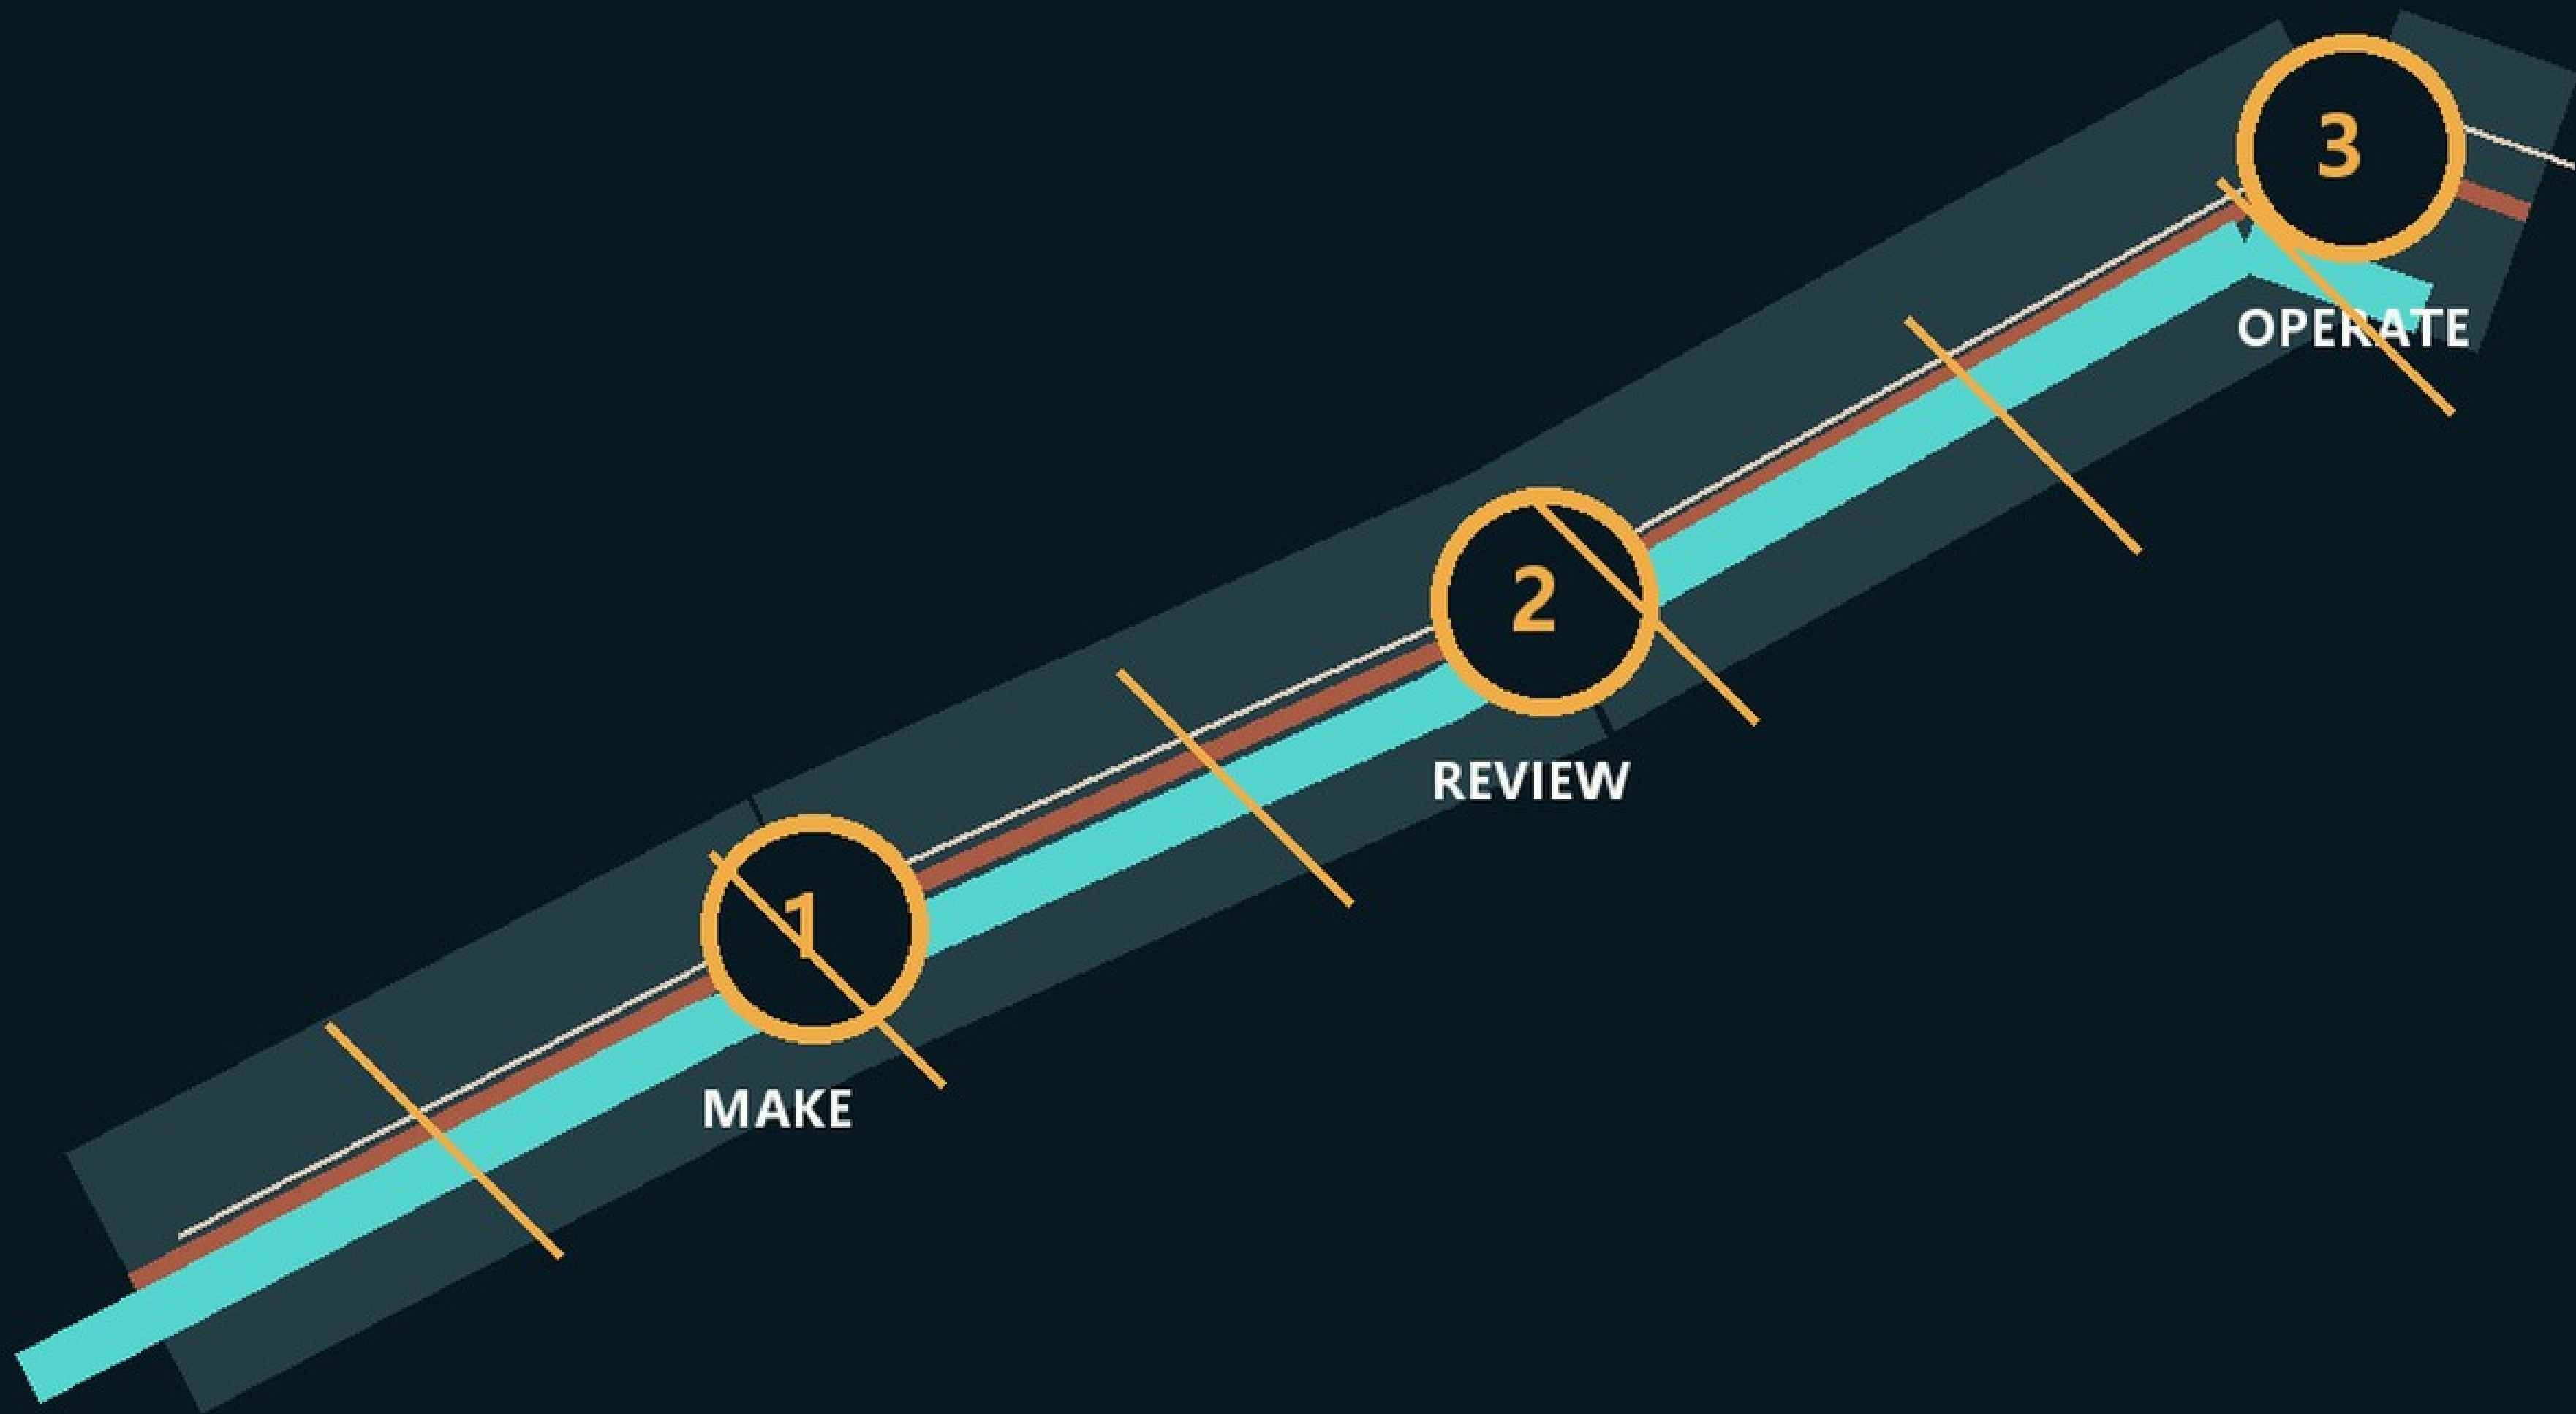

INVISIBLE WATER PROCESS

Rain is hidden as underground engineering, obscuring collection, closure, maintenance and recovery.

04

ONE GENERIC TEMPLATE

Fabrication, civic learning and commercial continuity need different spaces, not one generic tech-district image.

1 SPINE

retain memory + parallel dry/wet routes

6 GATES

turn crossings into civic thresholds

3 COURTS

make-review-operate progression

12 TESTS

manual baseline + stop + review

PROVISIONAL GEOMETRY | CONCEPT DESIGN | RECALCULATE WITH OFFICIAL AND ENGINEERING DATA

ENVIRONMENTAL ANALYSIS / 环境分析

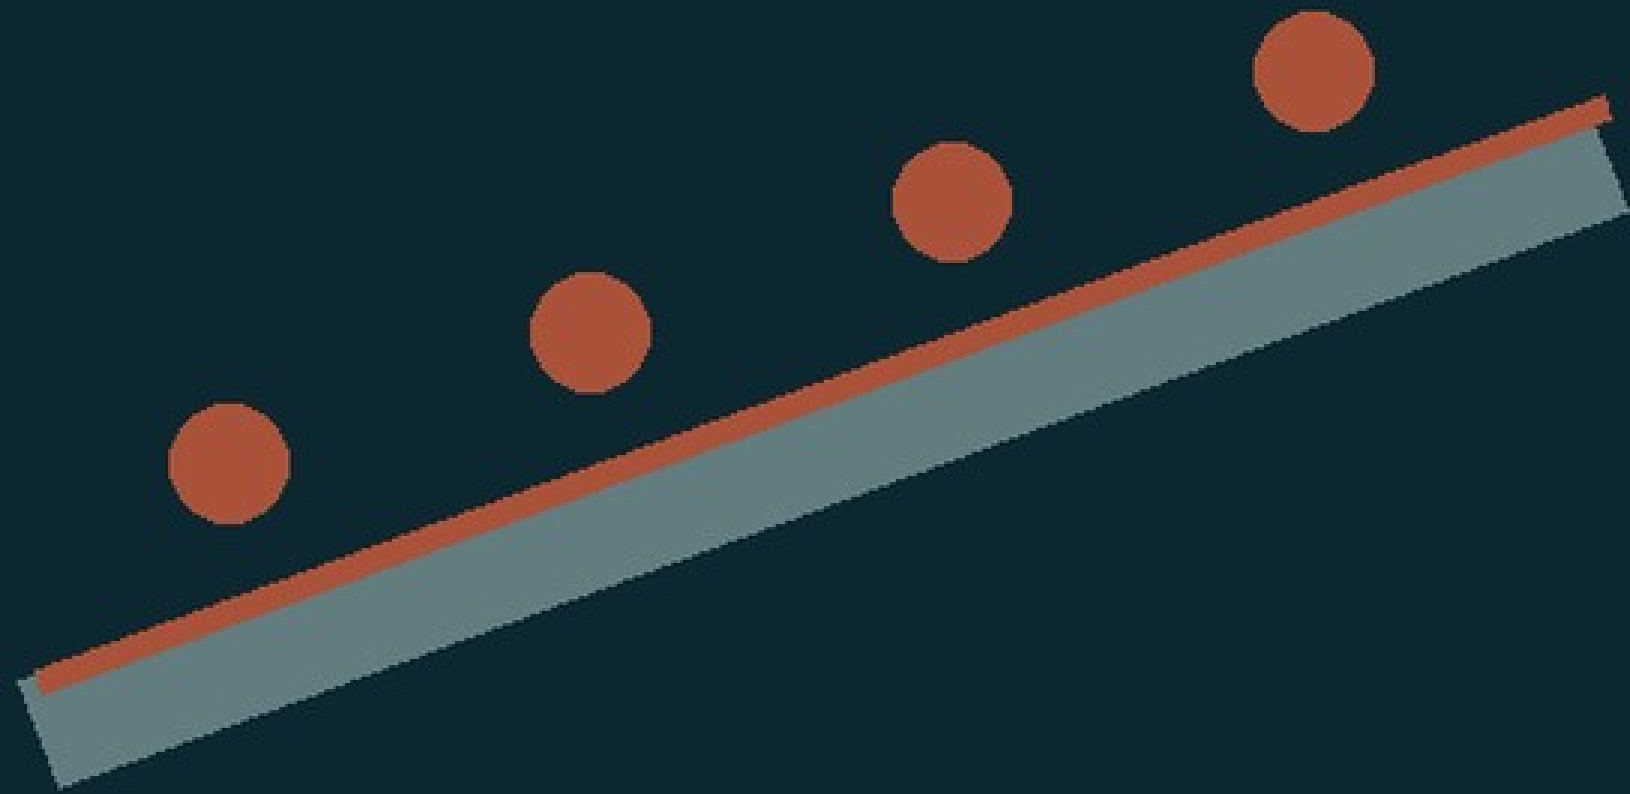

A02

ENVIRONMENT IS AN OPERATING CONDITION

Overlay heritage, water, movement and time into four operating states: dry, rain, closure and review.

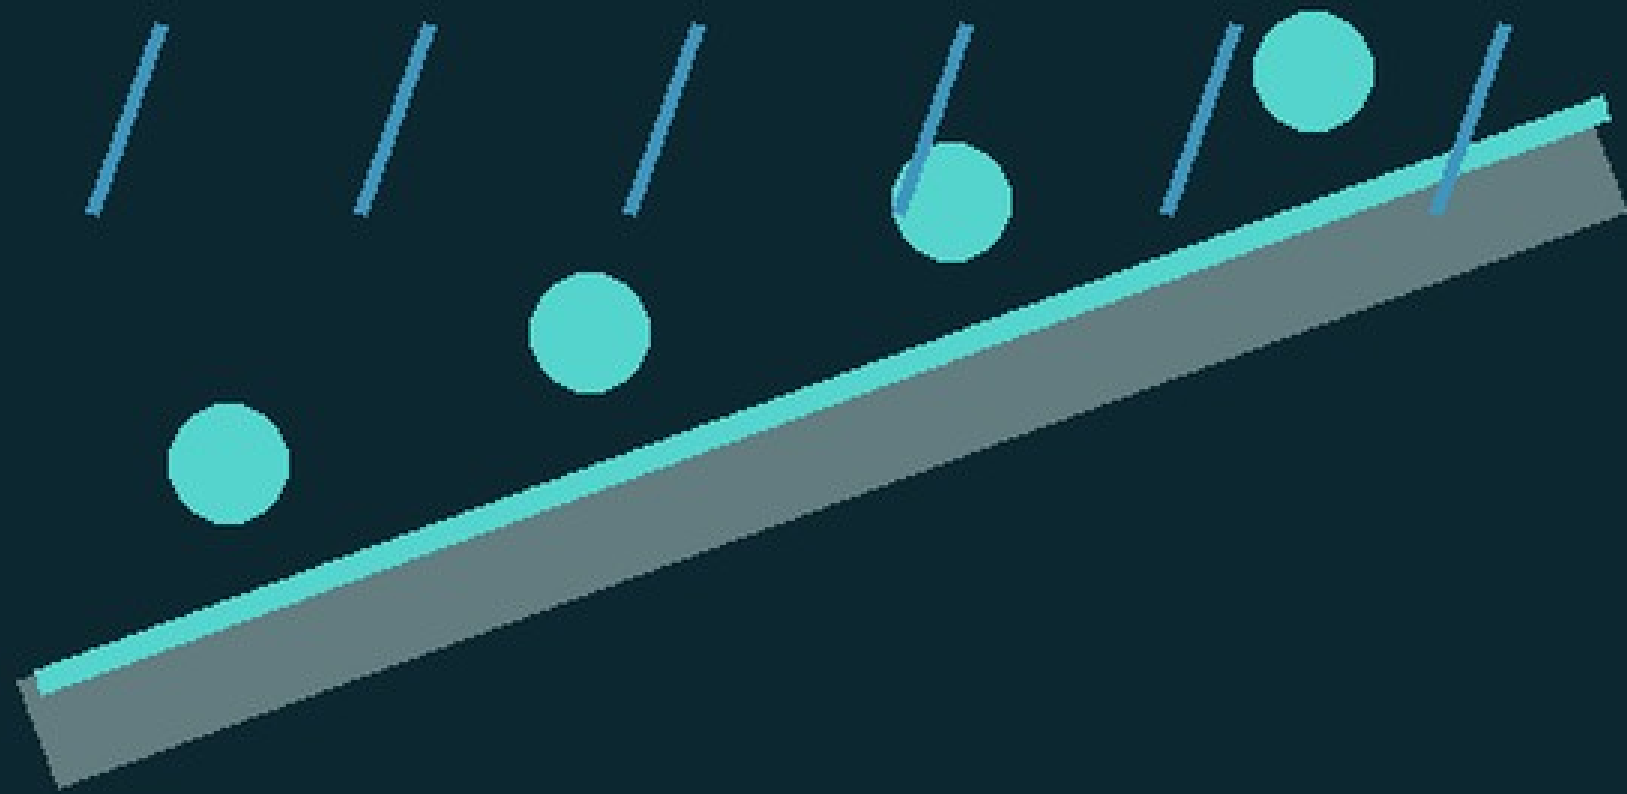

01 HERITAGE FRAME

Retain rail direction, brick sheds and steel traces; detach new inserts from old fabric.

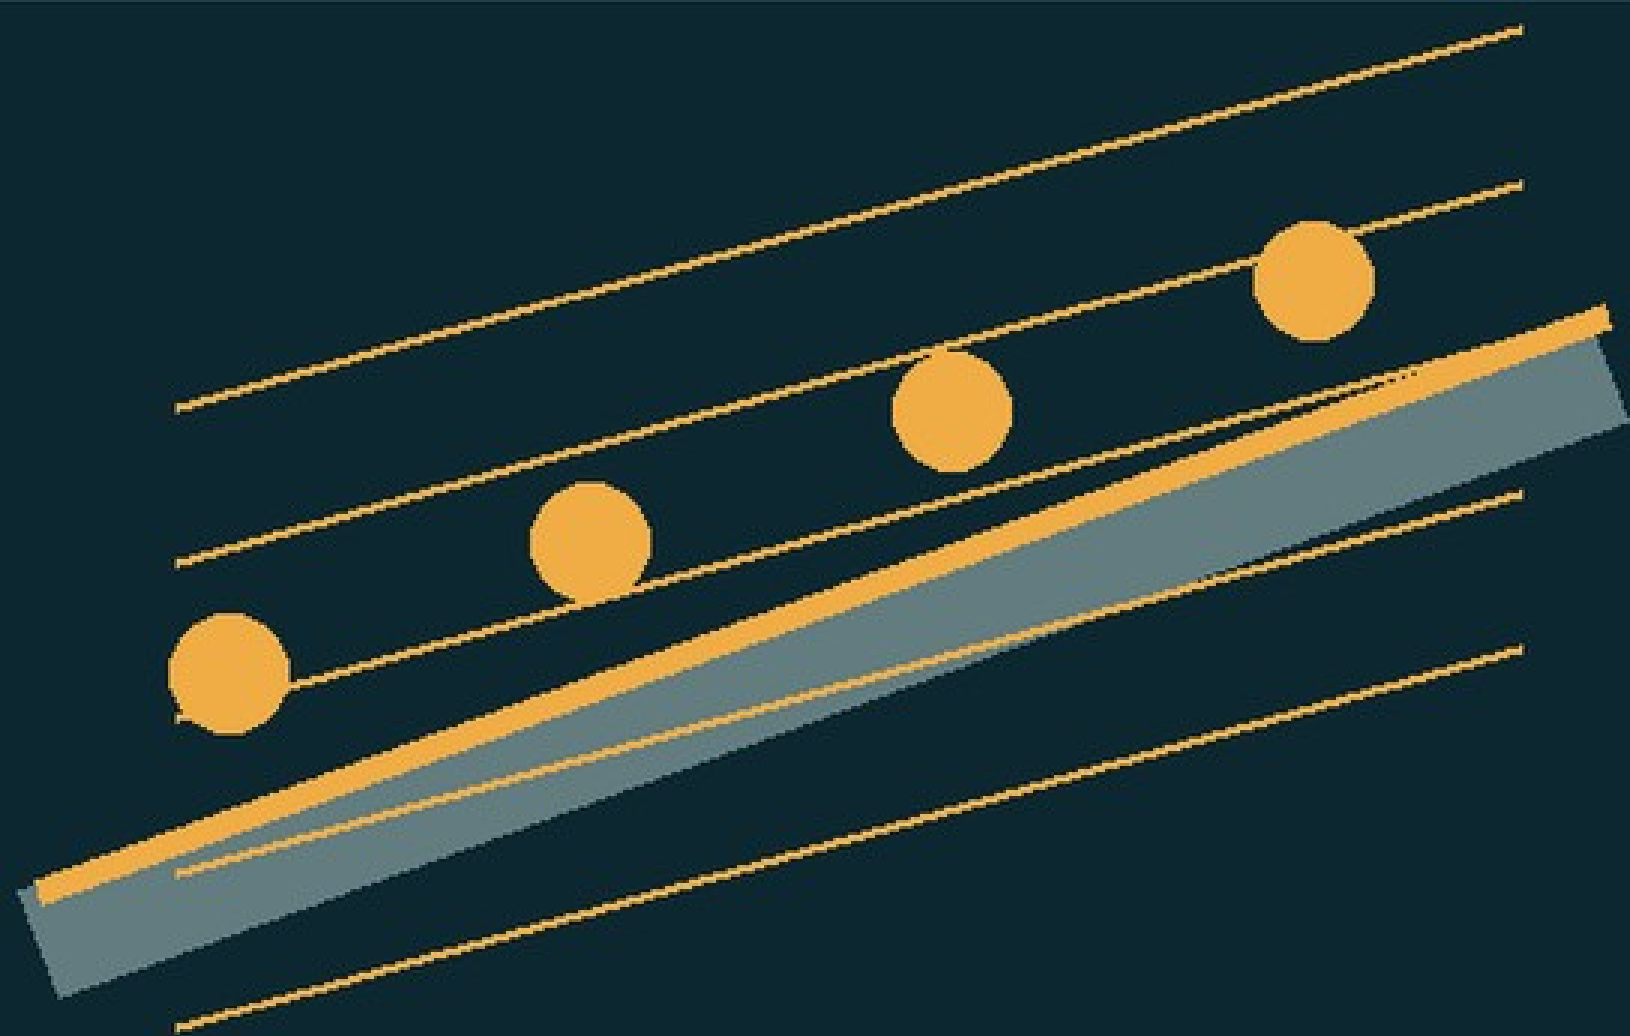

02 WATER PATH

Reveal collection, forebays, depressions and overflow before specialist underground design.

03 DAILY MOVEMENT

Keep a continuous dry route; the wet route may close without breaking accessibility.

04 OPERATING TIME

Space moves through prepare, run, stop and post-rain review rather than permanent openness.

PROVISIONAL GEOMETRY | CONCEPT DESIGN | RECALCULATE WITH OFFICIAL AND ENGINEERING DATA

DESIGN THESIS / 总体命题

LET THE CORRIDOR LEARN FROM EVERY RAIN

One civic infrastructure carries railway memory, climate adaptation, daily access and explainable AI testing.

B01

CONCEPT AERIAL | BLUE-GREEN SPINE AND RAIL HERITAGE AFTER RAIN

01
NOT A THEME PARK

Retain the real railway scale; technology follows public space and maintenance.

02
RAIN IS NOT AN EFFECT

Dry route open, wet route closable, post-rain reviewable: states matter more than spectacle.

03
AI IS NOT THE DECIDER

Manual baseline, named owner, stop rule and published error precede expansion.

1 REHEARSAL SPINE 3 REVIEW COURTS

6 RAIN GATES 12 REVERSIBLE TESTS

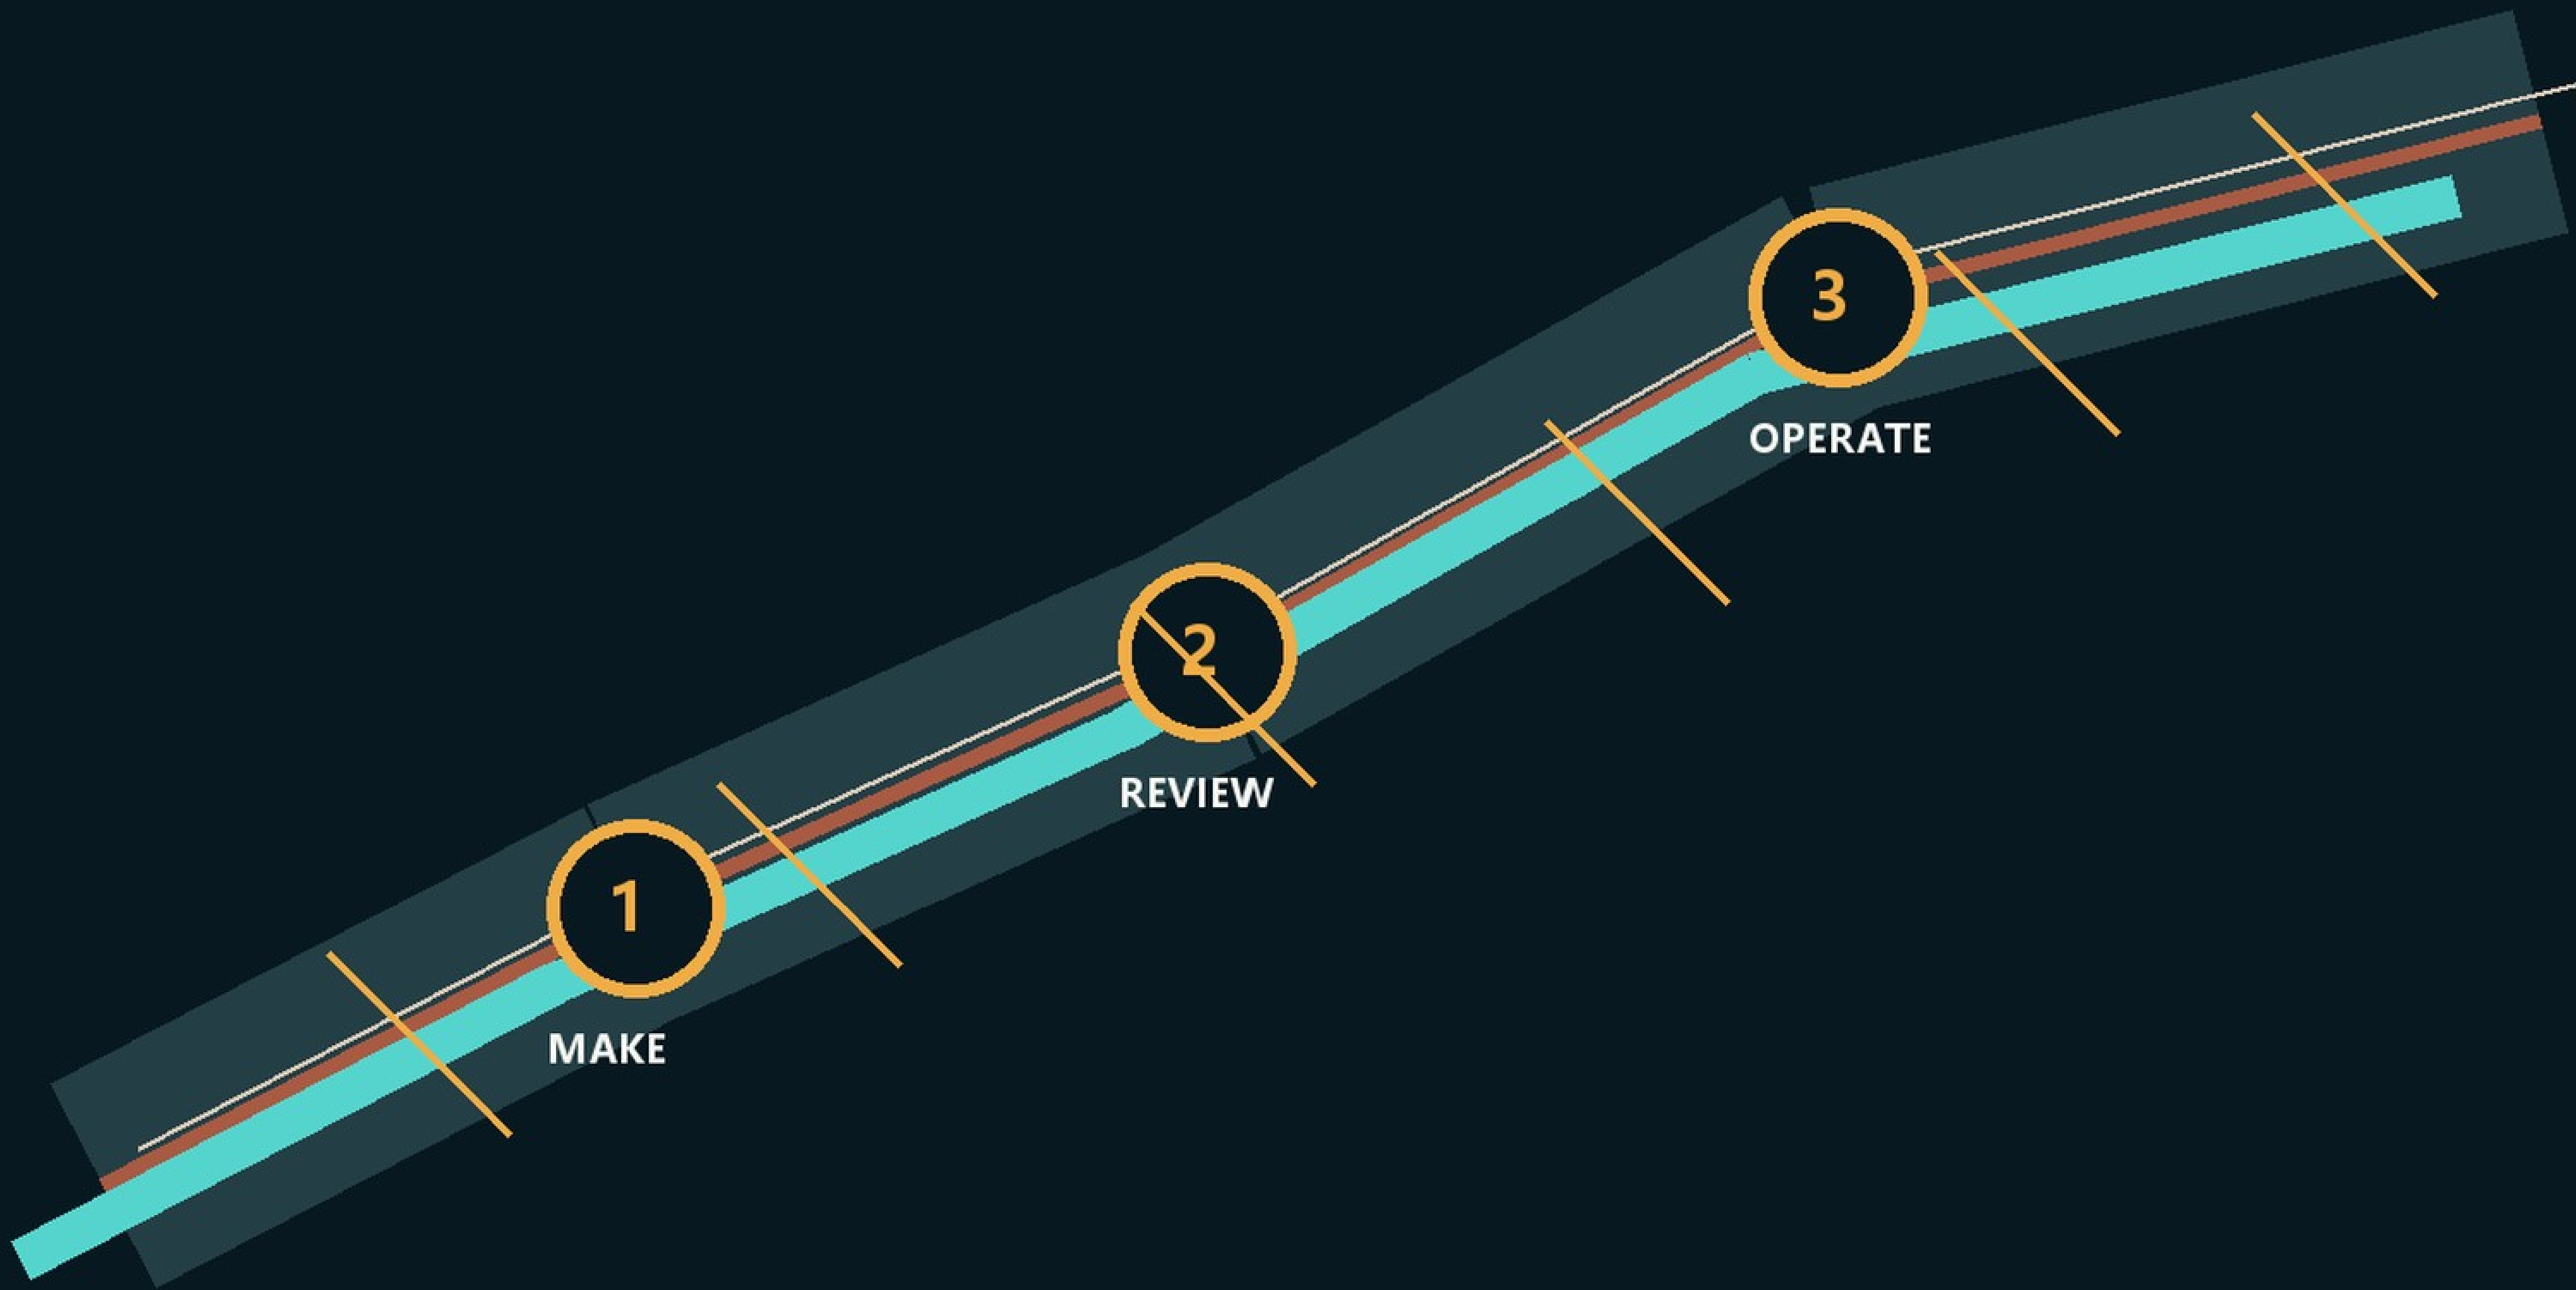

PROVISIONAL GEOMETRY | CONCEPT DESIGN | RECALCULATE WITH OFFICIAL AND ENGINEERING DATA

MASTERPLAN LOGIC / 总体结构

1 SPINE • 3 COURTS • 6 GATES • 12 TESTS

Longitudinal heritage continuity and lateral neighborhood stitching form a dual dry/wet civic framework.

B02

01
DRY ACCESS LINE
continuous access, shelter, static wayfinding

02
WET LEARNING LINE
forebay-depression-overflow; closable by stage

03
RAIL MEMORY LINE
rails, sheds, signals and long views

11.413 km²
provisional overall model

3 / 6 / 12
courts / gates / tests

PROVISIONAL GEOMETRY | CONCEPT DESIGN | RECALCULATE WITH OFFICIAL AND ENGINEERING DATA

THREE COURTS / 三处重点区

B03

ONE INNOVATION CHAIN, THREE SPATIAL PROTOTYPES

From controlled fabrication to civic review and complex daily operation, with an exit at every step.

01 RAIN PROTOTYPE COURT

MATERIAL × DEVICE × BLACKOUT | replaceable parts, visible water, low-risk public learning

02 CO-MEASURE REVIEW COURT

RESIDENT × CAMPUS × MAINTAINER | heritage span, reversible timber room, public review

03 CONTINUOUS OPERATIONS COURT

TRANSIT × COMMERCE × NIGHT | dry route open, wet route closed, service separated

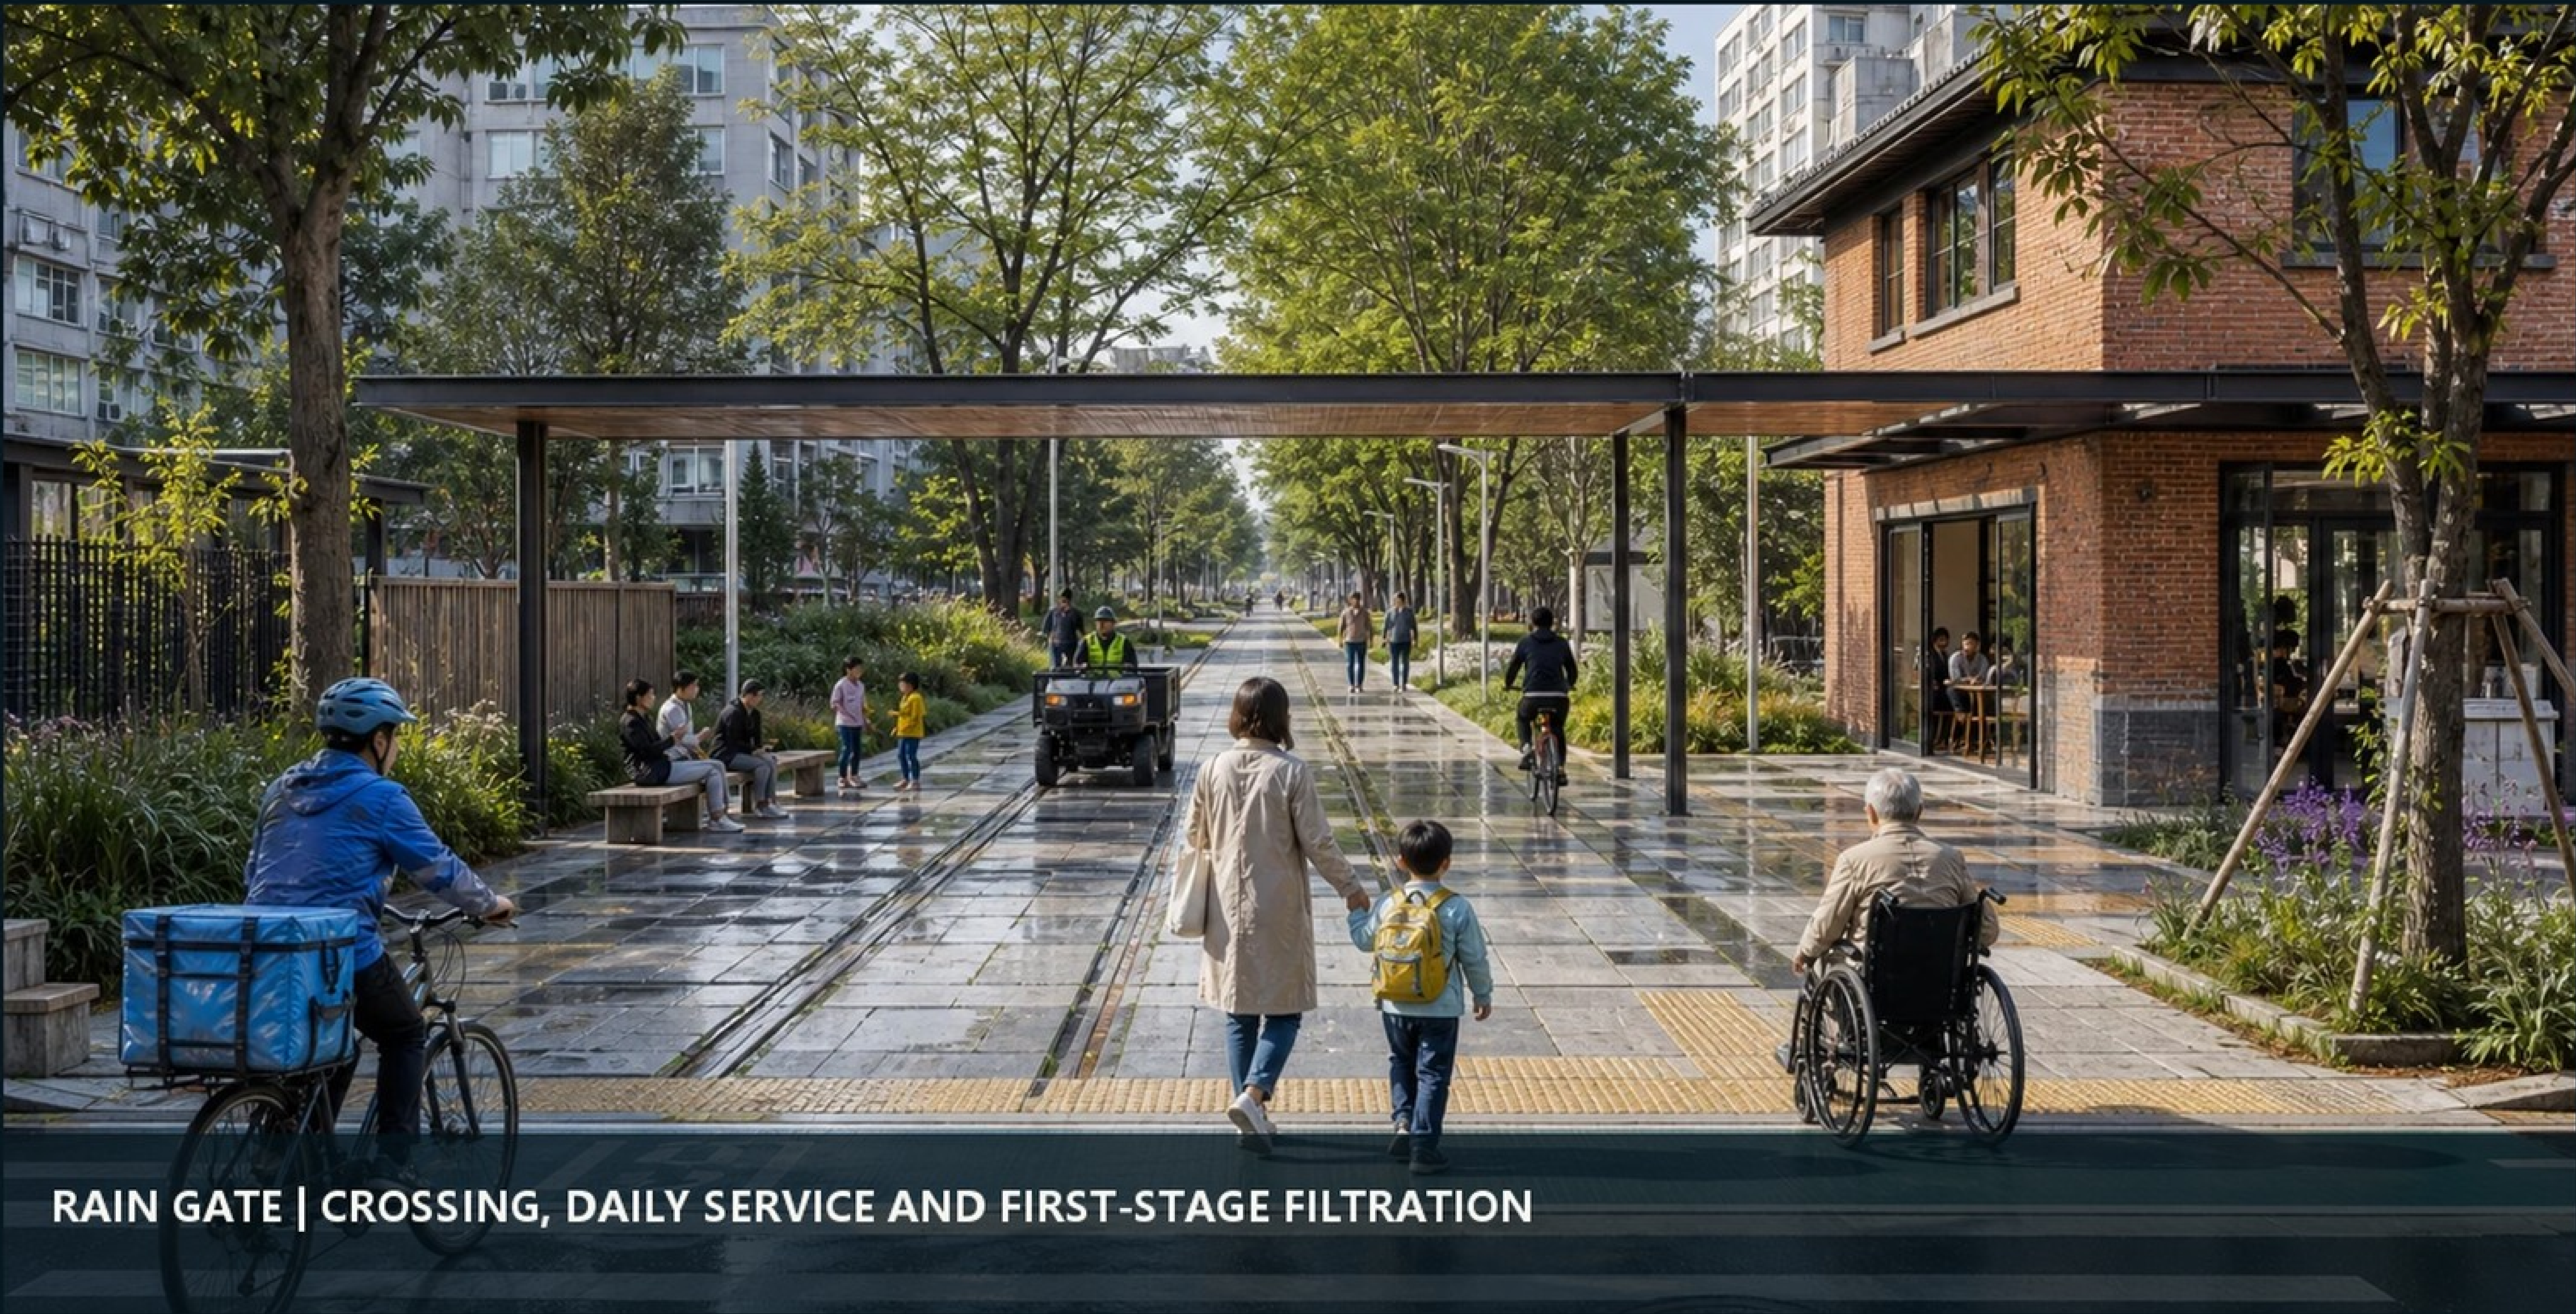

PROVISIONAL GEOMETRY | CONCEPT DESIGN | RECALCULATE WITH OFFICIAL AND ENGINEERING DATA

SECTION + GATE / 断面与雨门

B04

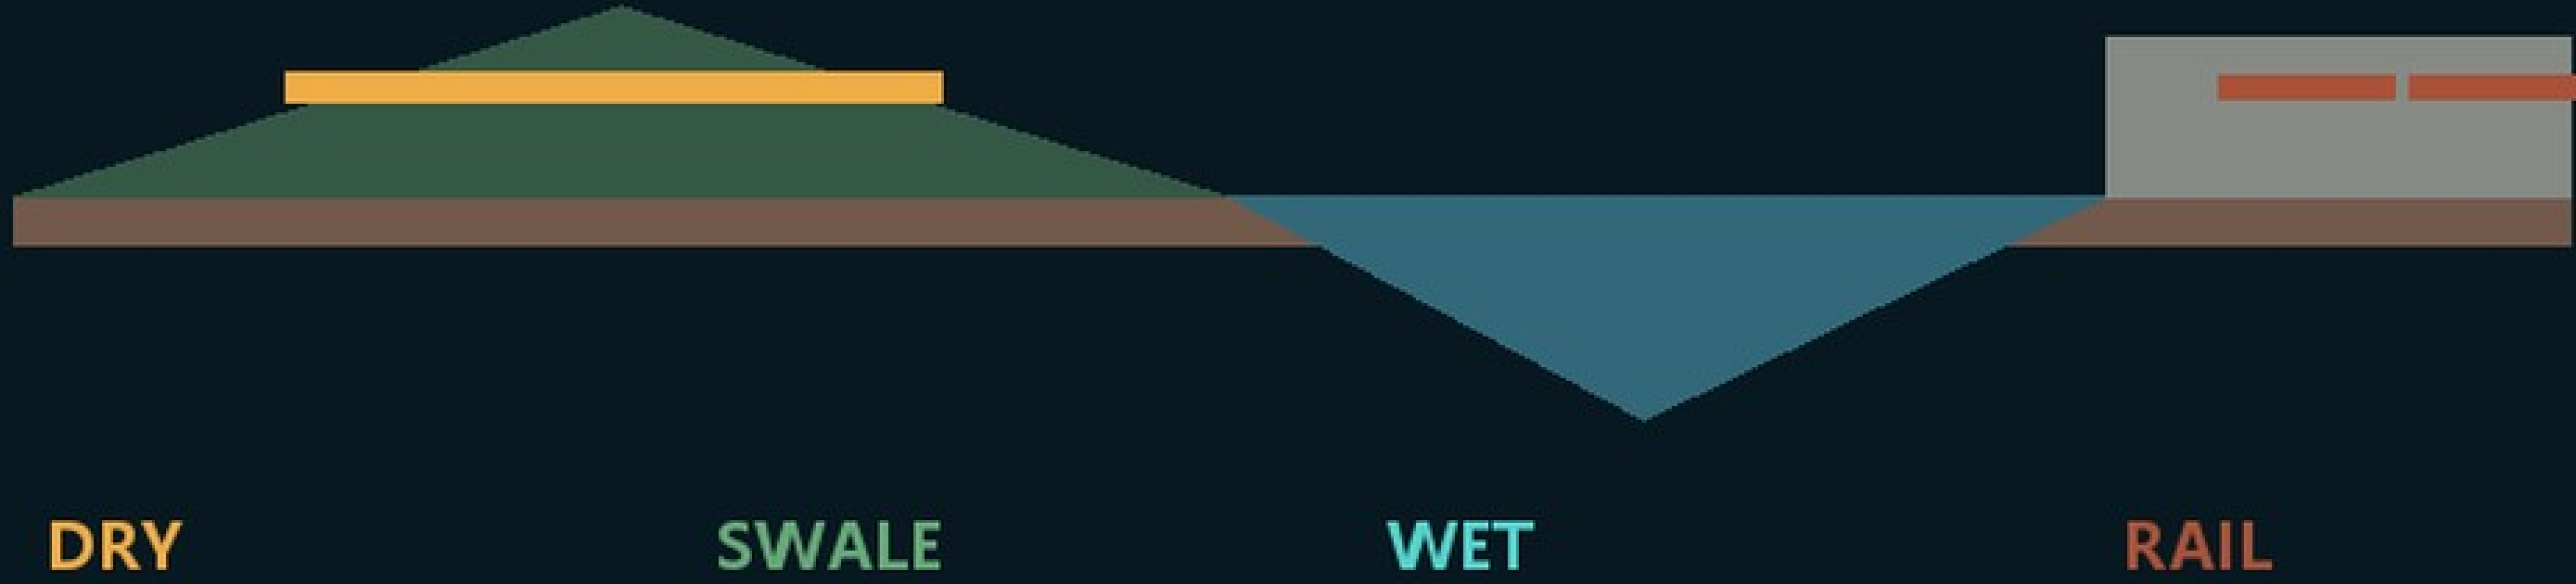

KEEP ONE LEGIBLE ROUTE FOR THE MOST VULNERABLE USER

Accessibility, water, heritage and maintenance negotiate one section rather than separate diagrams.

RAIN GATE | CROSSING, DAILY SERVICE AND FIRST-STAGE FILTRATION

TYPICAL CONCEPT SECTION

01

DRY

both routes open

02

RAIN

observe wet, keep dry

03

STOP

physical closure + detour

04

REVIEW

inspect + publish change

PROVISIONAL GEOMETRY | CONCEPT DESIGN | RECALCULATE WITH OFFICIAL AND ENGINEERING DATA

OPERATING PROTOCOL / 运营与证据

B05

ONE RAIN, FOUR MOMENTS THAT MUST BE RECORDED

AI organizes evidence; named people decide operation, closure, detour and the next version.

PREPARE

manual baseline, owner, weather threshold, alternative route

RUN

manual and model readings in parallel; aggregate facility state only

STOP

close on high risk, conflicting readings or failed human takeover

REVIEW

publish error, maintenance cost, feedback and next change

11.413 km²

provisional model

12.34%

green design model

7.33%

public-space model

3 / 6 / 12

courts / gates / tests

DECISION CHAIN

SITE READING → SPATIAL ACTION → RAIN TEST → HUMAN DECISION → REVIEW → NEXT VERSION

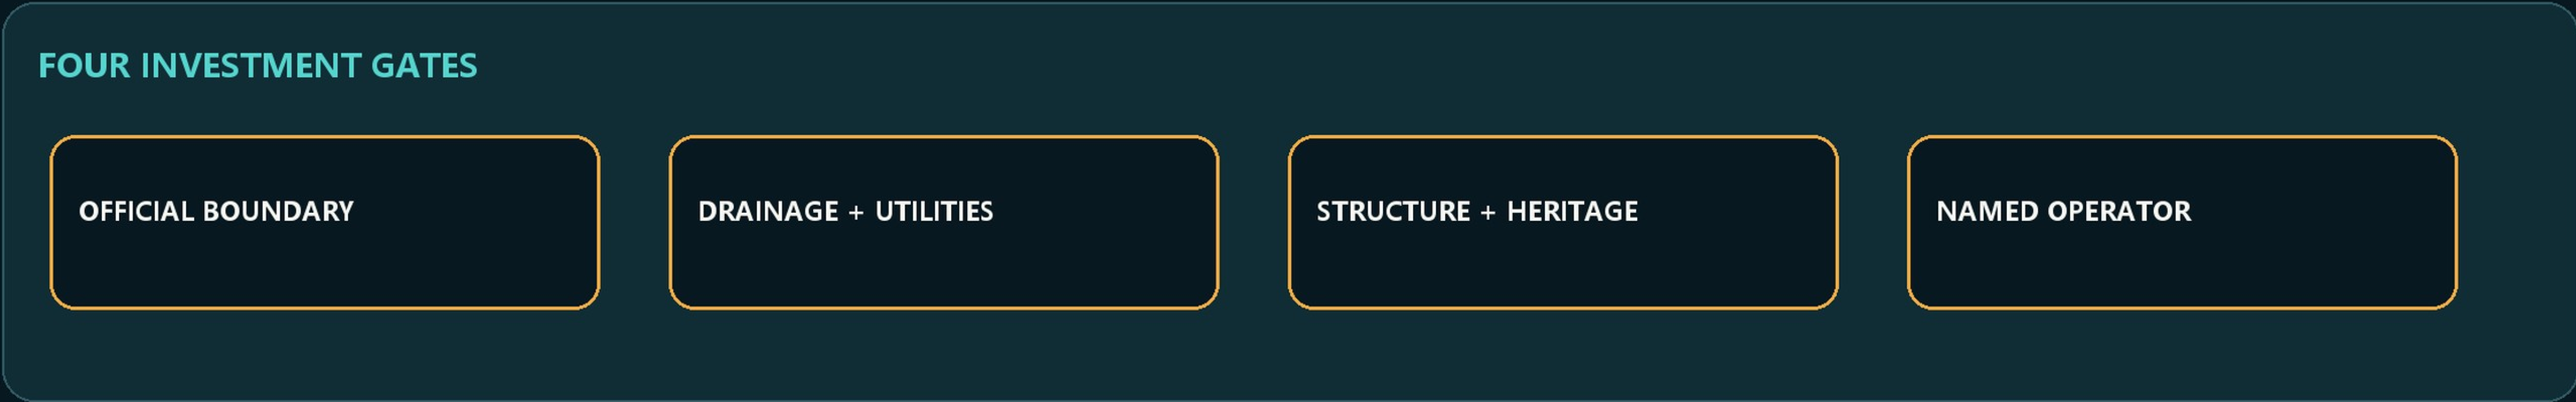

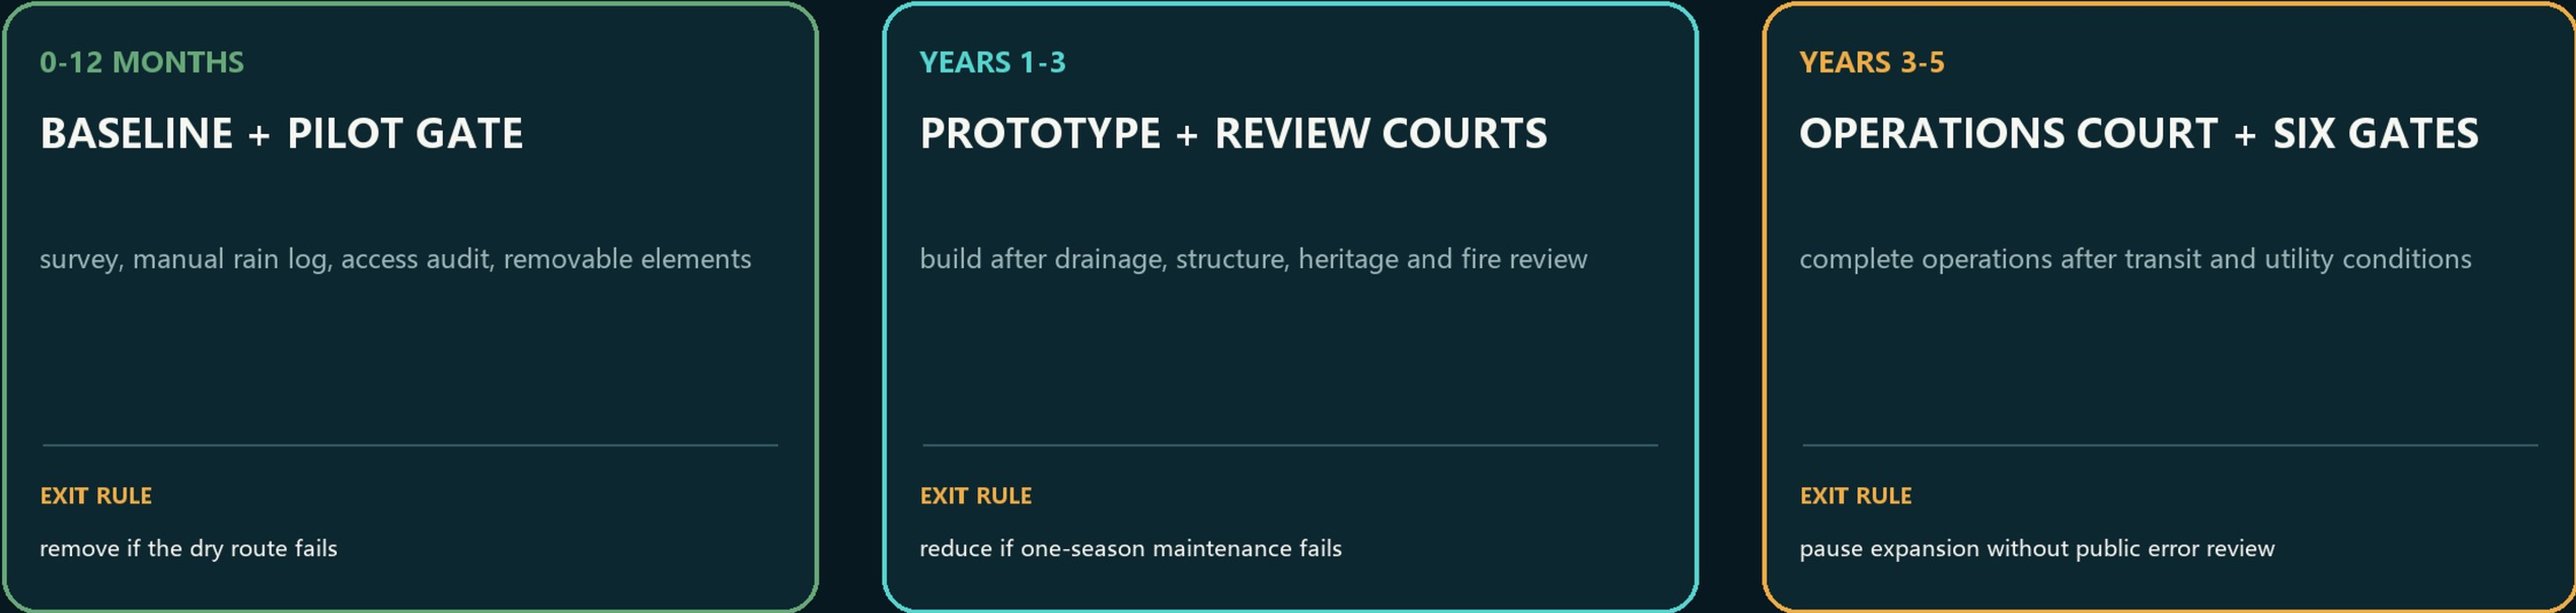

PROVISIONAL GEOMETRY | CONCEPT DESIGN | RECALCULATE WITH OFFICIAL AND ENGINEERING DATA

IMPLEMENTATION / 实施路径

B06

TEST ONE RAIN BEFORE BUILDING THE NEXT METRE

Light trials, professional review and public learning control the pace of investment.
