

COMMON TIME

Six bounded AI-planning roles route evidence to human decisions; three sites accept only reversible, comparable and retireable actions.

CONCEPT · NO PERSONAL PROFILING, AUTOMATED APPROVAL OR ALGORITHMIC RIGHT OF WAY · HOLD UNTIL AUTHORITY, FIELD, THRESHOLD, COST AND INDEPENDENT COMMISSION

DR-01 | Which reversible P-L01 kit may enter D31-60?

The simulated fixture verifies logic only—not authority, field performance or implementation.

Both independent methods select K1; deliberately breaking offline parity downgrades to K0. Real P-L01 still needs authority, fieldwork, co-signed thresholds, real cost, independent appointment and official geometry; current state is HOLD.

COMMON TIME / VERIFY · LEARN · LIVE

V13 proves DR-01 is reproducible and failures downgrade; simulated inputs never become real passes and external evidence remains HOLD

SITE EVIDENCE AND UNKNOWNNS

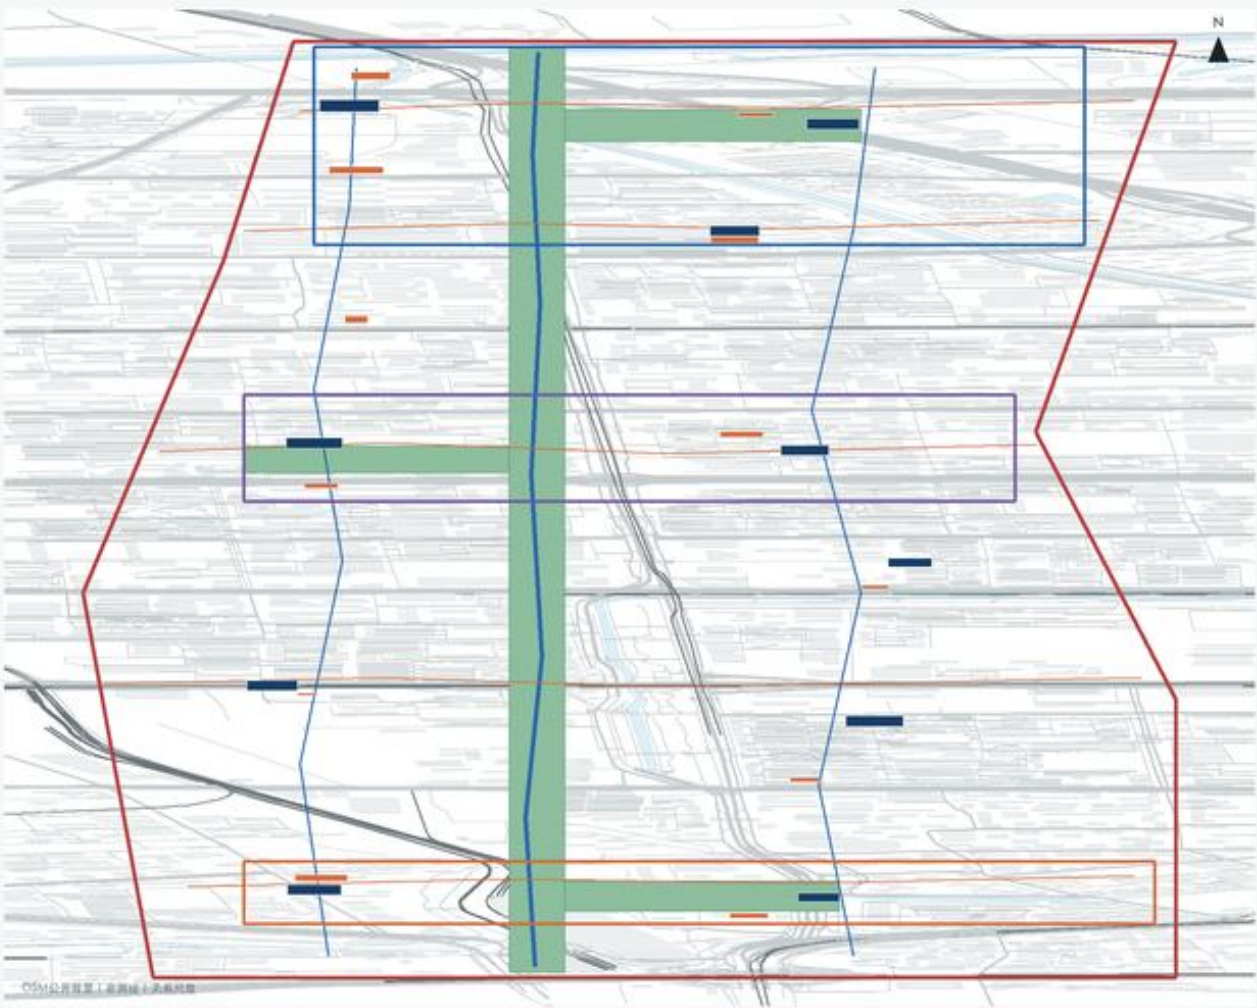

Public photographs do not replace a 2026 survey; official boundaries, title, heritage GIS, capacity and cost remain unknown.
