

JINGZHANG ENCOUNTER COMMONS

LET A FIRST-TIME VISITOR BEGIN AN ACCOUNTABLE, OPTIONAL PUBLIC COLLABORATION—WITHOUT AN ACCOUNT.

AI-GENERATED CONCEPT / NOT A SITE PHOTOGRAPH

NO ACCOUNT

HUMAN HOST

VISIBLE EXIT

Lin at the AI Origin Table for Ninety Minutes

Lin is a first-time international newcomer with limited Chinese, no local account, and a flat phone. They are a synthetic persona used to test the journey—not an interview claim.

01 PERSON

Lin does not need to be “matched.” They need a public route they can understand, refuse, and leave.

NO ACCOUNT

PAPER WORKS

EXIT ANYTIME

00 MIN

ARRIVE

Read physical bilingual signs.

10 MIN

ASK

A human explains data, complaints, and exit.

20 MIN

CHOOSE

Choose an authorised task—or decline.

30-75 MIN

CONTRIBUTE

Use paper or speech; keep dissent visible.

75 MIN

REVIEW + DELETE

Review the output; delete temporary preferences.

90 MIN

CLEAR EXIT

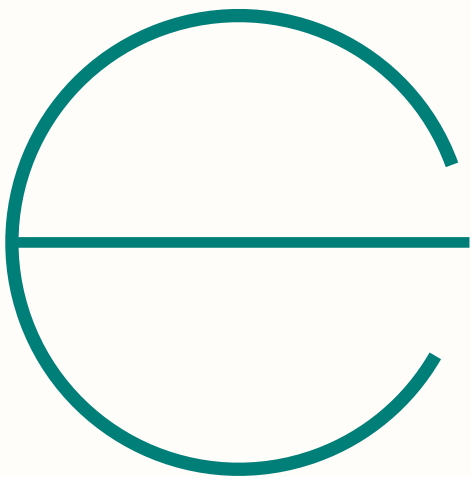

No lasting account; leave by a visible route.

One Task, Three Stages That May Span Days

Co-create at AI Origin, verify at Zhongzhiyuan, then exchange at Dazhongsi. Ninety minutes refers to one AI Origin table session, not one trip between all three places.

FLOW-A / PROV-KEY-002

AI ORIGIN: FRAME A TASK

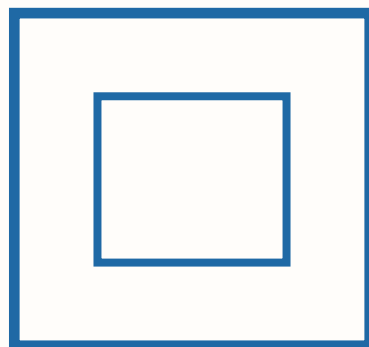

Complete an Encounter Ticket with a host; AI sees authorised fields, not private ties.

OUTPUT: 8-FIELD TASK

FLOW-B / PROV-KEY-001

ZHONGZHIYUAN: TEST IT

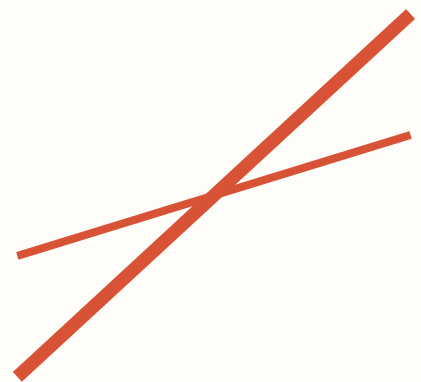

Enter a controlled yard; verify separation, bypass, stop, and restoration.

OUTPUT: TEST RECEIPT

FLOW-C / PROV-KEY-003

DAZHONGSI: RETURN IT

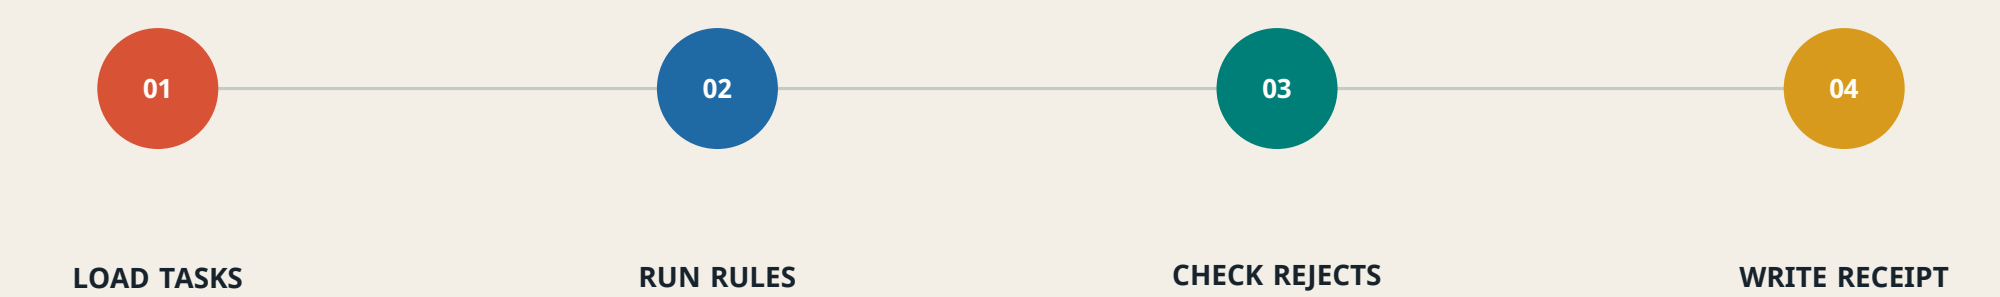

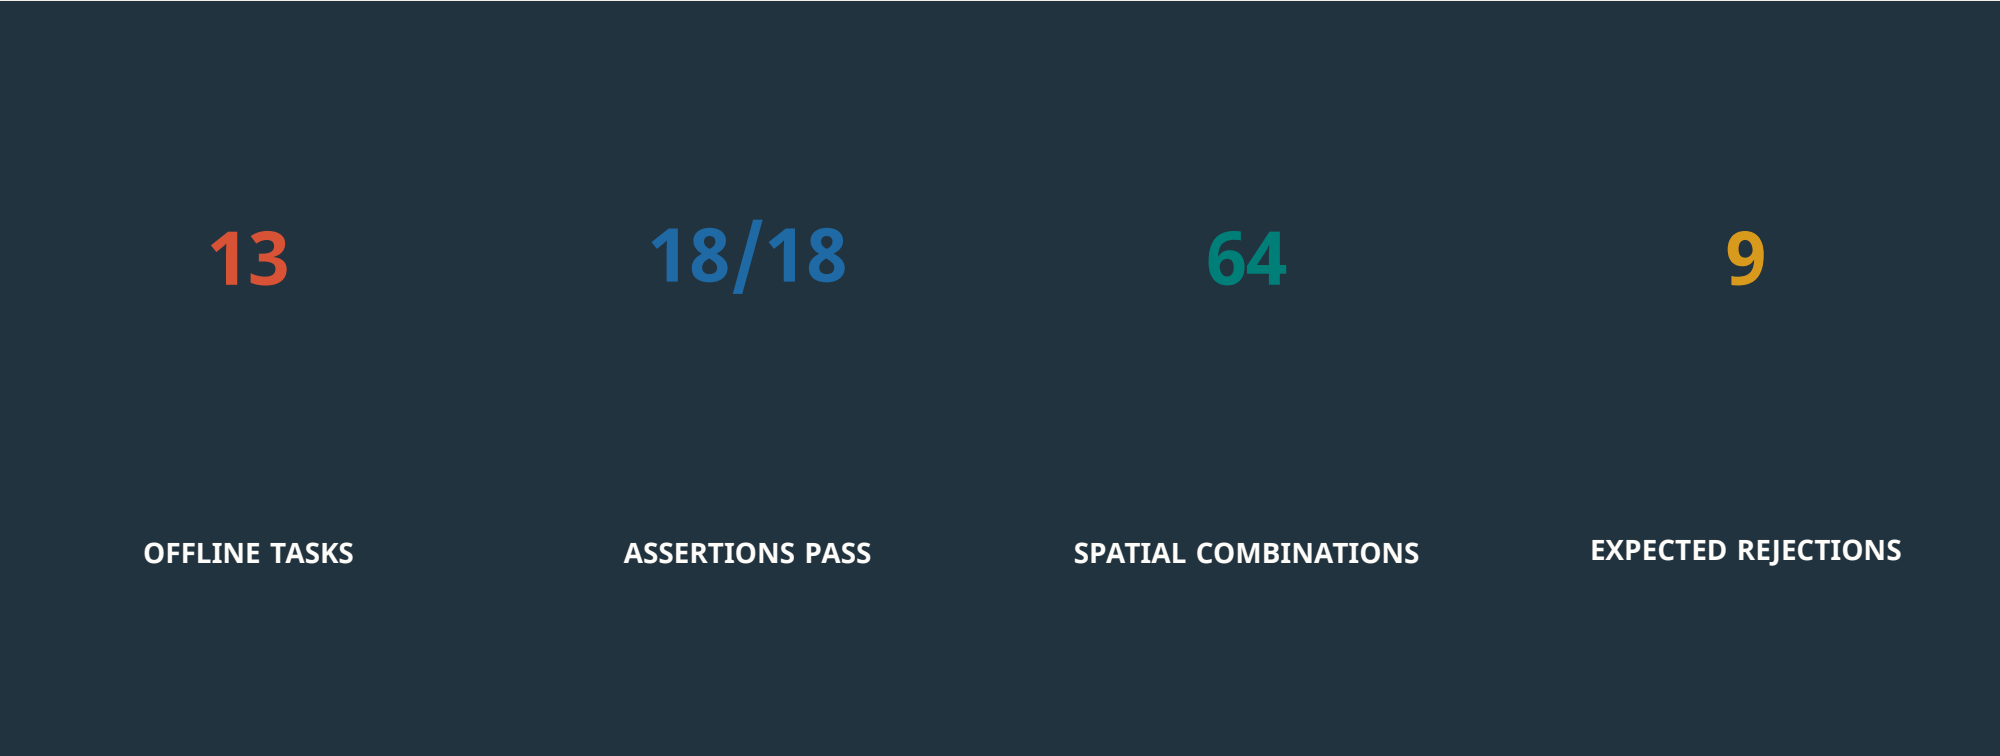

Review through a public display and quiet feedback table—without person matching or phone-only entry.

OUTPUT: PUBLIC FEEDBACK

First Check Whether the System Rejects Errors

The offline simulation replays both release and rejection. It checks the digital contract; it does not pretend the service has run on site.

WHAT IT PROVES

The structure is valid, recomputable, and rejects designed failure conditions.

WHAT IT DOES NOT PROVE

It does not prove field performance, authority, safety, capacity, demand, or acceptance.

FIELD RELEASE STILL REQUIRES OWNERSHIP, HERITAGE, FIRE, ACCESS, OPERATIONS, AND A FOUR-PARTY WALK.

Three Scope Levels, Three Questions

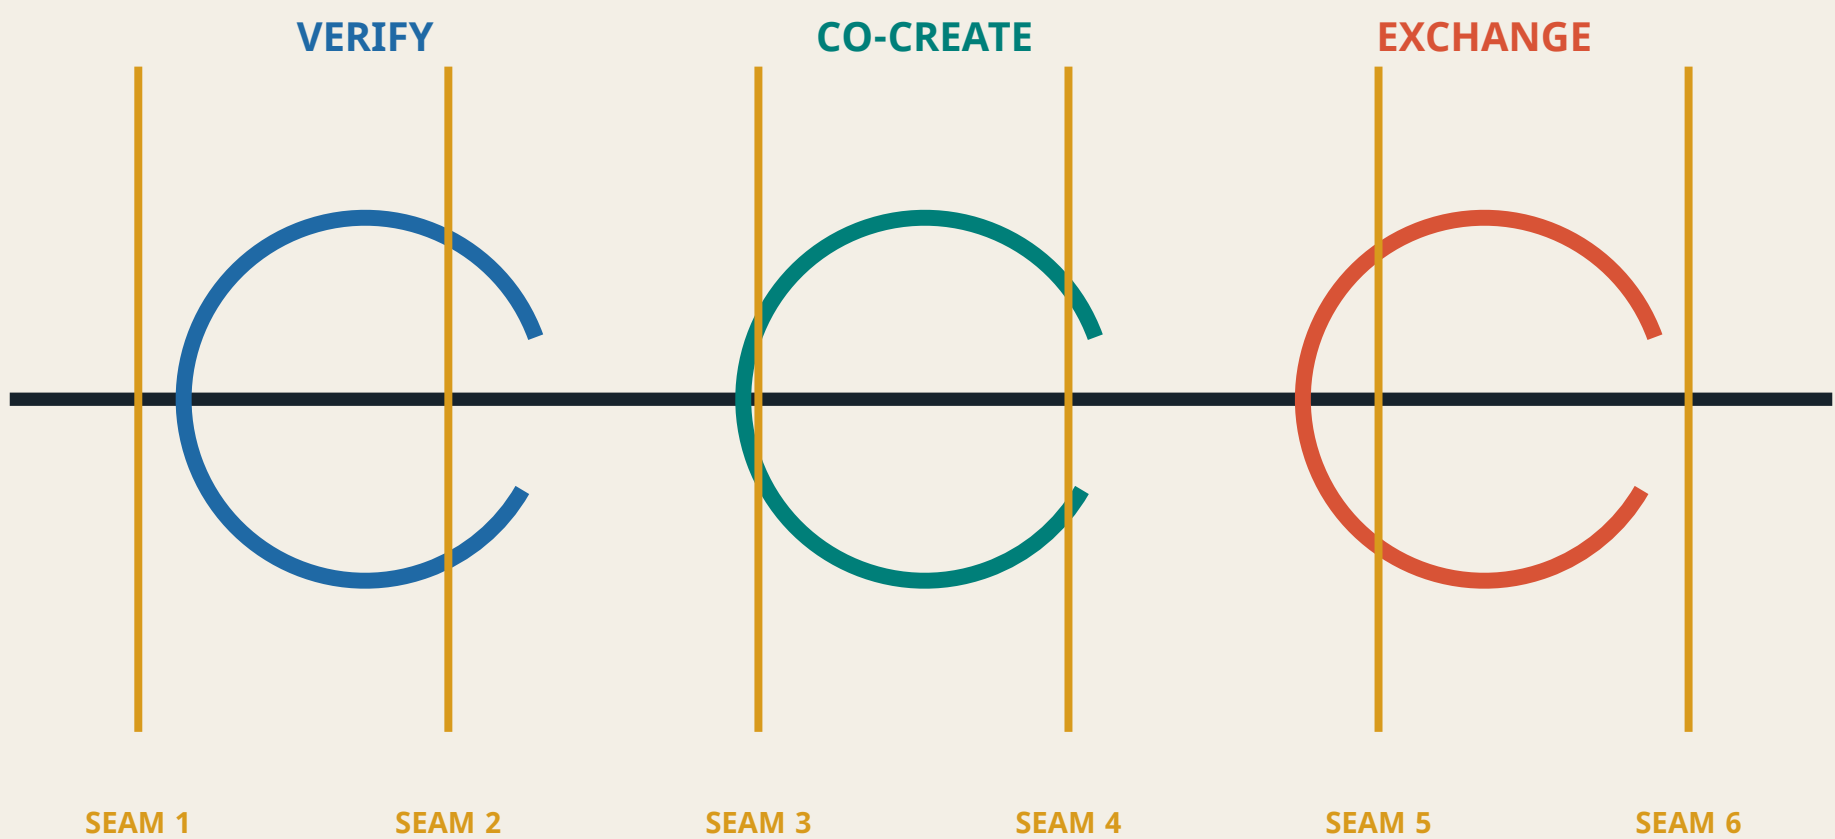

The strategic level links resources, the system level organises services, and key areas test prototypes. The three levels do not form one statutory boundary.

COORDINATE	SYSTEM	PROTOTYPES
43.6 km²	11.4 km²	368.4 ha
Announced regional coordination study area.	The provisional geometry measures 11.41 km²; it is not an official boundary.	Three announced areas; exact locations await official data.

Announced values, provisional calculations, and statutory boundaries must remain separate.

One Spine, Three Commons, Two Wings, Six Seams

The Encounter Spine is a service and programme sequence, not a new road; six seams are field-audit questions.

ARRIVE - CROSS - ENTER - STAY - EXIT

If any safety-critical fact is unknown, do not claim the route is connected.

The six seams are sample checks, not six proposed roads.

Protocol Before Permanent Works

Each step requires updated evidence on venue, fire safety, ownership, and accessibility.

01 VENUE PROTOCOL Verify operator, entry, exit, and hours; no exit means no opening.	02 REVERSIBLE KIT Paper, signs, tables, and physical stop; removable after ninety days.	03 PROFESSIONAL WORKS Sign off ownership, structure, fire, MEP, and access.
---	--	--

Keep FAR, height, parking, and demolition unknown until official evidence is available.

Four Parties Must Walk the Route

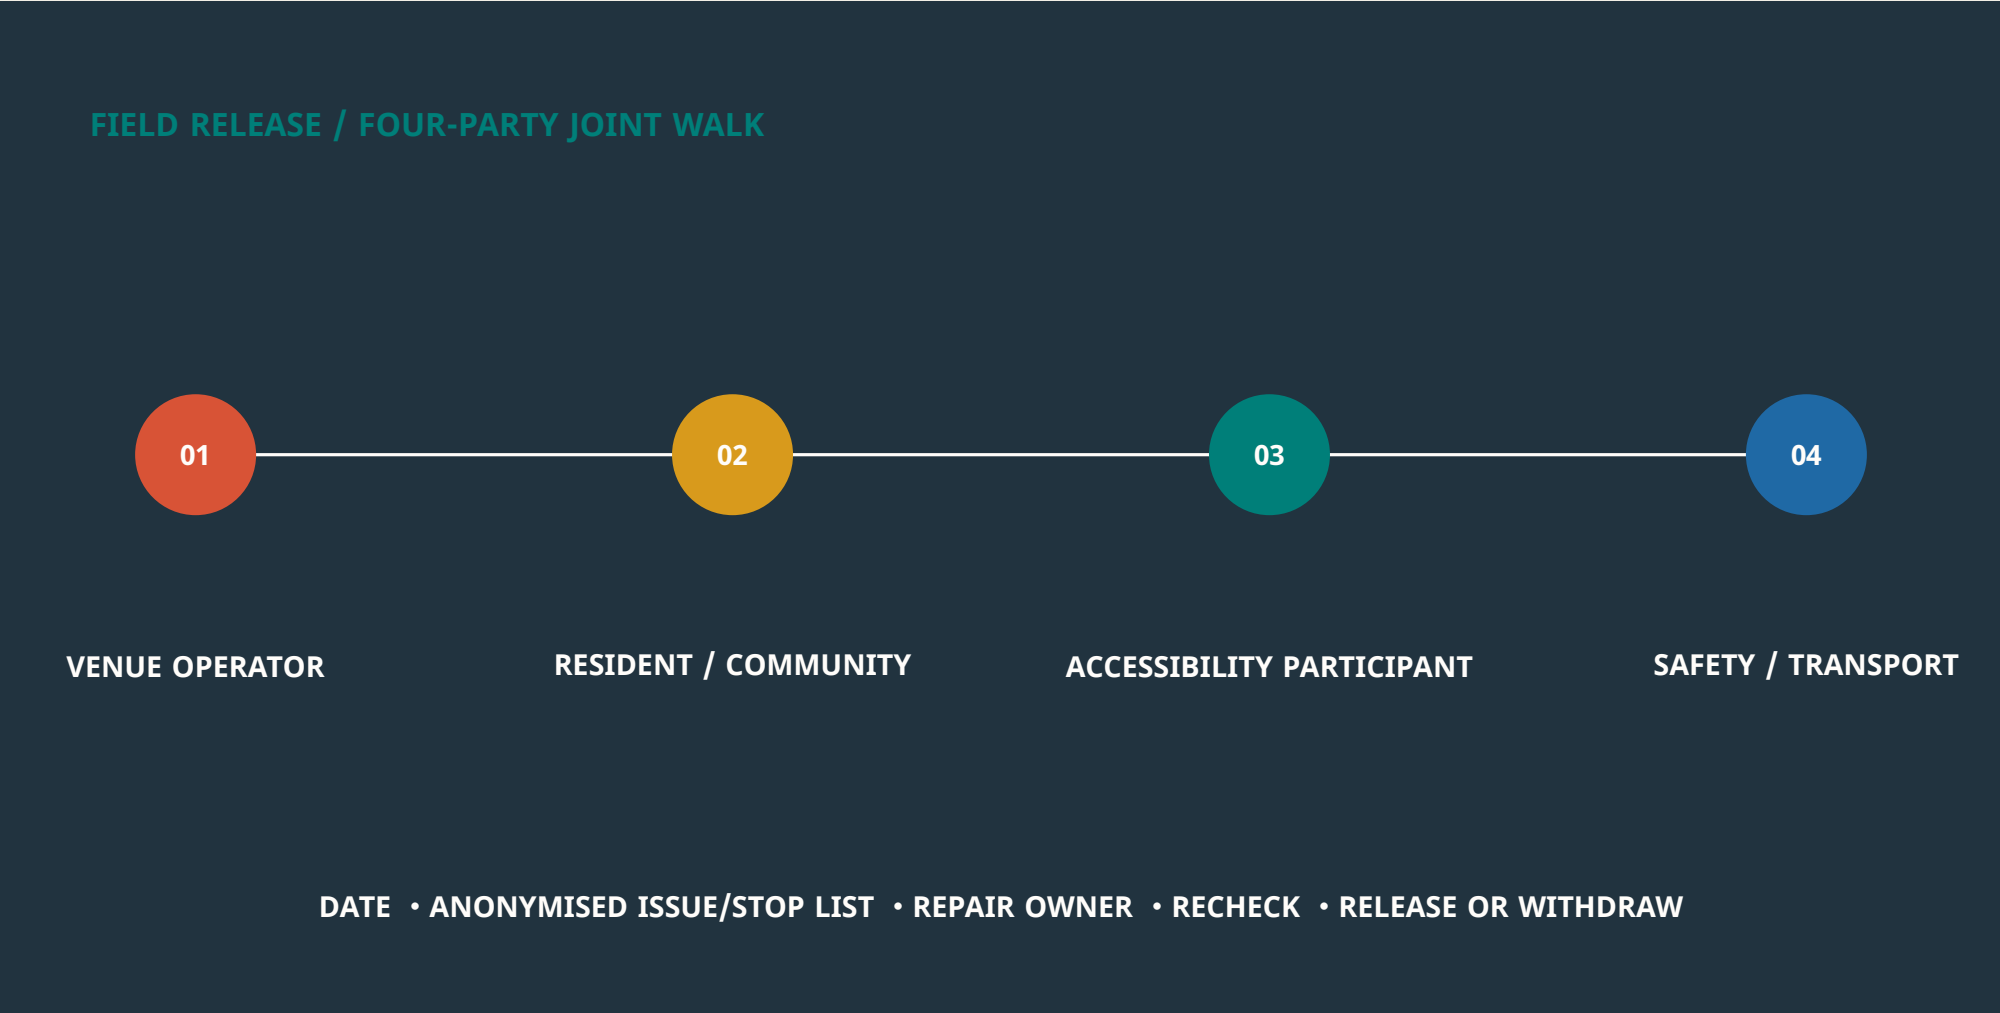

First confirm rail conditions and legal crossings; then all four parties walk the route from arrival to exit.

KNOWN / RAIL STATES

HSR BELOW • HERITAGE ABOVE • LINE 13 CURRENT

IF-TYPE-01 / CROSSING GATE

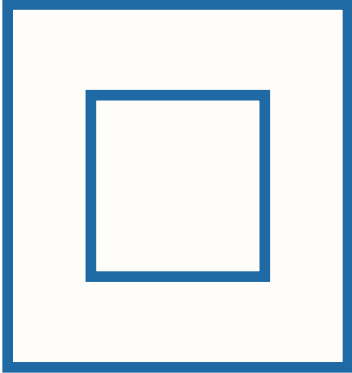

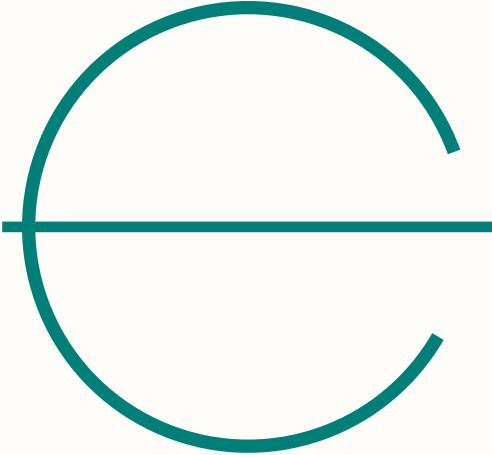

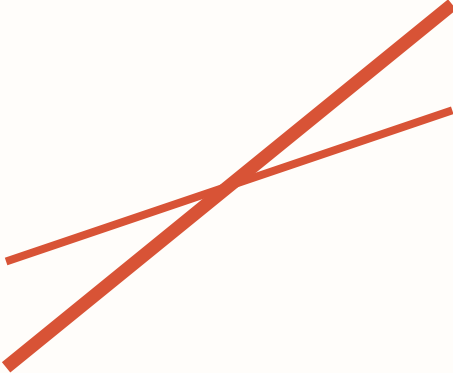

EXISTING / APPROVED CROSSINGS ONLY

If any of the four responsible people is unnamed, or any critical condition is unknown, do not publish the route.

Three Commons, Three Different Prototypes

Each provides a physical entrance, staffed checkpoint, core activity, emergency stop, and visible exit; their layouts differ.

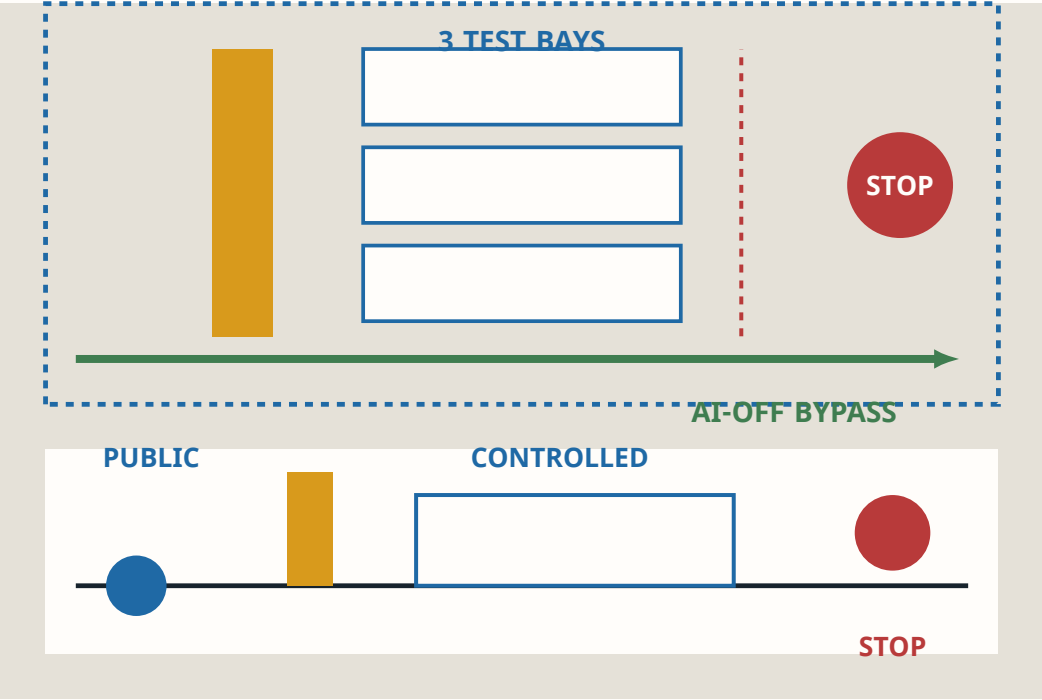

ZHONGZHIYUAN CONTROLLED YARD  ENTRY - THRESHOLD - CORE - STOP / EXIT	AI ORIGIN COMMON TABLE  ENTRY - THRESHOLD - CORE - STOP / EXIT	DAZHONGSI CITY GALLERY  ENTRY - THRESHOLD - CORE - STOP / EXIT
---	--	---

Exact location, dimensions, and permanence await professional sign-off.

Zhongzhiyuan Common Problem Yard

PLAN + SECTION / NTS

S01 • SYNTHETIC TEST PASSED / NOT CLEARED FOR FIELD USE

PUBLIC ENTRY - PROBLEM THRESHOLD -
CONTROLLED TEST - PHYSICAL STOP / EXIT

ROUTE

PUBLIC ENTRY, ISOLATED TEST

Core activity and bypass exit must both be visible.

FIRST EVIDENCE

PLAN + NTS SECTION

Three bays, physical stop, AI-off bypass, and site-restoration checklist.

STOP

NO SUPERVISOR, STOP

No separation, unclear boundary, or any safety event also stops.

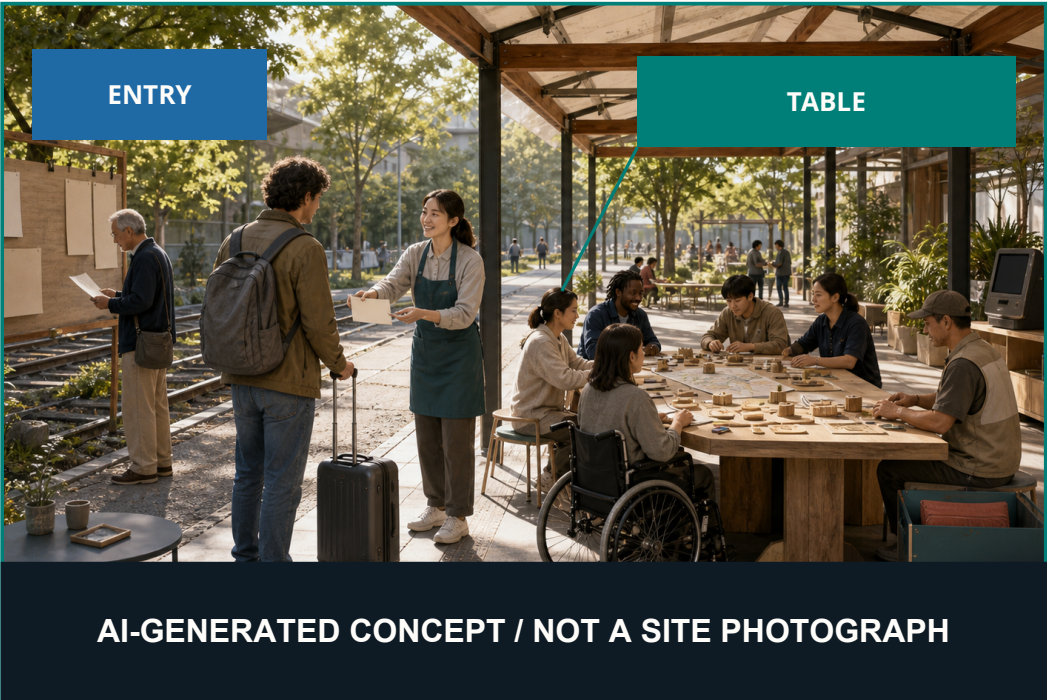

HANDOFF

PROFESSIONAL SIGN-OFF

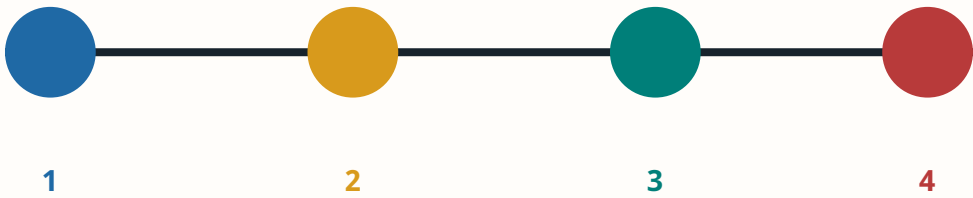

Architecture, structure, fire, access, and venue operations.

AI Origin Common Table Yard

SCENE / CONCEPT

EXIT

NO-LOCAL-ACCOUNT ENTRY - HUMAN
HOST - COMMON TABLE - OFFLINE EXIT

ROUTE

A COMMON TABLE, NOT PEOPLE MATCHING

A host explains the task, data limits, and how to exit.

FIRST EVIDENCE

NINETY-DAY ROSTER

Account-free, offline, and multilingual routes must work equally well.

STOP

NO HOST, STOP

Overload, unchecked translation, or failed offline route also stops.

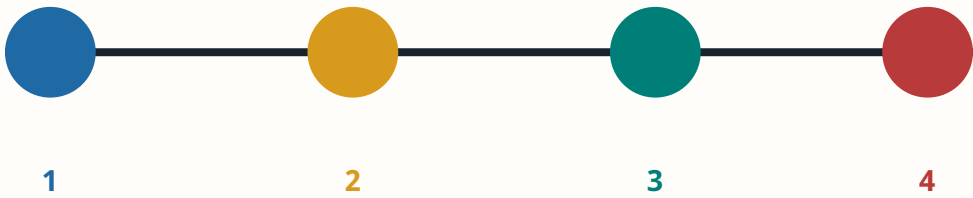

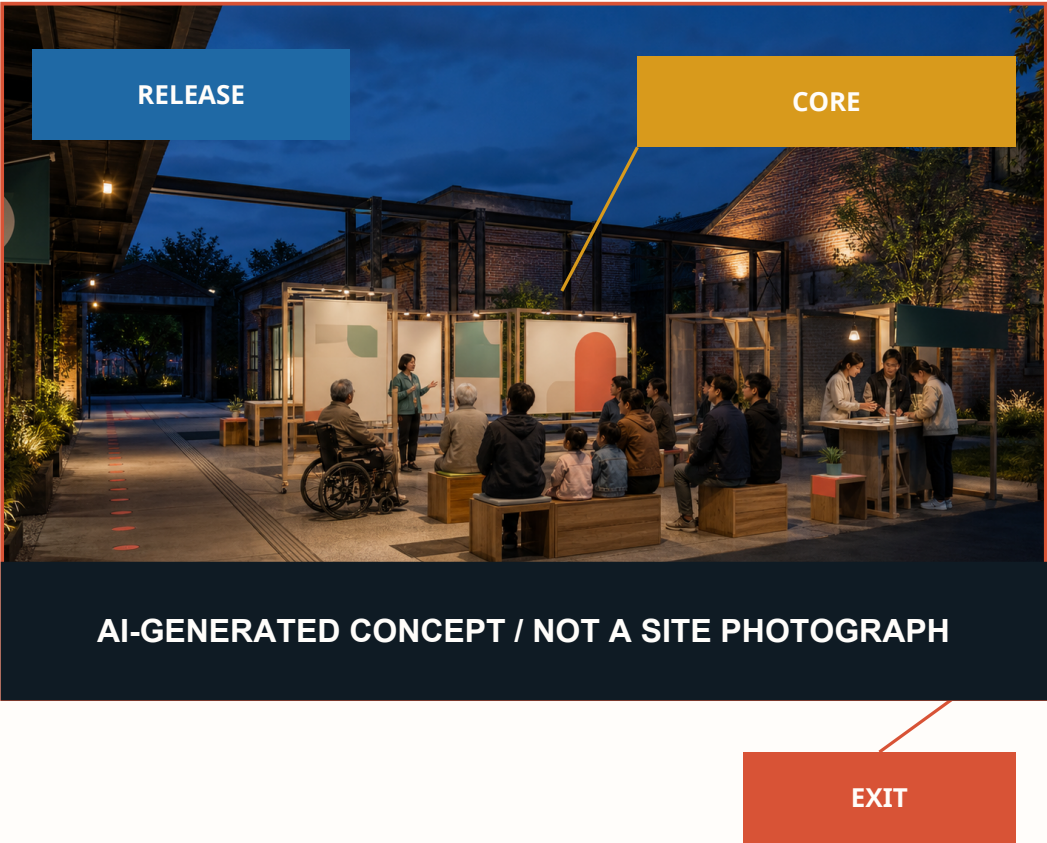

HANDOFF

OPERATIONS AND DATA

Public service, information access, staffing, and data governance.

Dazhongsi Common City Yard

SCENE / CONCEPT

URBAN ENTRY - EVENT RELEASE - FIRST USE / CULTURE - QUIET EGRESS

ROUTE

APPROVAL FOR EACH EVENT

The programme is not tied to a station or promised as permanent.

FIRST EVIDENCE

SECURE A CANDIDATE SITE

Then check heritage, noise, egress, and access.

STOP

IF A LIMIT FAILS, STOP

Crowd, noise, egress, or exit-route failure stops the event.

HANDOFF

DISCIPLINE SIGN-OFF

Planning, transport, heritage, fire, acoustics, and community.

One Person, Not a User Profile

First visit, limited Chinese, no local account, and a dead phone battery. This 90-minute journey is a test script, not measured performance.

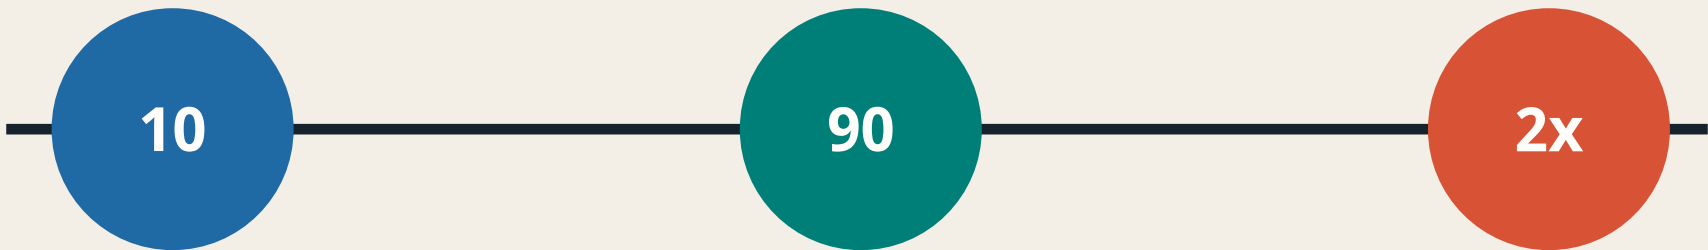

STOP / No host, critical mistranslation, missing source, no working account-free option, or blocked exit.

Twelve Scenarios, Three Offline Replays

S01-S03 are synthetic tests, not field results; S04-S12 still await authorisation.

S01/ TEST Workflow interoperability fixture / evidence / rollback	S07/ SERVICE Talent and health navigation no diagnosis / links only
S02/ TEST Source-backed multilingual service source / refuse / human	S08/ COMMONS Public test partners ethics / safety / no approval
S03/ TEST Accessible event sandbox capacity / stop / restore	S09/ COMMONS Community AI co-design preserve dissent / delete raw
S04/ SERVICE Cross-campus project clinic public topic / human confirmation	S10/ COMMONS Cultural guide co-edit source / sign-off / withdraw
S05/ SERVICE Mentor hour no chat retention / confirm	S11/ COMMONS Evening open demo time-noise limits / stop
S06/ SERVICE OPC compliance clinic public policy / not legal advice	S12/ COMMONS Annual Encounter Week fresh authority / output index

Advance Only with Evidence

10-DAY LAUNCH PACK

90-DAY OPERATING BASELINE

CYCLE REVIEW / RETIRE

3	5	8	4
PILOT CONTRACTS	G0-G4 GATES	HANDOVER ARTEFACTS	CRITICAL UNKNOWNNS

GATE	STATUS	HANDOFF
NO EVIDENCE, NO ADVANCE Release G0 authority through G4 public interest one by one.	not_authorized / null Do not present this as launched or proven effective.	HAND OFF UNKNOWNNS FAR, height, investment, and utility capacity remain unknown.

It Is Not Open Unless People Can Exit

The goal is not launch. Everyone must be able to understand, decline, complain, delete their data, leave safely, and verify the restoration record.

01 / PRIVACY

No face, contacts, precise trajectory, health inference, relationship graph, or personal score.

02 / SPACE

All boundaries are provisional; recompute when official data arrive.

03 / OPERATIONS

Named owners, non-AI equivalent, physical stop, restoration, and retirement are mandatory.

04 / RIGHTS

Sources, ODbL map attribution, Noto OFL, and original figures are registered.

05 / NEXT

Verify real entrances and accessible routes - confirm the operator - run a controlled 90-day pilot.

Three positions, five functions, eight resources, one reversible loop

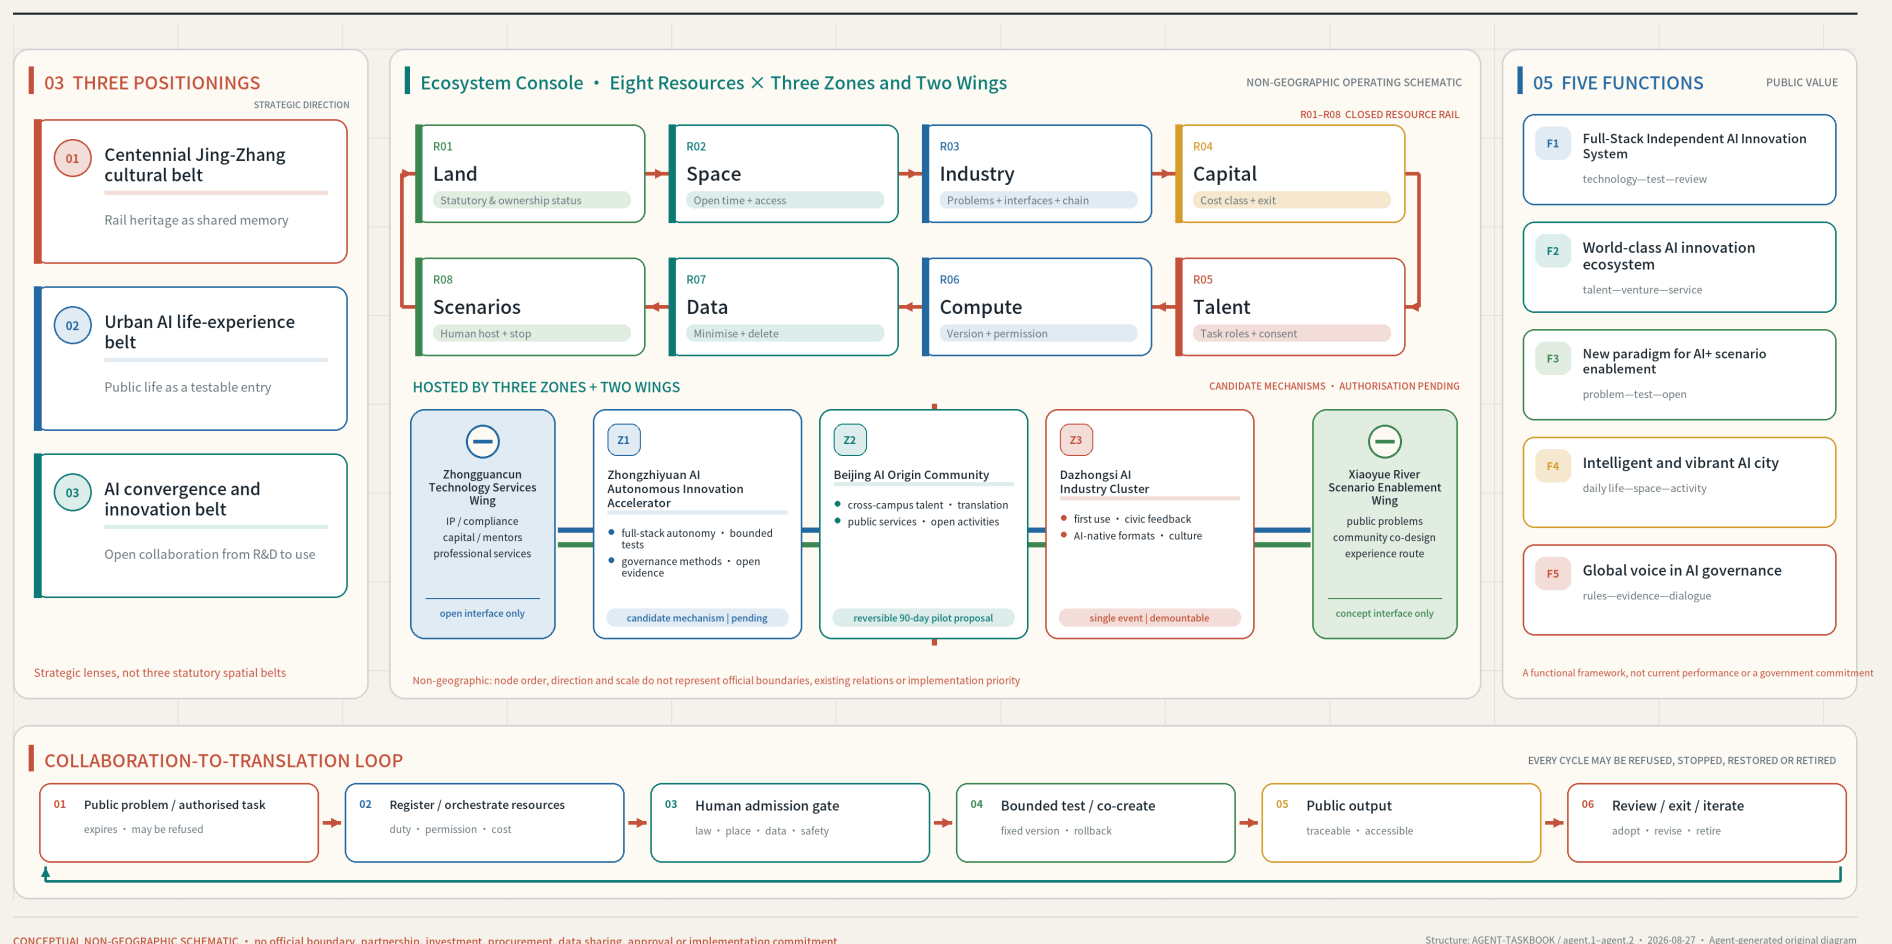

The taskbook framework becomes an auditable resource flow: public problems and scenarios enter through professional services and controlled testing, reach limited first use, and return to the city as public outputs, reviews, and exit records.

FIG-07 JINGZHANG ENCOUNTER COMMONS

AI Innovation Ecosystem Map • From Eight Resources to Public Value

Three positionings set direction, five functions organise value, and three zones plus two wings host tests; every translation needs human authorisation, review and exit

Indicators are not slogans

Define the AI Innovation Index, talent density, and output scale with denominators, time windows, and sources. Keep them unknown until a valid baseline exists.

A framework is not approval

Three Zones and Two Wings organise collaboration. Exact sites, scale, retain-renovate-demolish choices, station integration, and works await official polygons, field evidence, and specialist sign-off.

Conversion must remain reversible

Developers work through public tasks and versioned artefacts; international communication releases cleared bilingual work only; attraction follows controlled trials and review, with revision or retirement on failure.

Every resource flow names an owner, the permitted data, the review date, the stop rule, and the handback route.
