

SPATIAL CONTRACT AND COORDINATED FRAMEWORK

JINGZHANG HUMAN LOOP / 01

One launch loop, one public-service contract

How can AI remain visible, optional, assisted and escapable at city scale?

Conceptual proportion / not engineering scale

HUMAN LOOP / FIVE MOVES

- 01 NOTICE
AI identity, purpose and accountable operator
- 02 CHOICE
Consent first; refusal carries no penalty
- 03 HELP
Reach a person within the 100 m launch loop
- 04 EQUAL PATH
Accessible non-AI service remains equivalent
- 05 EXIT
Withdraw, appeal and receive a traceable response

ONE SPINE · THREE COURTS · TWO PATHS · 12 SCENARIOS

The 100 m human-service launch loop is conceptual, pending survey, operations and accessibility validation.

Source: submission geometry/*.geojson, metrics.json and assumptions.json, generated 2026-08-10. PROVISIONAL / NON-OFFICIAL: rough geometry, not a statutory boundary, approval basis or deployment evidence; recalculate with official survey and controls.

JINGZHANG HUMAN LOOP / 02

Land use as an enabling framework, not a claimed control

Where can research, civic service, mixed life and open space reinforce each other?

Conceptual proportion / not engineering scale

THREE SCALES / ONE EVIDENCE CHAIN

- 43.6 km² Coordinated research scope
Industry network, future-city and railway culture; not the submitted design boundary.
- 11.4 km² Provisional design scope
Concept land-use partition on provisional_rough geometry, pending full recalculation.
- 3 areas Detailed-design focus
Zhongzhiyuan, AI Origin and Dazhongsi share the Human Loop contract.

LAND-USE LEGEND

- R&D / education
- Industry / commerce
- Living / service
- Civic / culture
- Park / open

Source: submission geometry/*.geojson, metrics.json and assumptions.json, generated 2026-08-10. PROVISIONAL / NON-OFFICIAL: rough geometry, not a statutory boundary, approval basis or deployment evidence; recalculate with official survey and controls.

THREE HUMAN COURTS AND THE LAUNCH LOOP

JINGZHANG HUMAN LOOP / 03

Three Human Courts, twelve situated scenarios

How can each key area specialise while sharing one dignity-first protocol?

01 Zhongzhiyuan Model Public Test Court
Test transparency + accountable stop authority

2 Model-safety public test bench

4 Low-speed delivery coexistence

3 Accessible-navigation comparison

5 Energy-aware computing display

02 AI Origin 100 m Human-Service Loop Court
Flagship validation + equal service + open contribution

1 100 m Human-Service Loop (flagship)

7 AI / paper dual-mode wayfinding

6 Human-assisted public-service desk

8 Open-source contribution display

03 Dazhongsi Equivalent-Path Gateway
Everyday advice + culture + care + appeal

9 Responsible recruitment advice

11 Health-service navigation (not diagnosis)

10 Multilingual heritage guide

12 Quiet-access and family-care route

Source: submission geometry/*.geojson, metrics.json and assumptions.json, generated 2026-08-10. PROVISIONAL / NON-OFFICIAL: rough geometry, not a statutory boundary, approval basis or deployment evidence; recalculate with official survey and controls.

JINGZHANG HUMAN LOOP / 04

Prove a 100 m human-service loop before scaling

How can dual-path access be tested without pretending the proposal is deployment-ready?

100 m LAUNCH LOOP / CONCEPT

EXIT CRITERIA

☐ A person responds within the promised time

☐ Refusing AI does not reduce service quality

☐ Wayfinding and accessibility work

☐ Logs support appeal with named accountability

☐ Failure degrades safely to staffed service

Concept length, not a survey result. Validate access, staffing, privacy and fail-safe operation segment by segment on site.

Source: submission geometry/*.geojson, metrics.json and assumptions.json, generated 2026-08-10. PROVISIONAL / NON-OFFICIAL: rough geometry, not a statutory boundary, approval basis or deployment evidence; recalculate with official survey and controls.

EVIDENCE GATE AND DEPLOYMENT BOUNDARY

Evidence before deployment

What is known, what remains provisional, and why readiness is currently 0 of 6?

CORE METRICS / CURRENT EVIDENCE

Provisional design area

PROVISIONAL

11.41M m²

Green-space ratio

KNOWN

10.2%

Public-space ratio

KNOWN

2.0%

Key areas

KNOWN

3

9 DEPENDENCIES / ALL OPEN

- 1 Official boundary and planning controls
- 2 Site and accessibility audit
- 3 Interviews with six persona groups
- 4 Operator and service commitment
- 5 Privacy and cybersecurity
- 6 Model and public-safety assessment
- 7 Equivalent non-AI service design
- 8 Utilities, energy and equipment
- 9 Approvals, funding and lifecycle

9 assumptions recorded; none upgrades provisional data.

DEPLOYMENT READINESS

0 / 6

CONCEPT-ONLY

☐

Official spatial and planning evidence

☐

Site and accessibility audits

☐

Informed participation of six persona groups

☐

Operator and human-escalation responsibility

☐

Privacy, cyber, model and public-risk reviews

☐

Funding, approvals, maintenance and exit

Public sources > provisional geometry > concept > professional review > statutory process > operational acceptance

DEPLOYMENT READY

0 / 6

CONCEPT-ONLY

Content-reviewable only. No site gate is verified; no approval, engineering, procurement, testing or operation is claimed.

9 OPEN DEPENDENCIES

- 1 Official boundary and planning controls
- 2 Site and accessibility audit
- 3 Interviews with six persona groups
- 4 Operator and service commitment
- 5 Privacy and cybersecurity
- 6 Model and public-safety assessment
- 7 Equivalent non-AI service design
- 8 Utilities, energy and equipment
- 9 Approvals, funding and lifecycle
