

Overall Area and Breathing Spine

Provisional geometry as a north-to-right sequence; not an official redline

JZ / 01

PUBLIC OPERATING CONTRACT

- MEASURE / SERVE**
minimum data + staffed route
- REVIEW / HOLD**
anomaly, complaint, uncertainty
- STOP / EXIT**
privacy, access, ownership failure

SIX RELOCATABLE PUBLIC UNITS

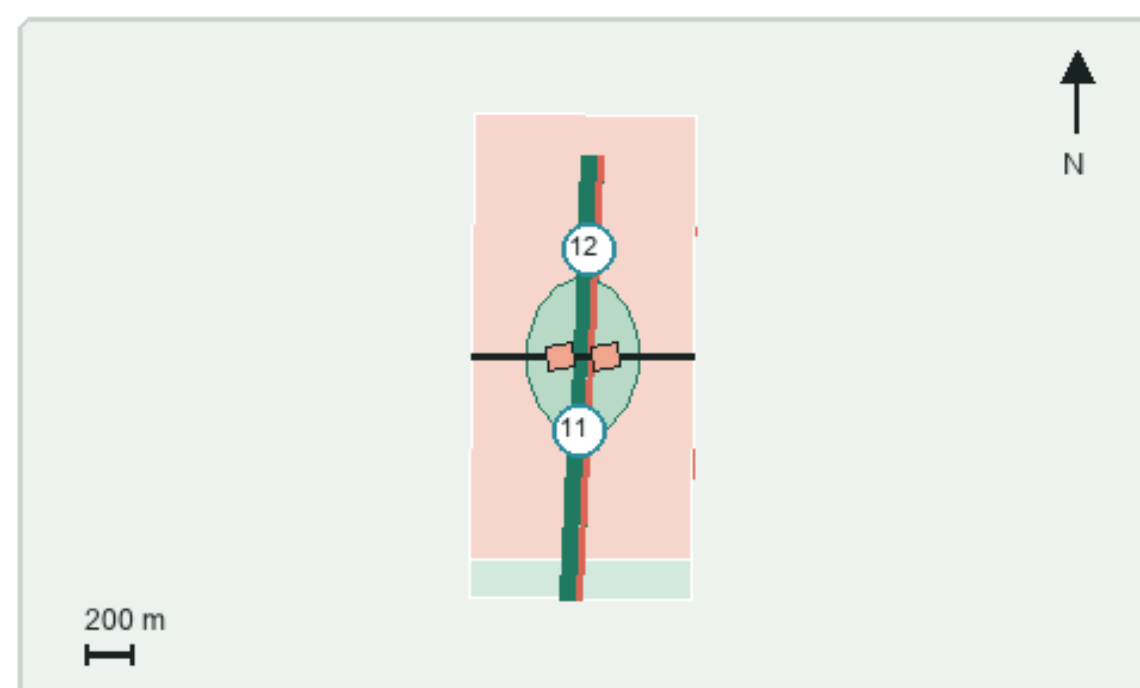

- 01 air observatory
- 02 shaded stop
- 03 quiet co-translation
- 04 blue-green wind gate
- 05 heat-return node
- 06 staffed access hall

Three Key Areas: Plan Evidence and Distinct Jobs

Concept buildings, green space, routes, and intersecting nodes inside provisional areas; not a statutory plan

JZ / 01

Zhongzhiyuan: Verification Lung

building green local nodes

PUBLIC JOB

Device settlement + industry validation

SPATIAL MOVE

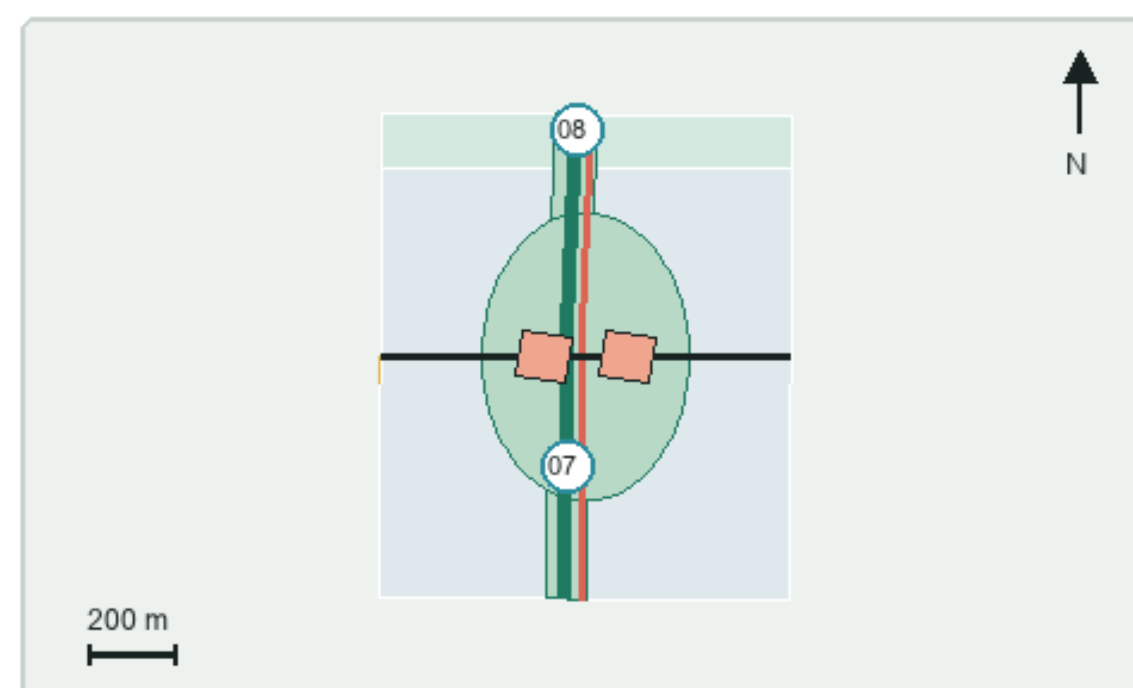

Co-located calibration / controlled loop

REVIEW OWNER

Technical verifier + safety operator TBC

LOCAL NODES: 11 - 12

Beijing AI Origin Community: Intergenerational Living Lung

building green local nodes

PUBLIC JOB

Intergenerational daily life + public health

SPATIAL MOVE

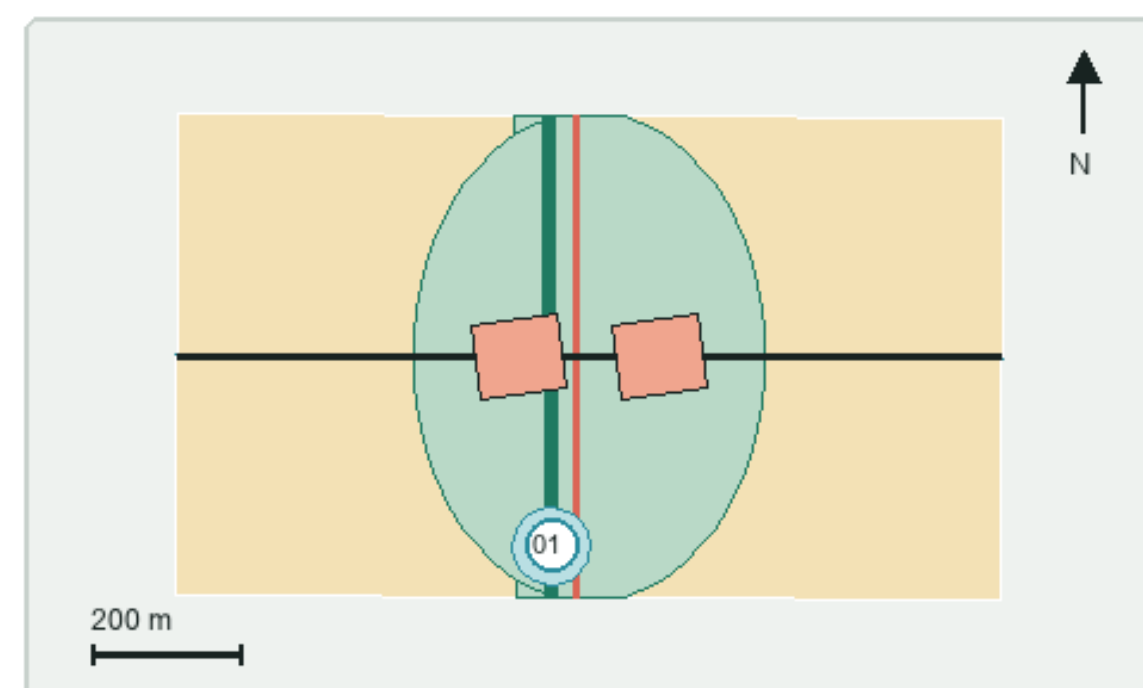

Shaded stay / staffed health service

REVIEW OWNER

Community + public-health reviewers TBC

LOCAL NODES: 07 - 08

Dazhongsi: Urban Exchange Lung

building green local nodes

PUBLIC JOB

Urban exchange + public acceptance

SPATIAL MOVE

Open calibration day / contribution archive

REVIEW OWNER

Operations + accessibility reviewers TBC

LOCAL NODES: 01

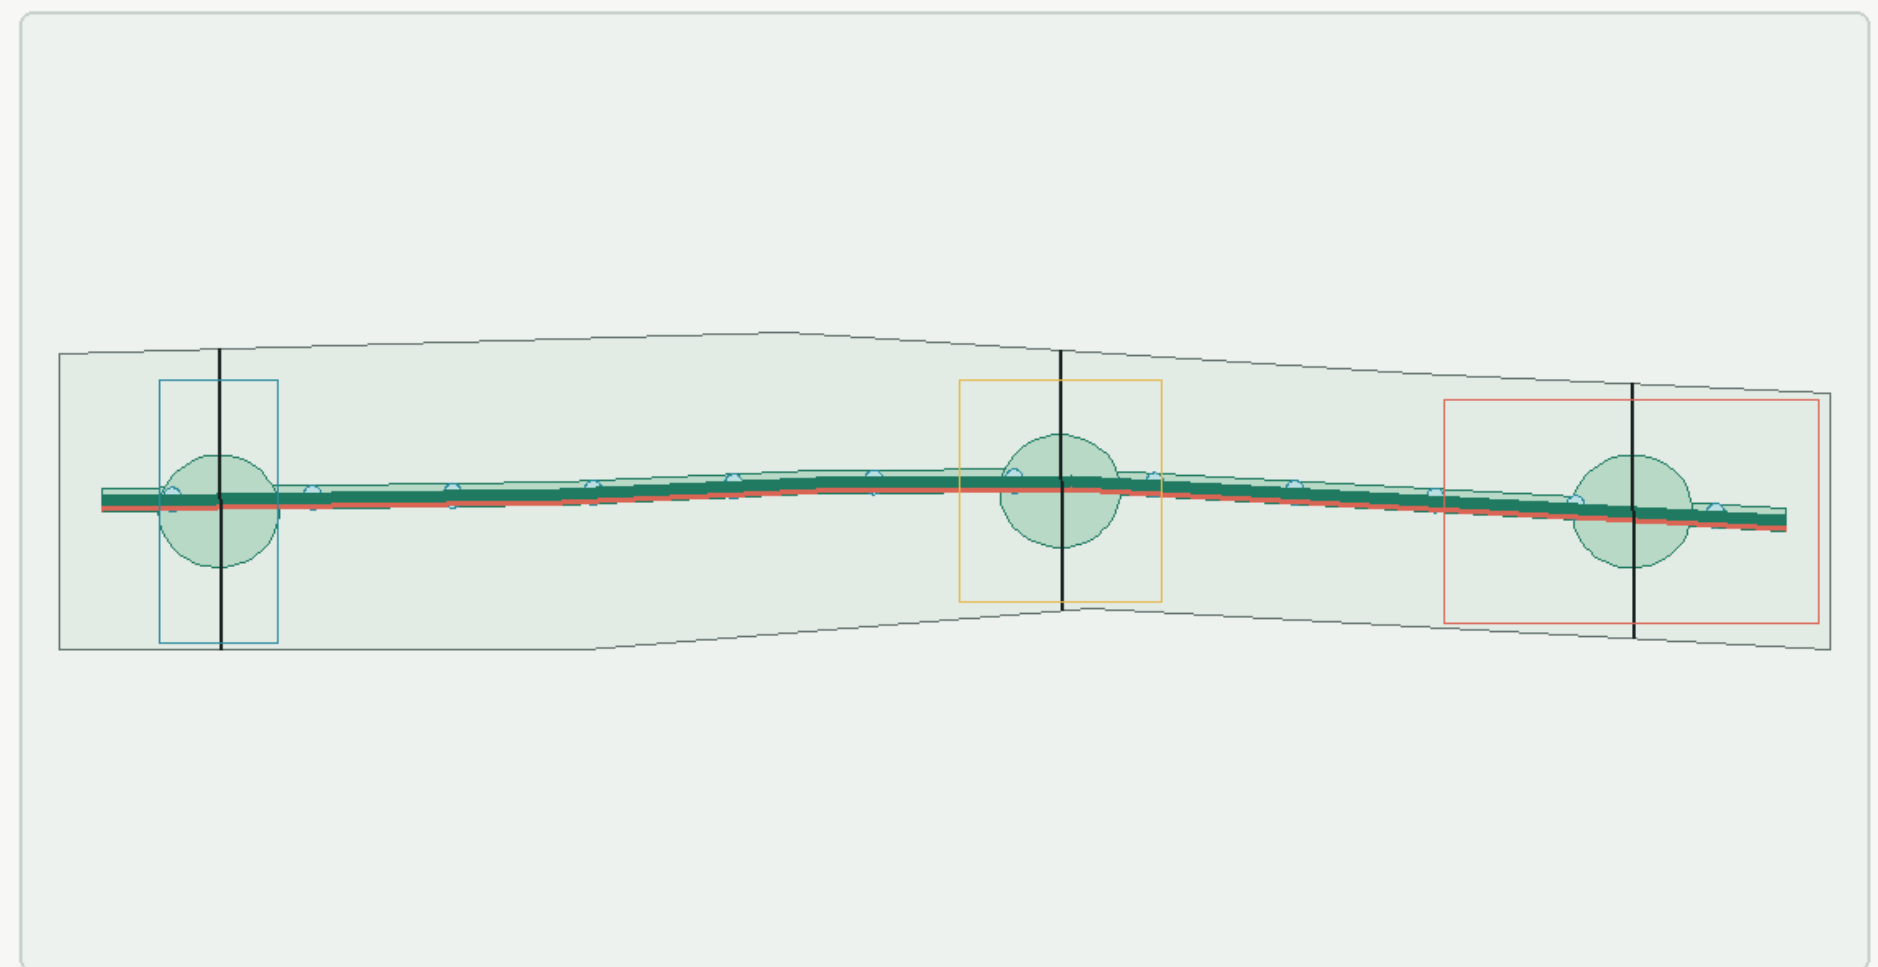

MEASURE → REVIEW → PUBLISH / HOLD / EXIT

One stop protocol; provisional polygons never become approval claims.

Mobility, Blue-Green, and Human Fallback

One spatial source supports 12 discrete nodes; collection is not continuous between them

JZ / 01

ROUTE GUARANTEE

- phone-free + account-free
- continuous staffed fallback
- no sensing between named nodes
- blocked route disables advice

12 nodes ≠ continuous collection

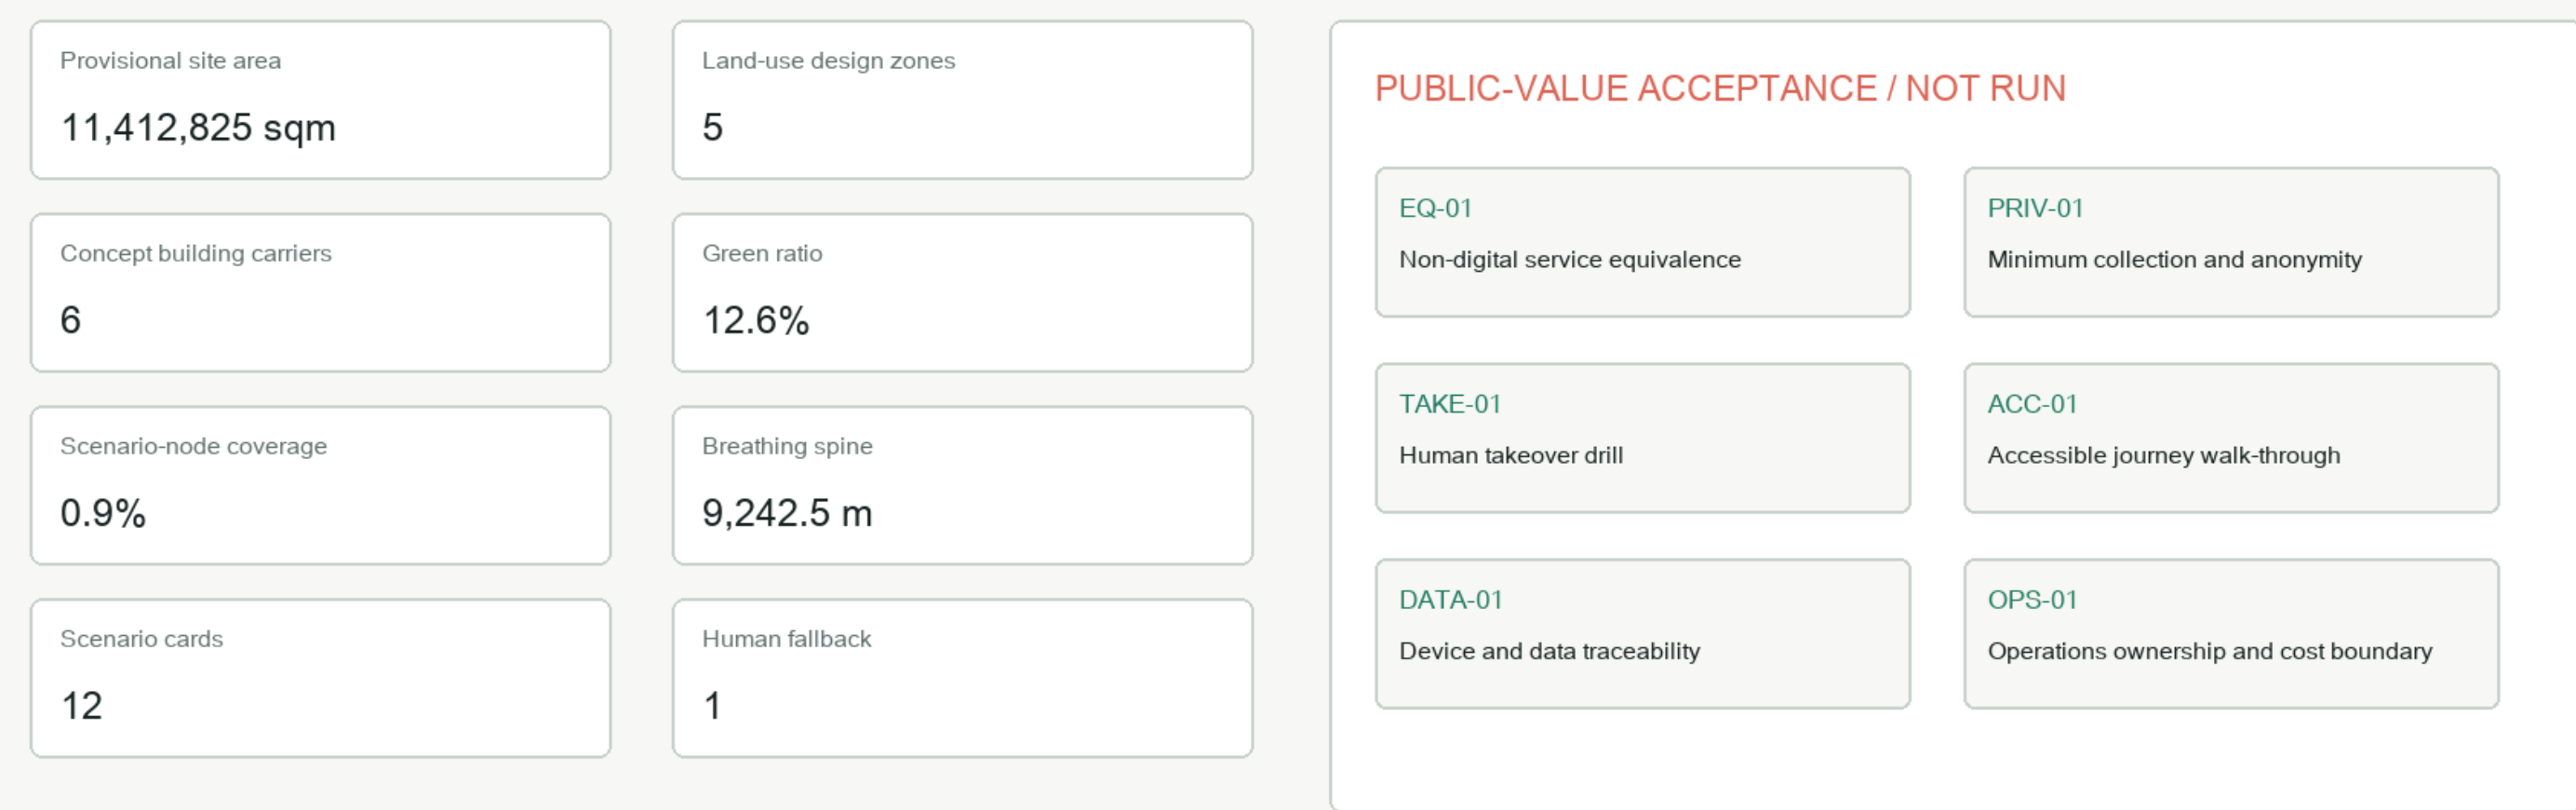

PUBLIC JOURNEY

- 01 arrive on fixed guidance
- 02 choose digital or staffed
- 03 receive visible service state
- 04 leave + request review

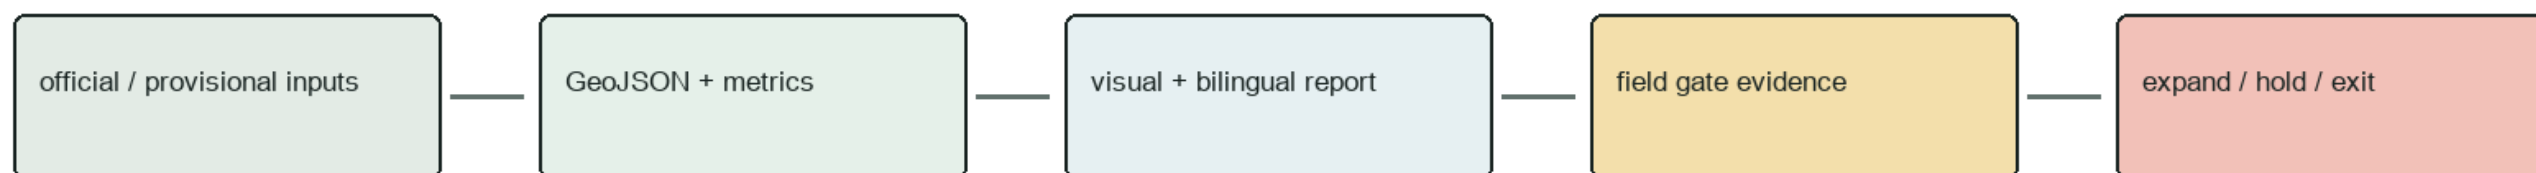

Metrics, Six Acceptance Gates, and Recalculation

Spatial values come from layers; all gates are not run and field performance stays unknown

JZ / 01

EVIDENCE CHAIN

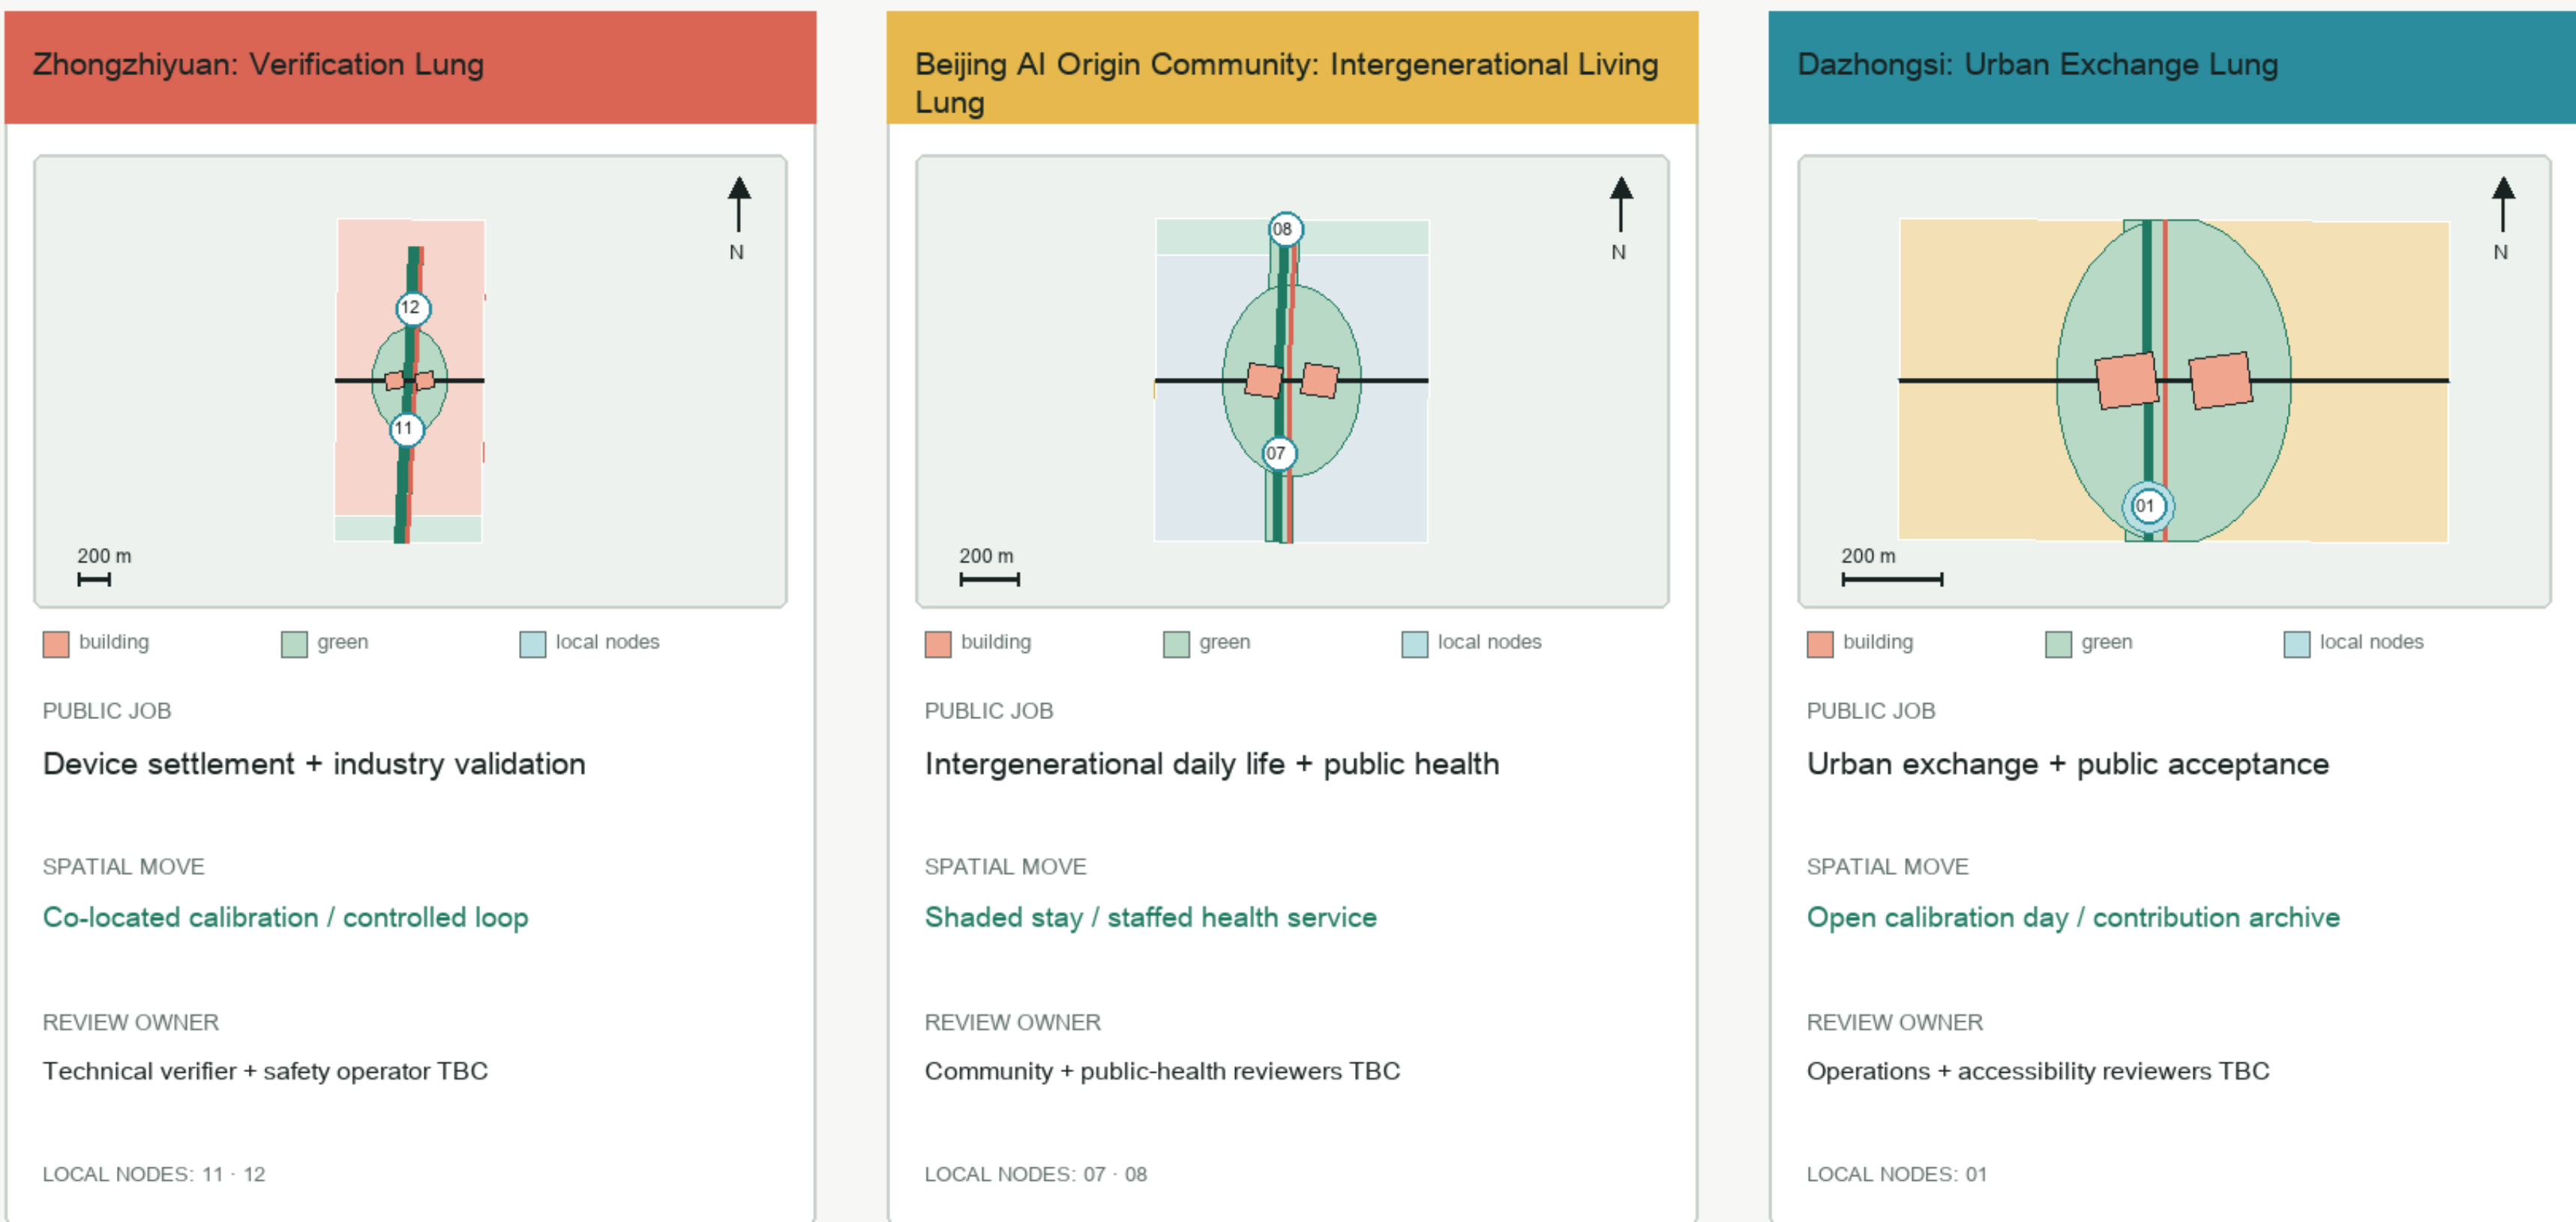

UNKNOWN: FAR · height · ownership · utilities · baseline performance · local cost

Numbers never turn provisional geometry into an official redline.

Three Key Areas: Plan Evidence and Distinct Jobs

Concept buildings, green space, routes, and intersecting nodes inside provisional areas; not a statutory plan

JZ / 01

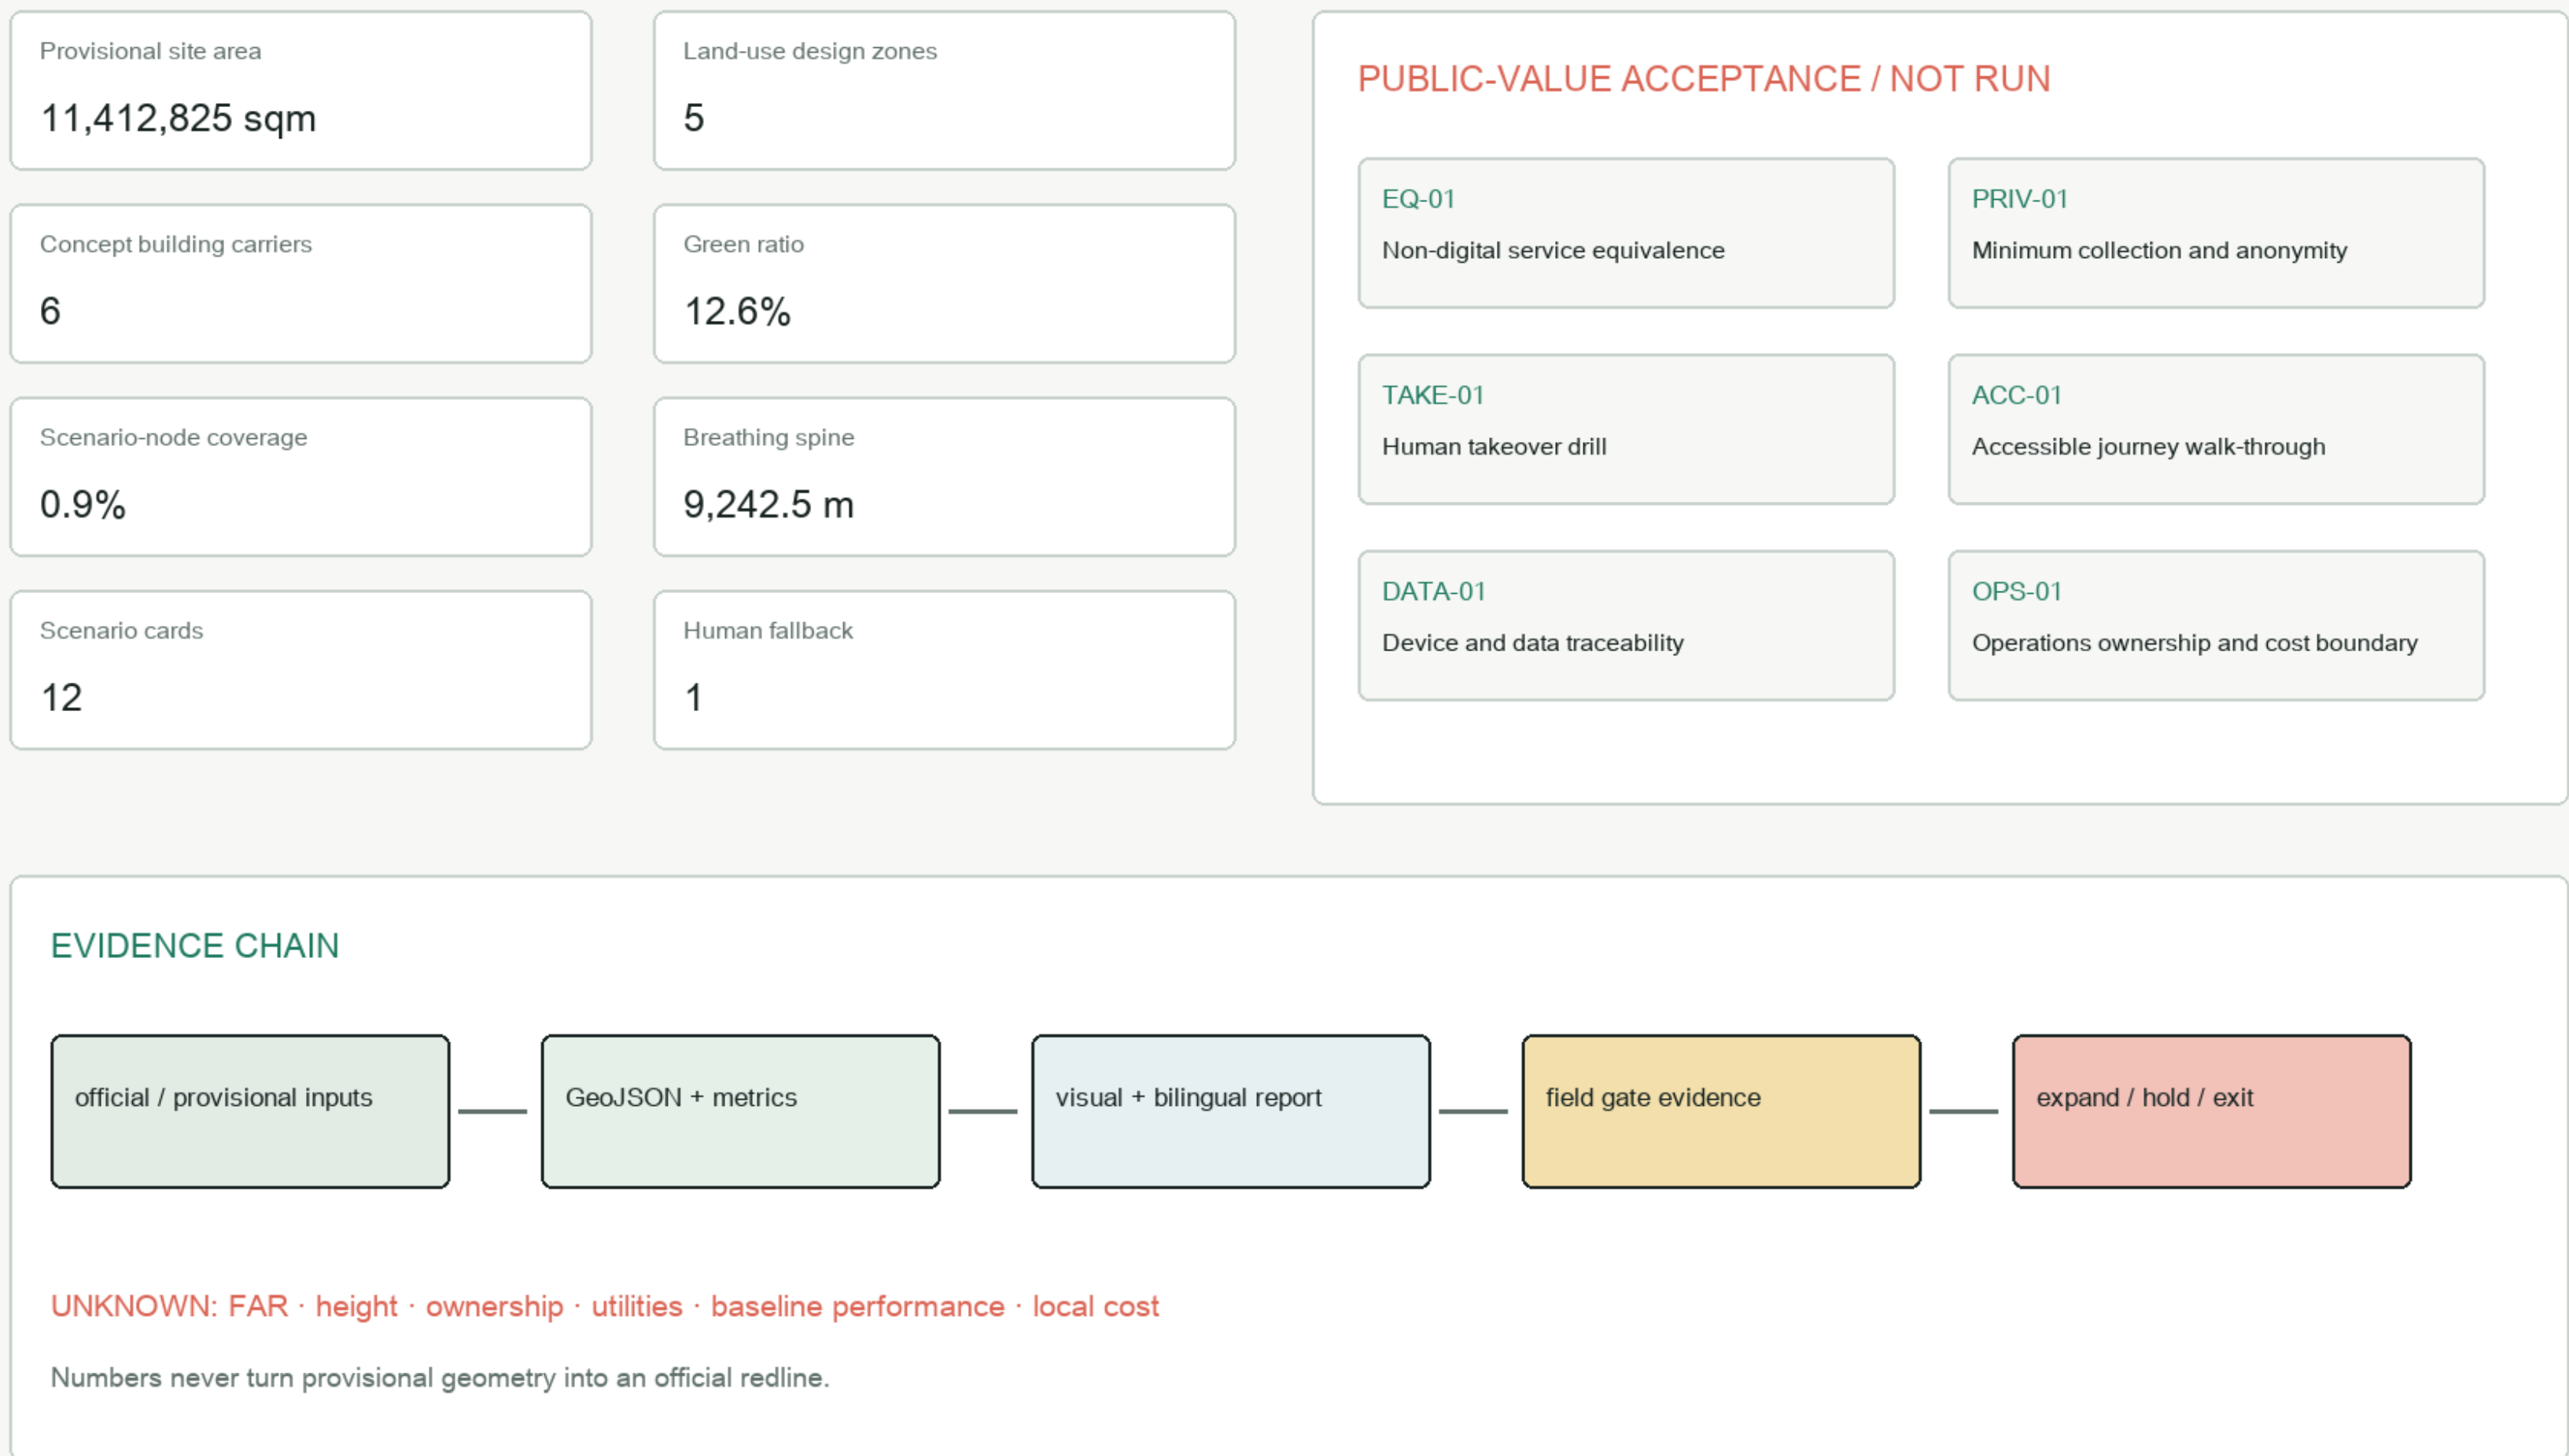

MEASURE → REVIEW → PUBLISH / HOLD / EXIT

One stop protocol; provisional polygons never become approval claims.

Metrics, Six Acceptance Gates, and Recalculation

Spatial values come from layers; all gates are not run and field performance stays unknown

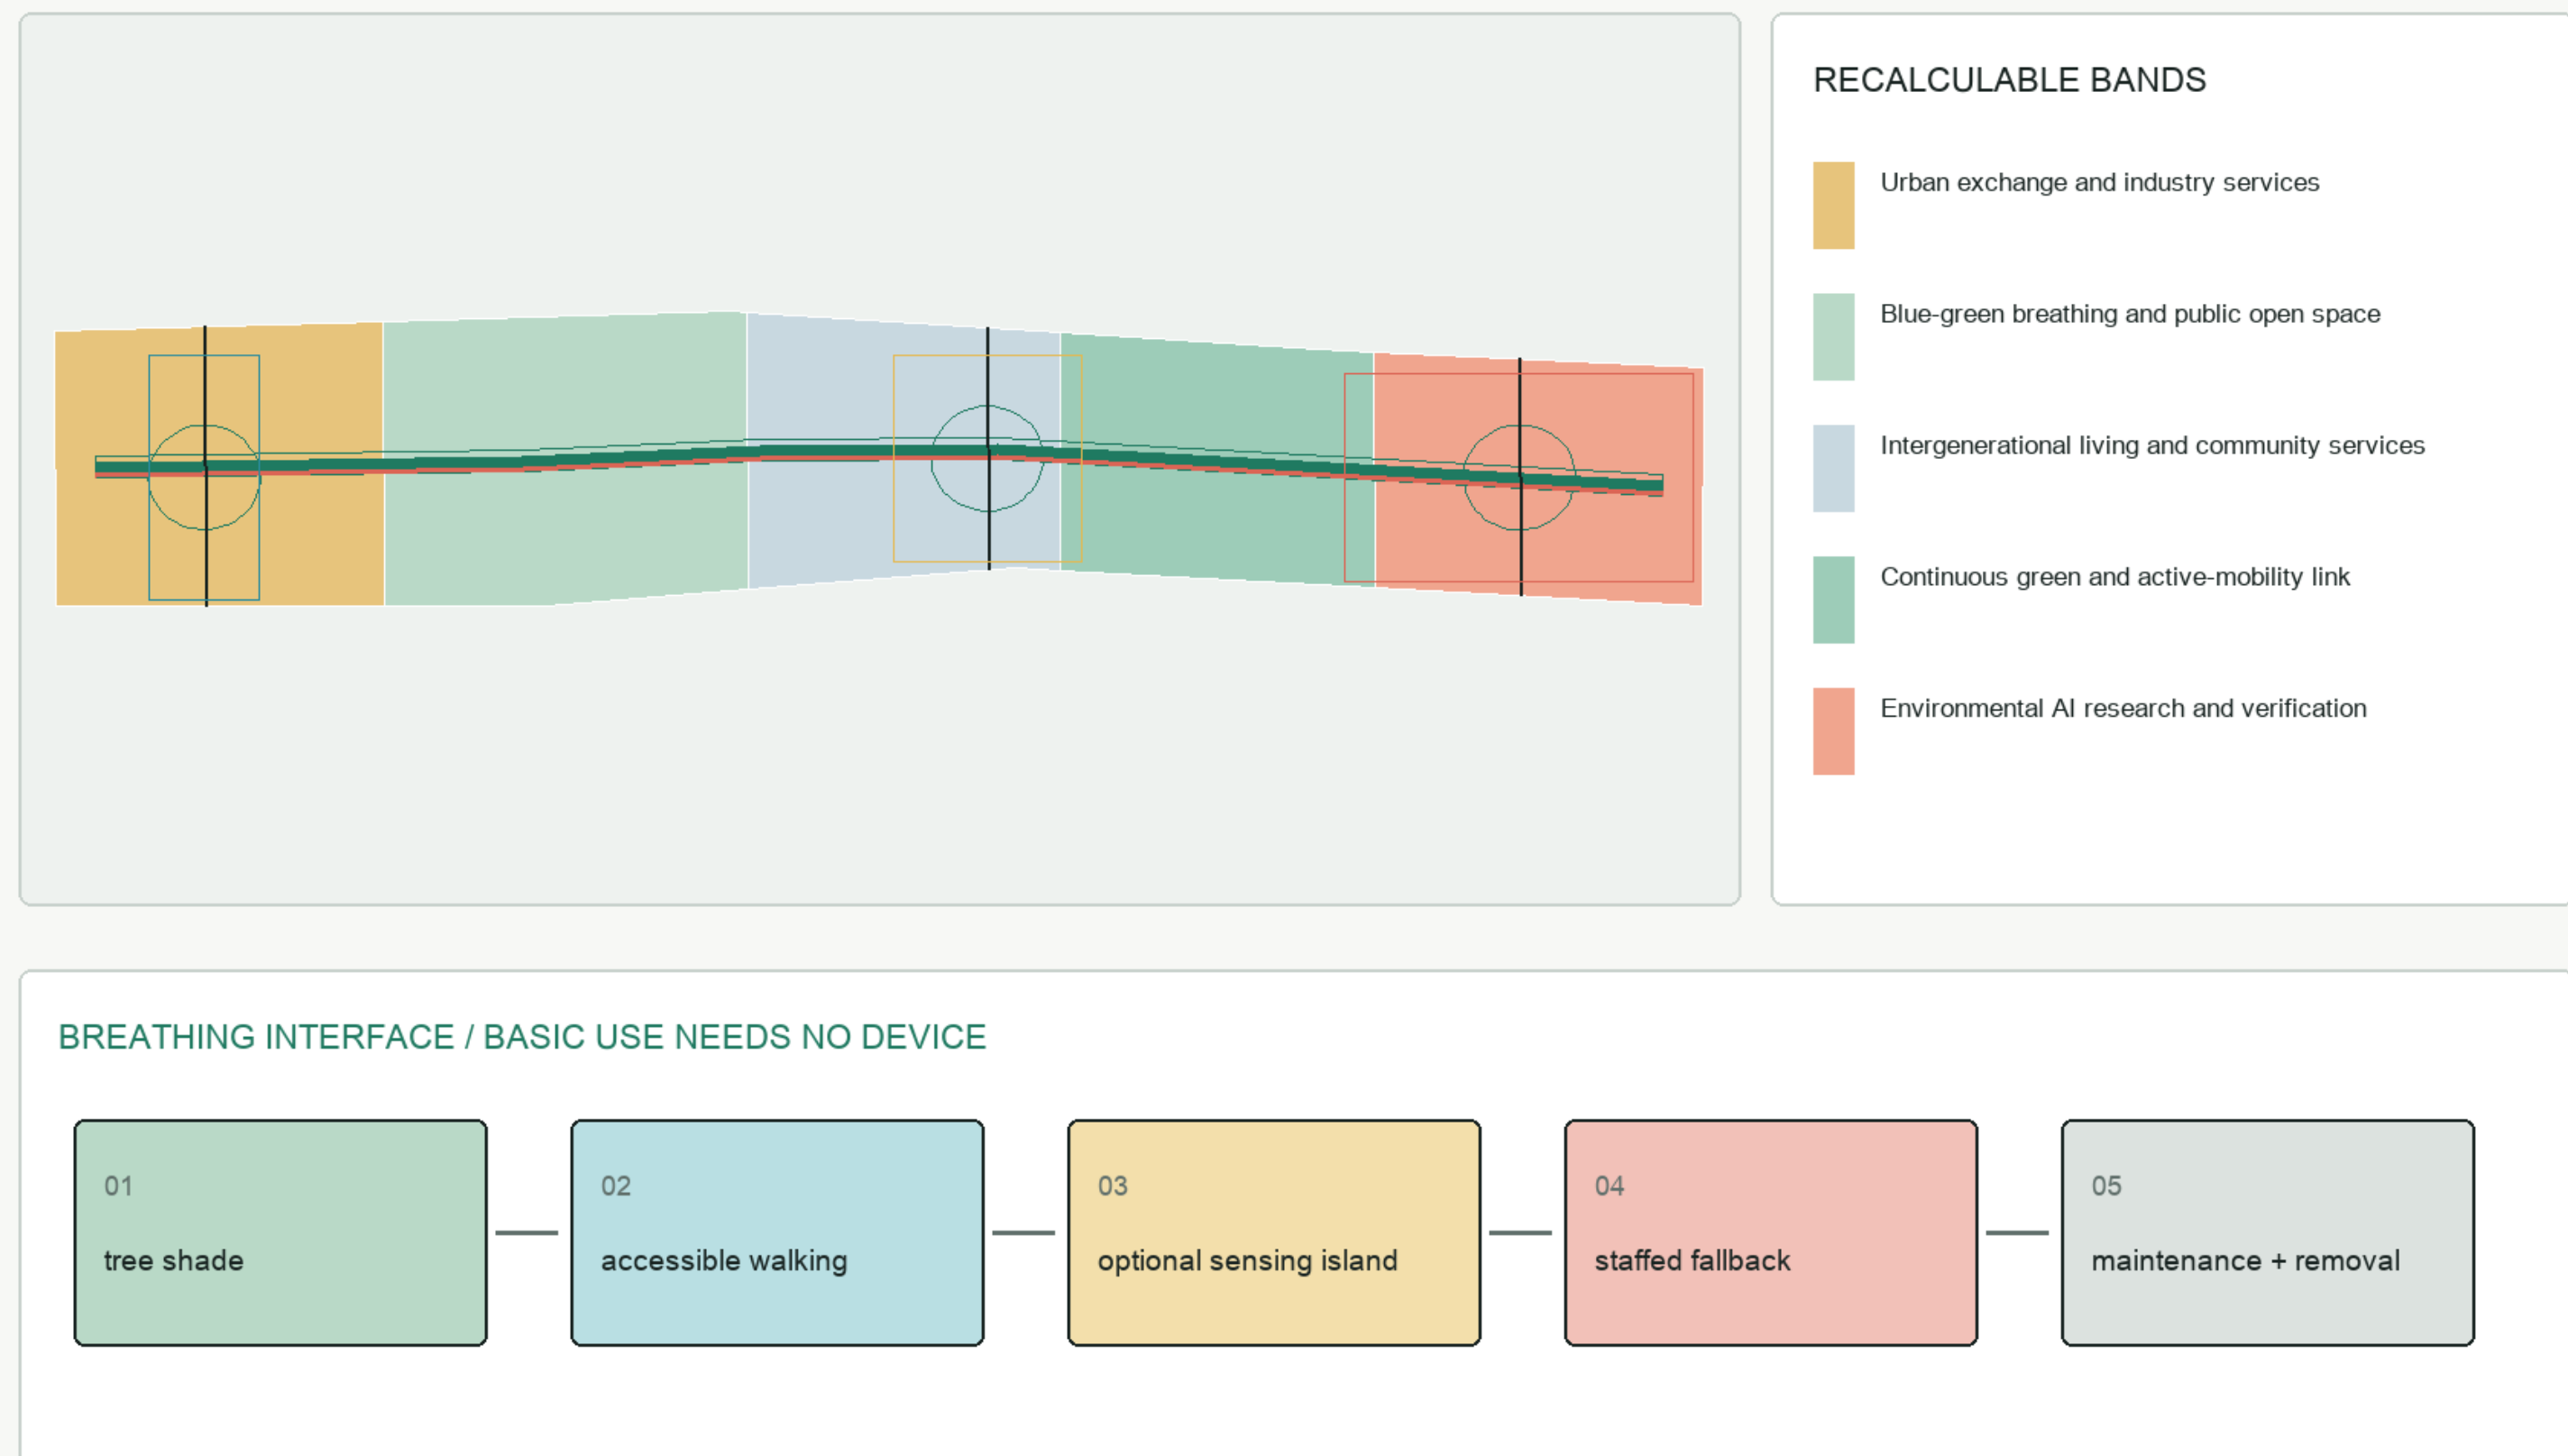

JZ / 01

Land-use Structure and Public Interface

Recalculable bands; shade, access, staff, and removable devices come first

JZ / 01

Mobility, Blue-Green, and Human Fallback

One spatial source supports 12 discrete nodes; collection is not continuous between them

JZ / 01
