

A CIVIC INTERFACE FOR URBAN AI

Make benefits, costs, responsibility and exit conditions visible in real space.

THE PROBLEM

Urban AI is usually invisible. Observable Jing-Zhang replaces trust-by-default with four public ledgers and a staffed human fallback.

CITY FIRST, AI SECOND

Repair walking and cycling, connect transit, then add explainable assistance. Physical signs and staffed service remain.

MOBILITY + BLUE-GREEN

先修复城市，再叠加智能 / CITY FIRST, AI SECOND

OPERATING PROTOCOL

Each scenario names a public owner, operator, duty officer and independent reviewer. No owner, no launch; no sunset, no renewal.
