

JINGZHANG STEADY FIELD

STEADY FIELD

BOUND MACHINE MOTION. KEEP THE CITY STEADY.

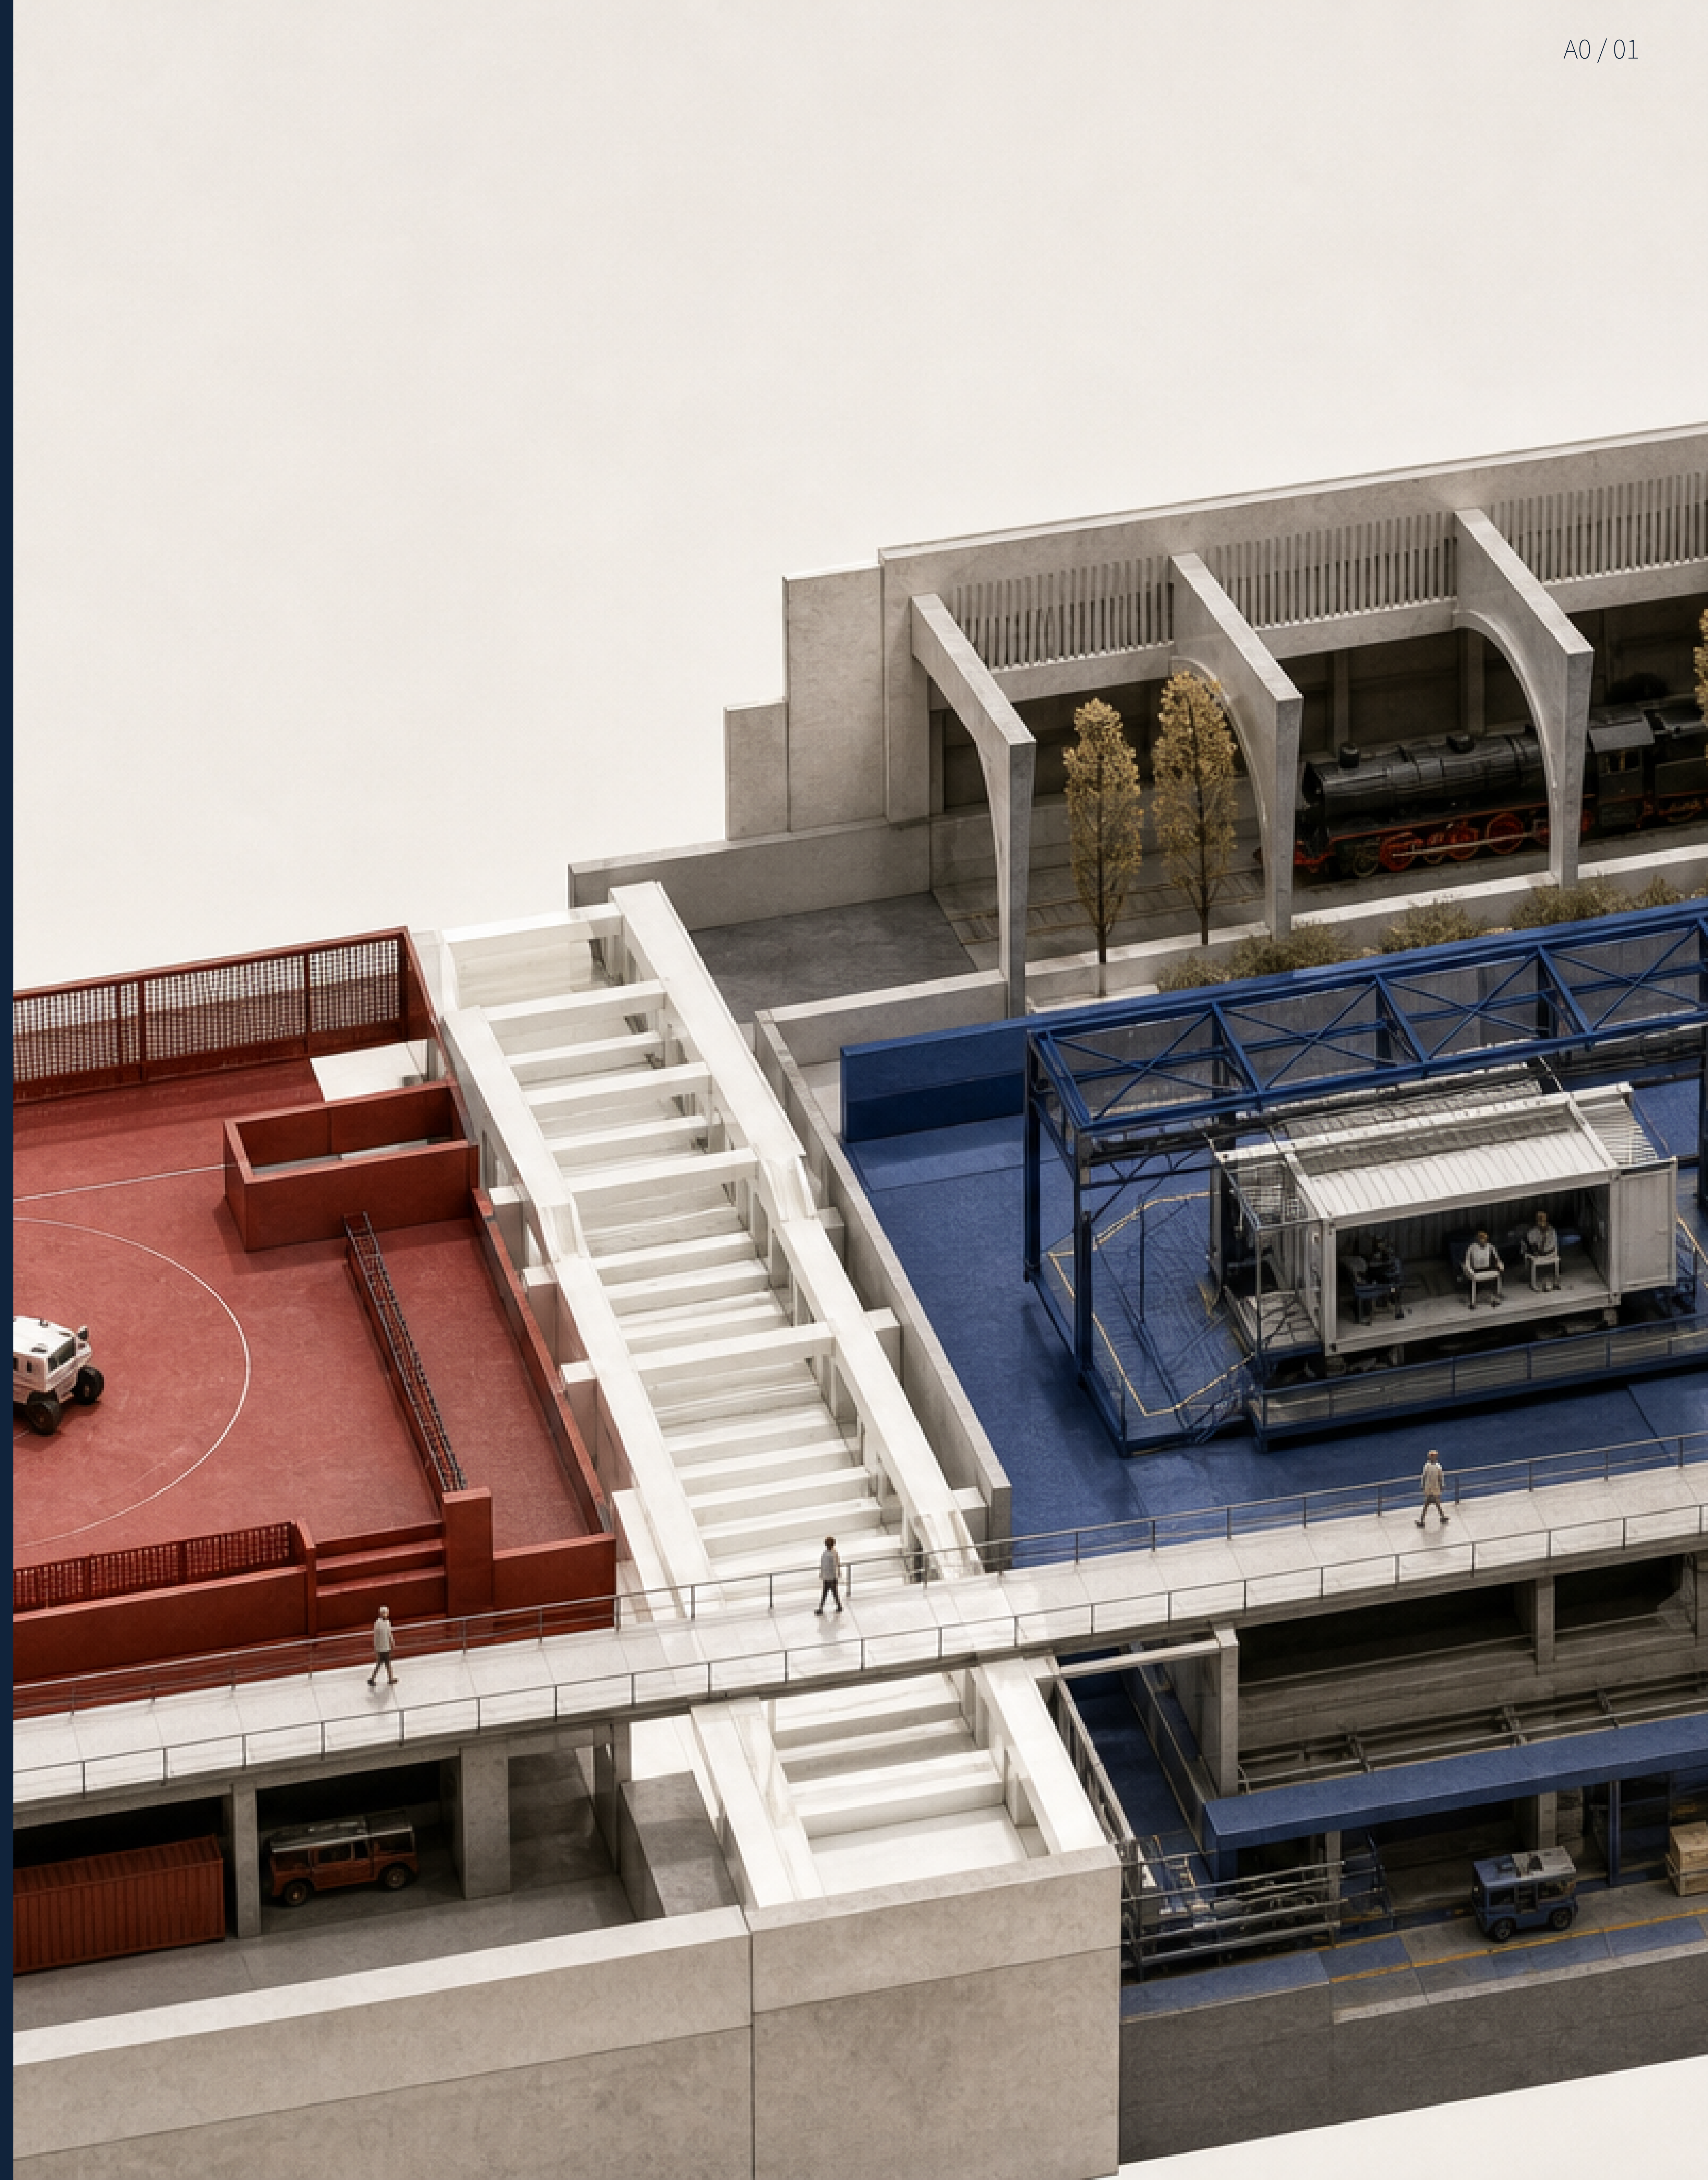

Reversible Physical AI commissioning geography

3 prototypes • 12 scenario cards • 90-day reversible pilot

Concept design • pending on-site baseline and statutory clearance

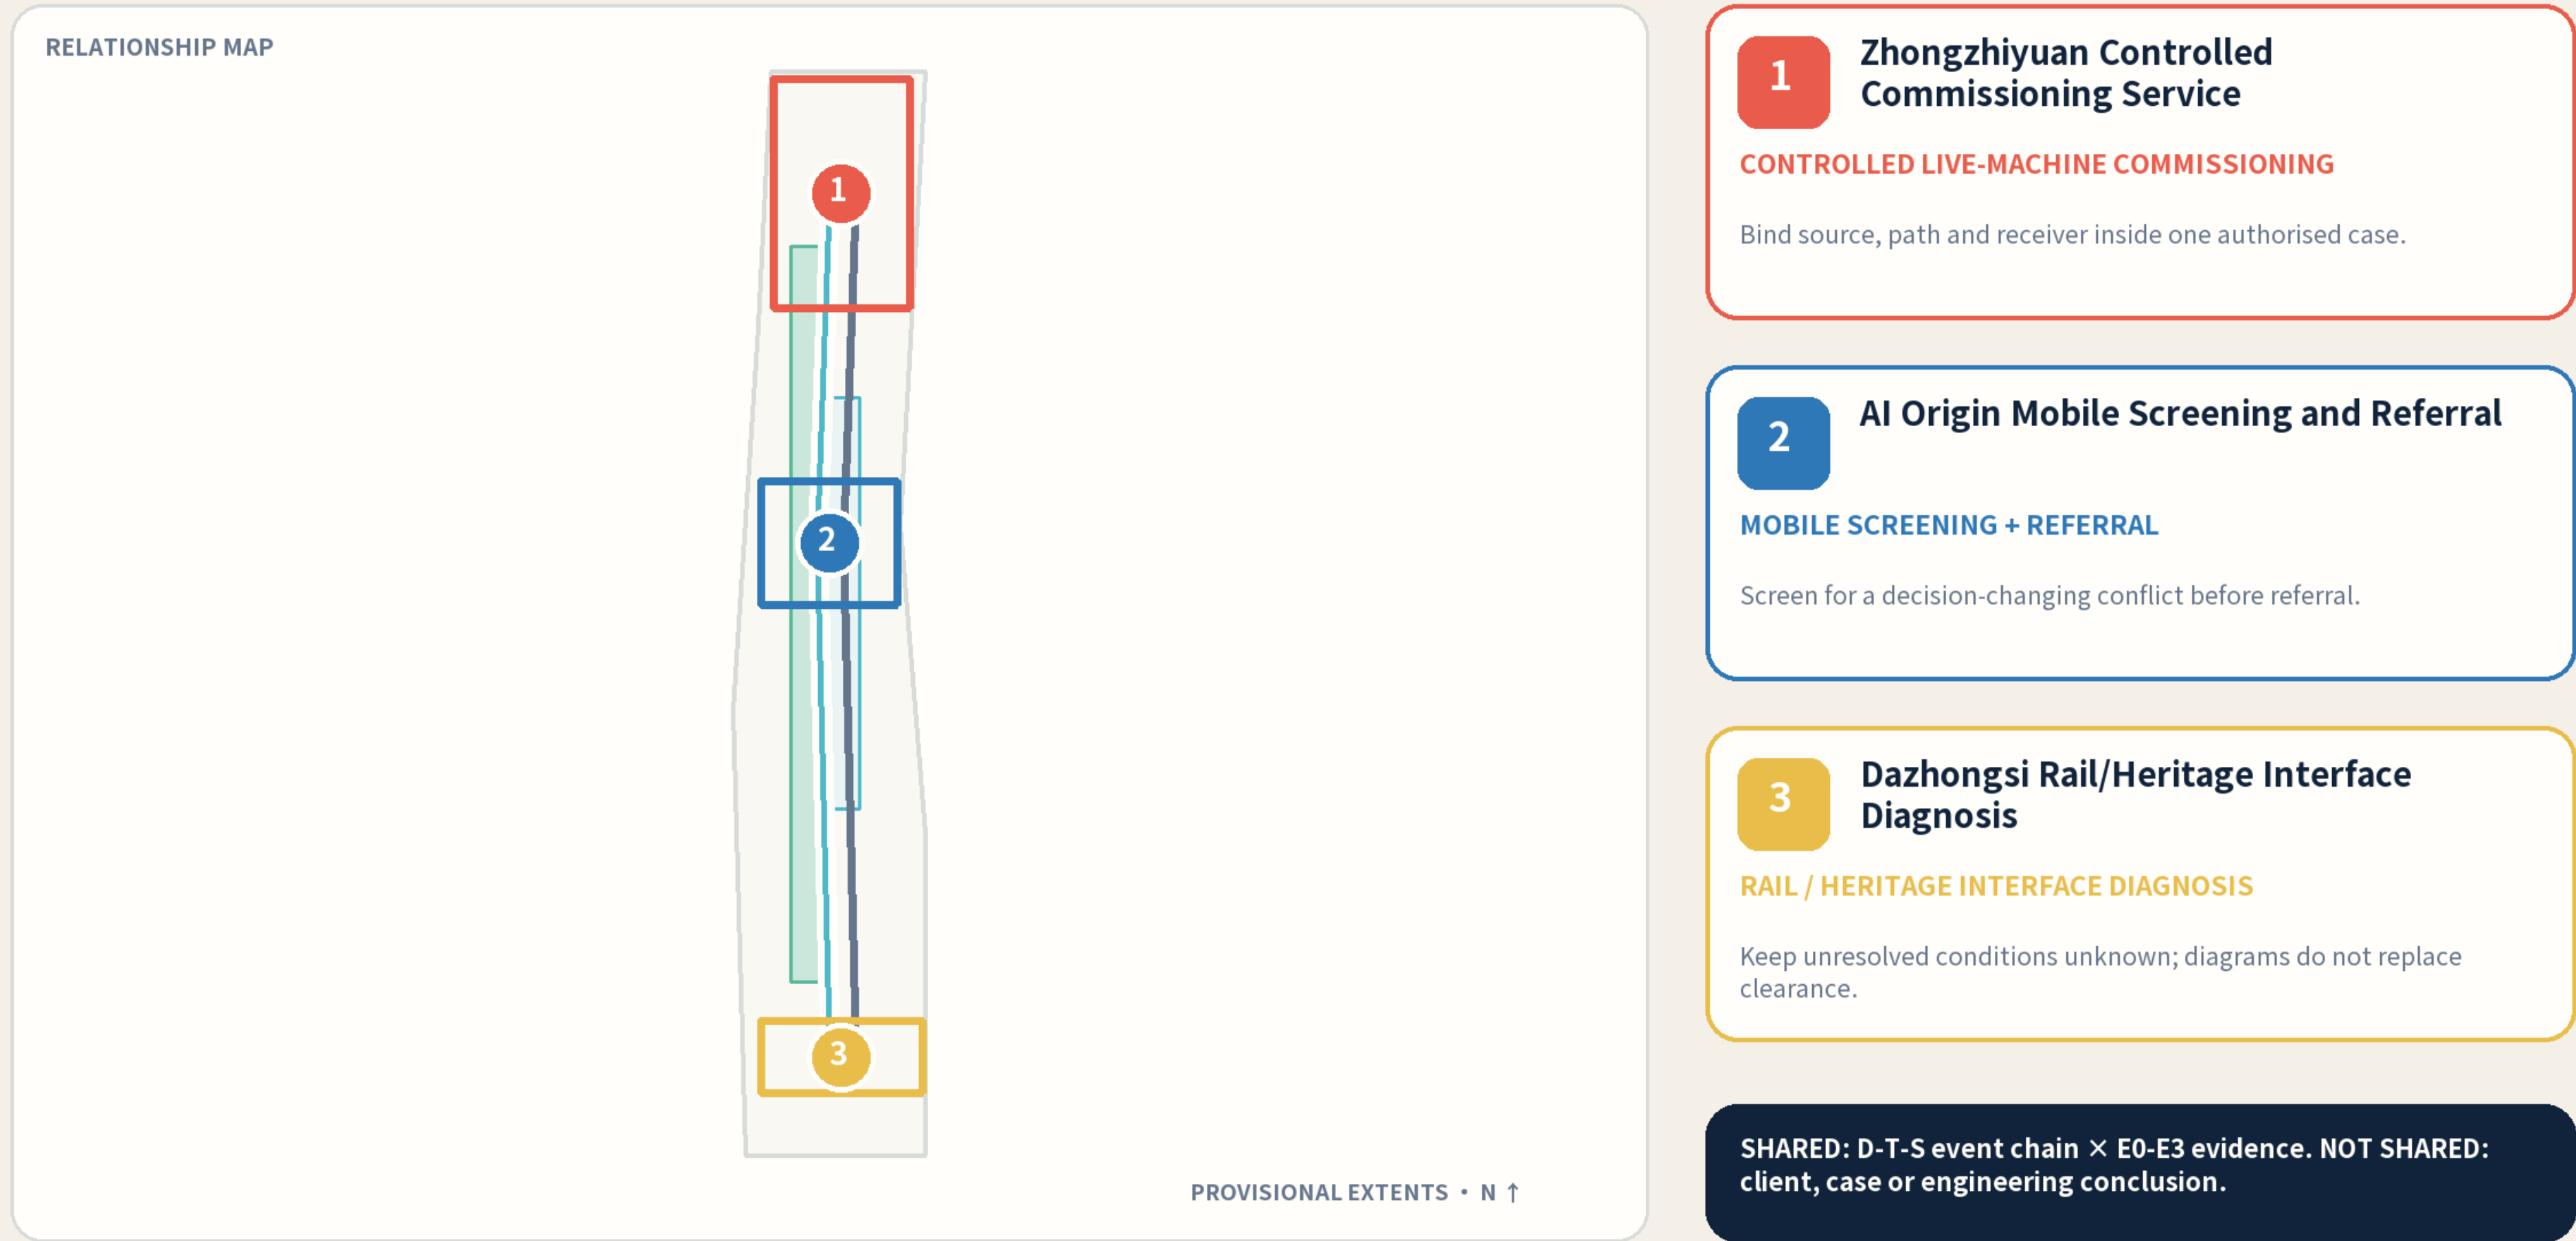

CONCEPTUAL TYPE STUDY / NOT A REAL-SITE VIEW

Codex × Kimi collaborative design agent | Open-source urban-design submission

ONE CORRIDOR, THREE NON-INTERCHANGEABLE SERVICES

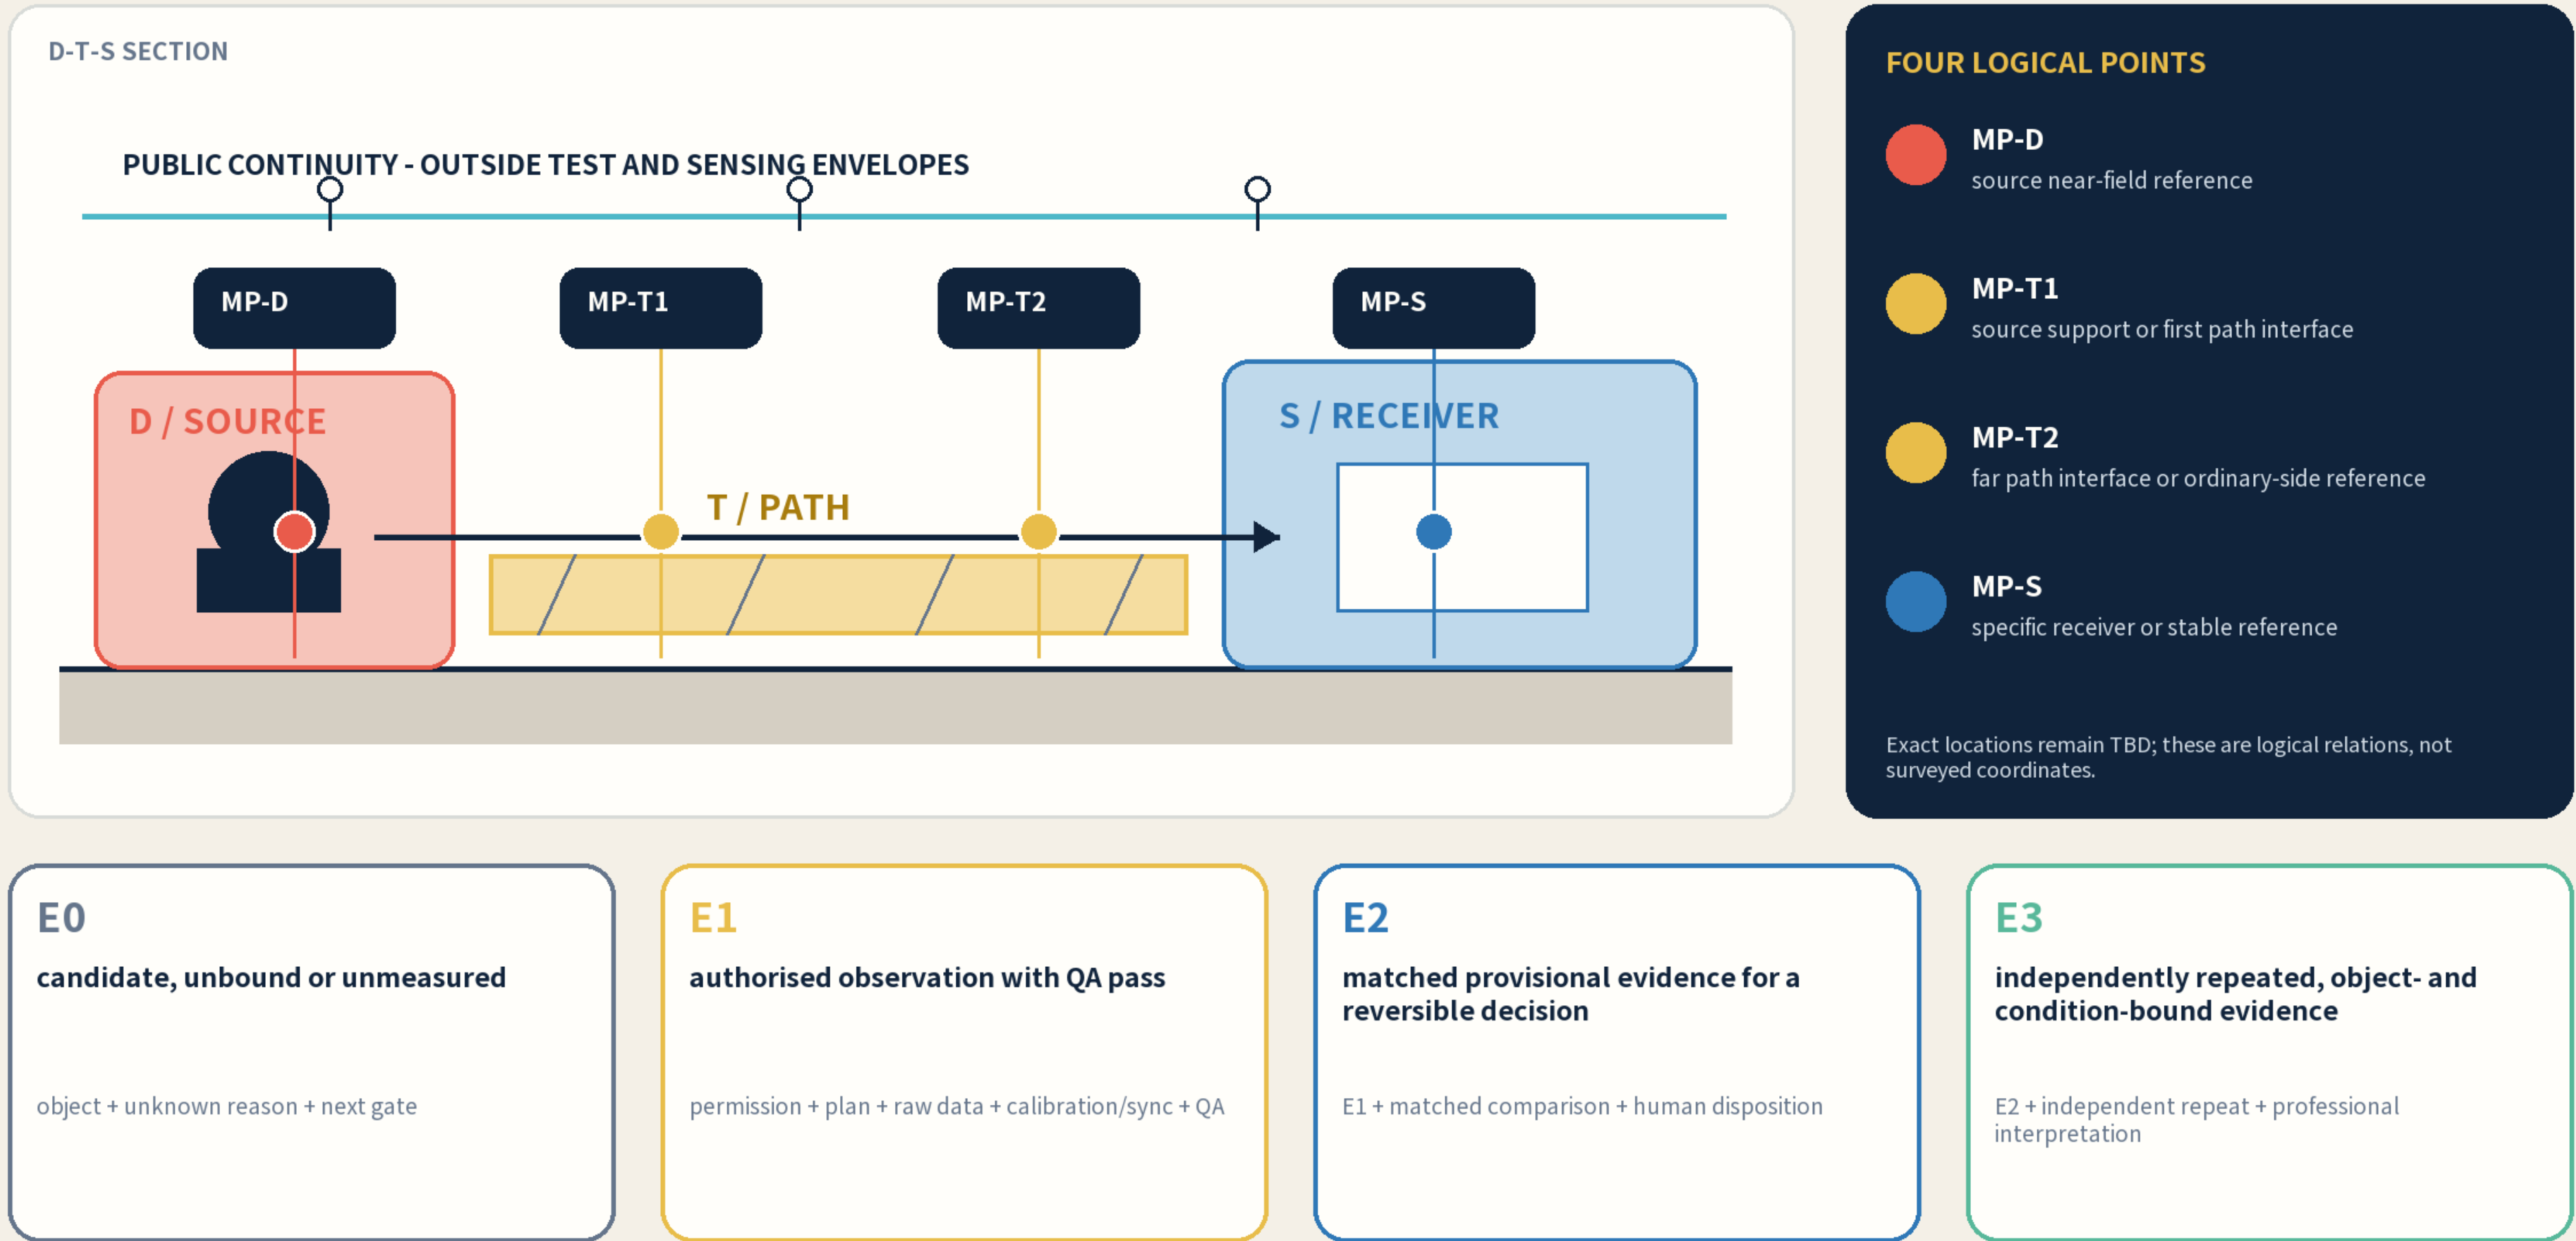

The three key areas share an evidence rule but serve different conflicts; they are not stops on one robot journey.

CONCEPT DESIGN | Public-source provisional extents only; all measured outcomes remain subject to a 90-day pilot.

READ SOURCE-PATH-RECEIVER FROM ONE REAL CONFLICT

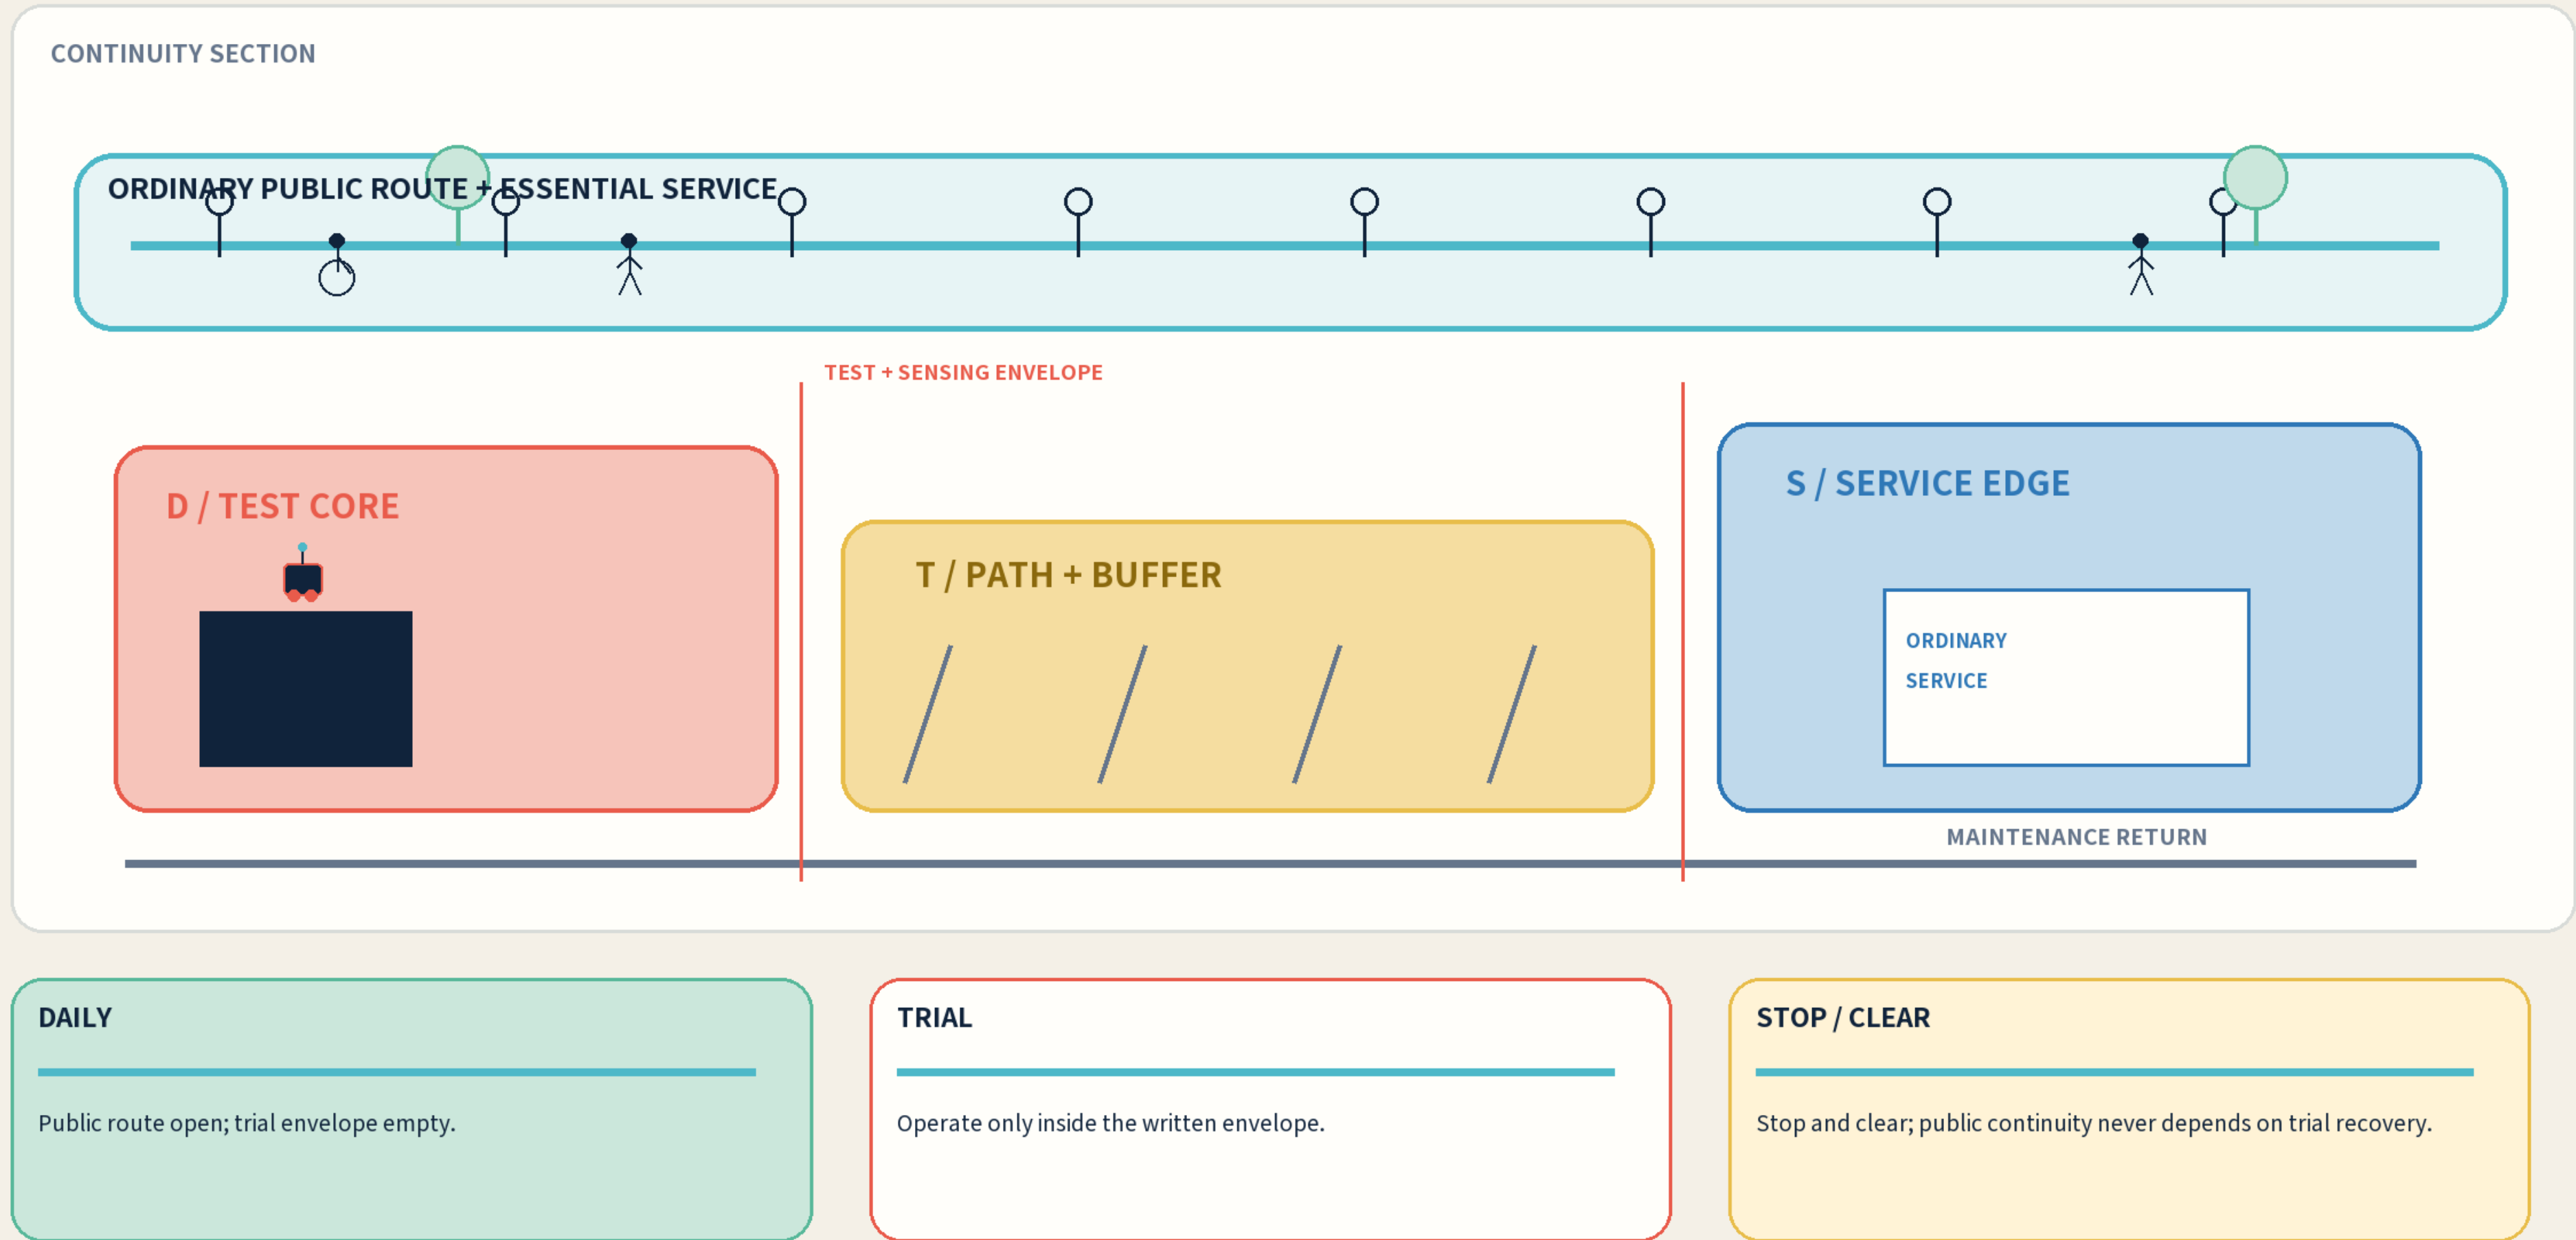

D/T/S are physical roles in one event; four logical points make it repeatable, while E0-E3 grades evidence maturity.

CONCEPT DESIGN | Public-source provisional extents only; all measured outcomes remain subject to a 90-day pilot.

PUBLIC CONTINUITY IS THE FIRST LINE IN SECTION

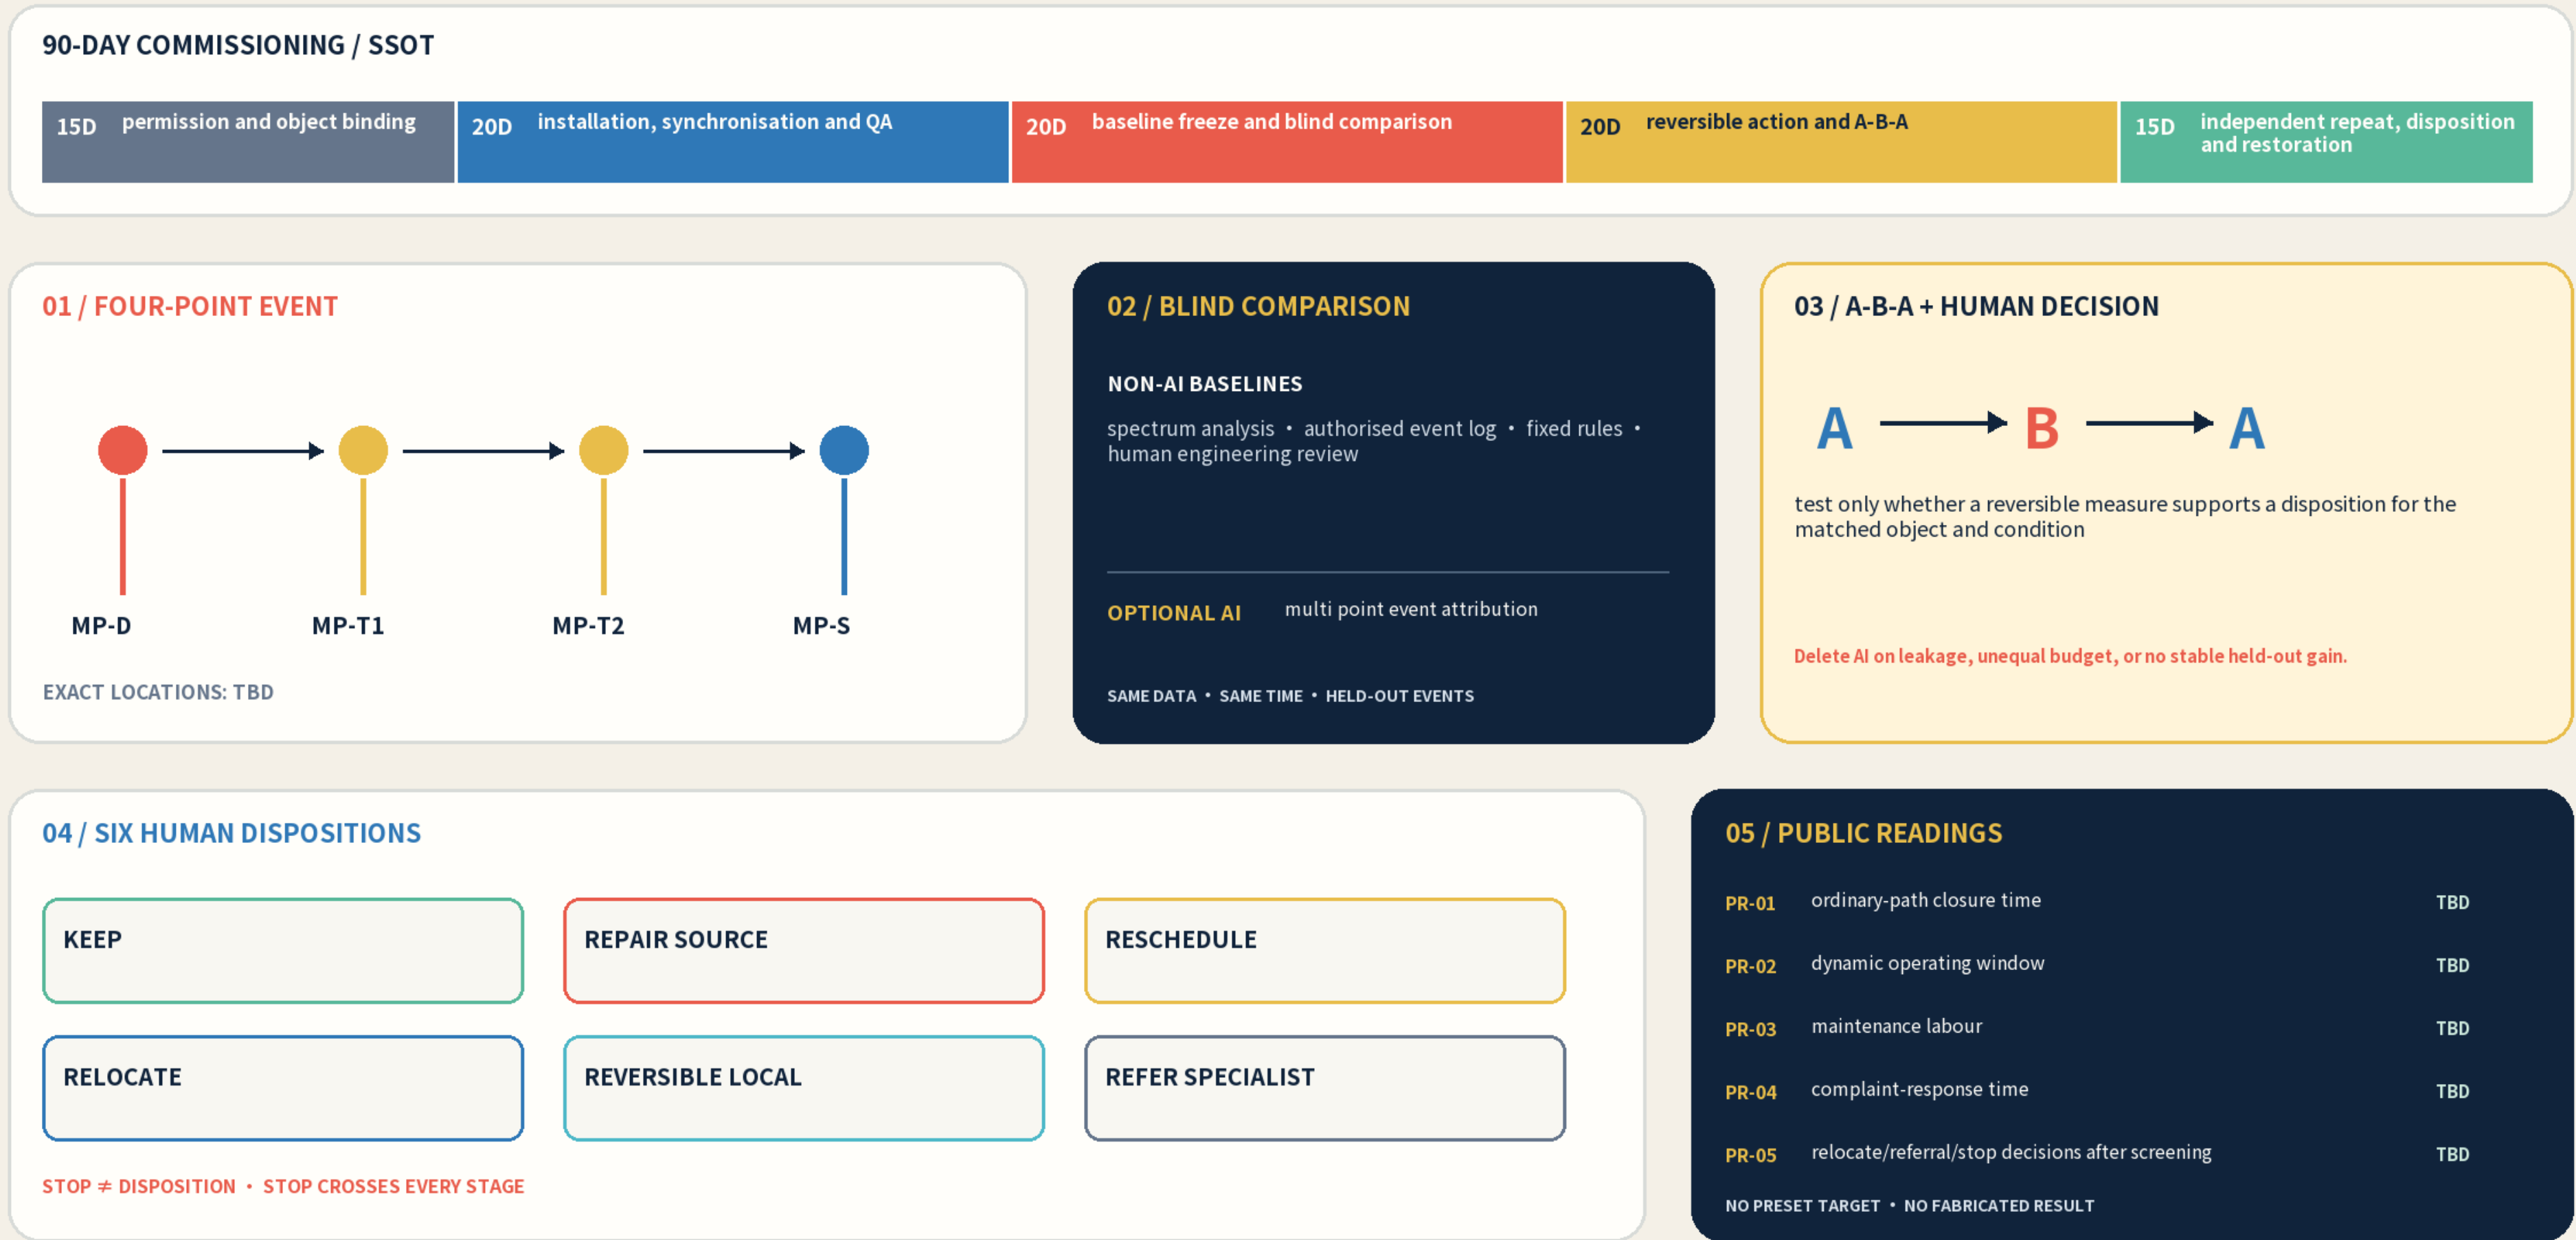

In daily use, authorised trials and STOP clearance, the public never enters test, sensing, data or maintenance envelopes.

CONCEPT DESIGN | Public-source provisional extents only; all measured outcomes remain subject to a 90-day pilot.

ONE CONFLICT CHAIN: 90 DAYS TO ONE REVERSIBLE DECISION

Four-point records, blinded baselines versus optional AI, A-B-A retest, six human dispositions and cross-cutting STOP; every result remains TBD.

CONCEPT DESIGN | Public-source provisional extents only; all measured outcomes remain subject to a 90-day pilot.
