

JINGZHANG STEADY FIELD

STEADY FIELD

BOUND MACHINE MOTION. KEEP THE CITY STEADY.

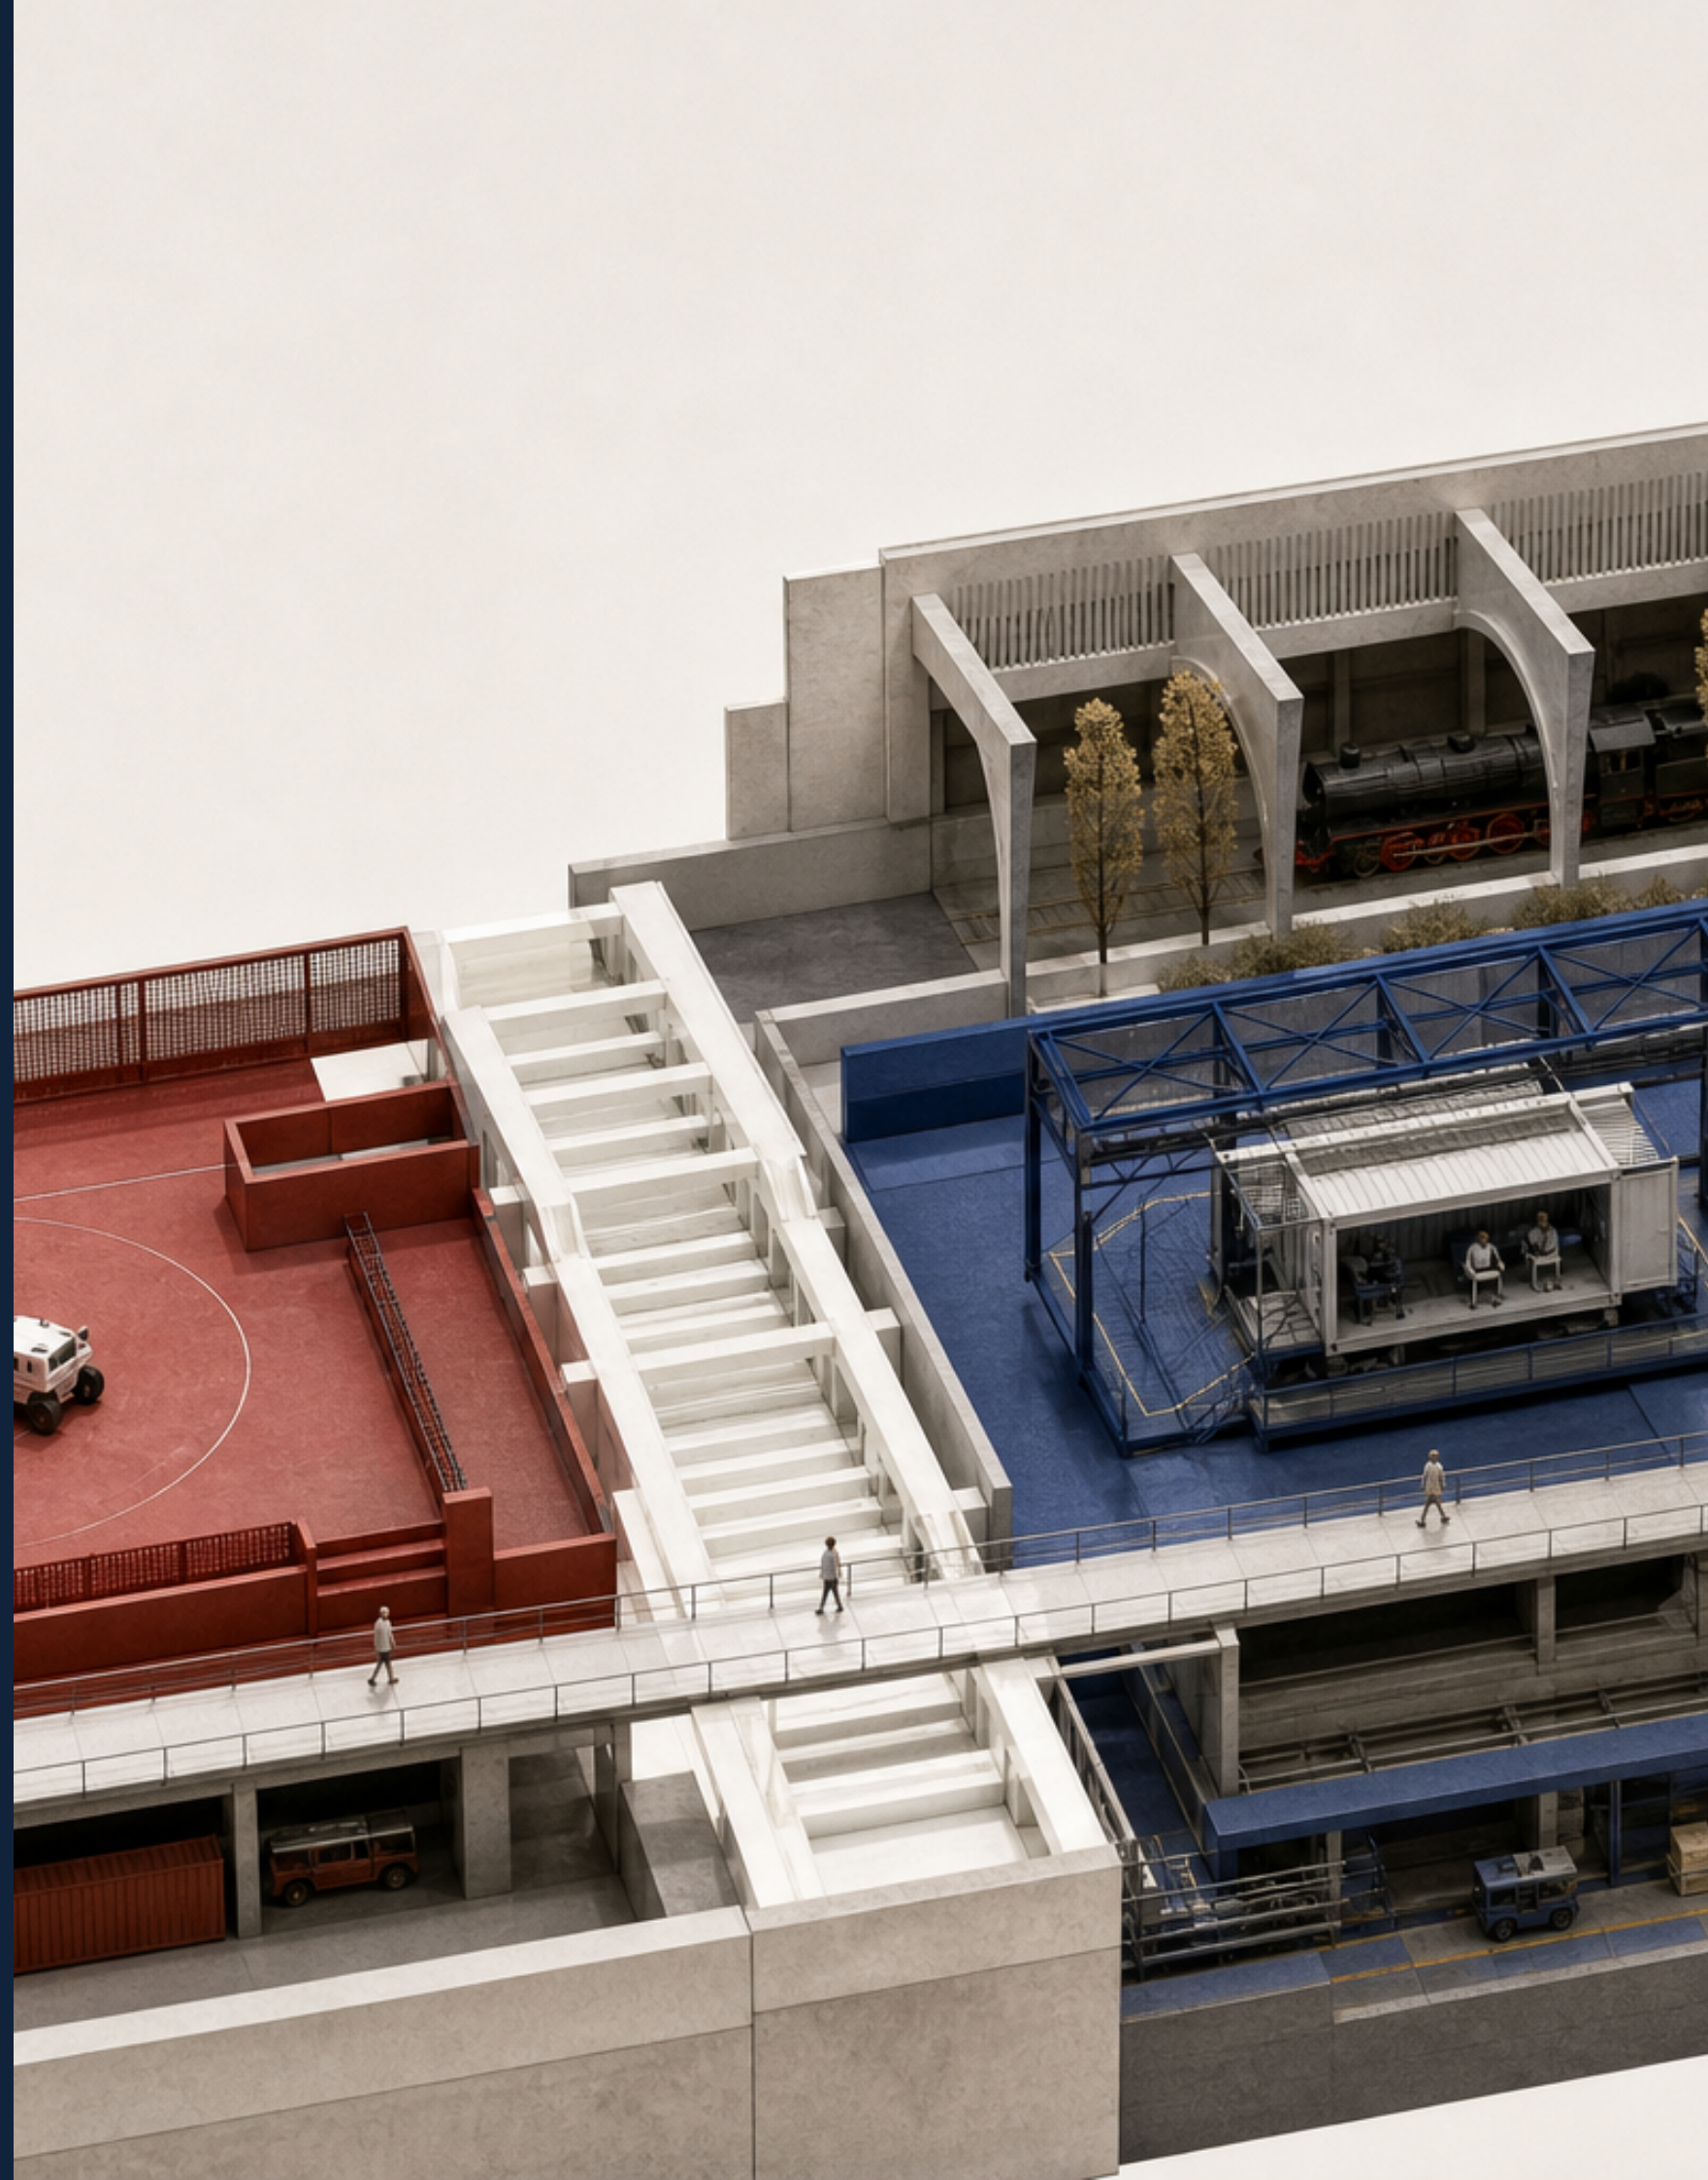

Reversible Physical AI commissioning geography

3 prototypes • 12 scenario cards • 90-day reversible pilot

Concept design • pending on-site baseline and statutory clearance

CONCEPTUAL TYPE STUDY / NOT A REAL-SITE VIEW

Codex × Kimi collaborative design agent | Open-source urban-design submission

THREE SERVICE PROTOTYPES: PLAN, SECTION, DAILY-TRIAL-EXIT

Each prototype shows ordinary use, bounded trial operation and recovery after exit; the three areas do not copy one component.

01

Zhongzhiyuan Controlled Commissioning Service

CONTROLLED COMMISSIONING COURT

PLAN

SECTION

OPERATING STATES

DAILY

PUBLIC ROUTE OPEN

TRIAL

RUN INSIDE AUTHORISED ENVELOPE

EXIT

REMOVE, CLEAR, RESTORE

CONCEPTUAL TYPE • EXACT SITE TBD

02

AI Origin Mobile Screening and Referral Service

MOBILE SCREENING CLINIC

PLAN

SECTION

OPERATING STATES

DAILY

PUBLIC ROUTE OPEN

TRIAL

RUN INSIDE AUTHORISED ENVELOPE

EXIT

REMOVE, CLEAR, RESTORE

CONCEPTUAL TYPE • EXACT SITE TBD

03

Dazhongsi Rail/Heritage Interface Diagnosis

MOTION-STABILITY INTERFACE

PLAN

SECTION

OPERATING STATES

DAILY

PUBLIC ROUTE OPEN

TRIAL

RUN INSIDE AUTHORISED ENVELOPE

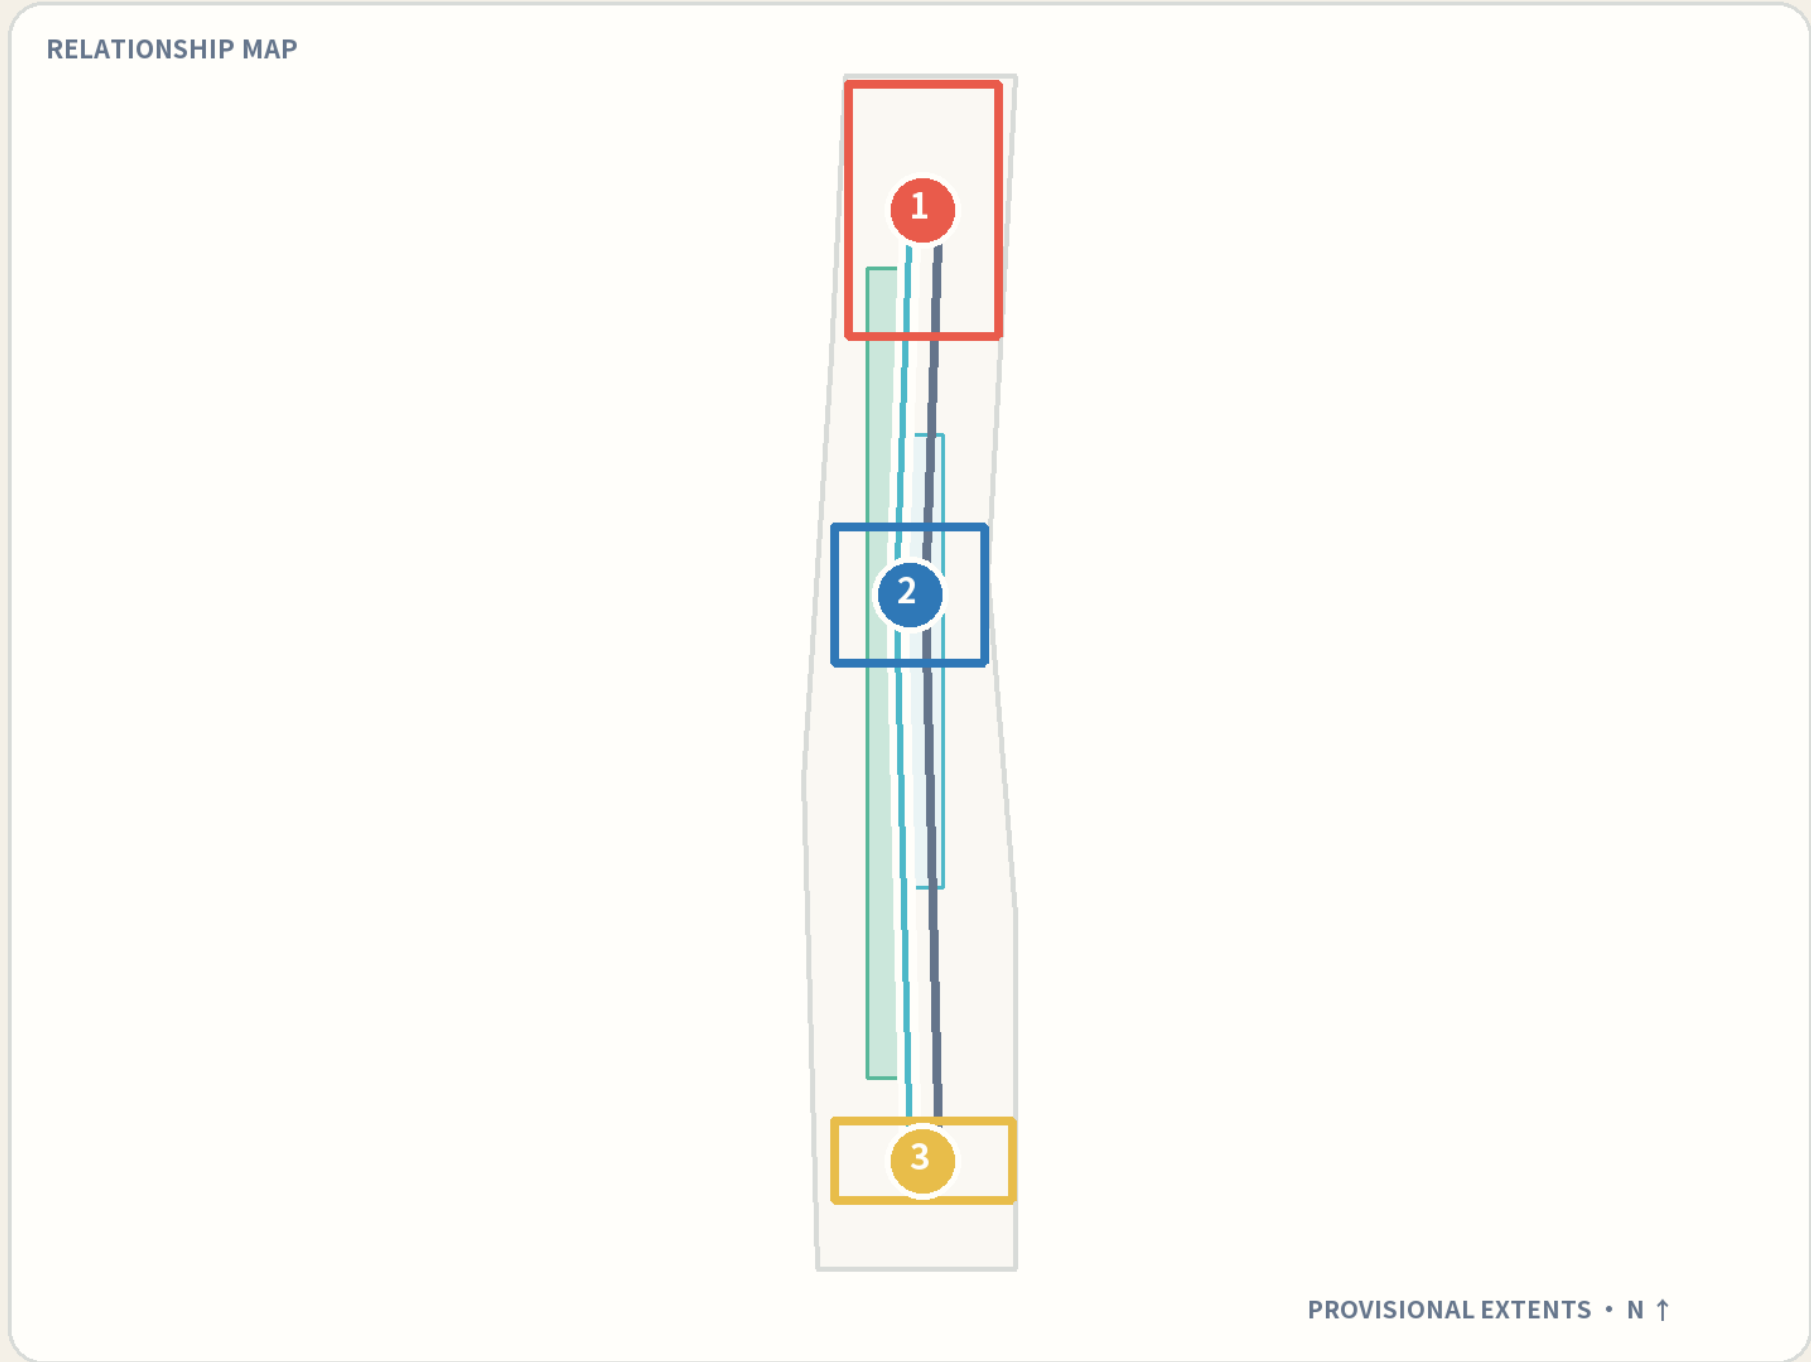

EXIT

REMOVE, CLEAR, RESTORE

CONCEPTUAL TYPE • EXACT SITE TBD

ONE CORRIDOR, THREE NON-INTERCHANGEABLE SERVICES

The three key areas share an evidence rule but serve different conflicts; they are not stops on one robot journey.

1

Zhongzhiyuan Controlled Commissioning Service

CONTROLLED LIVE-MACHINE COMMISSIONING

Bind source, path and receiver inside one authorised case.

2

AI Origin Mobile Screening and Referral

MOBILE SCREENING + REFERRAL

Screen for a decision-changing conflict before referral.

3

Dazhongsi Rail/Heritage Interface Diagnosis

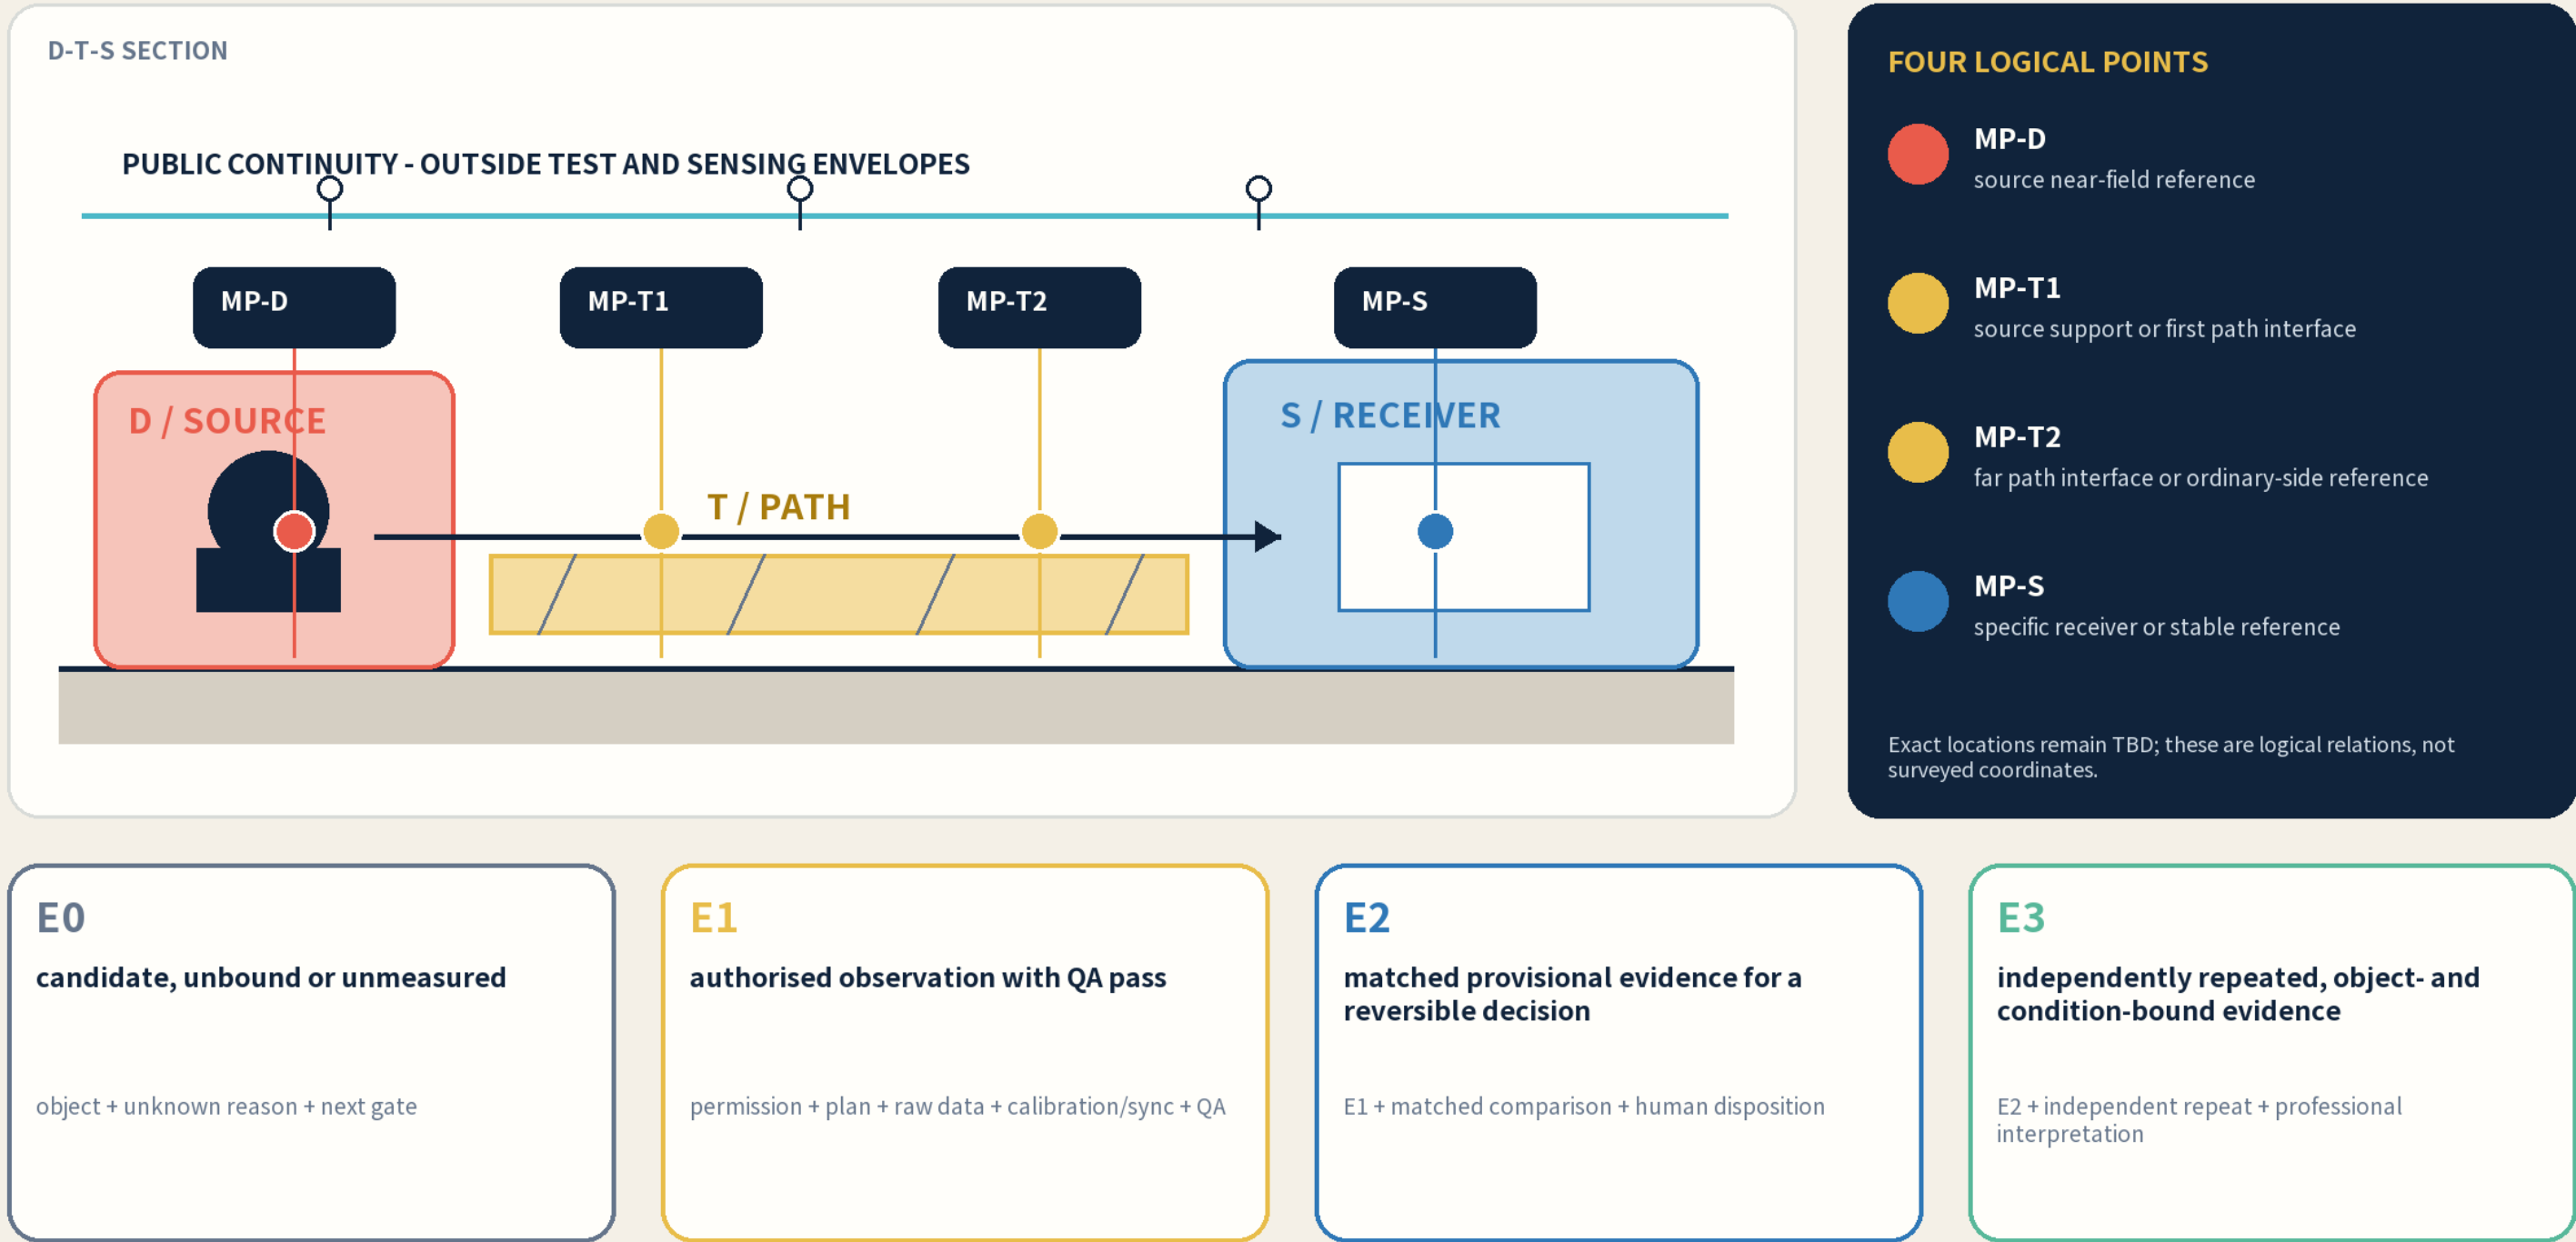

RAIL / HERITAGE INTERFACE DIAGNOSIS

Keep unresolved conditions unknown; diagrams do not replace clearance.

SHARED: D-T-S event chain × E0-E3 evidence. NOT SHARED: client, case or engineering conclusion.

READ SOURCE-PATH-RECEIVER FROM ONE REAL CONFLICT

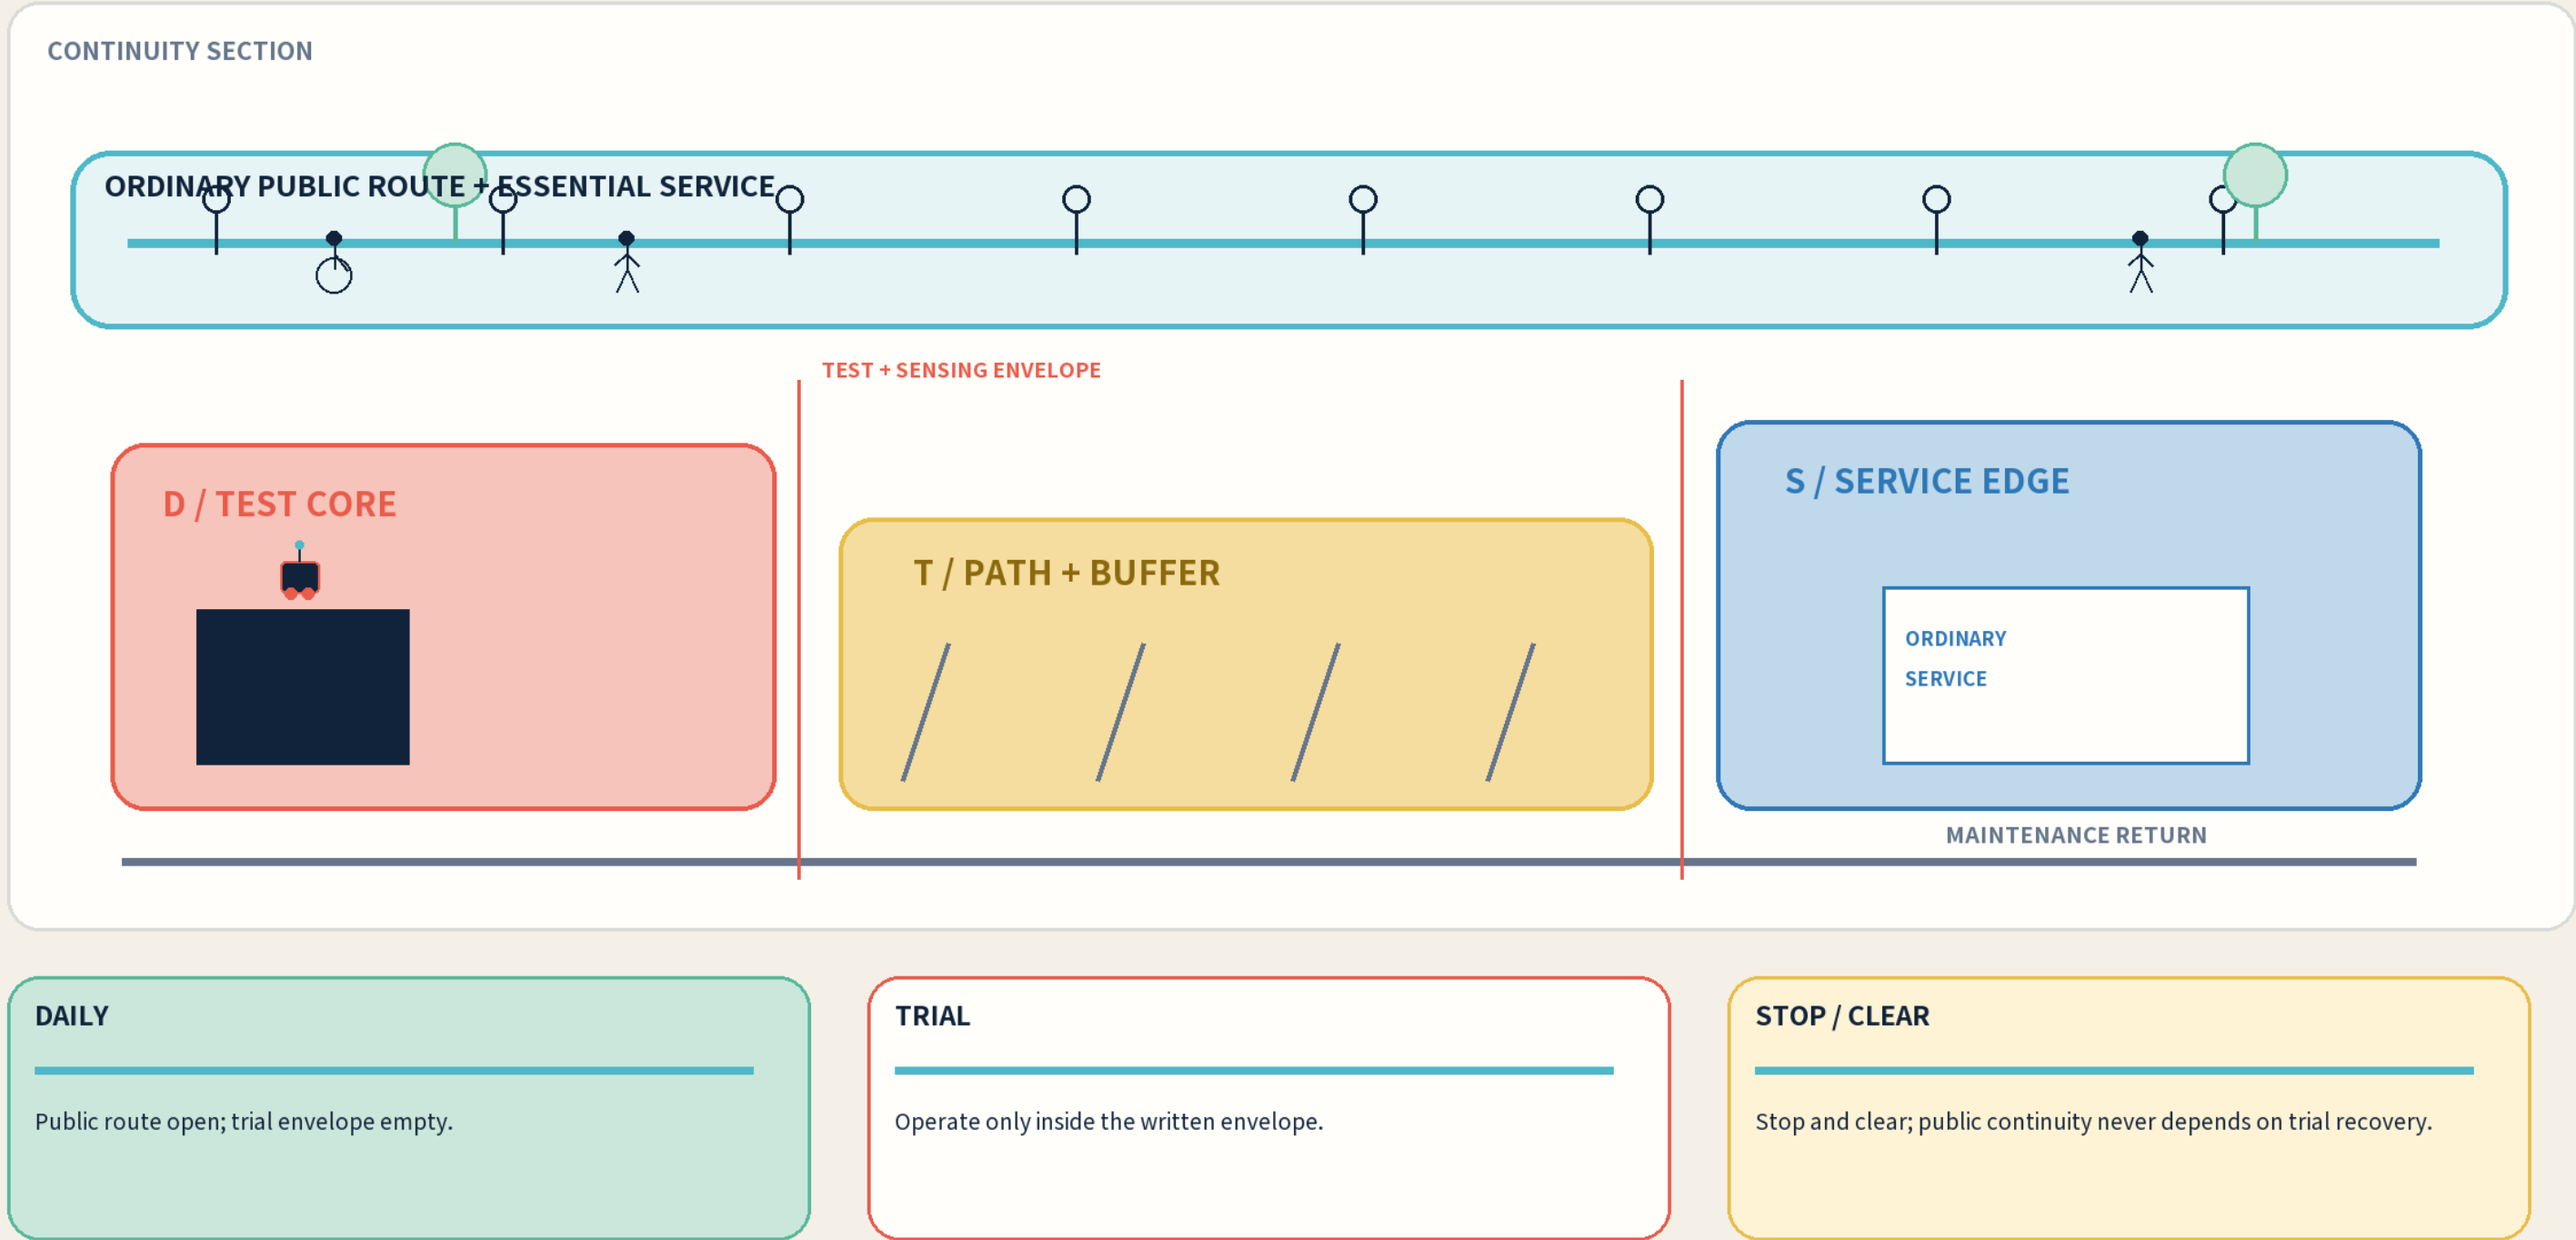

D/T/S are physical roles in one event; four logical points make it repeatable, while E0-E3 grades evidence maturity.

U = unresolved evidence overlay, never a fourth permanent land-use zone.

PUBLIC CONTINUITY IS THE FIRST LINE IN SECTION

In daily use, authorised trials and STOP clearance, the public never enters test, sensing, data or maintenance envelopes.

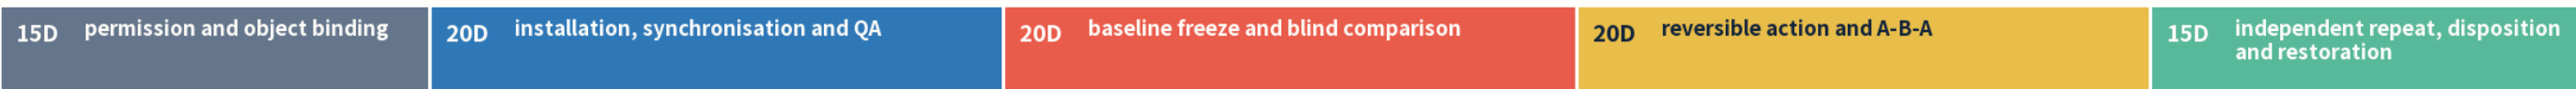

SSOT STOP: immediate site stop

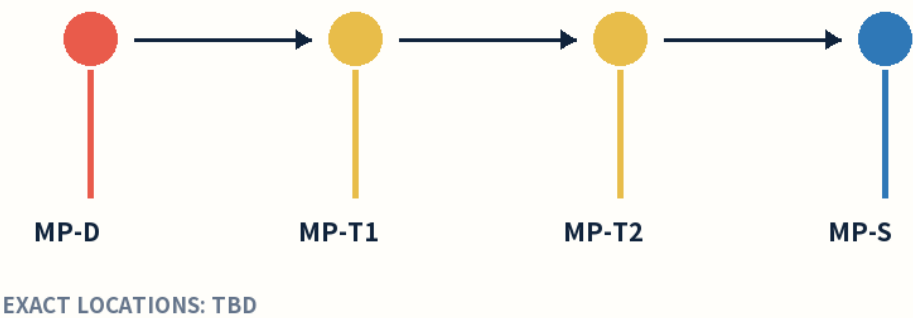

ONE CONFLICT CHAIN: 90 DAYS TO ONE REVERSIBLE DECISION

Four-point records, blinded baselines versus optional AI, A-B-A retest, six human dispositions and cross-cutting STOP; every result remains TBD.

90-DAY COMMISSIONING / SSOT

01 / FOUR-POINT EVENT

02 / BLIND COMPARISON

NON-AI BASELINES

spectrum analysis • authorised event log • fixed rules • human engineering review

OPTIONAL AI

multi point event attribution

SAME DATA • SAME TIME • HELD-OUT EVENTS

03 / A-B-A + HUMAN DECISION

A

B

A

test only whether a reversible measure supports a disposition for the matched object and condition

Delete AI on leakage, unequal budget, or no stable held-out gain.

04 / SIX HUMAN DISPOSITIONS

KEEP

REPAIR SOURCE

RESCHEDULE

RELOCATE

REVERSIBLE LOCAL

REFER SPECIALIST

STOP ≠ DISPOSITION • STOP CROSSES EVERY STAGE

05 / PUBLIC READINGS

PR-01

ordinary-path closure time

TBD

PR-02

dynamic operating window

TBD

PR-03

maintenance labour

TBD

PR-04

complaint-response time

TBD

PR-05

relocate/referral/stop decisions after screening

TBD

NO PRESET TARGET • NO FABRICATED RESULT
