

A city runs on two clocks

AI updates quarterly · shade, soil and daily life take years

Experiment fast,
expansion must be reviewed slowly.

EXPERIMENT FAST · EXPAND SLOW

Fast clock: AI tests and releases quarterly

Slow clock: five slow variables gate expansion

FIVE SLOW VARIABLES

- SV-01

Canopy

8–15 yrs
- SV-02

Soil infiltration

3–5 flood seasons
- SV-03

Barrier-free access

2–3 yrs
- SV-04

Retail survival

5–10 yrs
- SV-05

Children's independent mobility

1–3 yrs

1909: a switchback carried the railway over Badaling — steel learned to turn; today, algorithms learn to wait.

43.6 km² BELT

11.41 km² SITE

368.4 ha KEY AREAS

One time spine, three workshops

N—S spine + three E—W links + two feedback wings

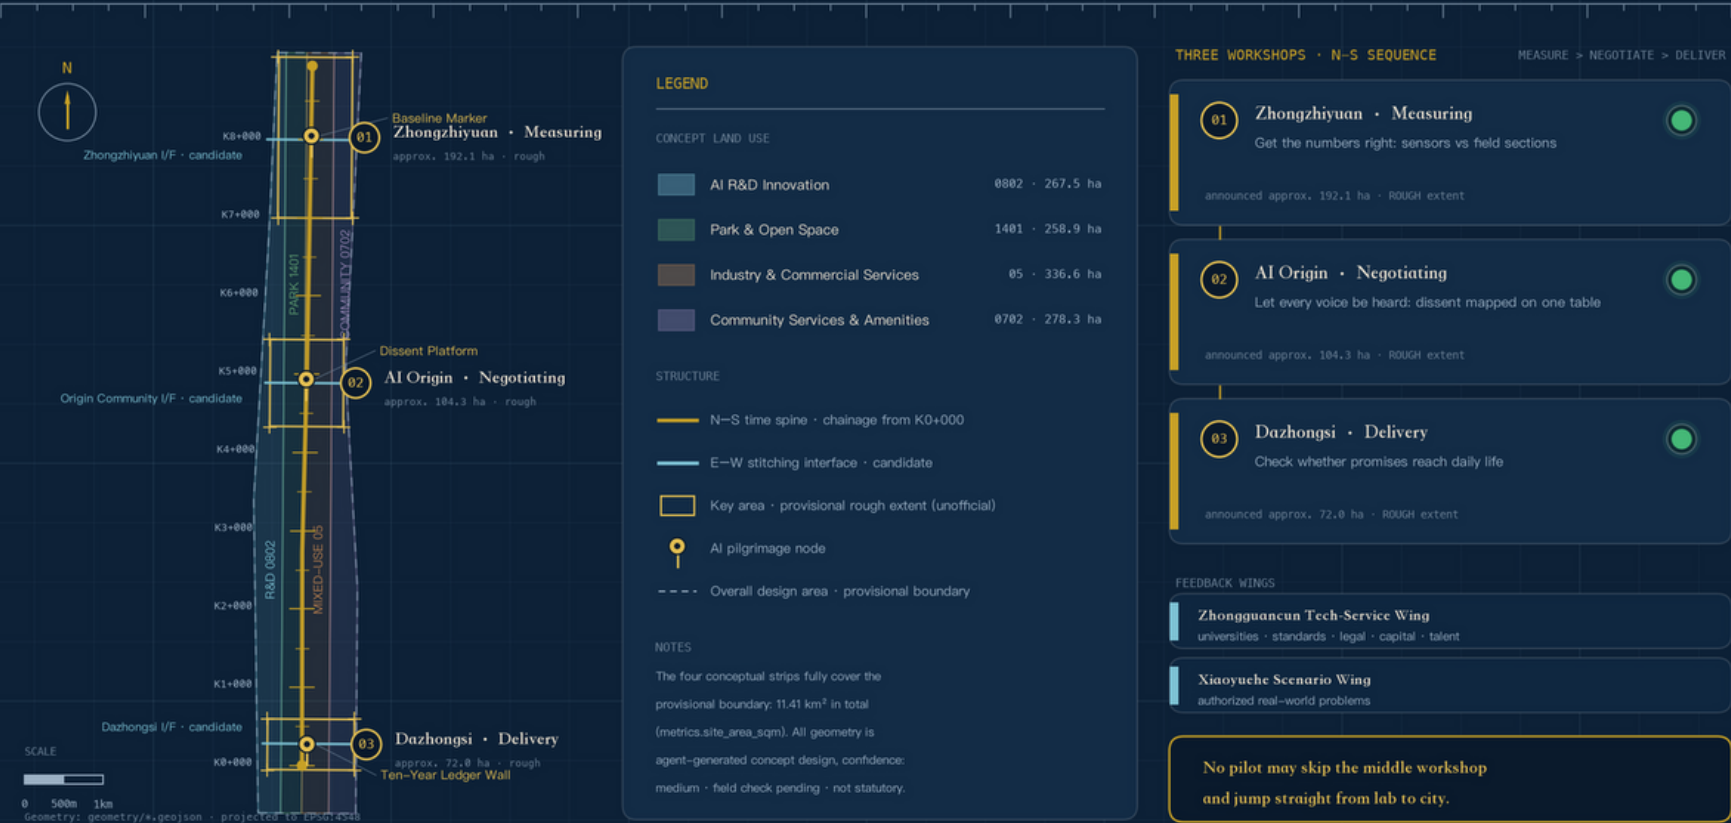

FIG.02 STRUCTURE

JING-ZHANG AI INNOVATION BELT

One Time Spine, Three Workshops

Four conceptual land-use strips cover the provisional site · a measure—negotiate—deliver sequence, with two feedback wings

HOW TO READ

- ① The spine is a N—S time axis; three workshops sit along it.
- ② Three E—W links tie the spine back to the blocks.
- ③ Two wings host housing and daily services, feeding data back.
- ④ Three scales: 43.6 km² belt / 11.41 km² site / 368.4 ha key areas.

1 SPINE

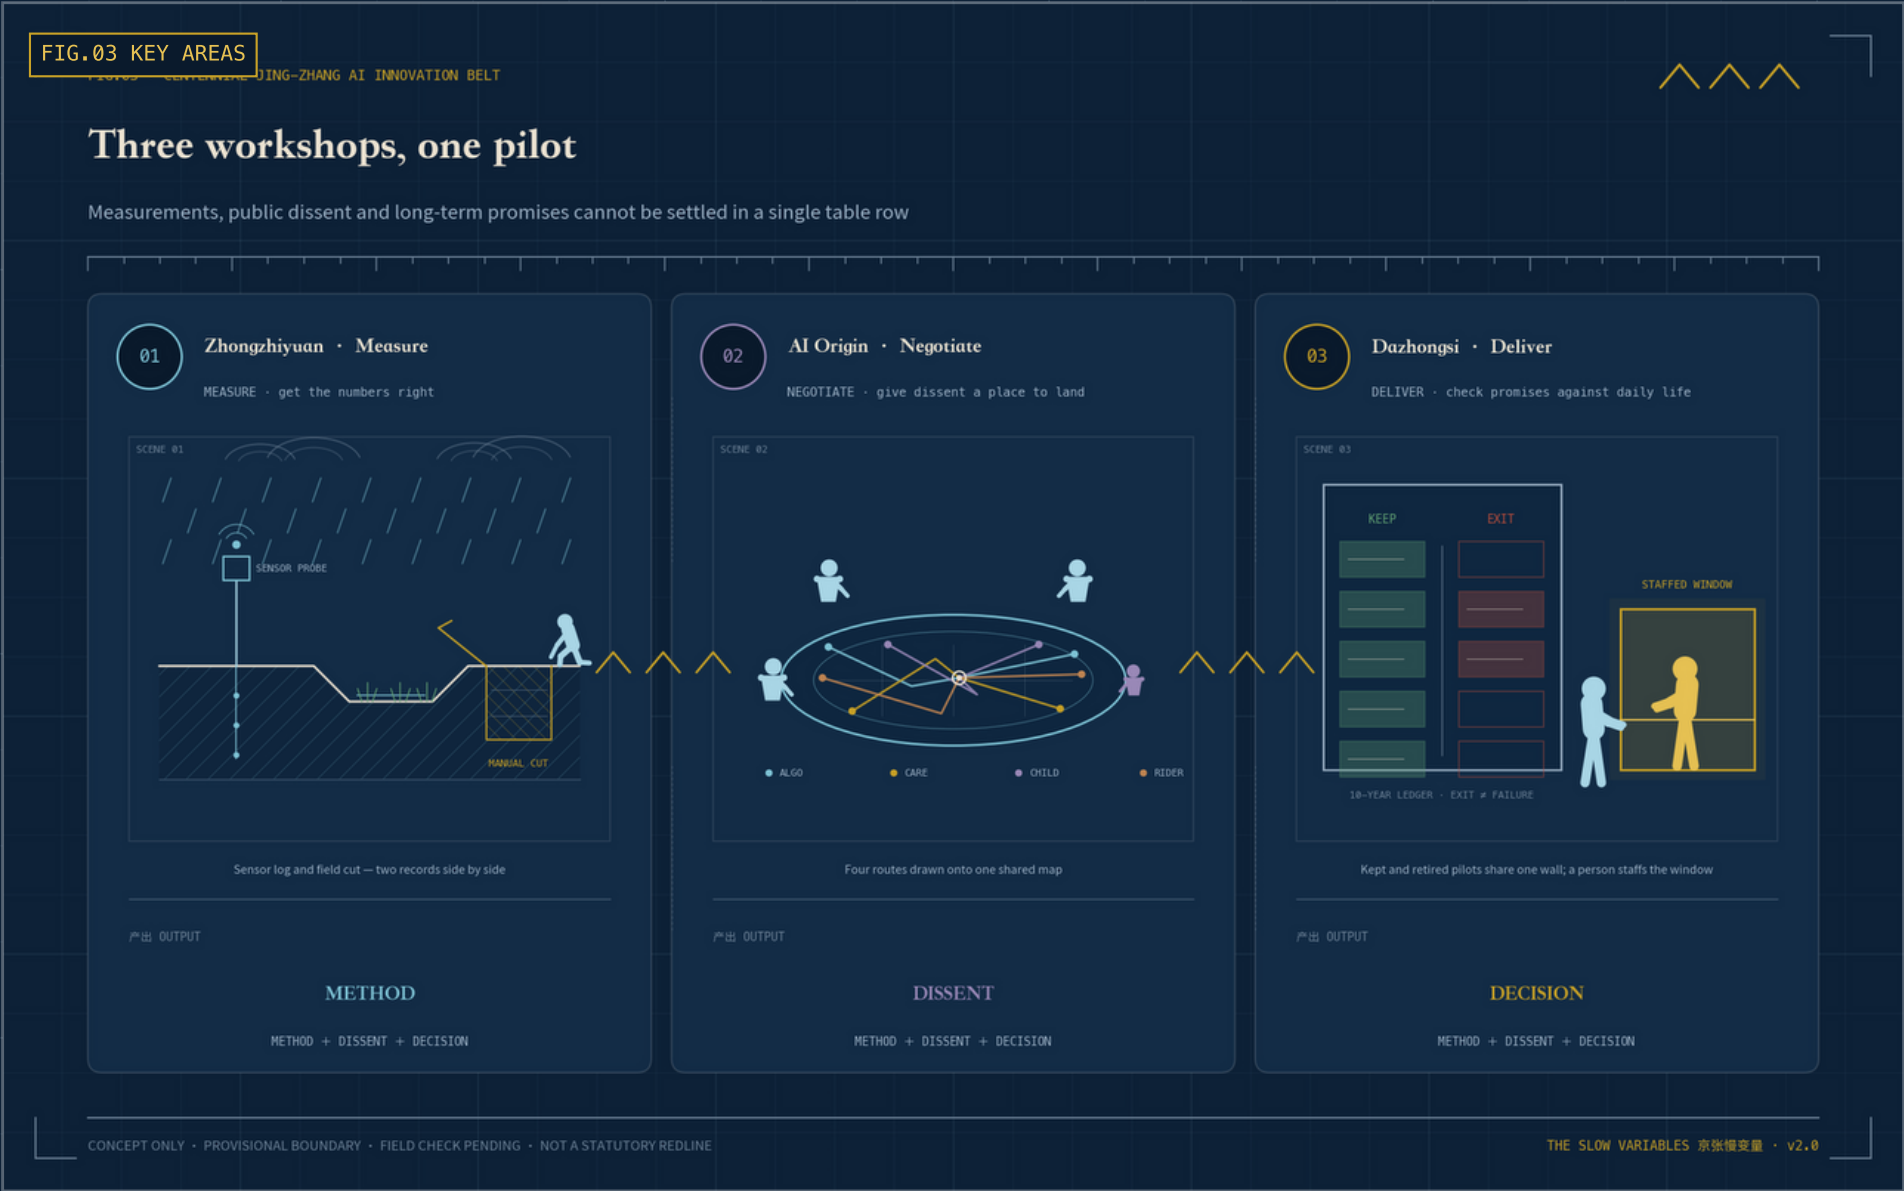

3 E—W LINKS

2 WINGS

3 WORKSHOPS

Three workshops, one job each

01 measure · 02 explain · 03 deliver

01 Zhongzhi Yard · Measure

sensors + crowd measurement, get it right

sensor calibration · crowd-sourced baseline

02 AI Origin · Explain

every algorithmic decision is explainable

explainable AI · decision logs · human review

03 Dazhongsi · Deliver

public services delivered in daily life

services delivered · retail survival · ledger

3 KEY AREAS

12 SCENARIO CARDS

3 INDUSTRY TESTS

4 GATES

One street, four speeds at once

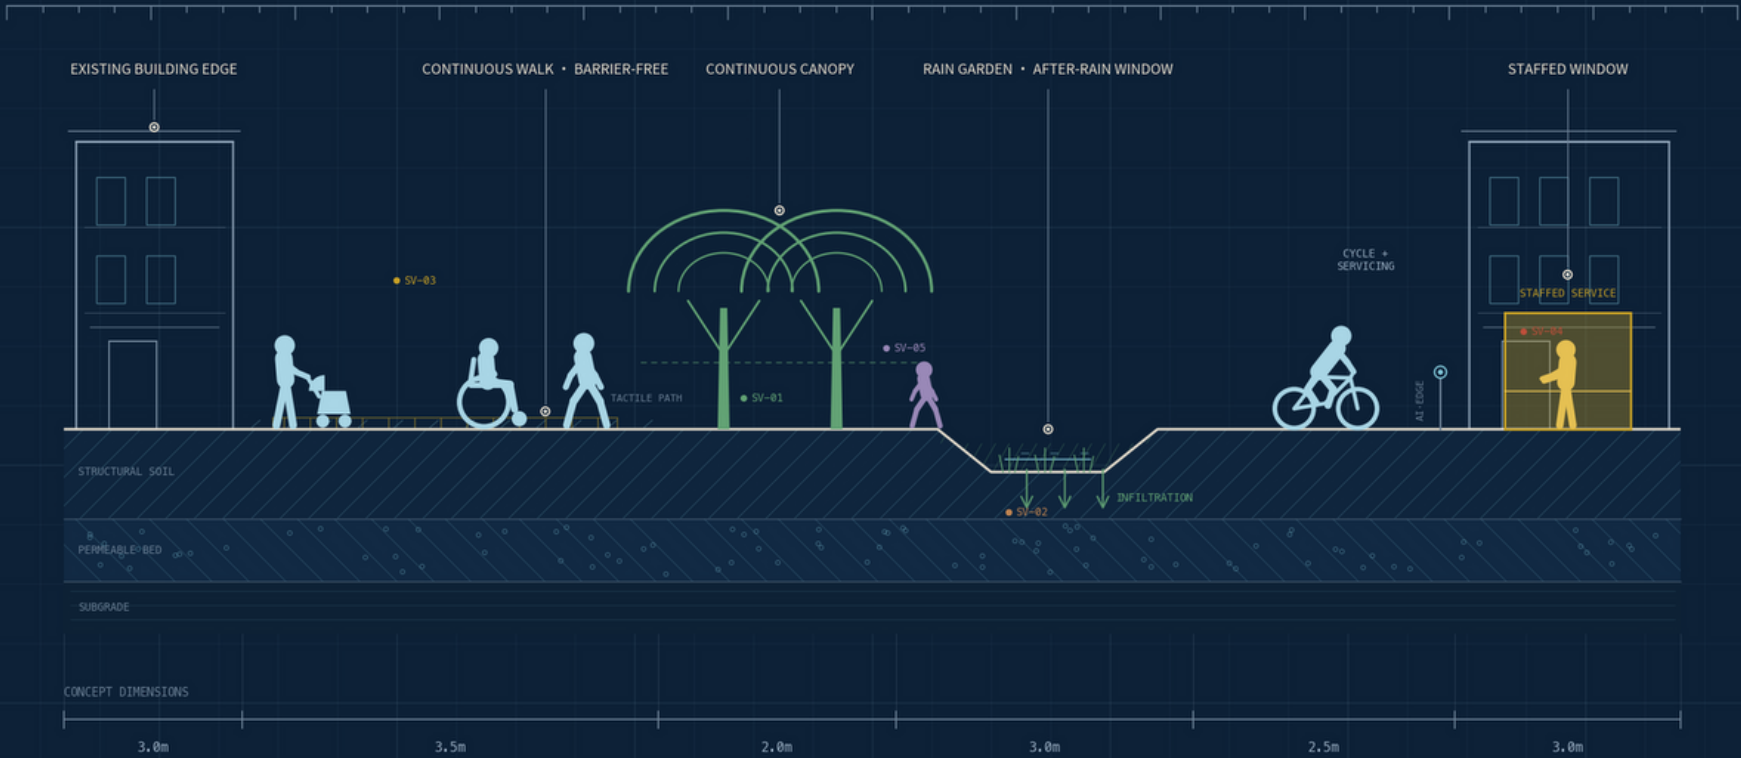

passage, lingering, stormwater and staffed services each in place

FIG.04 SECTION

TRANSFORMING JING-ZHANG AI INNOVATION BELT

One street, four speeds

Typical concept section · walking, shade, infiltration and staffed service each in place

AI devices retreat to the edge — ordinary passage never depends on being connected

CONCEPT ONLY · PROVISIONAL BOUNDARY · FIELD CHECK PENDING · NOT A STATUTORY REDLINE

THE SLOW VARIABLES 京张慢变量 · v2.0

AI devices step to the edge;

passage never requires being online.

EDGE-FIRST AI

READING THE SECTION

SV-01 continuous canopy & seating · 8–15 yrs

SV-02 rain gardens & infiltration · 3–5 flood seasons

SV-03 continuous barrier-free route · 2–3 yrs

SV-04 street retail & staffed counters · 5–10 yrs

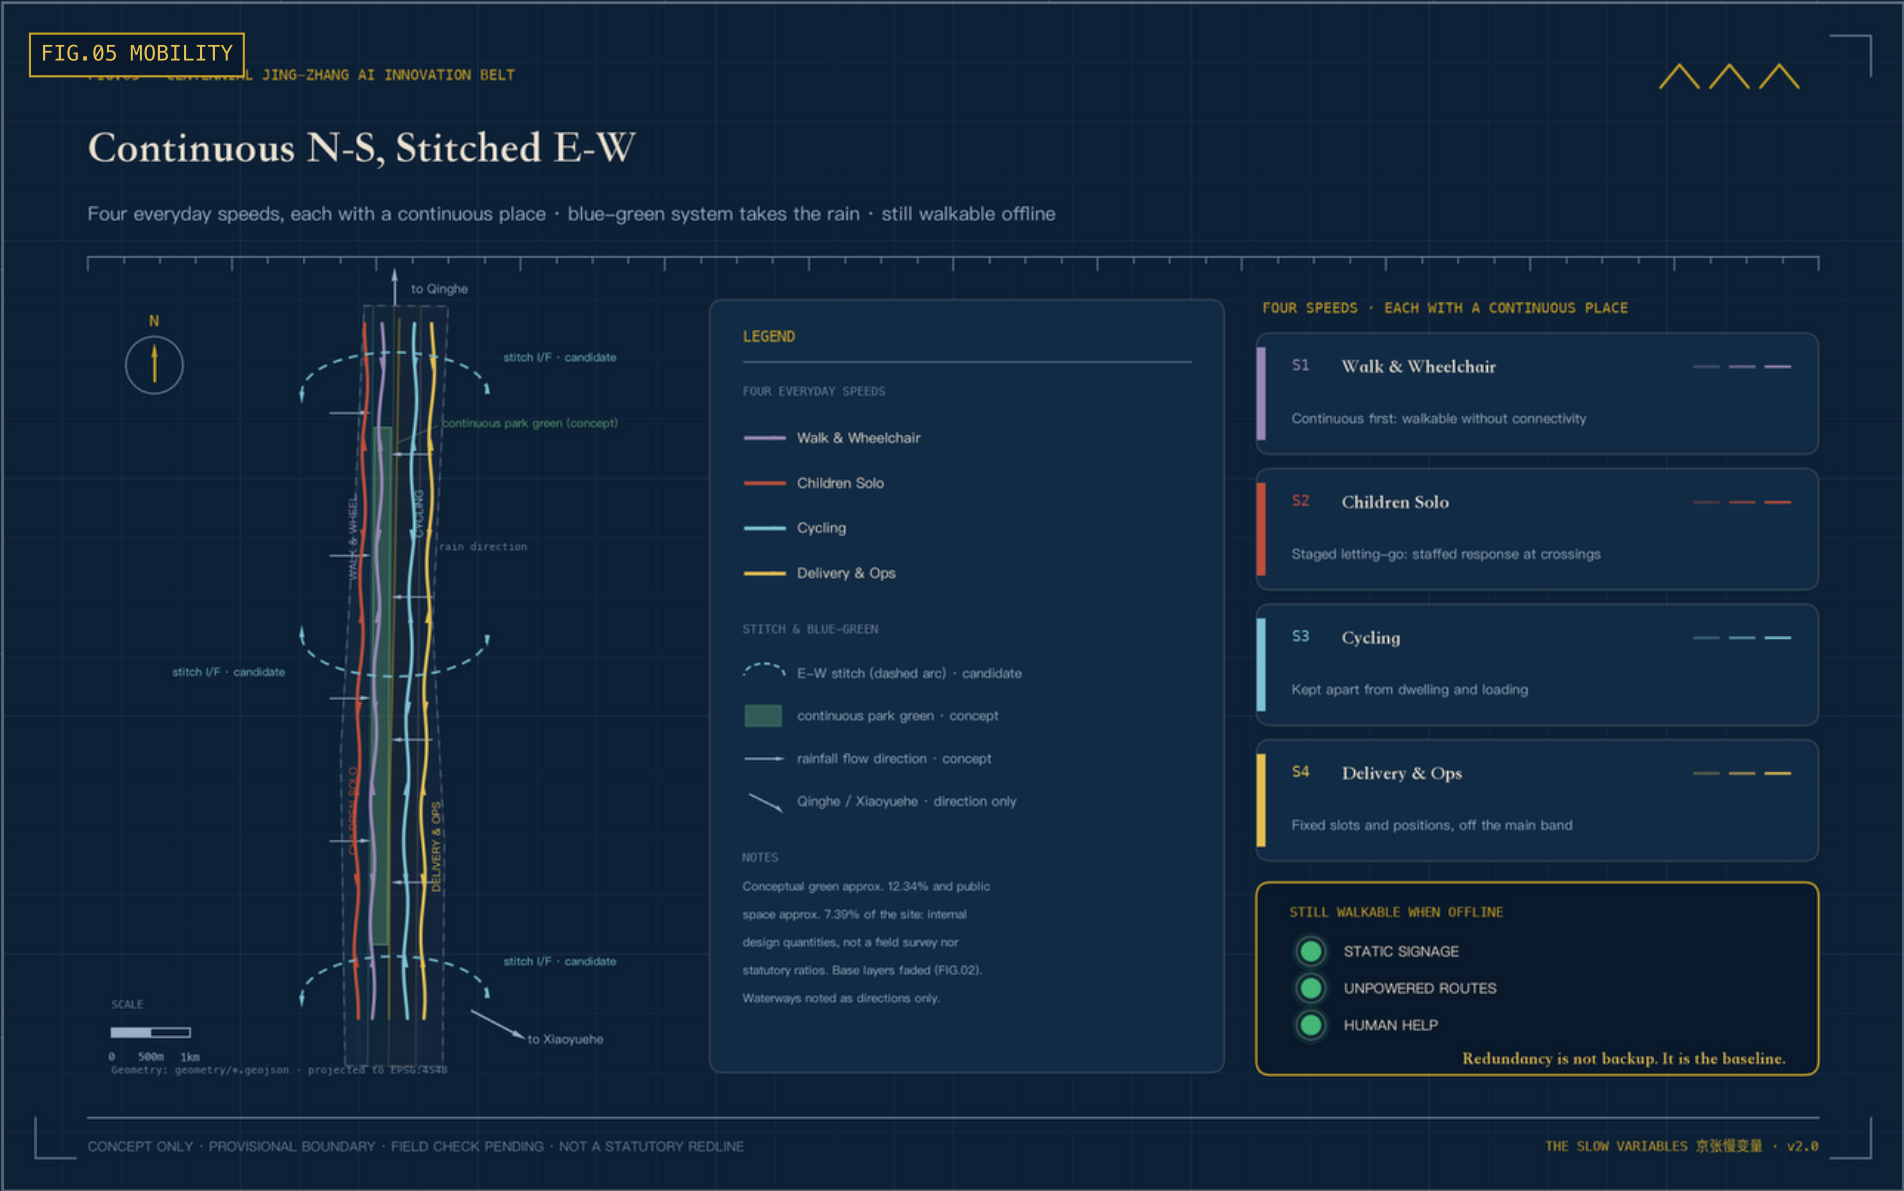

SV-05 blocks children can roam · 1–3 yrs

cycling and delivery bots run apart · no login needed to simply pass

Four speeds, each in its lane

walking · cycling · transit · delivery bots, layered and apart

FOUR SPEEDS

步行 WALK

continuous, shaded, lingerable

骑行 RIDE

own lane, apart from walking

公交接驳 TRANSIT

stops along the spine, rail feeder

无人配送 DELIVERY

confined corridors and hours

BLUE-GREEN BASE

green ratio 12.34% · public space 7.39%

recomputed from site geometry · 11.41 km²

GREEN 12.34%

PUBLIC SPACE 7.39%

FOOTPRINT 310.8k m²

Measure one year, then set thresholds

four seasons of work · phases 0–1 / 2–3 / 4–10 yrs

FIG.06 METRICS

Baseline first, decade goals later

Recomputable design quantities kept strictly apart from life metrics not yet known

Annual ledger of five slow variables

五类慢变量年度总账

Targets set jointly by professionals, users and operators — never by AI alone

SLOW VARIABLE · EMERGENCE 慢变量 · 显现周期	BASELINE · METHOD 基线 · 测量方法	TARGET 目标	RE-MEASURE 复测	DISSENT 异议	DECISION 决定
SV-01 Canopy EMERGENCE · 0–15 yrs	Canopy model vs. summer re-survey 树冠模型对照夏季复测	AWAITING YEAR-1 BASELINE 待一年基线	AWAITING YEAR-1 BASELINE 待一年基线	AWAITING YEAR-1 BASELINE 待一年基线	AWAITING YEAR-1 BASELINE 待一年基线
SV-02 Soil infiltration EMERGENCE · 3–5 flood seasons	Sensors + manual soil profiles 传感器 + 人工剖面	AWAITING YEAR-1 BASELINE 待一年基线	AWAITING YEAR-1 BASELINE 待一年基线	AWAITING YEAR-1 BASELINE 待一年基线	AWAITING YEAR-1 BASELINE 待一年基线
SV-03 Barrier-free access EMERGENCE · 2–3 yrs	Accompanied-walk audits 共走审计	AWAITING YEAR-1 BASELINE 待一年基线	AWAITING YEAR-1 BASELINE 待一年基线	AWAITING YEAR-1 BASELINE 待一年基线	AWAITING YEAR-1 BASELINE 待一年基线
SV-04 Retail survival EMERGENCE · 5–10 yrs	Voluntary merchant logs 商户自愿记录	AWAITING YEAR-1 BASELINE 待一年基线	AWAITING YEAR-1 BASELINE 待一年基线	AWAITING YEAR-1 BASELINE 待一年基线	AWAITING YEAR-1 BASELINE 待一年基线
SV-05 Children's independent mobility EMERGENCE · 1–3 yrs	Staged release, escorted trials 分段放手跑测	AWAITING YEAR-1 BASELINE 待一年基线	AWAITING YEAR-1 BASELINE 待一年基线	AWAITING YEAR-1 BASELINE 待一年基线	AWAITING YEAR-1 BASELINE 待一年基线

RE-COMPUTABLE DESIGN QUANTITIES 可复算的设计量

--	--	---------------------------------	---------------------------------	-----------------------------	-----------------------------	-----------------------	------------------------

All recomputable from geometry/*.geojson & metrics.json · FAR & slow-variable baselines stay pending – no estimates invented

CONCEPT ONLY · PROVISIONAL BOUNDARY · FIELD CHECK PENDING · NOT A STATUTORY REDLINE

THE SLOW VARIABLES 京张慢变量 · v2.0

INTENTIONAL BLANKS

- Blank constraint layer
reserved for statutory redlines
- Floor–area ratio
awaiting official data
- Slow–variable baseline
awaiting one–year baseline survey

HONESTY NOTE

Areas and ratios are recomputed from provisional geometry, not official redlines;
FAR awaits official data; slow–variable thresholds follow a one–year baseline.

SPRING

· land

0–1 yrs · one–year baseline

SUMMER

· walk

0–1 yrs · walk audits & objections

AUTUMN

· blocks

2–3 yrs · block–level adjustment

WINTER

· ledger

4–10 yrs · annual ledger gates growth
