

A0-01 Overall structure

One corridor, three quarters, two belts • provisional boundary as dashed constraint only

Corridor

Jing-Zhang rail-park corridor

Walkable, stayable living main path; home and station first; display and smart services along the edge, not the whole park.

Quarters

Research / near-campus / middle

North: walkable park, managed evaluation; mid: translation with living; south: way home and parlor.

Belts

Streets & river

Zhongguancun service streets for errands; Xiaoyuehe living river belt for walks and community activity.

Five nodes

Everyday service points

Mobility and meeting, park-shore shade, neighborhood deliberation, daily amenities, switchable civic info.

A0-02 Three-quarter index

Detailed design depth • conceptual buildings and projects

Research

192.1 ha (announced)

Walkable Qinghe shore, managed evaluation edge; JZ-02; BLDG-001/002.

Near-campus

104.3 ha (announced)

Translation street beside living ground floors; JZ-03; BLDG-003/004

Station market

72.0 ha (announced)

Four-quadrant walking and station parlor; JZ-04; BLDG-005/006.

Method

Organic renewal

Stitch interfaces, close walk gaps, activate ground floors; no demolition list without survey.

A0-03 Scenarios & public space

Daily nodes • components • operations

Landmarks

Four concepts

Mid-corridor rest gallery (sit first); near-campus star-map wall; low research stele; station porch (no block on transfer).

Components

Public kit

Movable seats, shade, power, accessibility, bilingual wayfinding, switch-offable sensors.

Operations

Event menu

Open-source week, sandbox open day, rail-park citizen day, pitch season, developer community — citizen day parallel to industry events.

Narrative

Rail → city → people

Return to walkable parks, enterable quarters, and a station front you can go home through.

A0-04 Metrics • compliance • risk

Recomputable numbers + missing data + formal self-check

Numbers

Known metrics

Provisional projected area ~11.41 km²; green ≈0.49; public space ≈0.30; footprints ~3.77 km².

Matrices

Task coverage

Announcement 1.3–1.5 and agent .1–6 checked in compliance / standard / depth matrices.

Risks

Main gaps

Official redline, ownership, controls, utilities, heritage not ingested ; unauthorized sensing damages t rust.

Claim

Does not claim

No approval, adopted controls, final scale, or delivery guarantee; final judgment rests with human reviewers.
