

GLOBAL AI FRONTLINE

AI LINE 1

Not a technology-display boulevard, but a public innovation system where original research, young talent, enterprise demand, public scenarios and professional services keep meeting.

P1
WORTH DOING

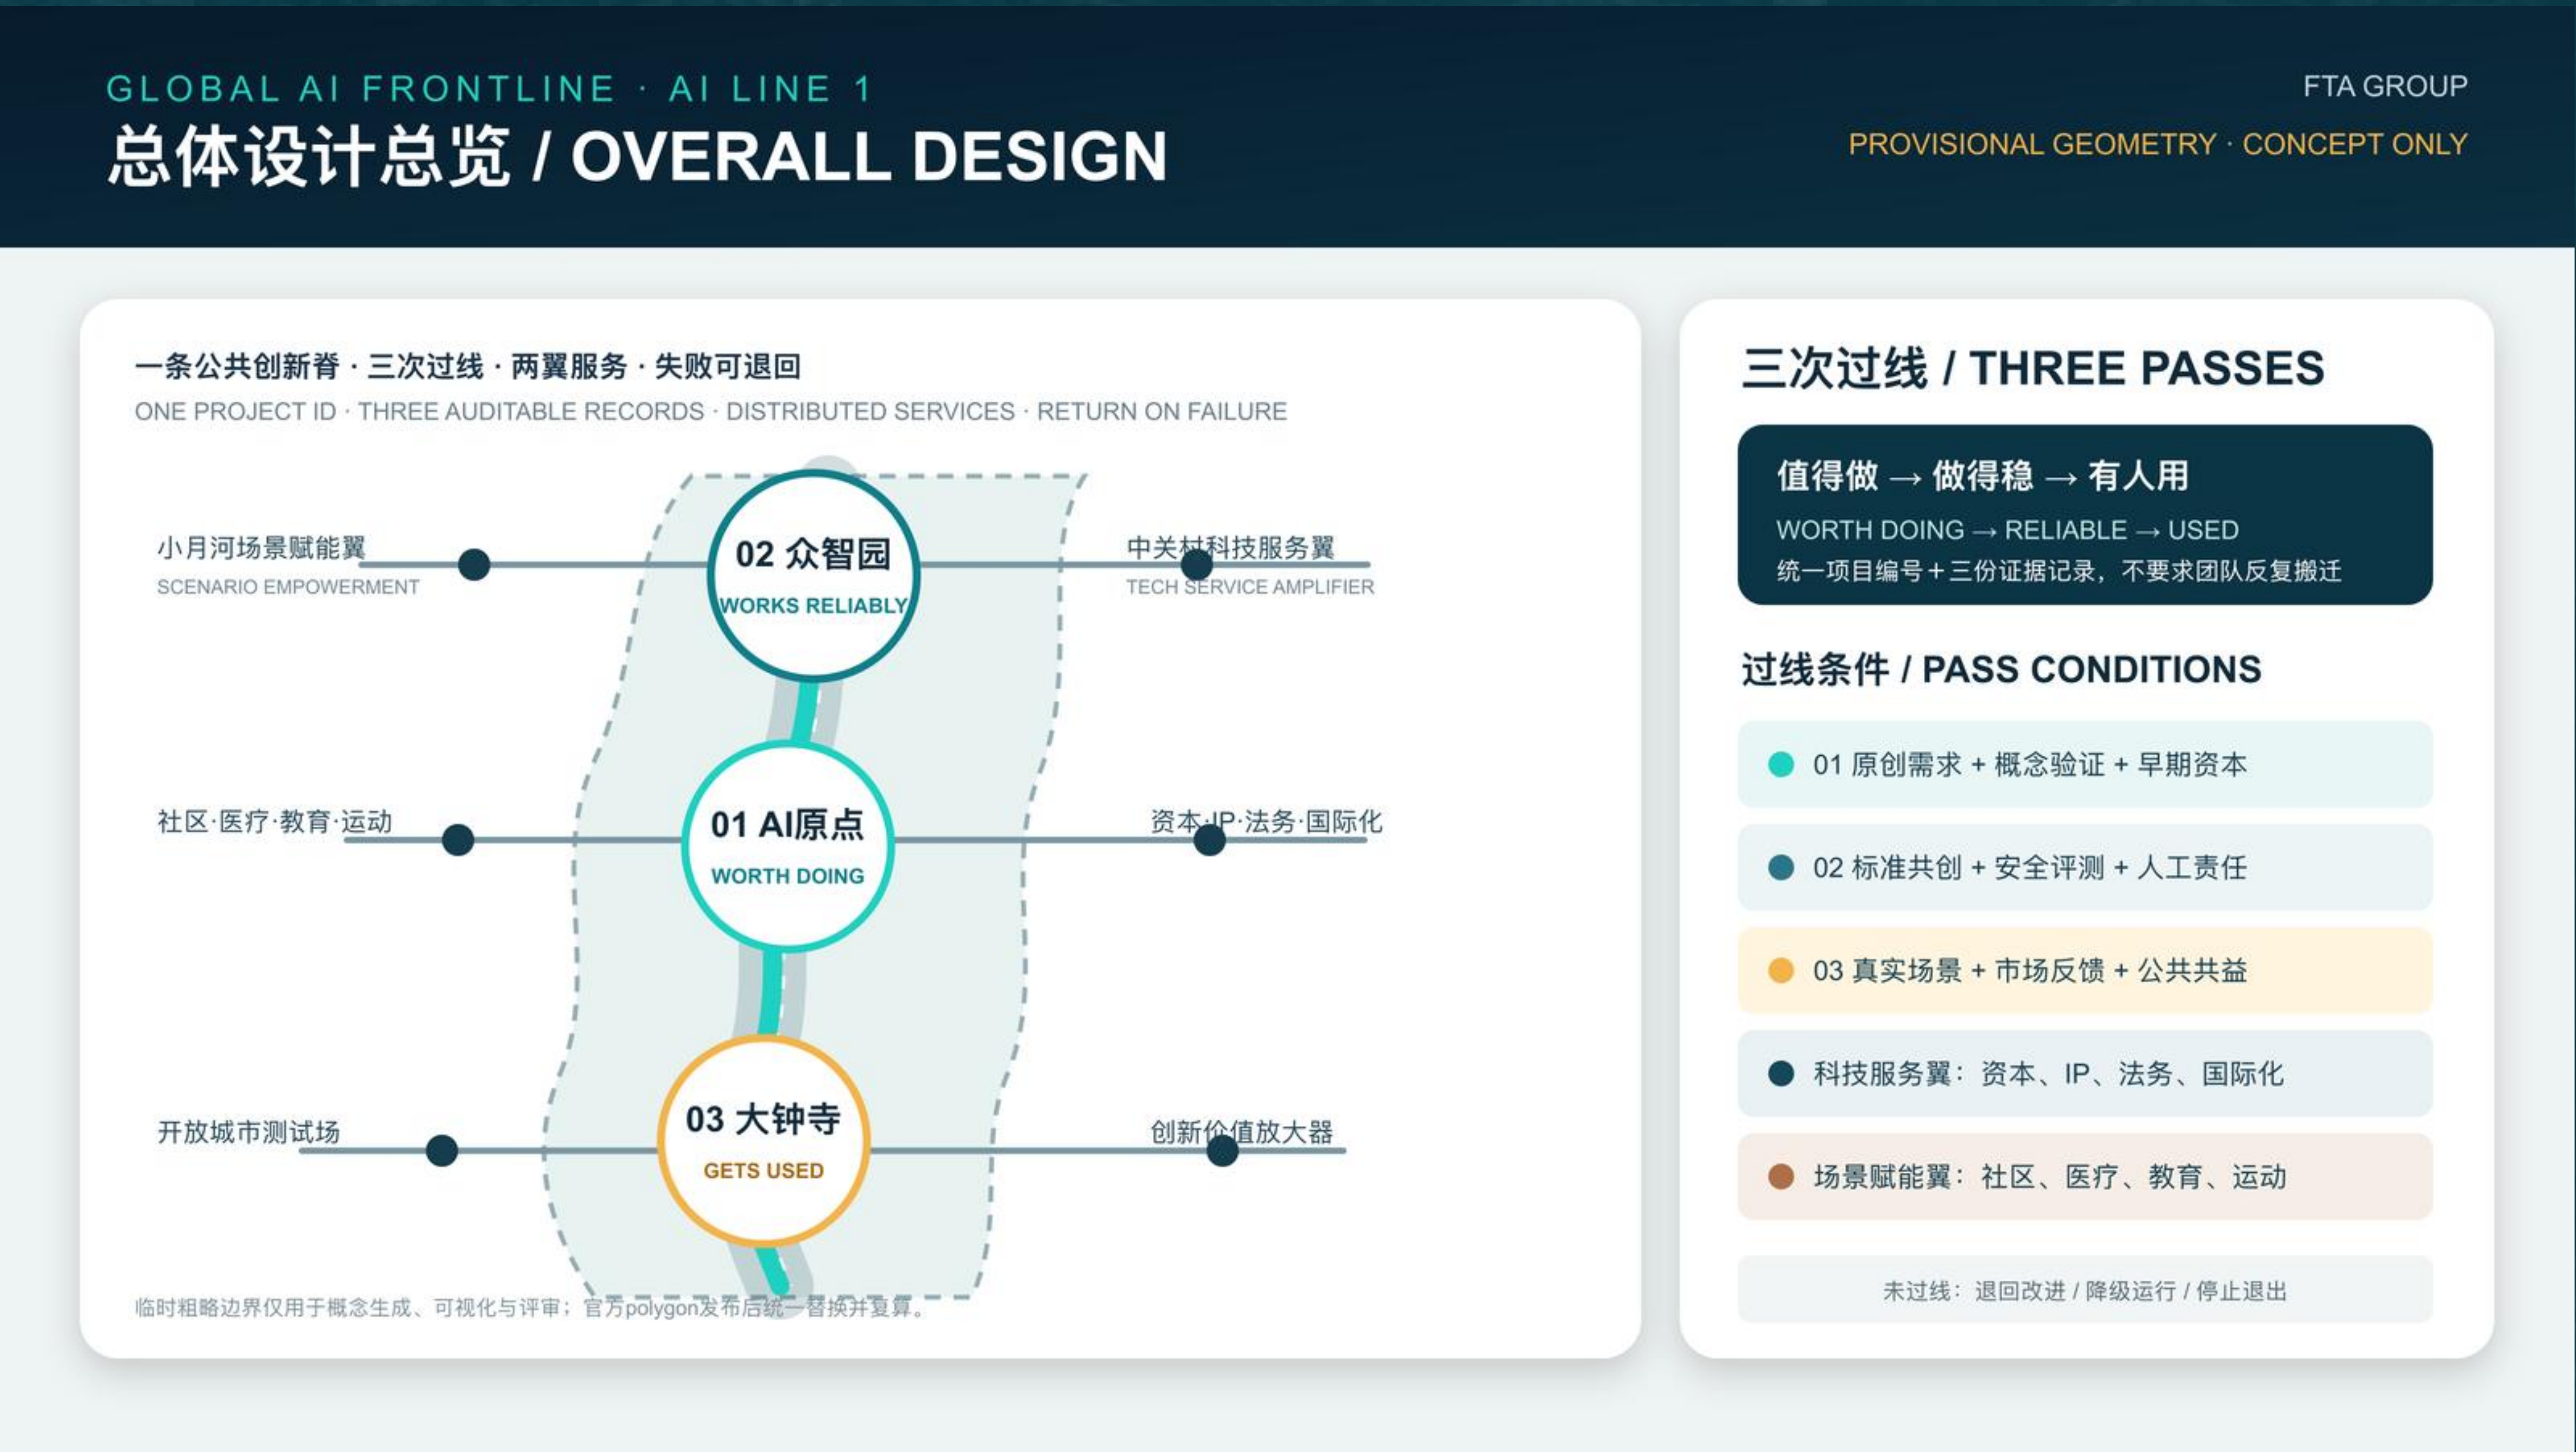

P2
WORKS RELIABLY

P3
GETS USED

Three areas + two wings · five flows · twelve governed AI scenarios · three pre-registered 90-day pilots

CORE SPATIAL LOGIC

ORIGINATE → VALIDATE → TEST → APPLY → LEARN

43.6 km²
COORDINATED STUDY

11.4 km²
PROVISIONAL ODA

3
KEY AREAS

12
GOVERNED SCENARIOS

90 DAYS
EVIDENCE FIRST

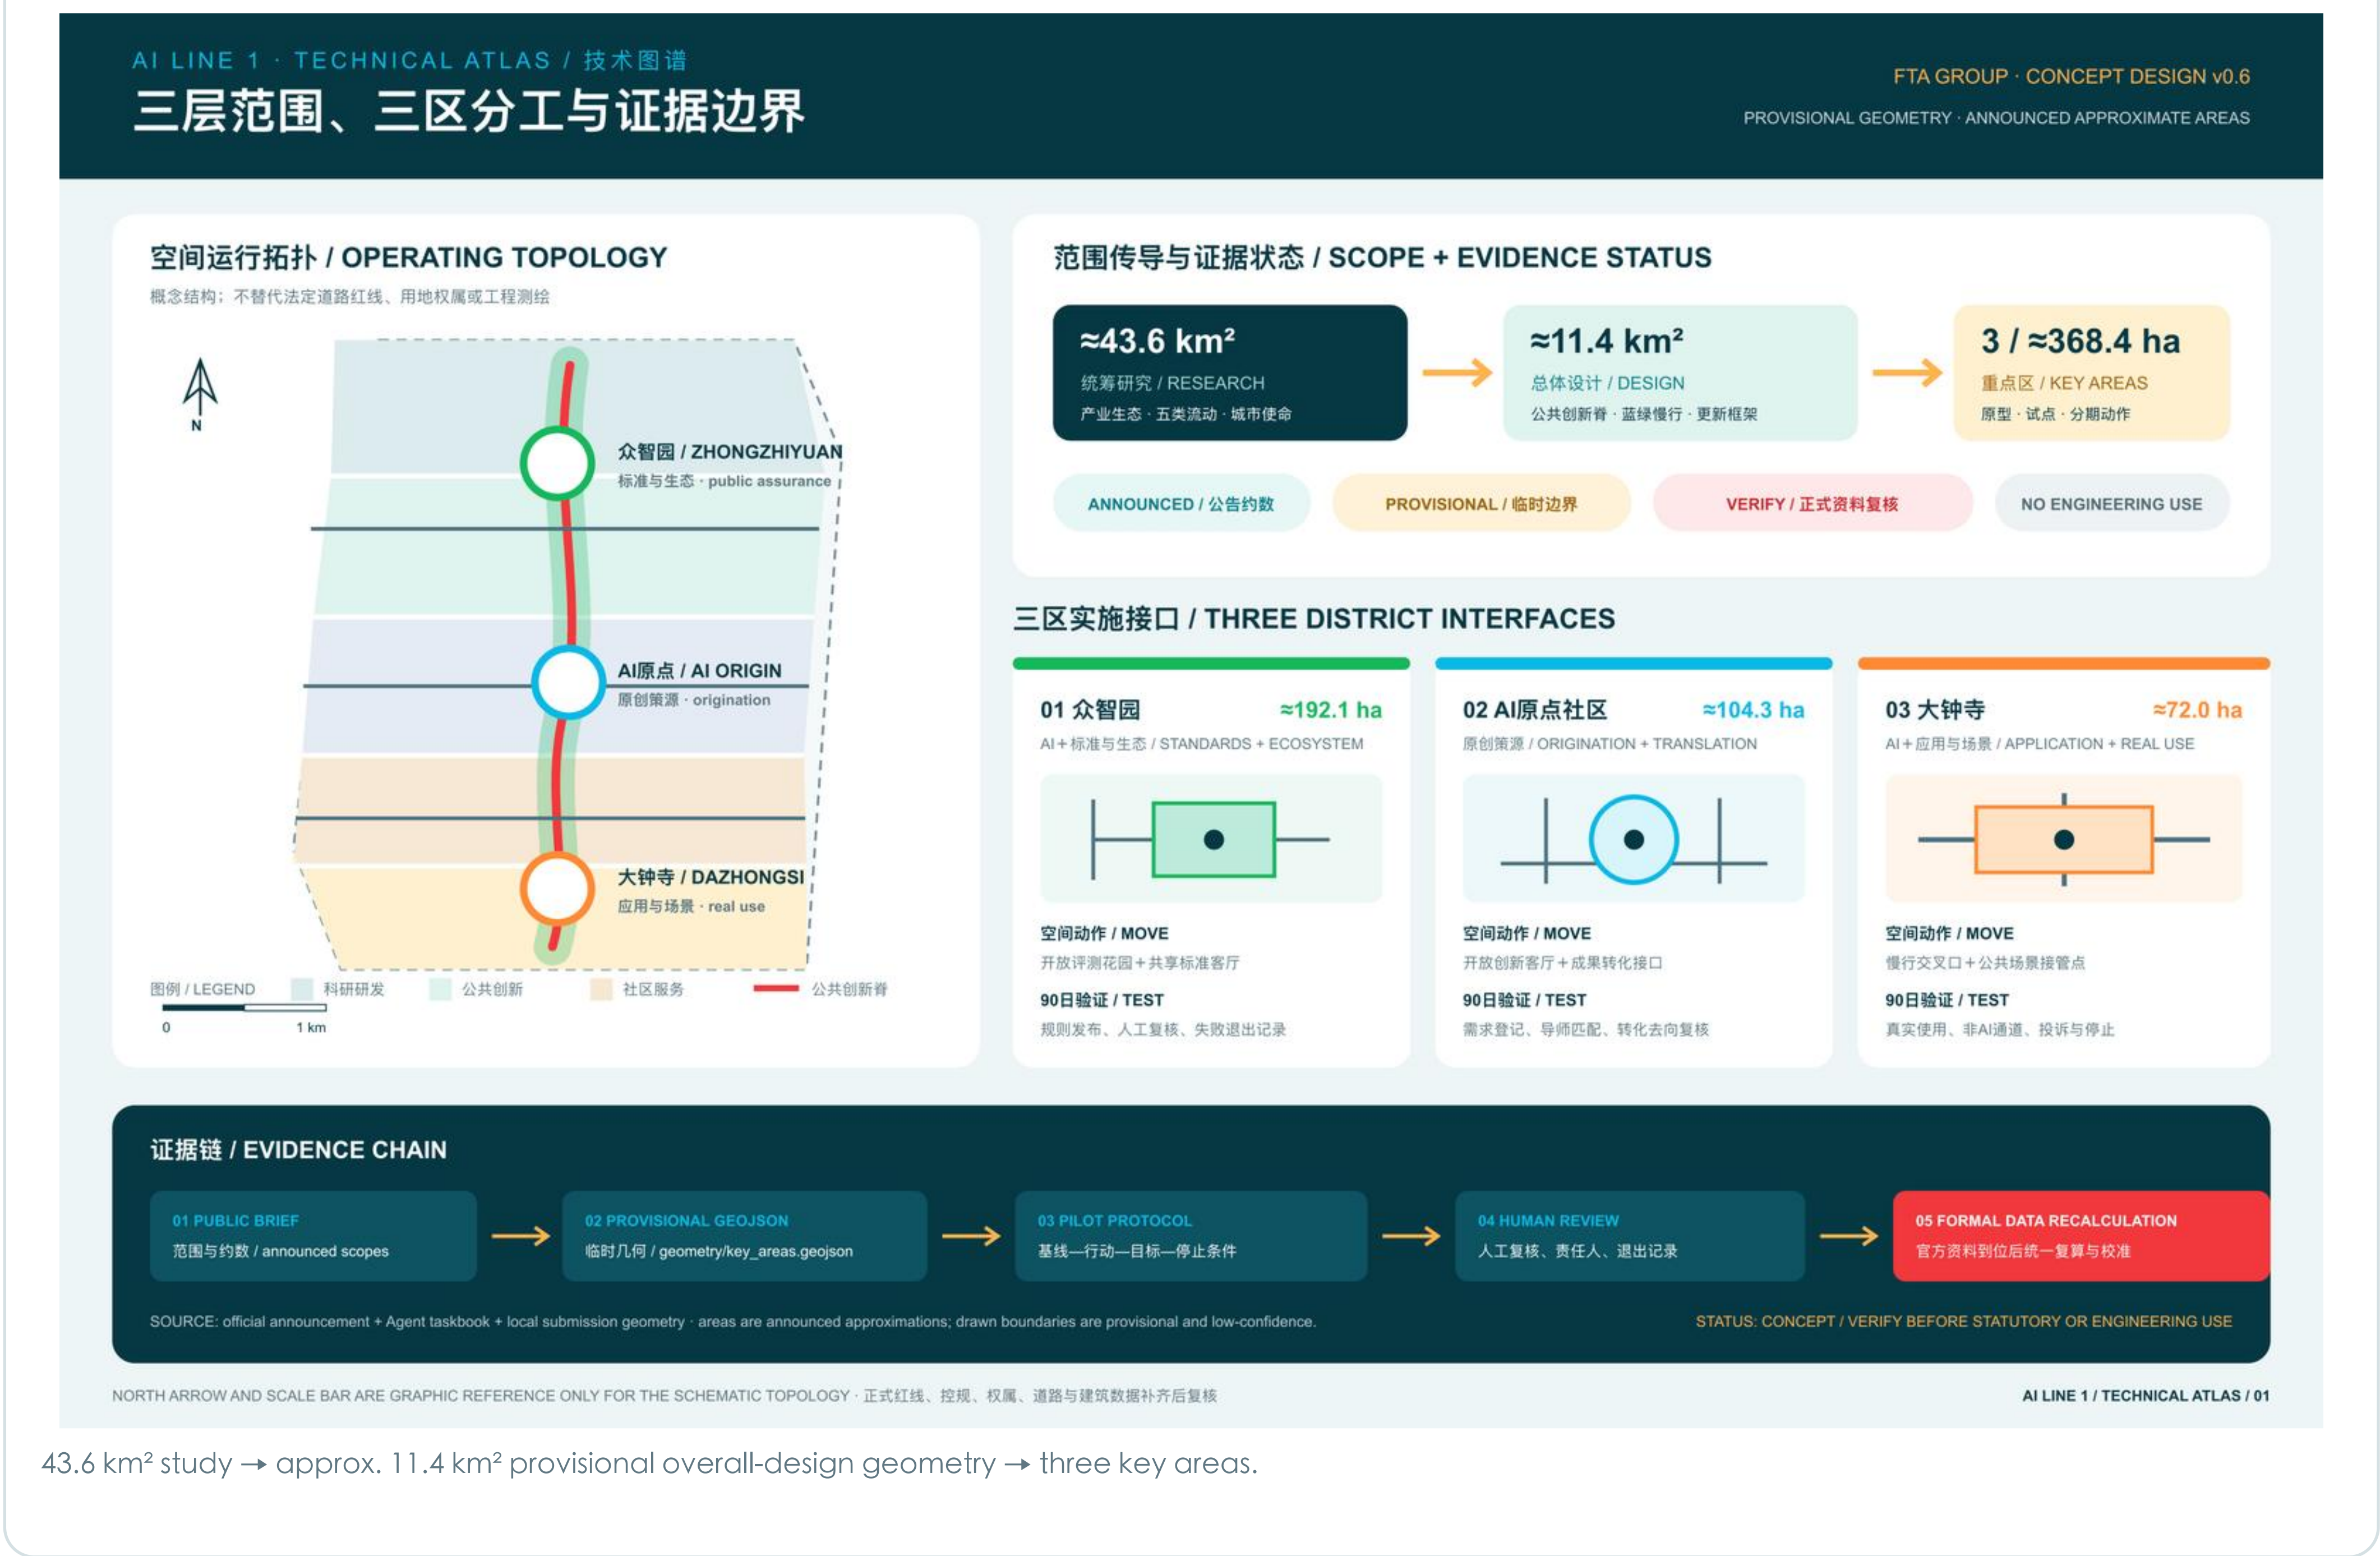

THE 30-SECOND CASE

- One Jing-Zhang public innovation spine links three differentiated engines and two cross-area service networks.
- AI enters need discovery, testing, real use, human takeover and exit; public life remains primary.
- Controls, actors and funding stay authorization-dependent; reversible pilots create evidence first.

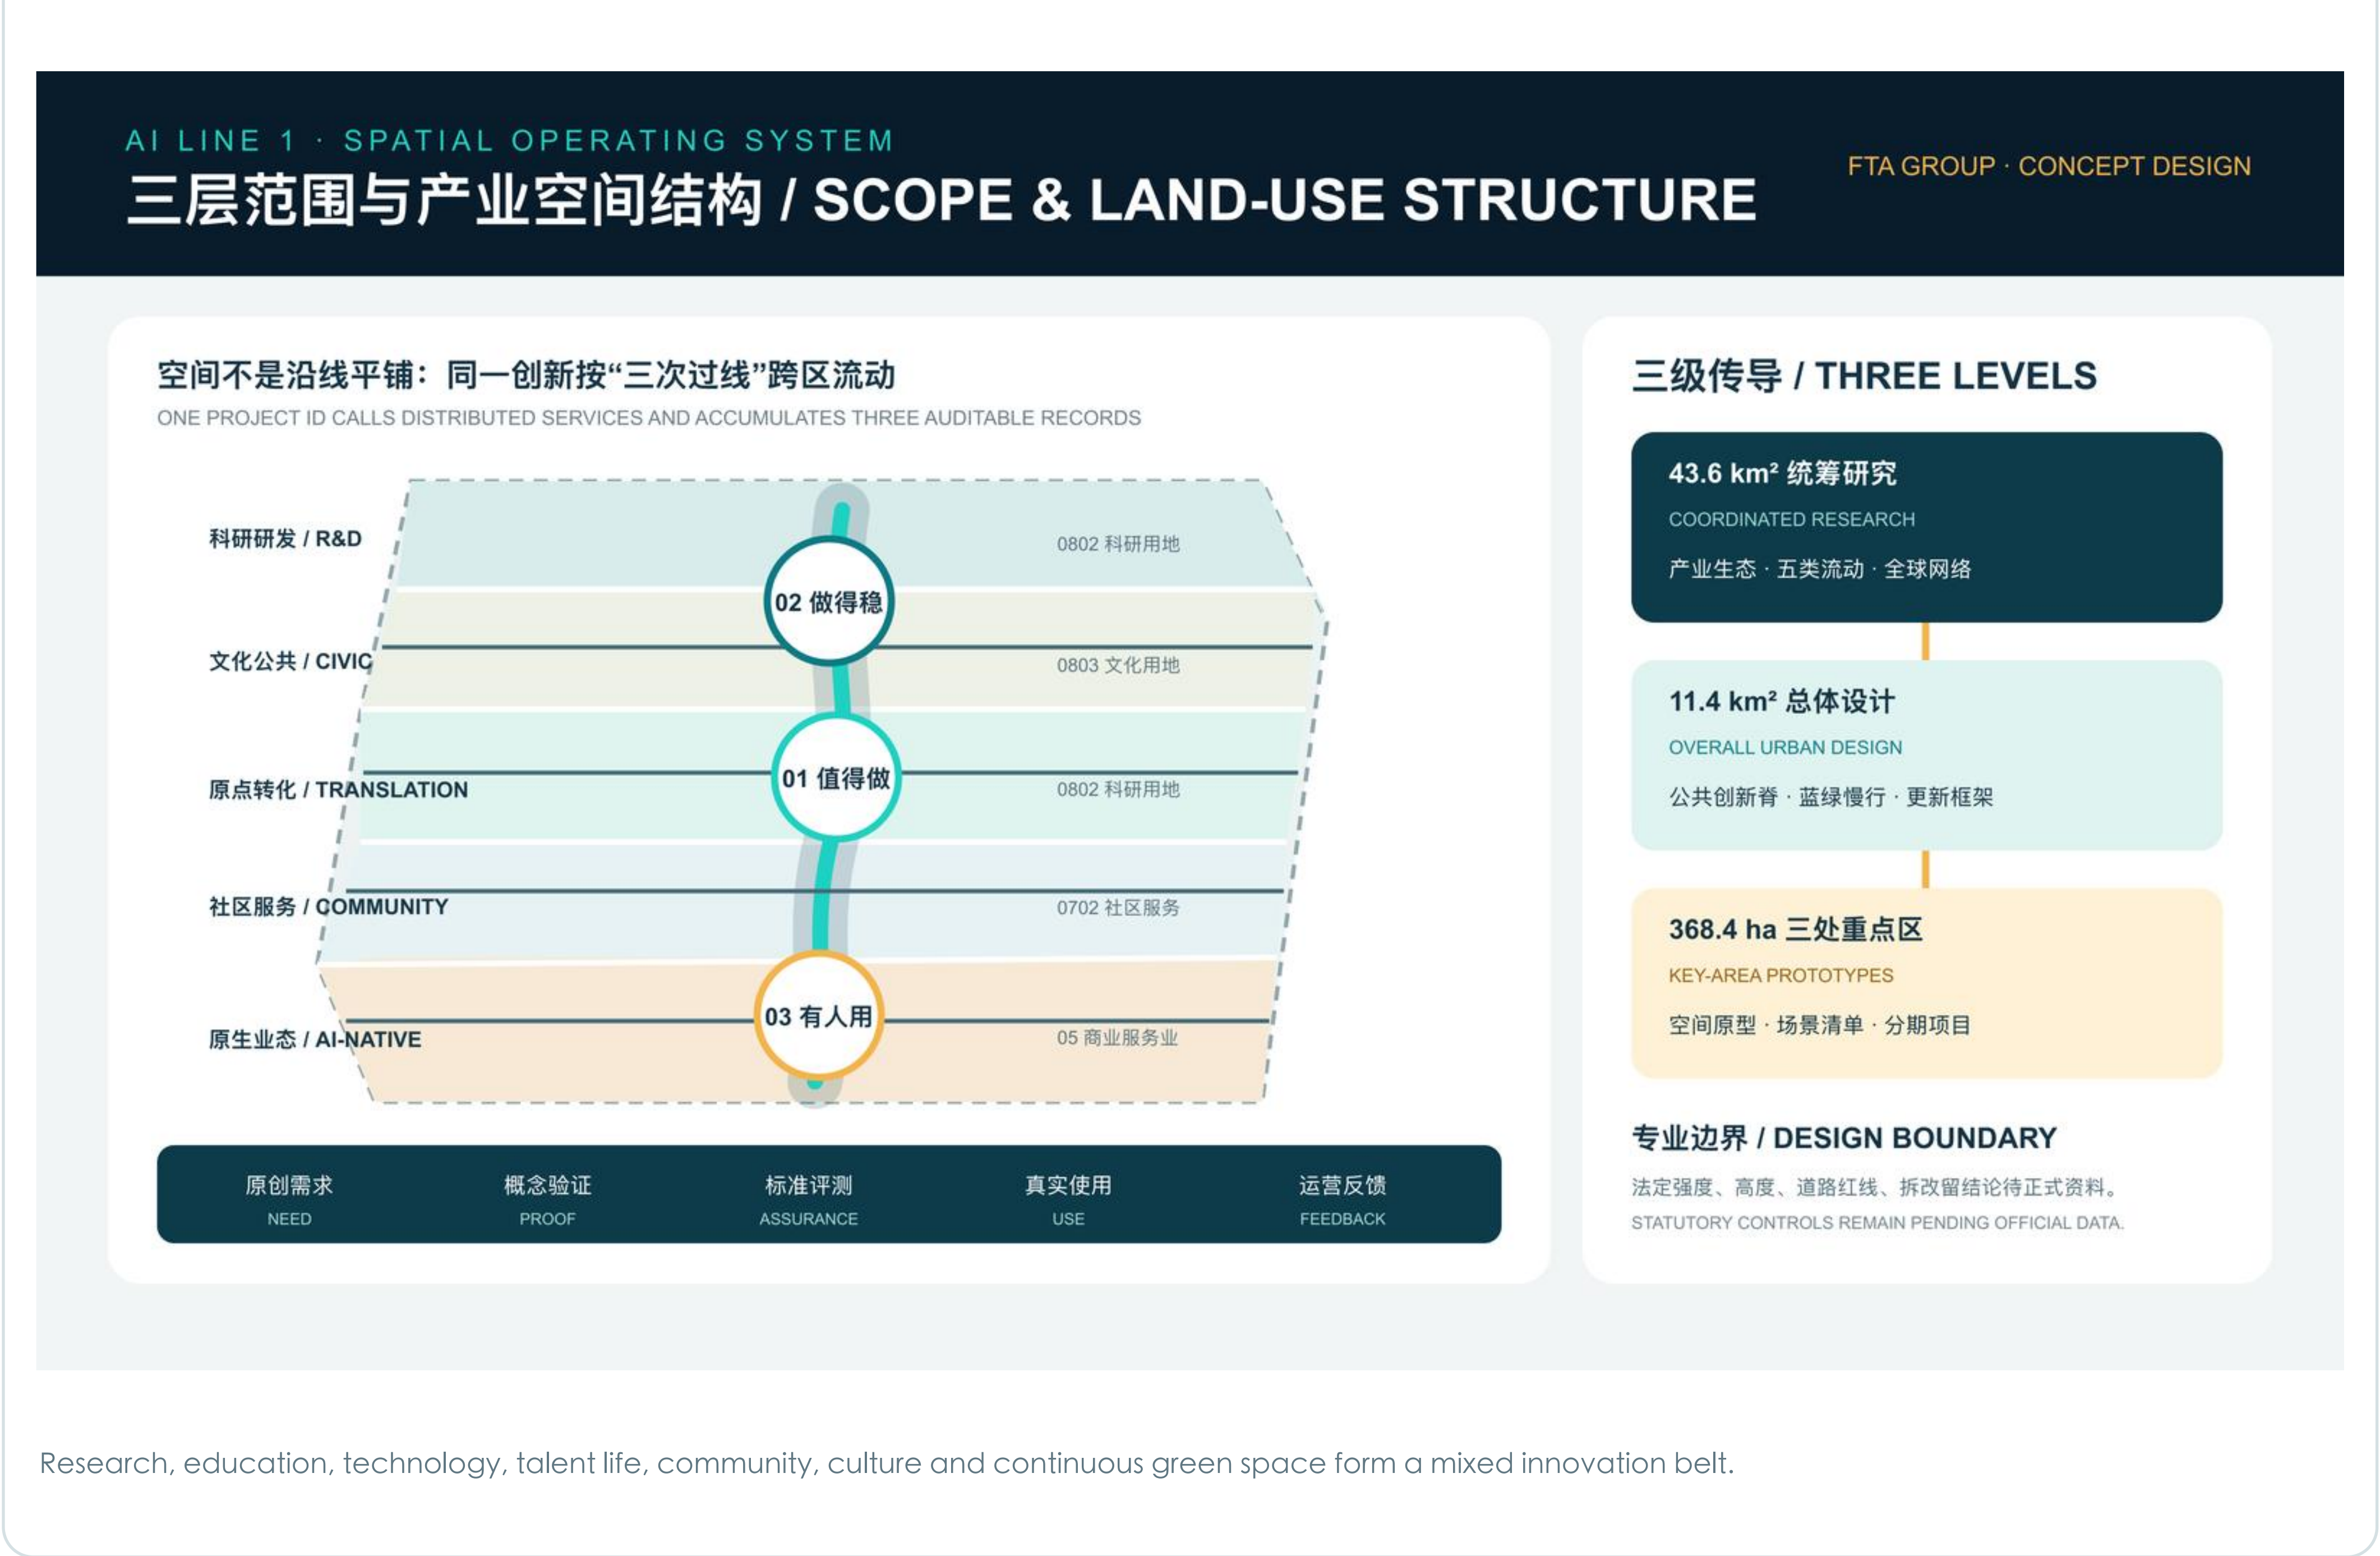

THREE SCALES, LAND-USE TOPOLOGY AND PUBLIC INFRASTRUCTURE

Complete coverage without statutory fiction; three handover fields and three responsibility transfers.

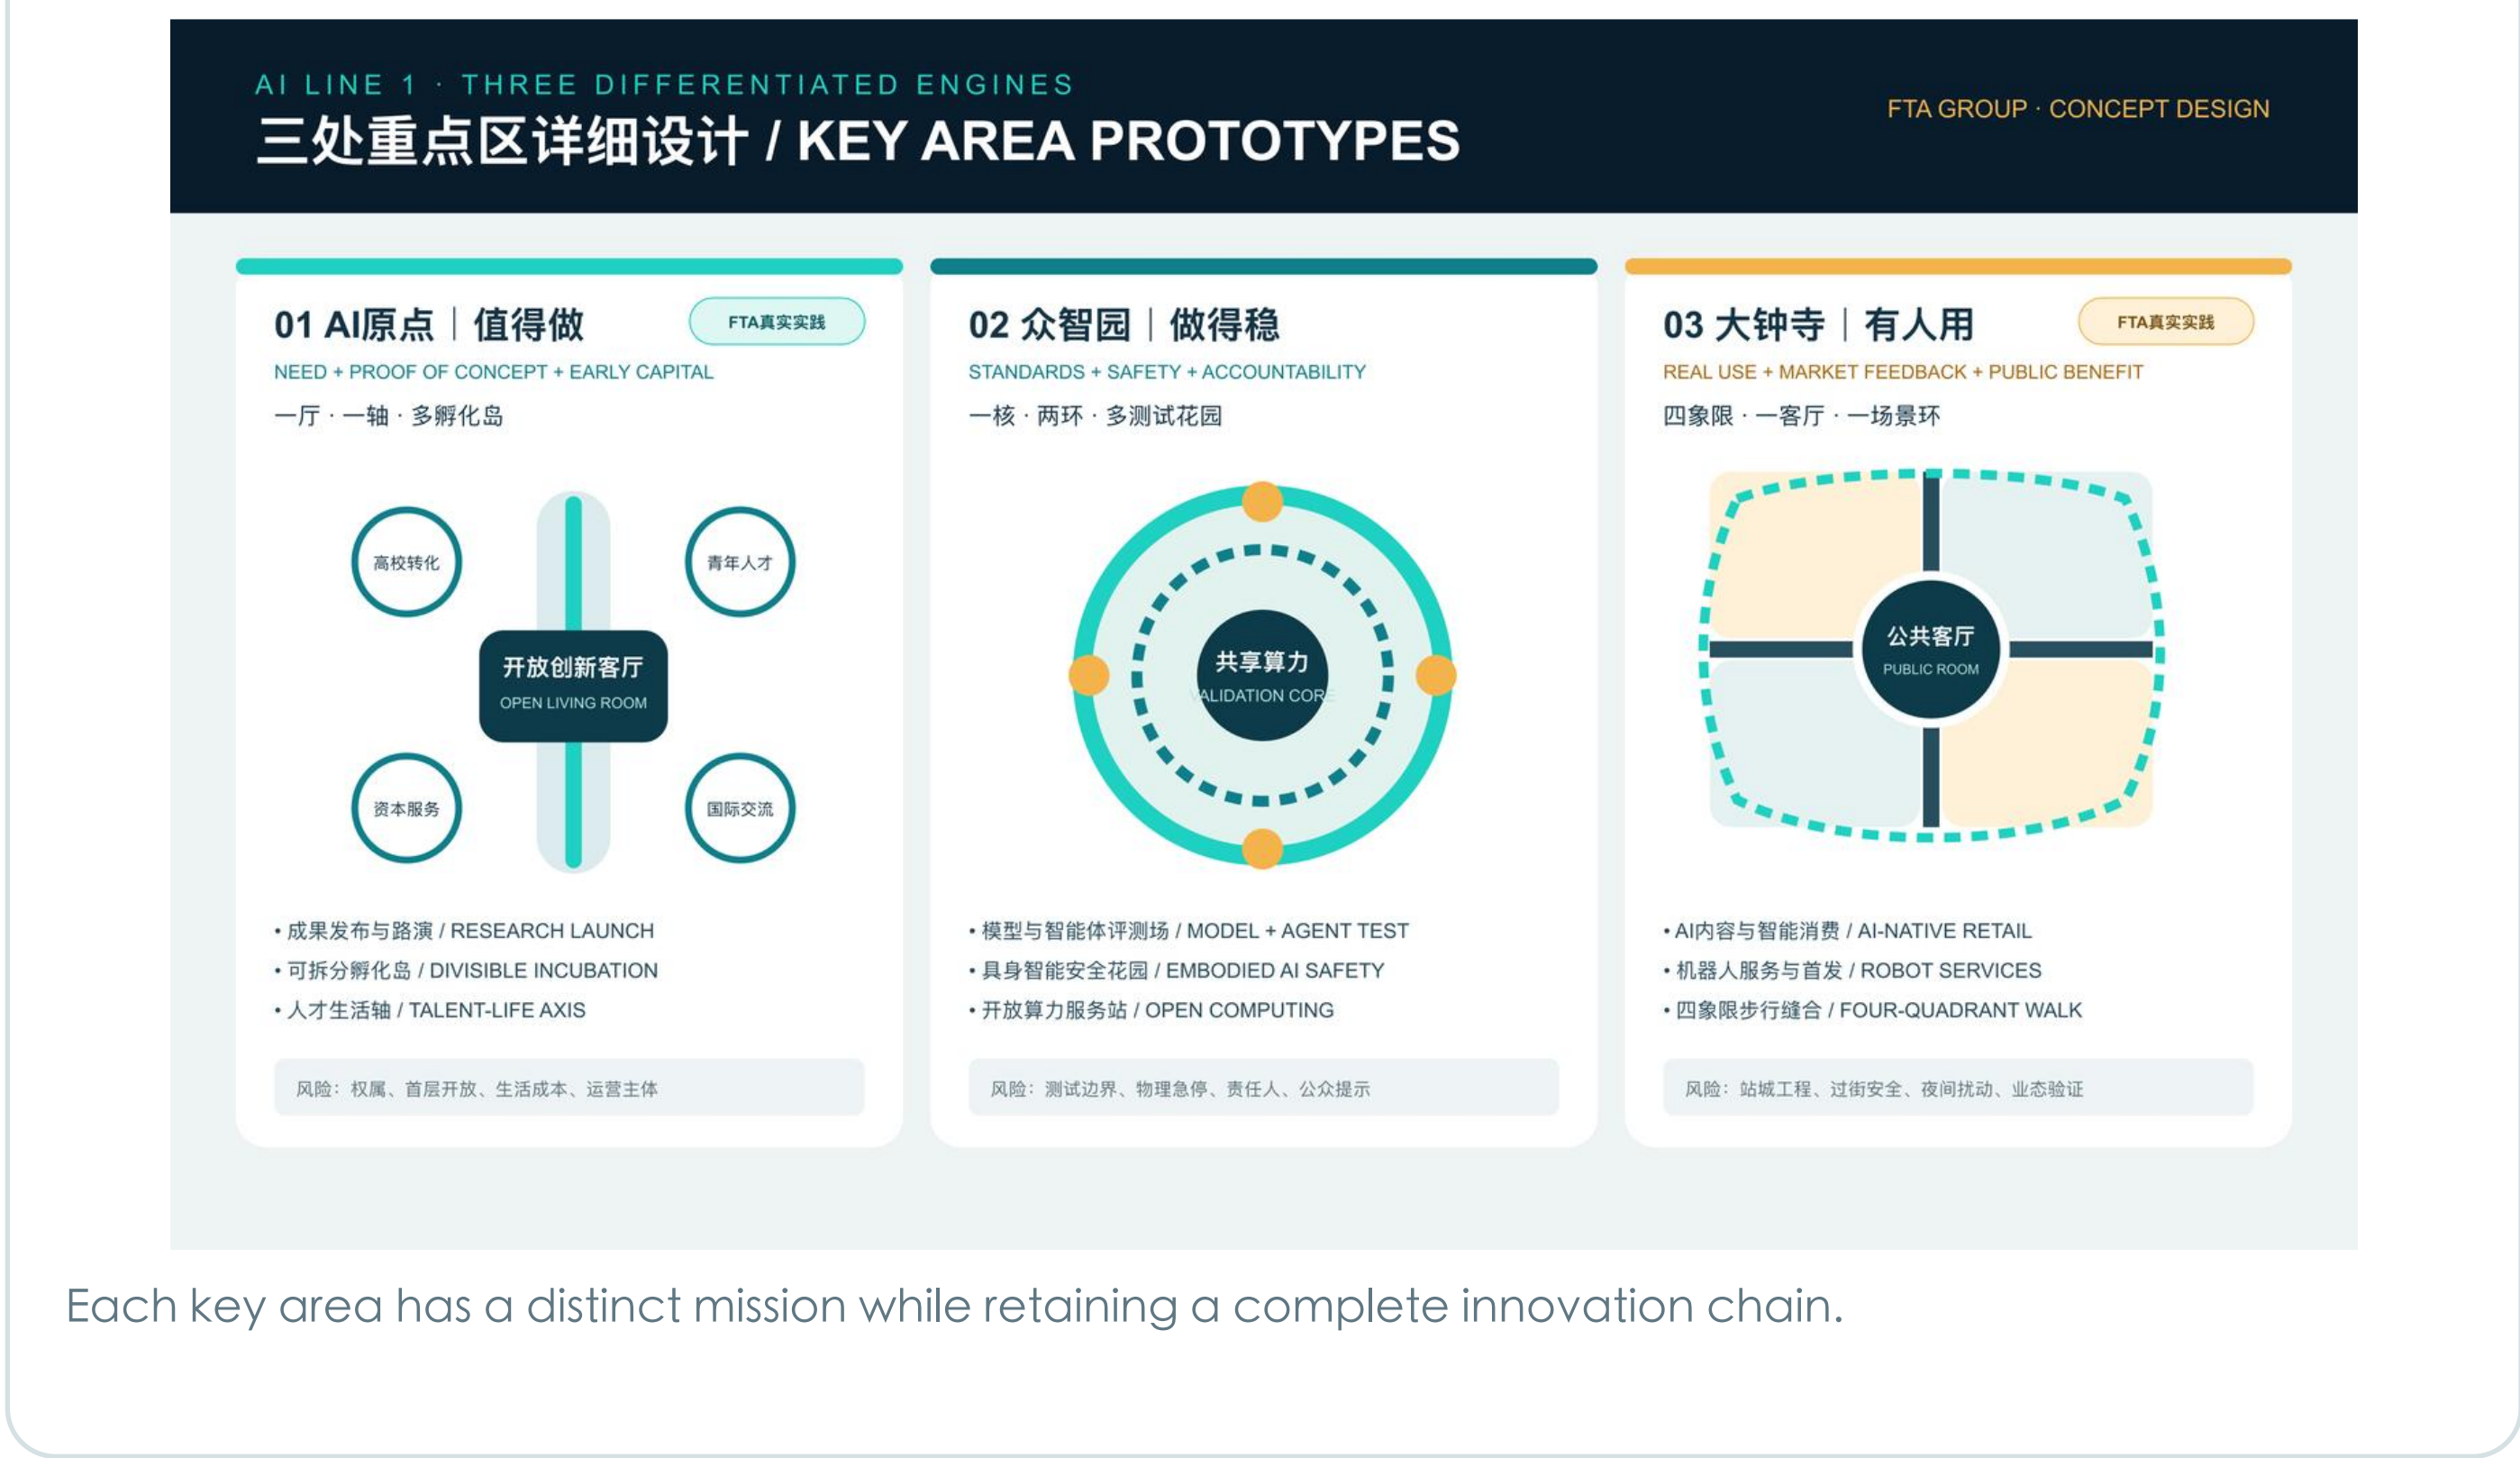

01 THREE-SCALE HANDOVER STRUCTURE

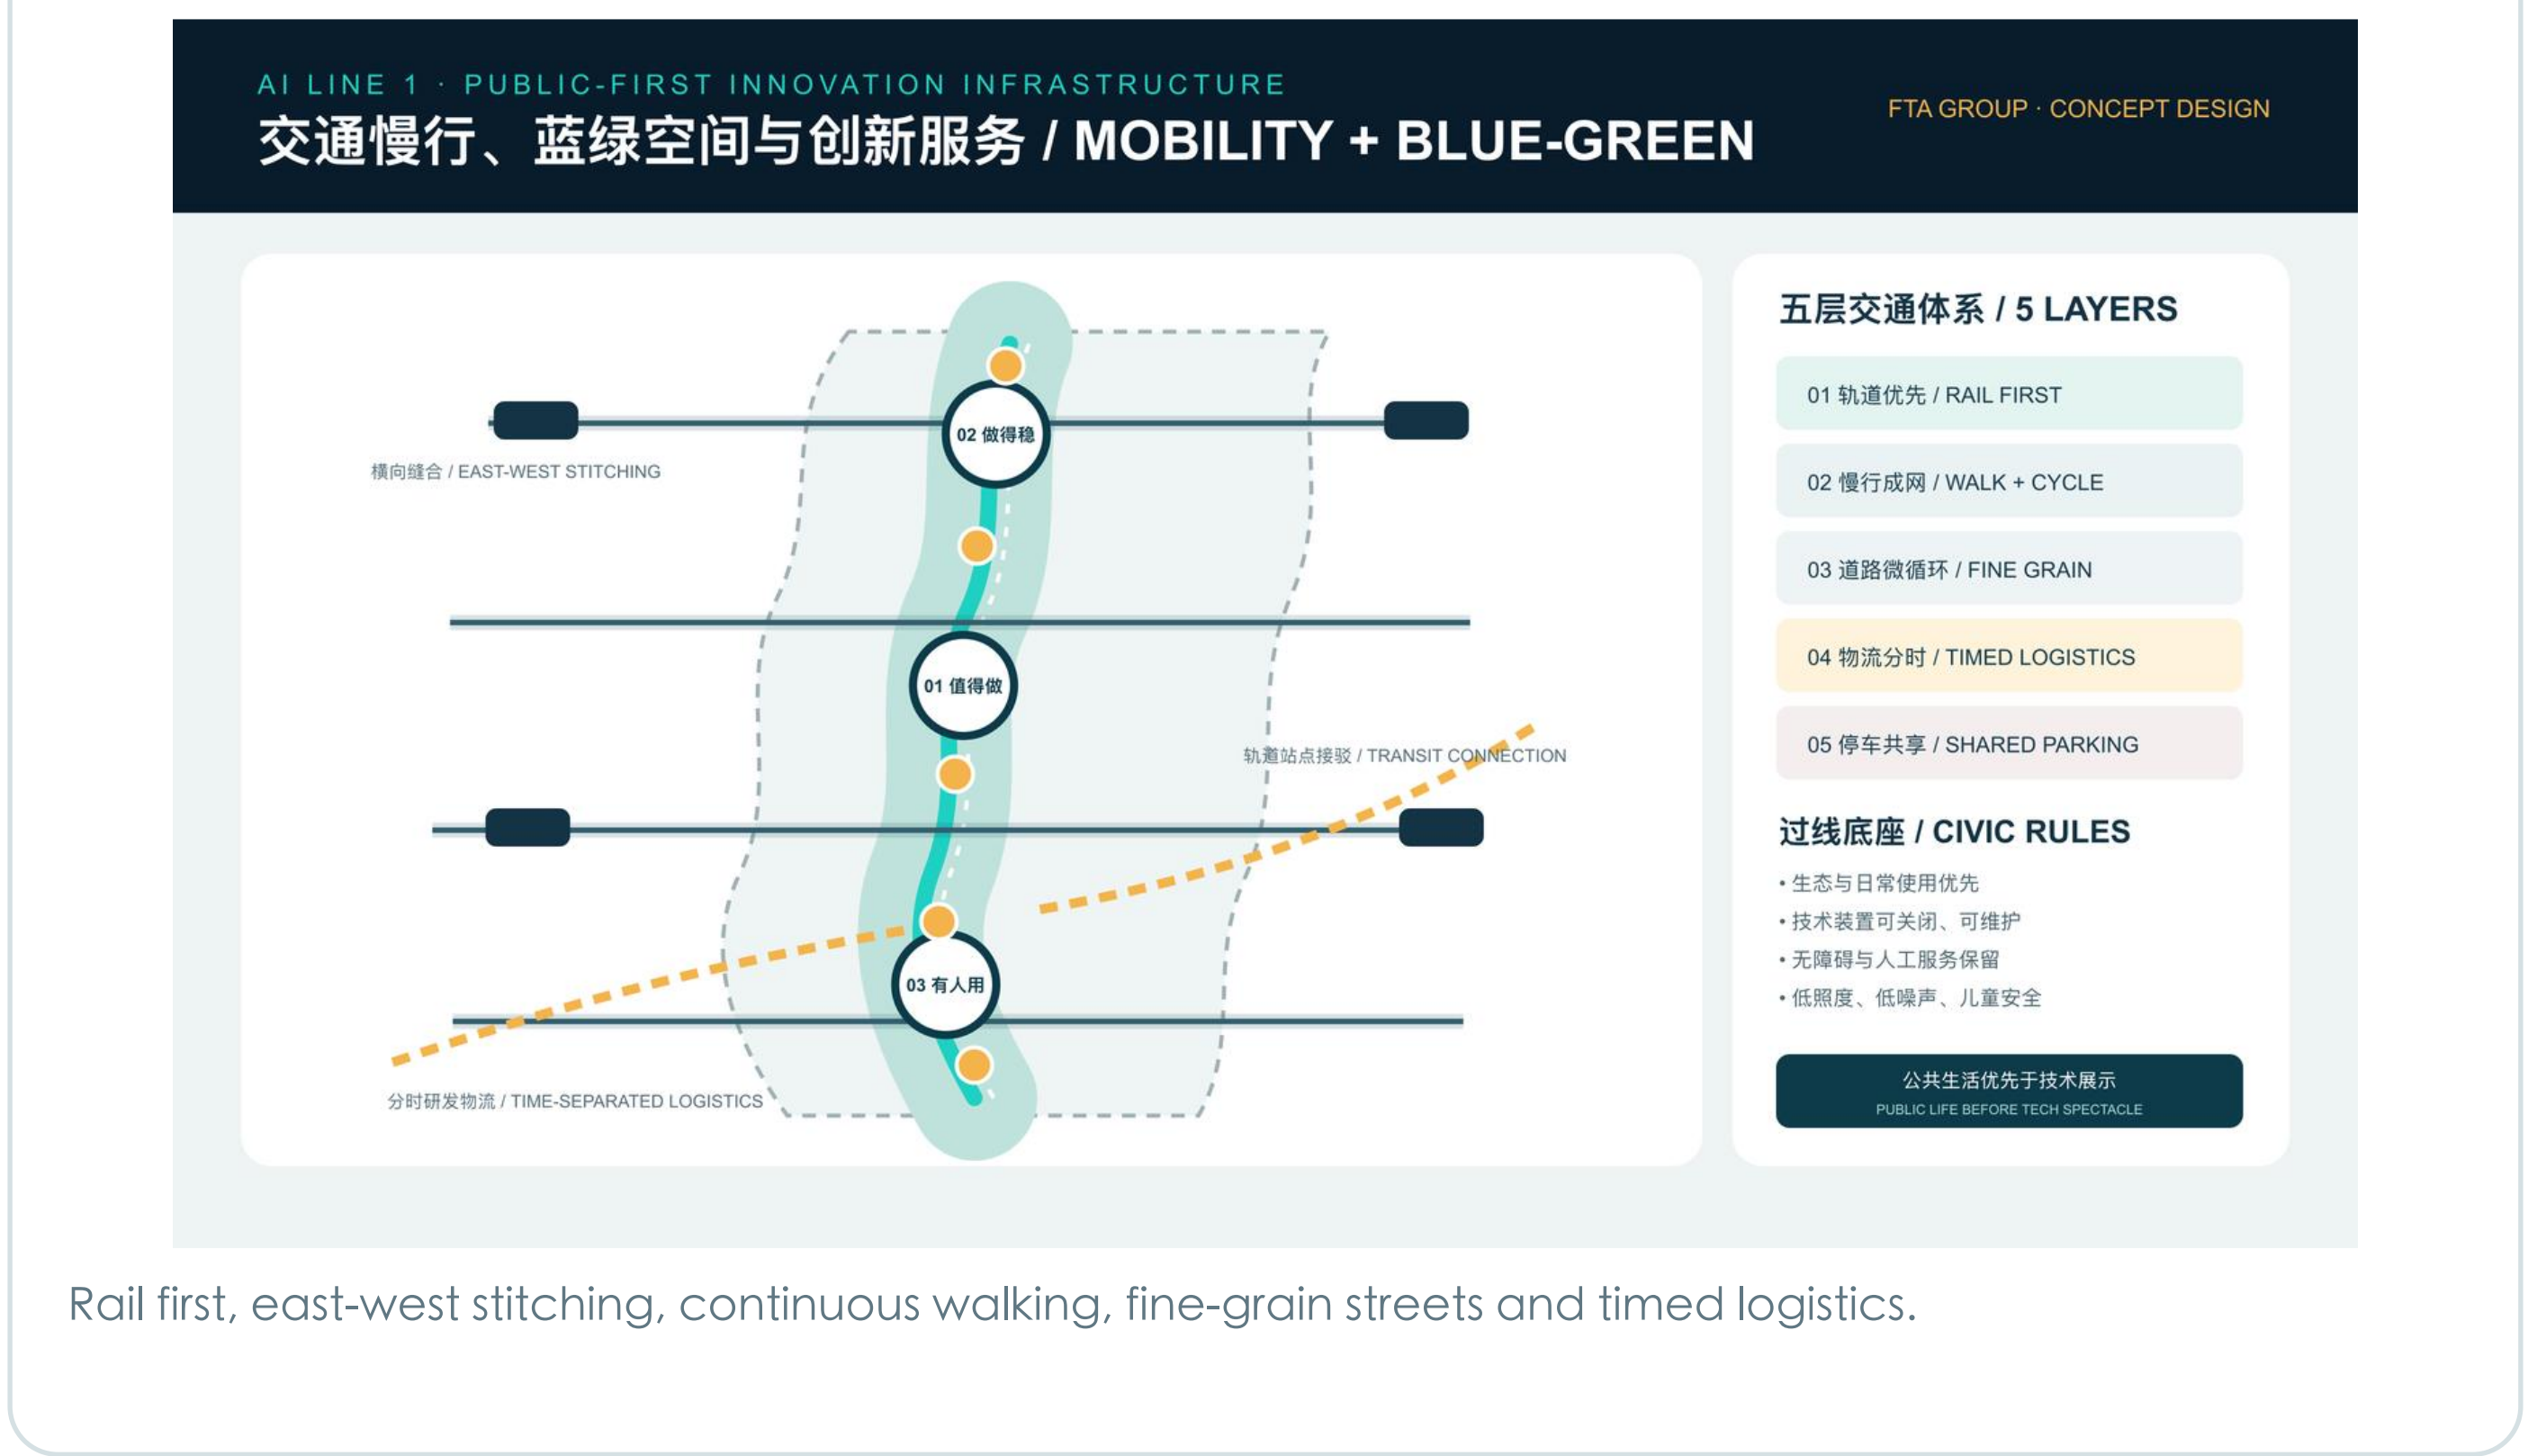

02 LAND-USE TOPOLOGY + THREE AREAS / TWO WINGS

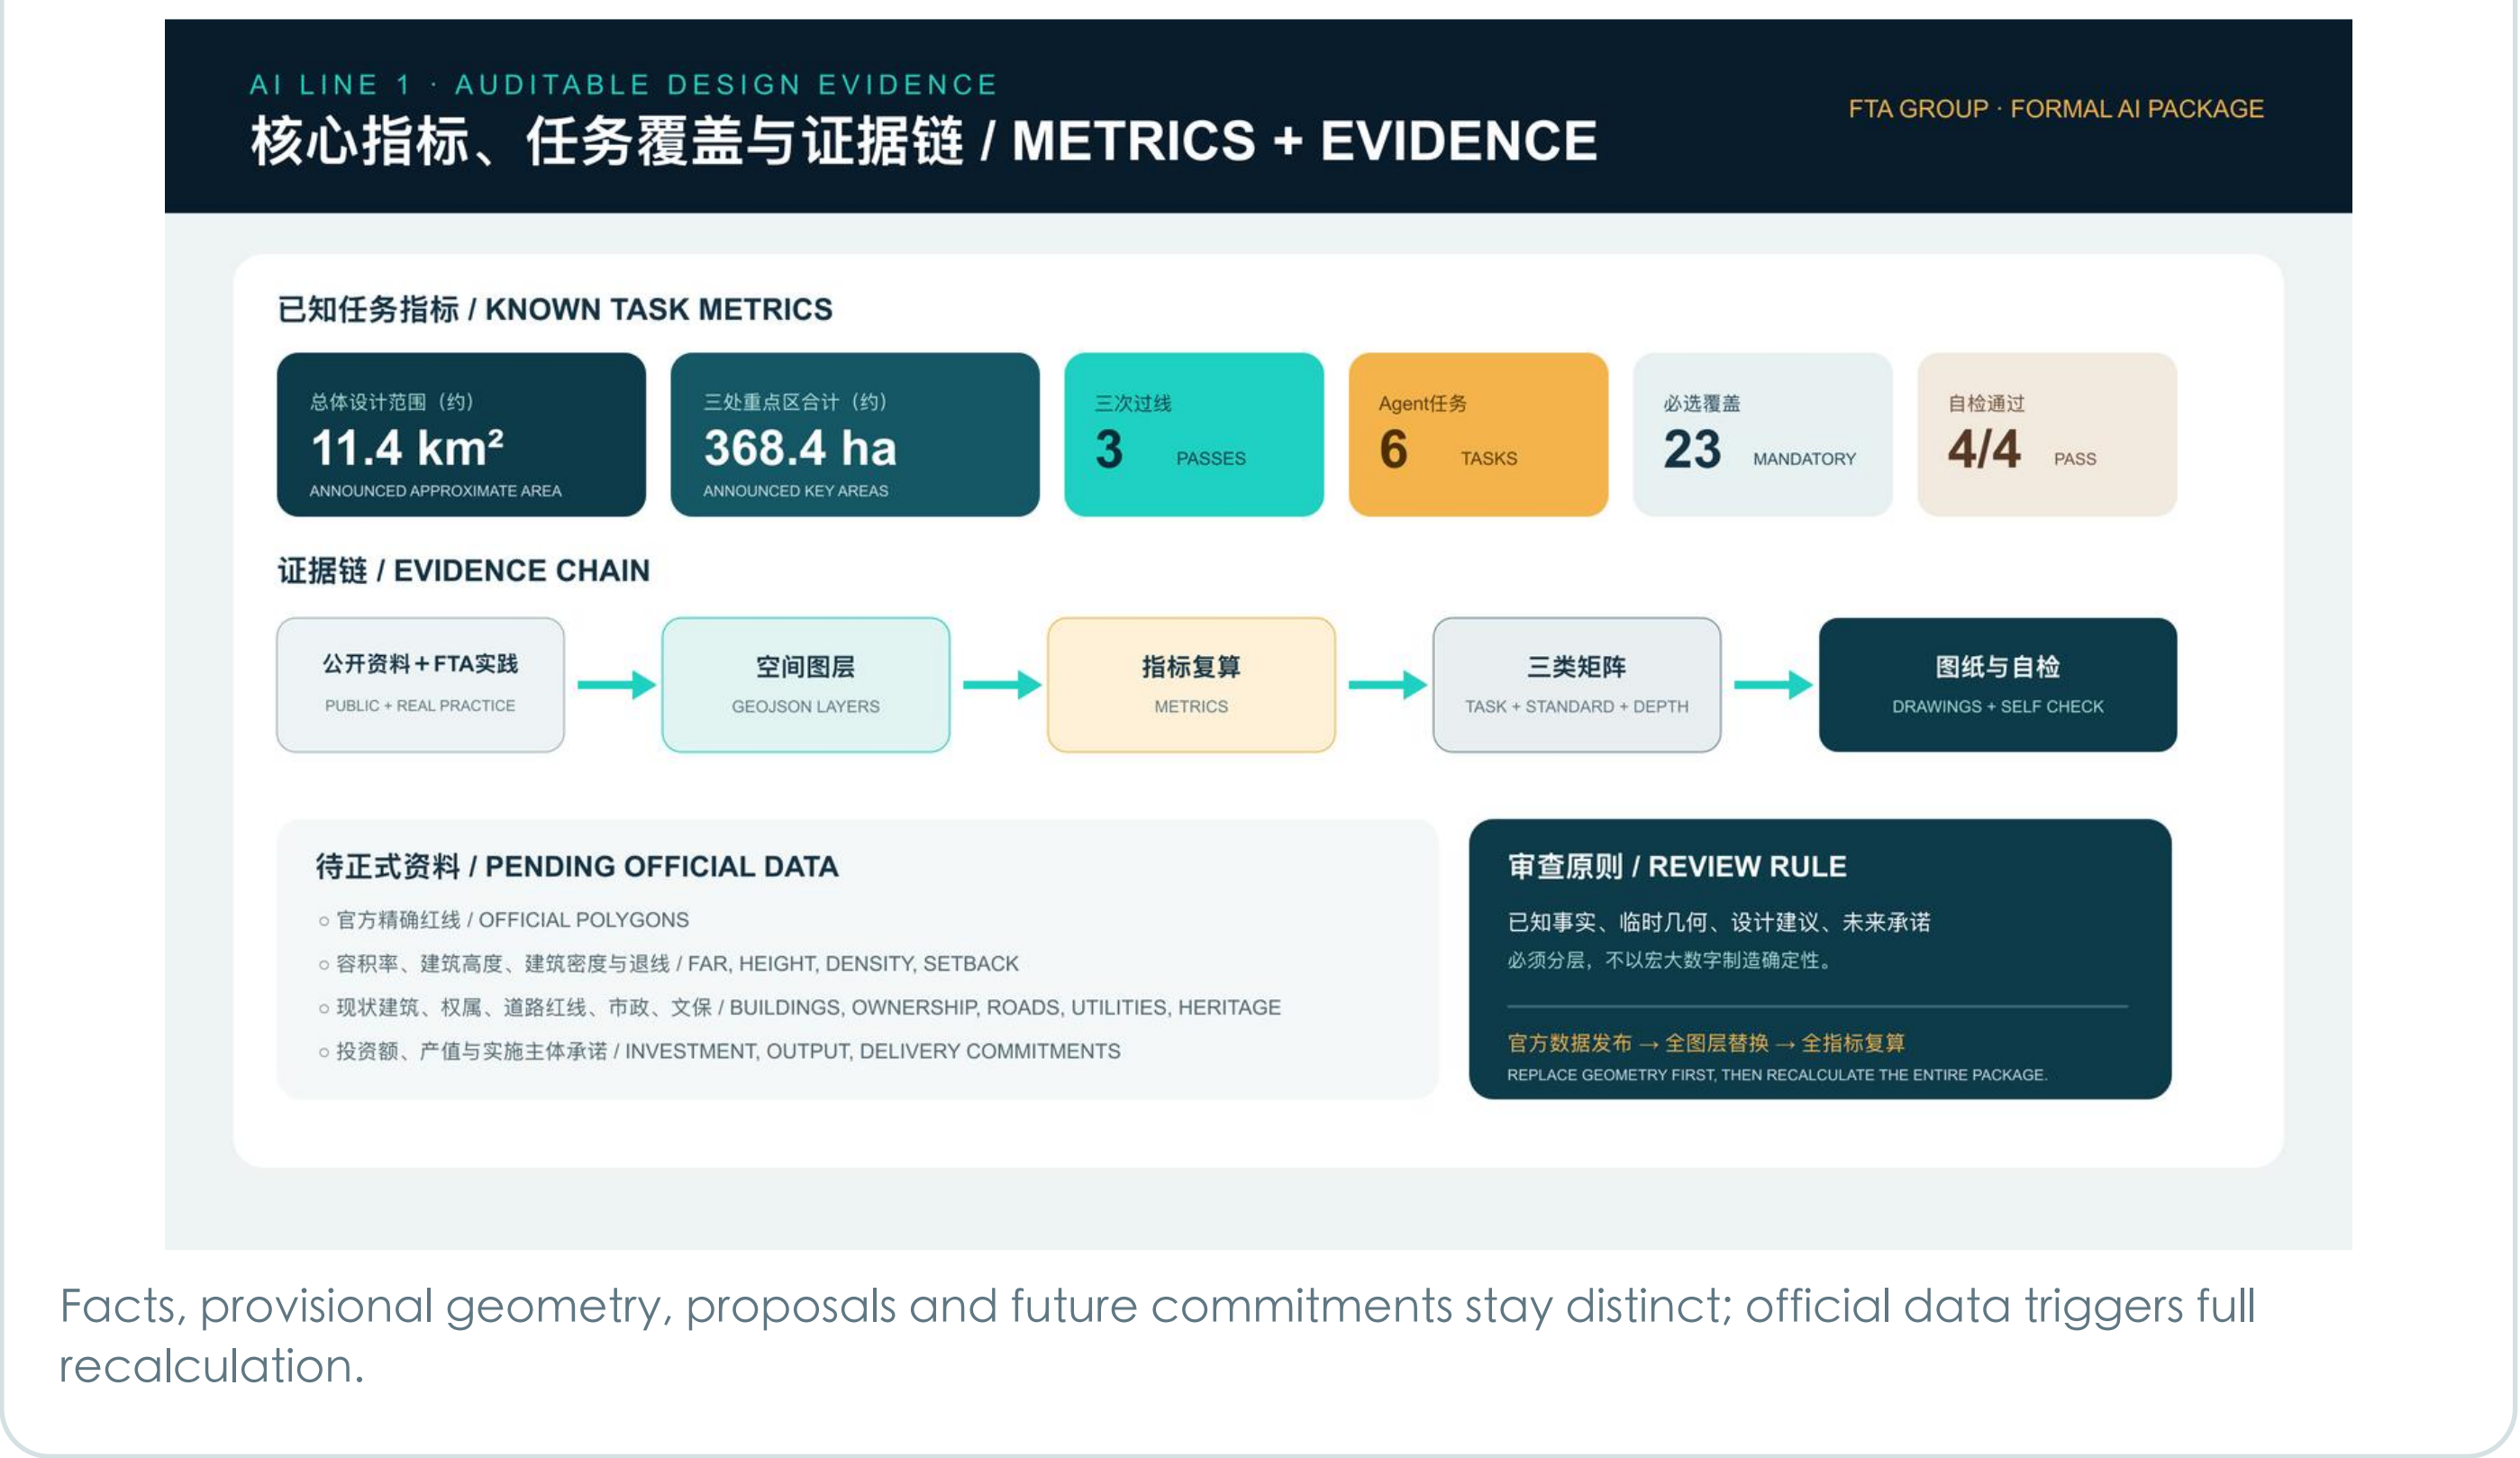

03 KEY AREAS + PUBLIC INNOVATION SPINE

04 TRANSIT, STREETS AND ACTIVE MOBILITY

05 METRICS + EVIDENCE STATUS

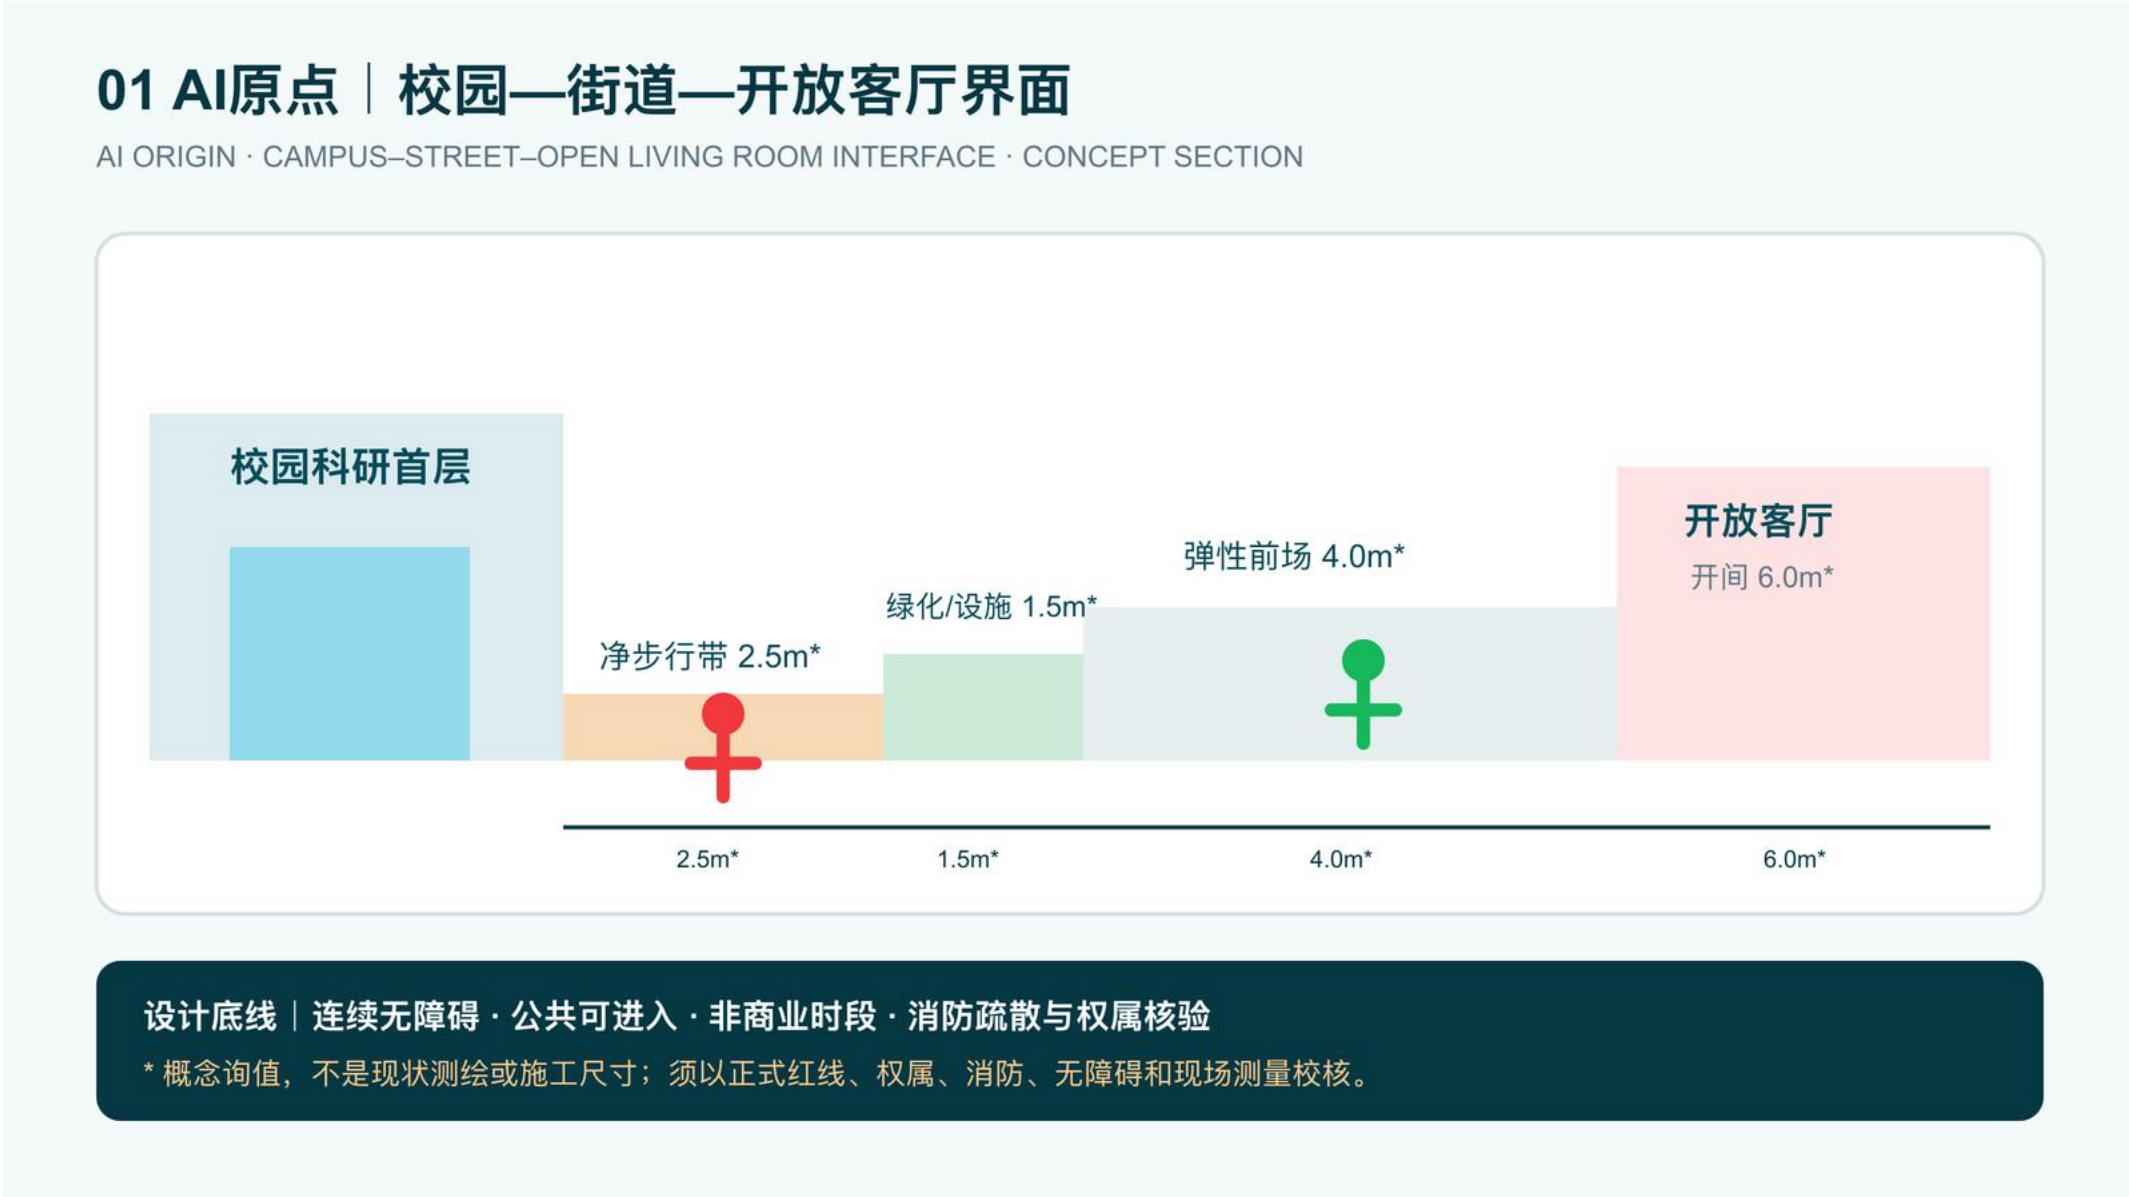

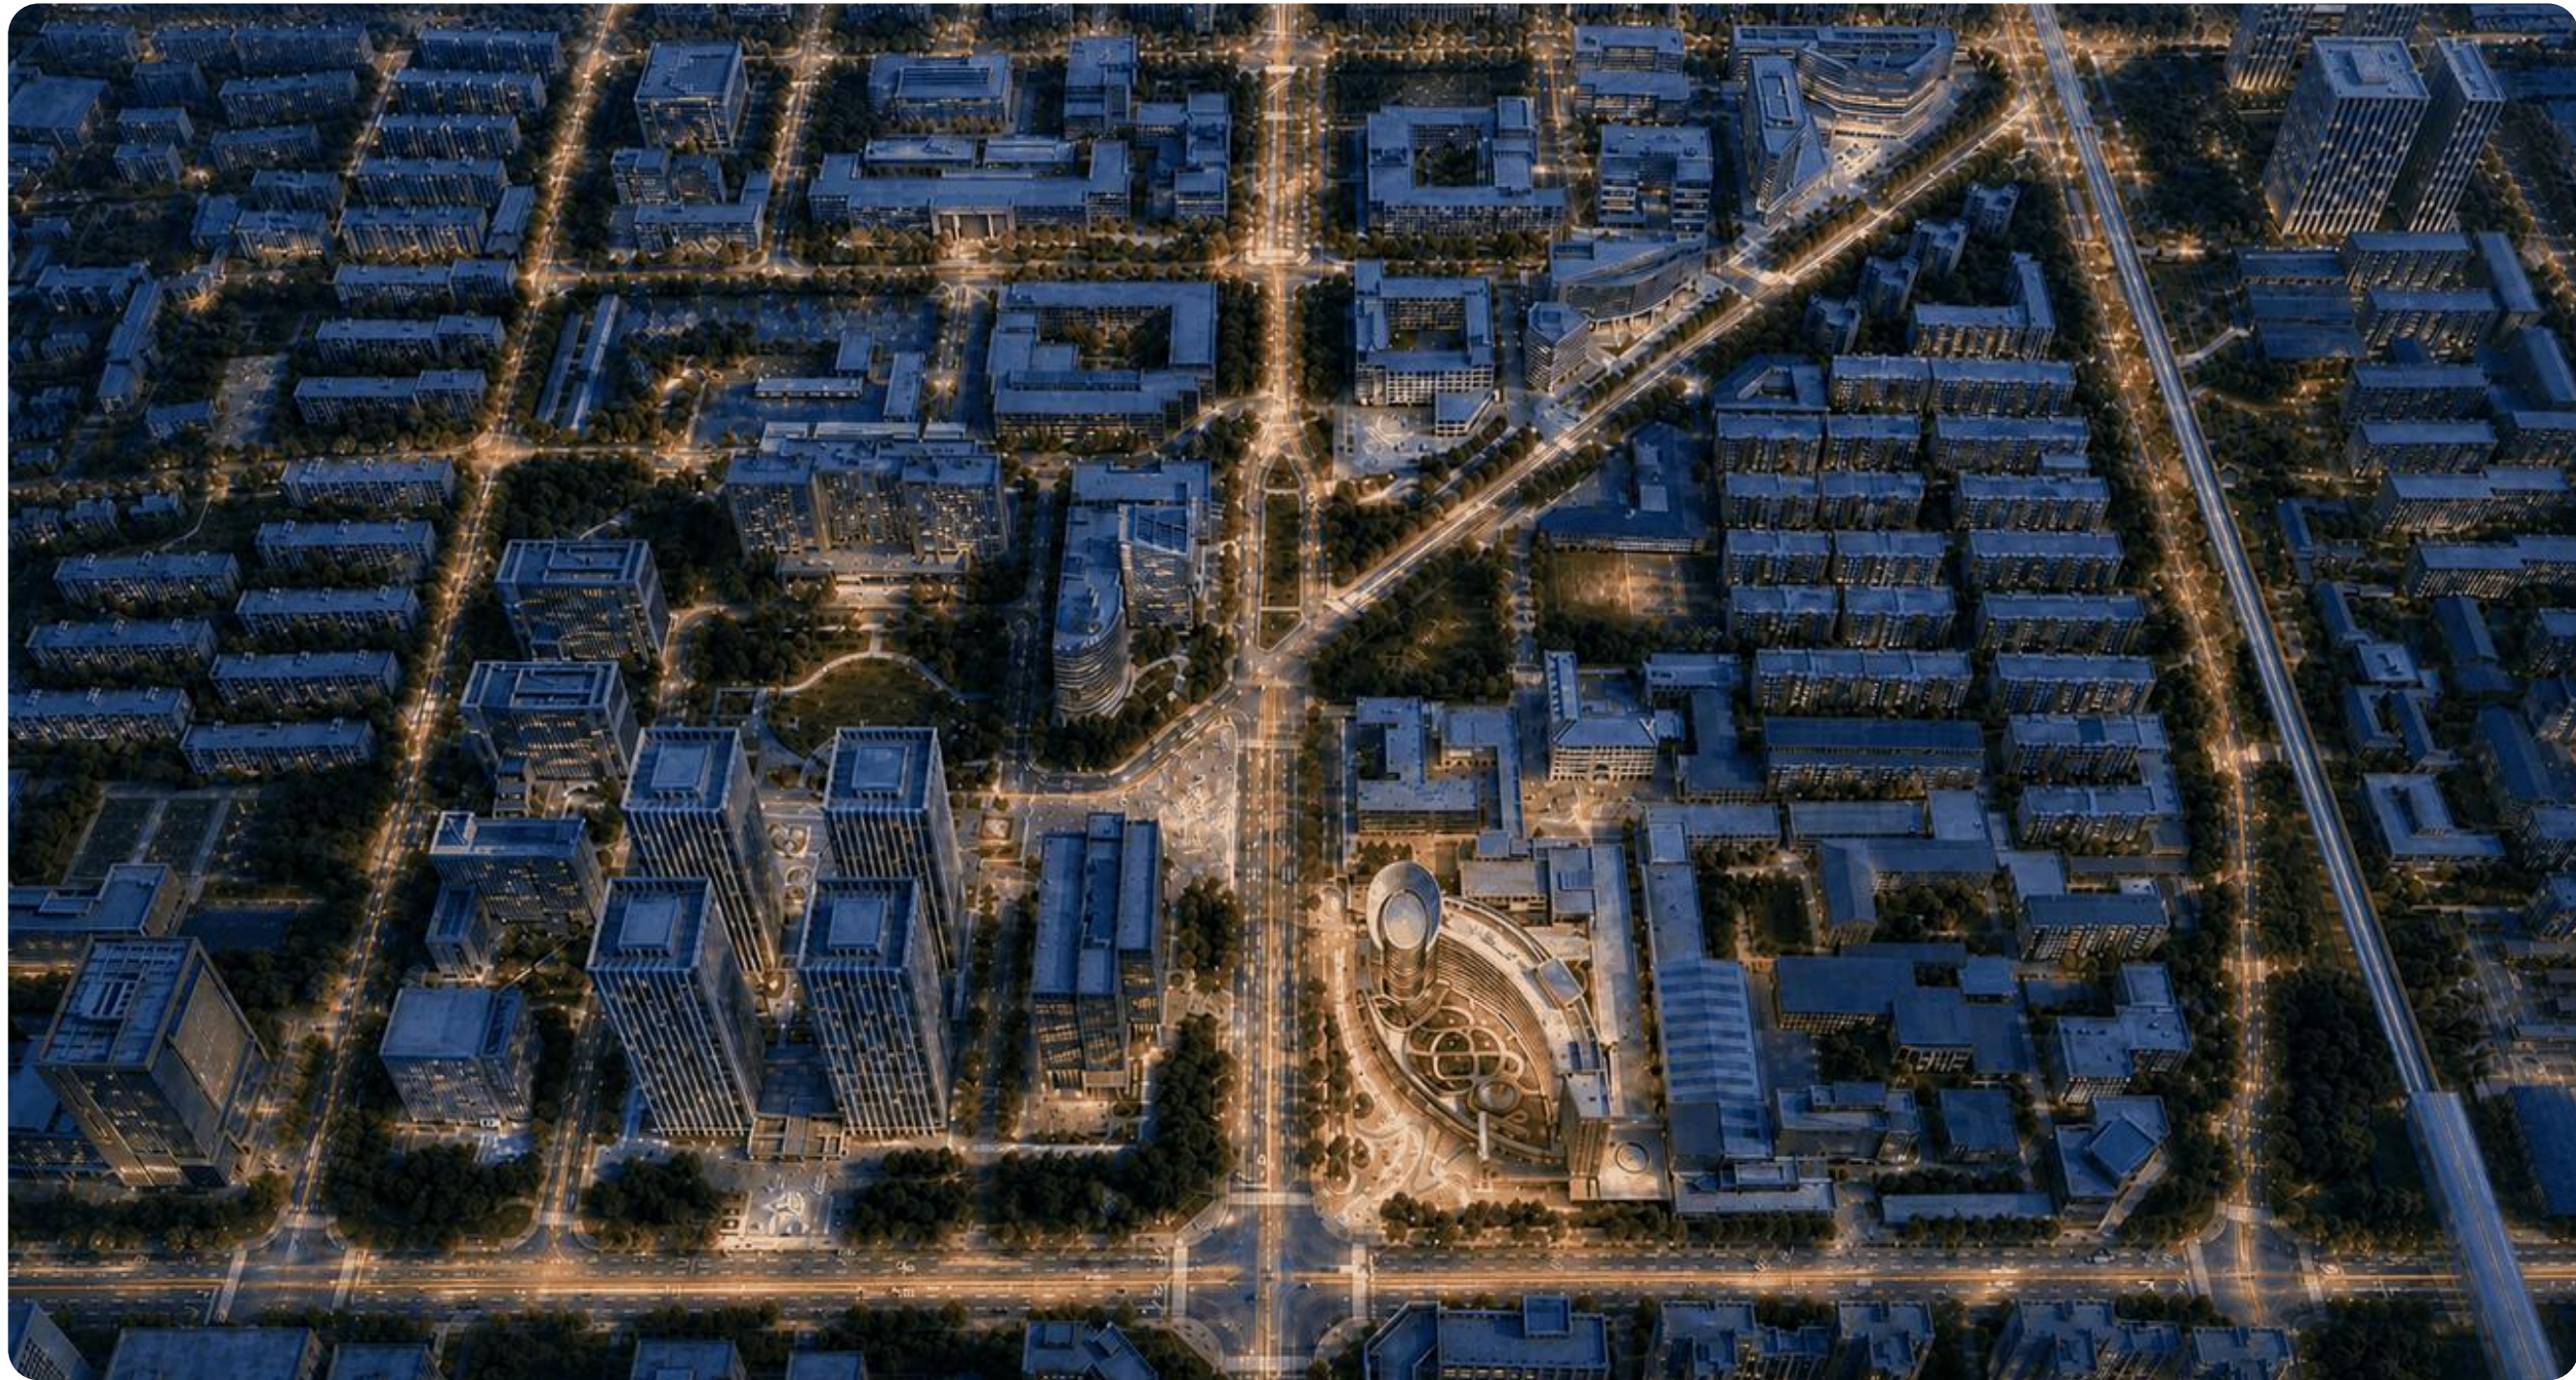

THREE KEY AREAS: DISTINCT URBAN ROLES ON ONE EVIDENCE CHAIN

From origination to standards and safety validation, then real market and public-use feedback.

AI ORIGIN COMMUNITY

ORIGINATION + YOUNG ENTREPRENEURSHIP

- 1 A low-impact open living room links campuses, streets and proof-of-concept services.
- 2 Showcase, mentors and early capital become bookable shared interfaces.
- 3 Test a 90-day living-room and proof-of-concept service before consolidation.

Proposed mission: origination | Before start: site permission, data notice, liability cover and human complaint route.

ZHONGZHIYUAN

STANDARDS, SAFETY + DEVELOPER ECOSYSTEM

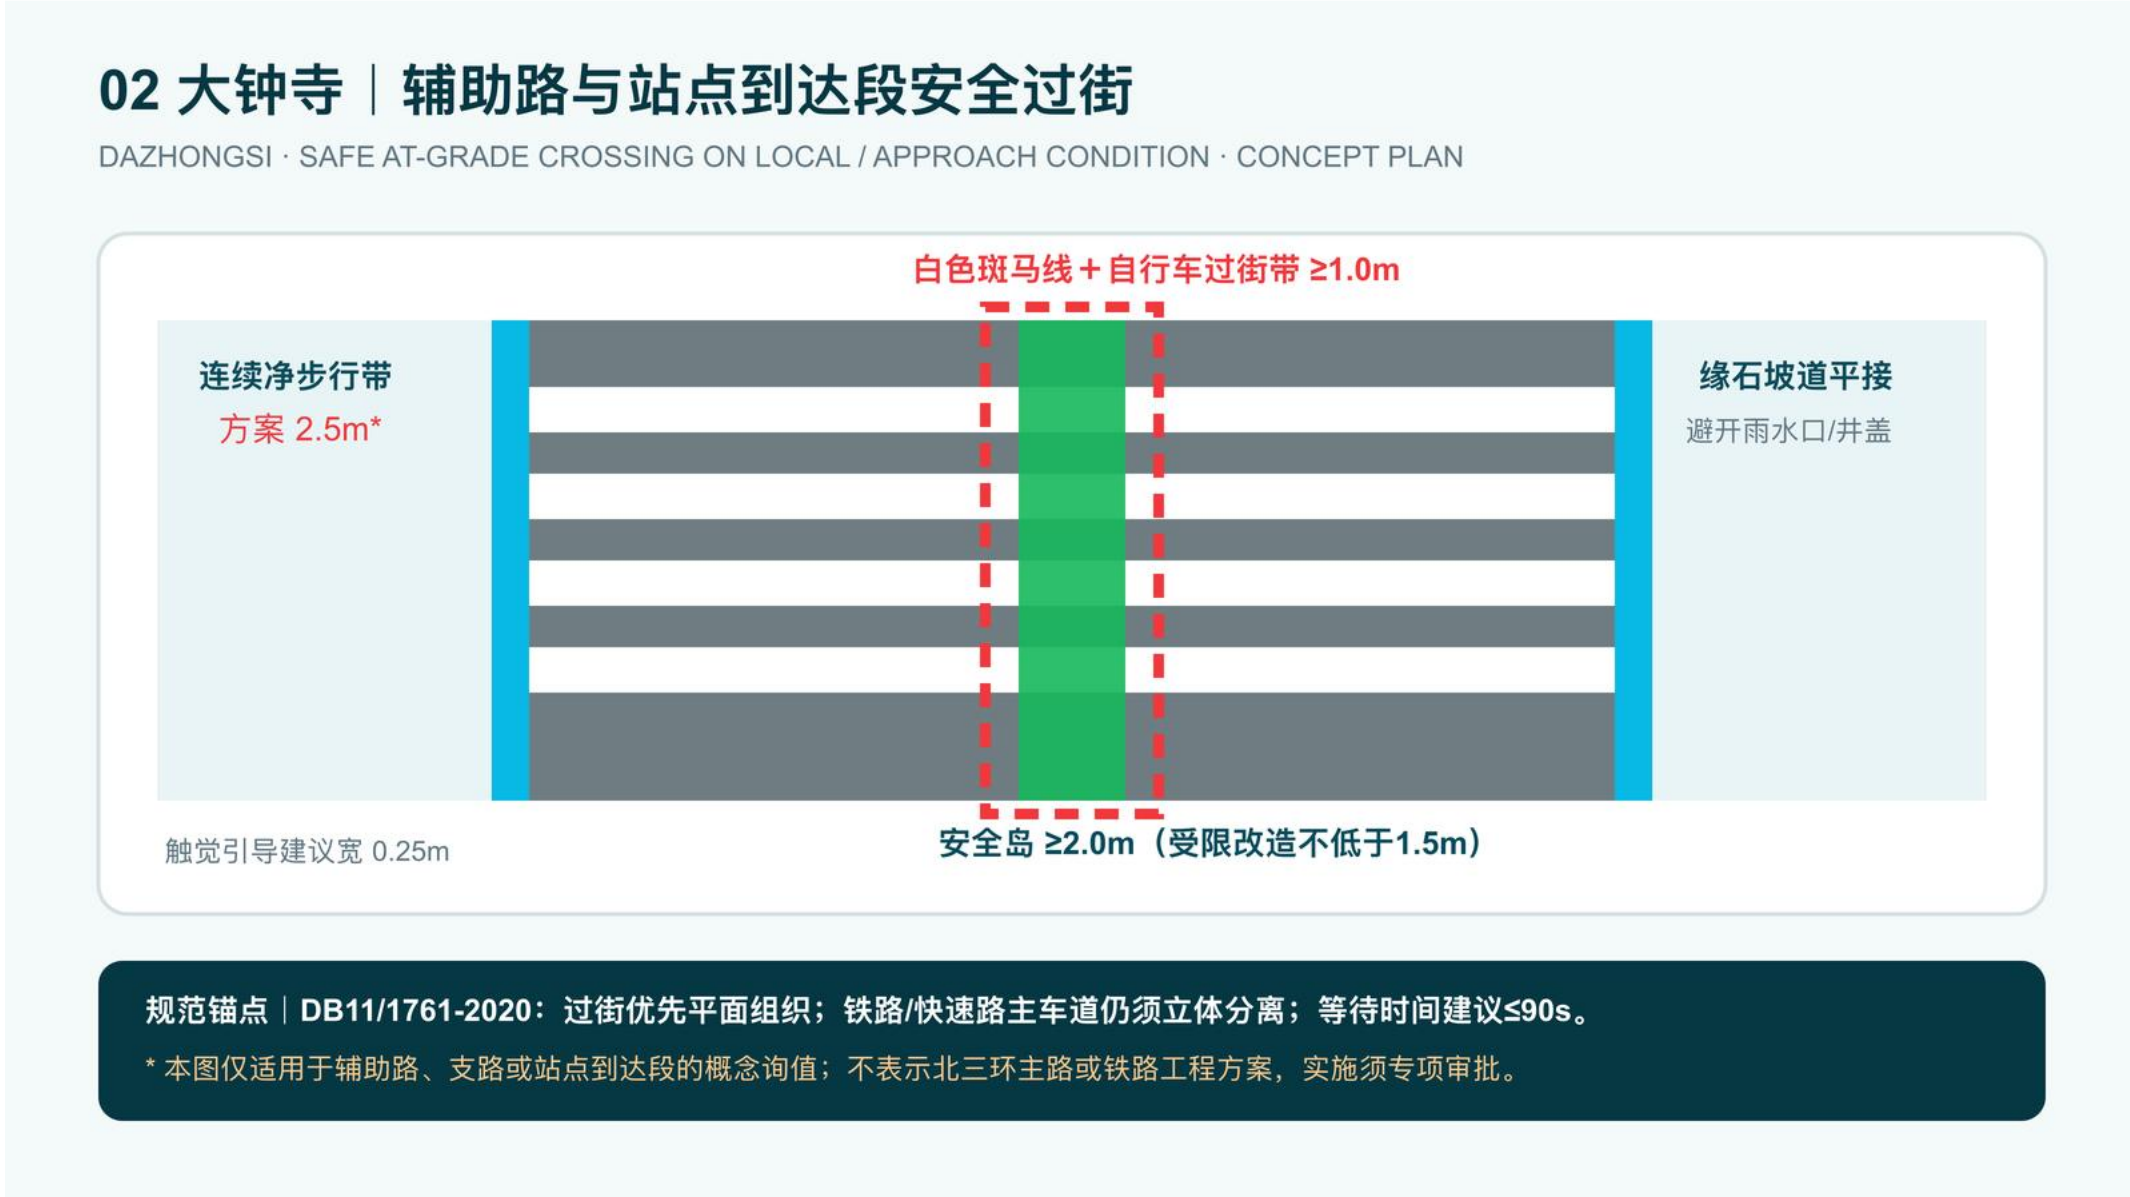

- 1 A shared enablement center connects evaluation, computing, compliance and developer services.
- 2 A bounded test garden provides physical stop, bypass and observation interfaces.
- 3 The 90-day gate requires 30 governed tests, 100% emergency-stop success and zero uncontrolled breach.

Proposed mission: public validation | Before start: enclosure, fire safety, equipment insurance, safety lead and exit protocol.

DAZHONGSI

AI-NATIVE LAUNCH + URBAN APPLICATION

- 1 Active ground floors, continuous walking and innovation content create a market interface.
- 2 A hard-constraint gate rejects an irreversible Third Ring structure and selects a near-term arrival prototype.
- 3 The 90-day gate requires repeat use, zero major safety incident and closed complaints.

Proposed mission: real application | Before start: road/site permission, T0 baseline, transport review, insurance and stop authority.

TWELVE GOVERNED AI SCENARIOS: EXIT-READY PUBLIC SERVICE UNITS, NOT A DEVICE LIST

Every scenario binds a real problem, users, space, data boundary, human accountability, non-AI access and stop conditions.

05 GRACEFUL DEGRADATION

06 STOP CONDITION

THREE PASSES ALLOCATE RESOURCES

P1

REAL PROBLEM?

P2

SAFE + RELIABLE?

P3

REPEATEDLY USED?

PASS: CONSOLIDATE / SCALE FAIL: REDESIGN / DEGRADE / EXIT

OPERATE FIRST, CONSOLIDATE THROUGH SPACE: 90-DAY PILOTS, ACCOUNTABILITY GATES AND RISK LEDGER

Delivery is not a promise of major construction; accountability, evidence, cost and exit conditions precede launch.

01 / 0–6 MONTHS
PROTOTYPE SEASON

One reversible prototype per area establishes T0 baselines, accountability gates and real-user evidence.

02 / 6–18 MONTHS
NETWORK SEASON

Connect validation, incubation, shared services, public scenarios and a cross-area project ledger.

03 / 18–36 MONTHS
BRAND SEASON

Build recurring communities and annual Five Highs review; publish reusable scenario and governance protocols.

THREE PRE-REGISTERED 90-DAY PILOTS

AI ORIGIN LIVING ROOM + POC

D90 PASS

≥ 6 teams; ≥ 60 independent users; D90 repeat use ≥ 40%; zero major privacy/safety incident.

BEFORE START

Site permission, budget, data notice, public liability cover and human complaint process.

DAZHONGSI ACTIVE GROUND FLOOR + WALKING

D90 PASS

≥ 200 trip observations; ≥ 80 valid responses; repeat visit ≥ 30%; zero severe conflict.

BEFORE START

Road/site permission, T0 baseline, transport review, event plan, insurance and stop authority.

ZHONGZHIYUAN BOUNDED TEST GARDEN

D90 PASS

≥ 30 governed tests; ≥ 5 teams; emergency-stop success 100%; zero uncontrolled breach.

BEFORE START

Enclosure, fire/emergency review, equipment insurance, one safety lead and exit protocol.

RACI ACCOUNTABILITY GATE | NO SIGN-OFF, NO START

R / RESPONSIBLE

Authorized site operations, professional service and test teams

A / ACCOUNTABLE

One project lead appointed by the authorized site/operating body

C / CONSULTED

Transport, fire, accessibility, data, insurance, users and public representatives

I / INFORMED

Neighbors, participating teams, public-space users and regulatory interfaces

FTA internal commitment: 施道红, 刘小华, 王继春 and 金苏 participate across the full cycle and attend key gates; AI, design, planning and financial experts mobilize on demand. Strategic-investment status carries no preset internal person-day cap. 施道红 is designated signatory; external authority remains excluded.

DATA, SOURCES + RIGHTS CONTROLS

L0 PUBLIC FACT

Official notices/law, cited within allowed use

L1 PROVISIONAL GEOMETRY

Concept generation, visualization and low-confidence calculation only

L2 FTA SELF-ATTESTED

Method/project-experience context; not proof of client authority or approval

L3 RESTRICTED / EXCLUDED

Client data, contracts, internal originals and non-public parameters are excluded

Twenty-three AI-assisted concept and persona visuals plus one FTA-supplied project image are disclosed; concept people are fictional. Font, logo, public-source and third-party rights boundaries are recorded in the copyright statement and sources.json.
