

Find who is left out first

Space and algorithms share personas, tasks and review windows

1

Two scorecards

detour, wait and care time / error, ranking, price and appeal

2

One admission rule

failure on either side blocks expansion

3

One honest boundary

provisional geometry supports concept, display and internal checks only

Find who is left out before deciding where AI belongs.

12 scenarios • 4 industry tests • 3 key areas • 6 personas

Three key areas and two scorecards

test • co-design • daily parity • continue / modify / withdraw

SIX DAILY SECTIONS

Six daily sections, not another smart axis

Codes are preserved; conceptual functions are not statutory zoning

Baseline → reversible trial → measure gaps → human review → public retrospective → expand / modify / withdraw

PROVISIONAL ROUGH GEOMETRY | NOT AN OFFICIAL REDLINE | VERIFY ALL LOCATIONS

F02 • 2026-08-10

THREE TESTING GRADIENTS

Three key areas: test - co-design - daily parity

Each key area has a verified, correctable and withdrawable honour node

PROVISIONAL ROUGH GEOMETRY | NOT AN OFFICIAL REDLINE | VERIFY ALL LOCATIONS

F03 • 2026-08-10

WELL LIT, NOT IDENTIFIED

Equal access at night: repair space before testing AI

Robots, shuttles and navigation retain emergency stop, staffed degradation and offline service

PROVISIONAL ROUGH GEOMETRY | NOT AN OFFICIAL REDLINE | VERIFY ALL LOCATIONS

F04 • 2026-08-10

EVIDENCE BEFORE PRECISION

Known, provisional and unknown - no false precision

D30 establishes baselines; insufficient samples never become a pass

PROVISIONAL ROUGH GEOMETRY | NOT AN OFFICIAL REDLINE | VERIFY ALL LOCATIONS

F05 • 2026-08-10
