

THE NEW HUNDRED TRADES

Urban Design for the Centennial Jing-Zhang AI Belt · Conceptual Suggestion

On a hundred-year-old line, the roster of trades has grown longer; the new trades must find their place on this street.

The nine-kilometre handscroll - opening north, closing south - one horizon line, level change at five points

Do not redo

The rail park opened in August 2026, connecting the full 9 km. This proposal does not redo the line; it thickens it at five points.

Flat by default

Section states are assigned by site condition, not composition. Lifting only for crossings, sinking only beside rail, stacking only where constraints are fewes t.

Growth ladder

Creating at the centre, Testing north, Market south. The 9 km spine is the co nveyor between rungs.

Sharing the frame

Dwelling and market at the deck centre, machines on the edge lane; ramps meet accessibility standards and are shared with wheeled robots.
