1909 Railway Signal Protocol → AI-Native Spatial Protocol
9km Jing-Zhang Green Corridor · 11.4km² Design Area · 368.6ha Three Core Zones

Reconstruct AI-Native Innovation Space with 1909 Railway Signal Protocol
The linear logic of the century-old Jing-Zhang Railway — connection, transmission, nodes, iteration — is translated into the flowing skeleton of data, computing power, talent and scenarios in the AI era.

MASTER PLAN Three Cores × One Axis × Two Wings

Using the Jing-Zhang Green Corridor as the main artery of AI innovation, with three cores forming composite modes of innovation, living and culture.
