

Jing-Zhang Civic Intelligence Loop

A walkable public baseline turns a six-step protocol, three task platforms and nine civic interfaces into a human-governed urban system

SIX-STEP CIVIC TASK PROTOCOL

1 PUBLIC BASELINE

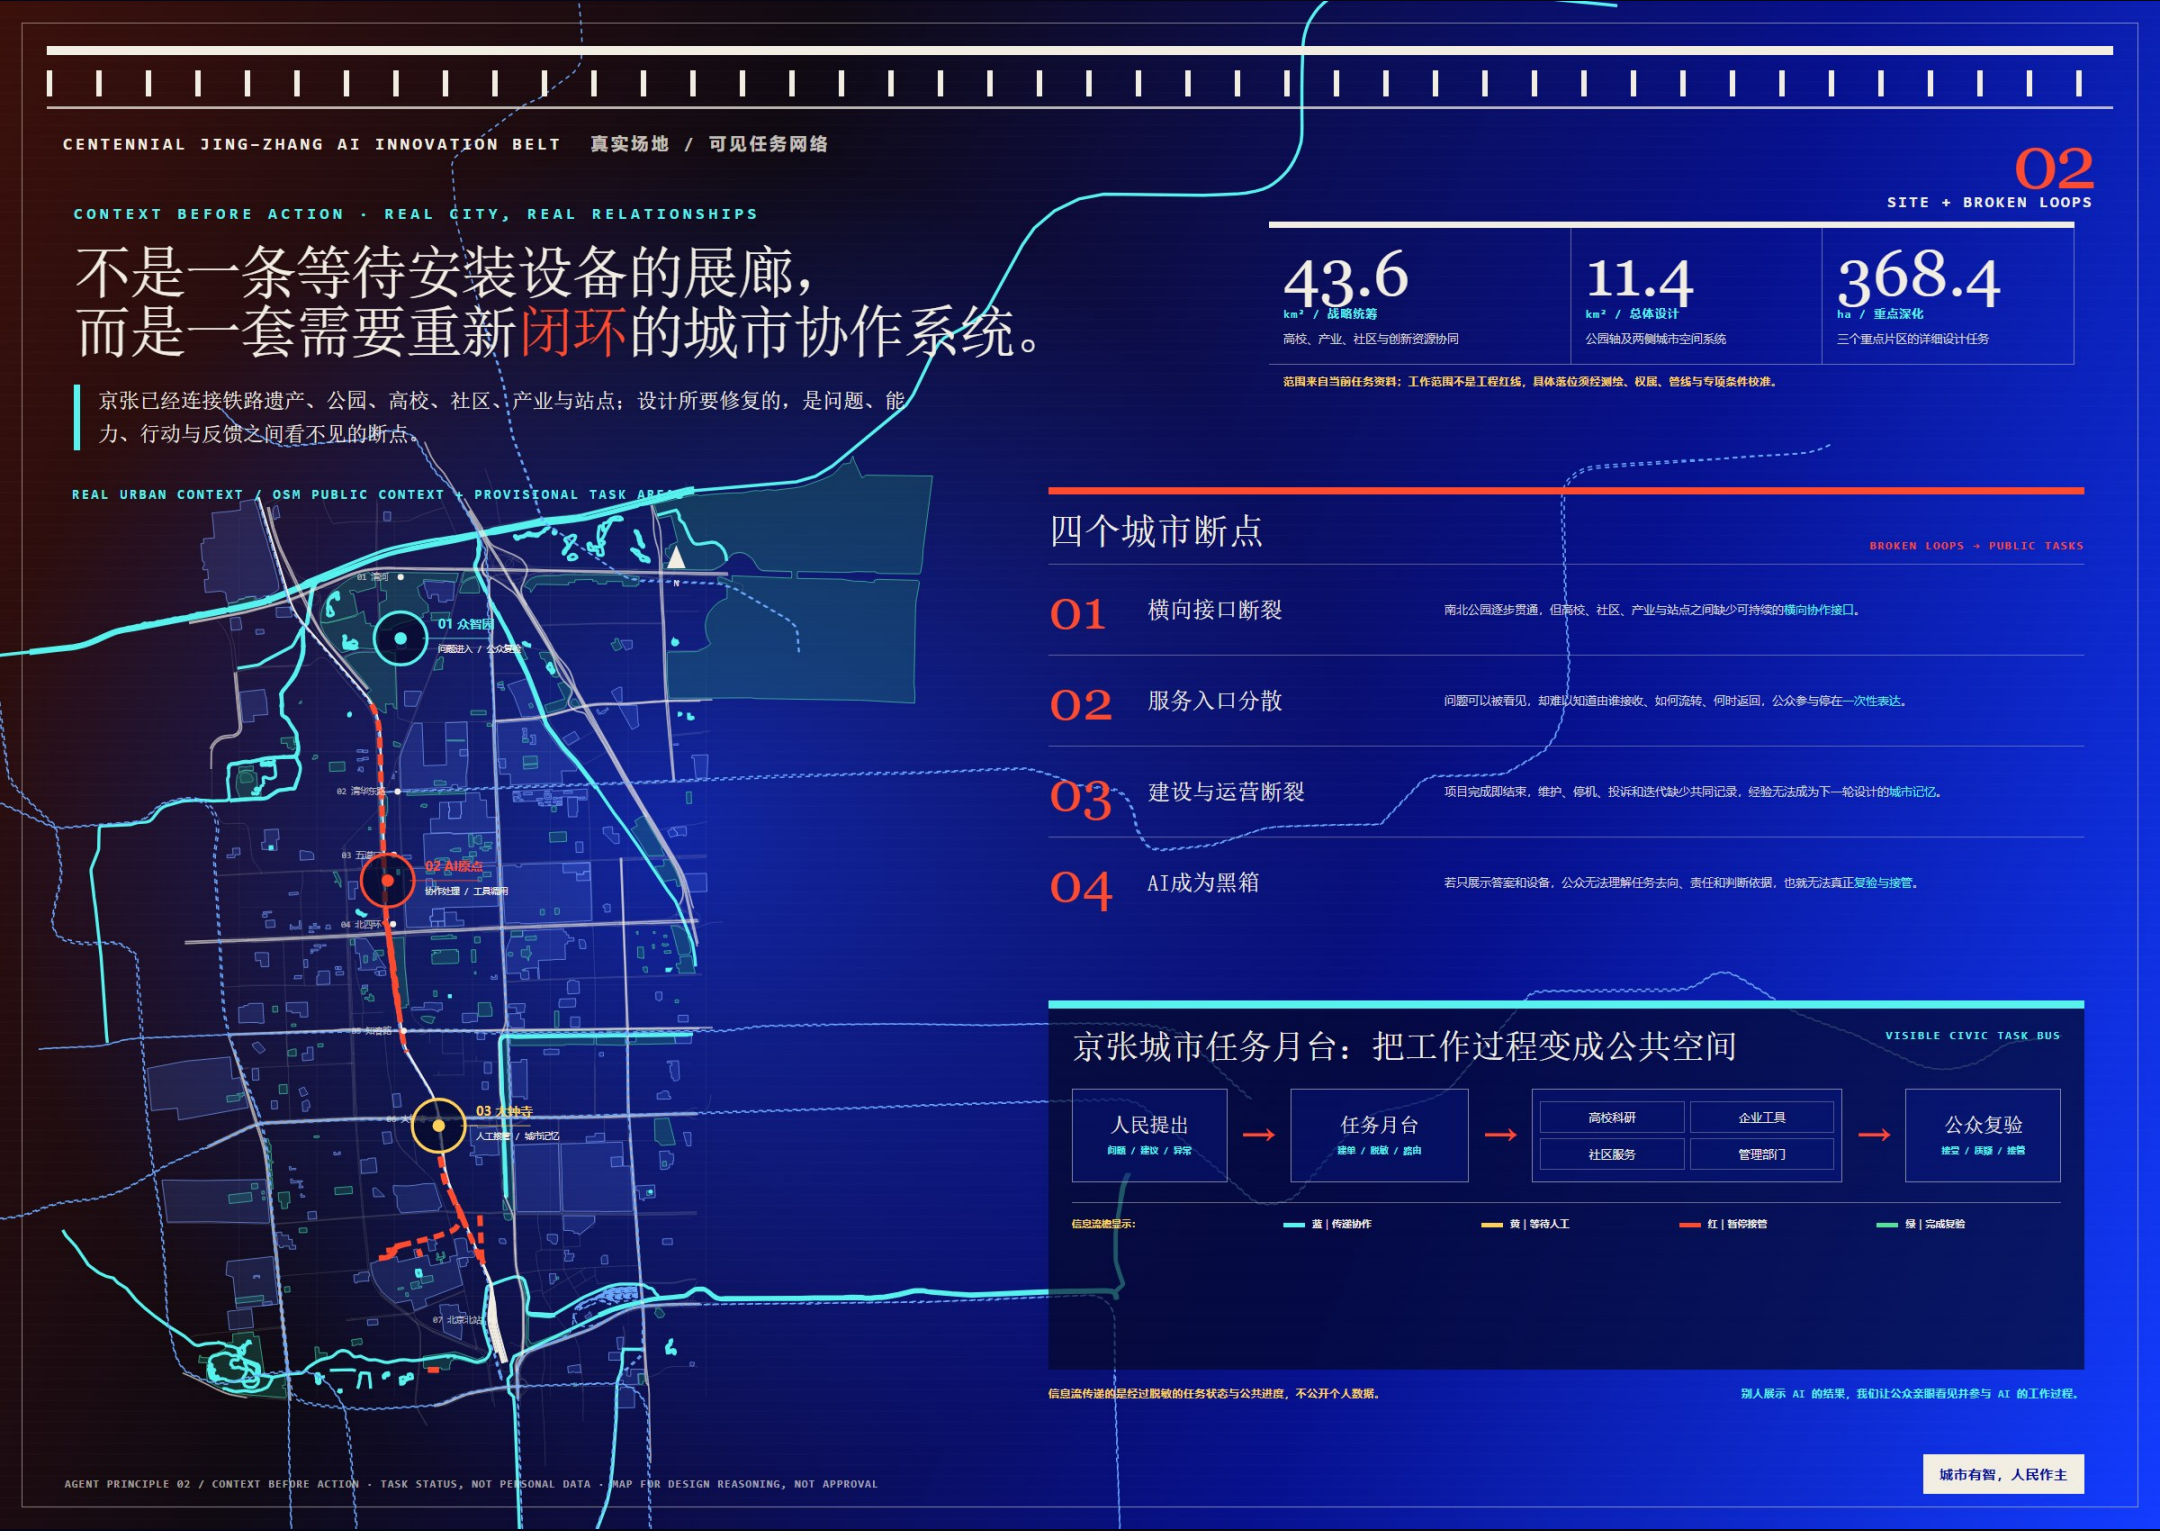

3 DELIVERY CONTRACTS

7 PUBLIC RIGHTS

4 REVERSIBLE GATES

02 REAL CONTEXT, FOUR BROKEN LOOPS

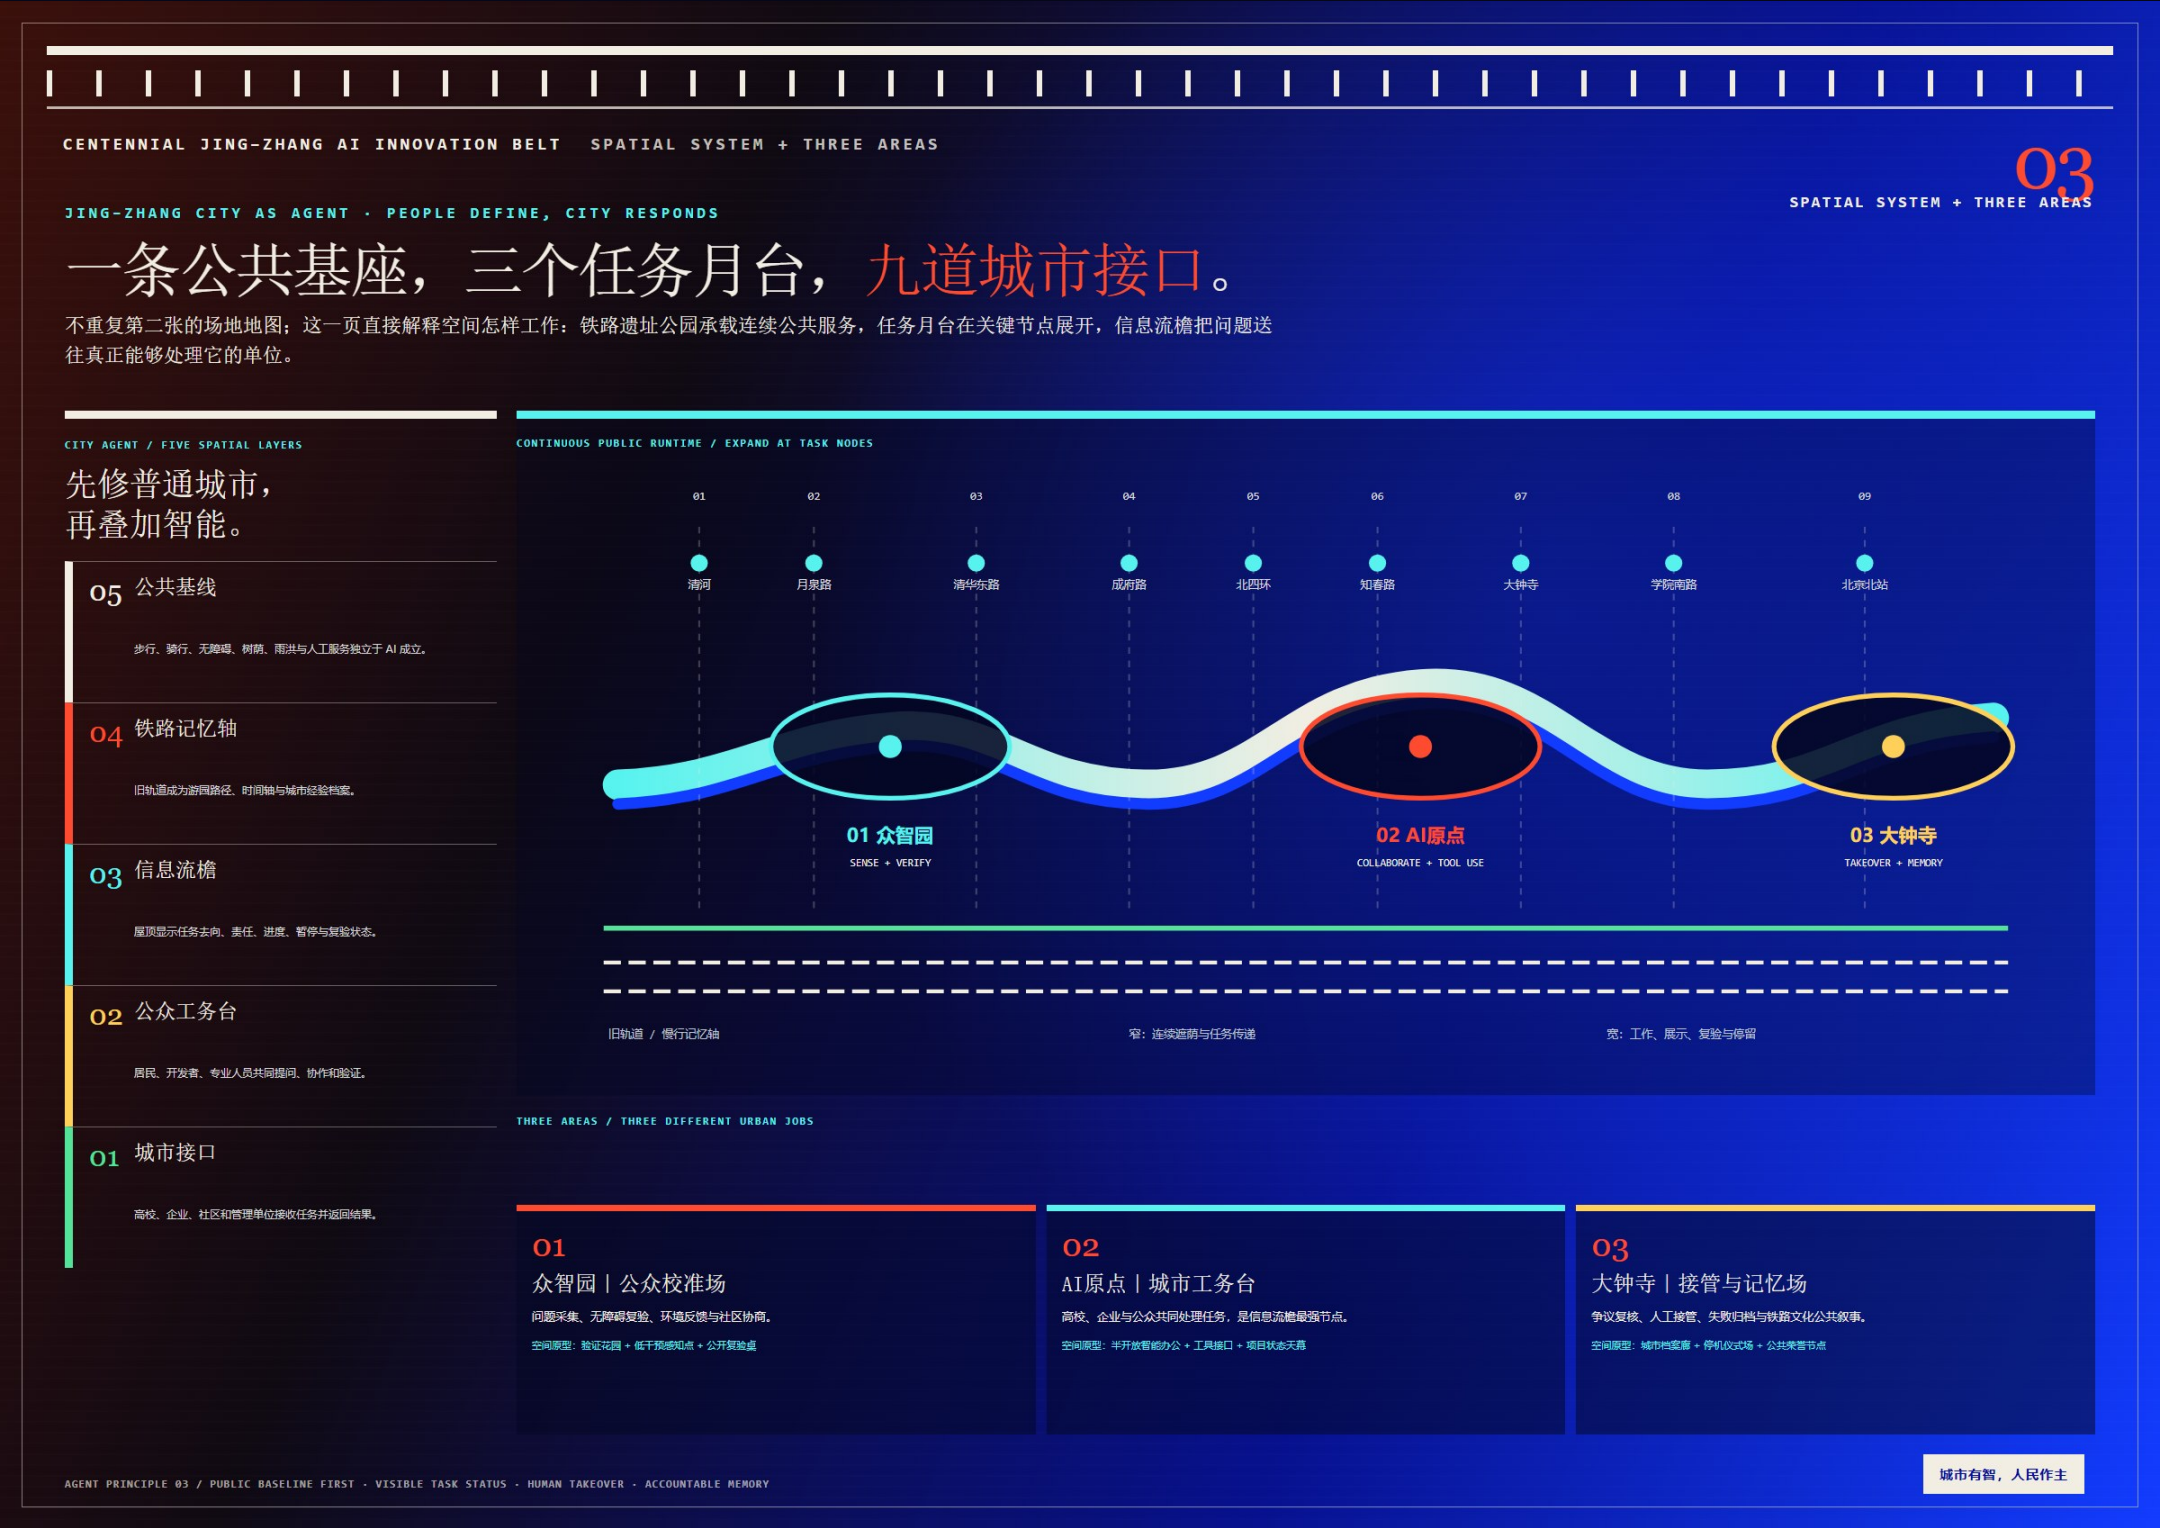

Repair the civic loop before adding technology

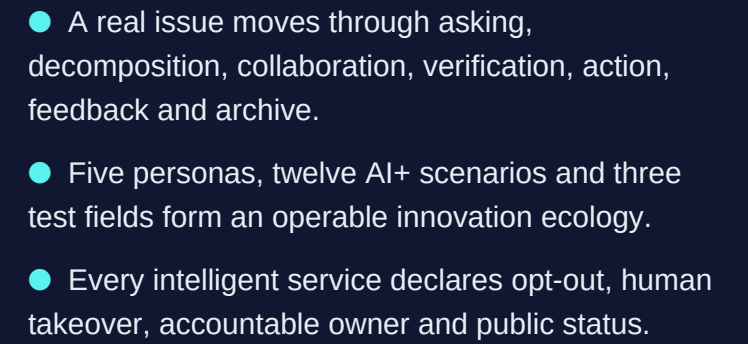

- Railway heritage, park, universities, communities, industries and stations already form a real urban network.
- Design reconnects the broken links between problems, capabilities, action and feedback.
- All mapped limits remain provisional constraints, never official redlines or precise statutory evidence.

03 THE SPATIAL OPERATING SYSTEM

One public baseline, three task platforms, nine civic interfaces

People ask; the city responds

Concept design | provisional boundaries | professional deepening required

05 THE INFORMATION PLATFORM

See the Agent at work - and join the work

CENTENNIAL JING-ZHANG AI INNOVATION BELT PUBLIC SPACE + INFORMATION PLATFORM

JING-ZHANG CITY AS AGENT · PEOPLE DEFINE, CITY RESPONDS

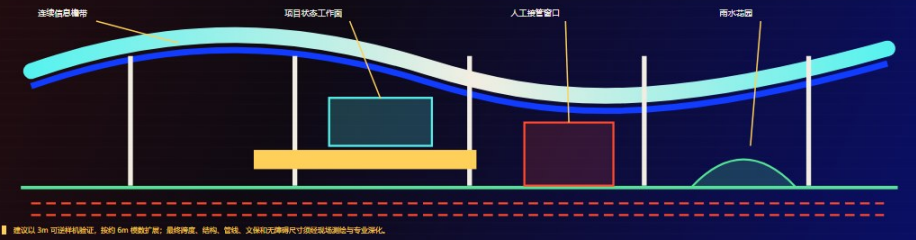

PUBLIC SPACE + INFORMATION PLATFORM05

让人进入 Agent，也让任务离开月台。

信息月台把 Agent 的输入、工具调用、行动状态、人工接管和公众复验物化为可进入的城市空间；顶部信息檐带把任务串流发送至真实工作单位，并把处理过程重新带回现场。

PLAN + SECTION / ONE DAY, SIX CIVIC FUNCTIONS

COMPONENT LIBRARY / REPLACEABLE, MAINTAINABLE, REVERSIBLE

P1 公众建单 人工窗口与数字界面并置	P2 协作工位 电脑、工具与数字设备并置
P3 状态檐带 檐带连续并任务去向	P4 单位中继 把数据工单发送至高校、企业、社区与管理单元
P5 公众复验 结果回到原场所，由受影响者确认	P6 维护檐带 独立檐带、檐带、檐带与檐带

VISIBLE TASK RELAY / WHAT THE ROOF ACTUALLY SHOWS

让任务离开月台，也让责任回到月台。

01 公众提出 需求、问题、需求、需求、需求、需求	02 月台脱敏 需求、问题、需求、需求、需求、需求
03 发送单位 需求、问题、需求、需求、需求、需求	04 过程返回 需求、问题、需求、需求、需求、需求
05 公众复验 需求、问题、需求、需求、需求、需求	06 进入记忆 需求、问题、需求、需求、需求、需求

檐带传递的是最敏感的公共任务状态，不是个人轨迹；任何智能界面失效时，普通通行与人工服务仍然成立。

铁路工务：巡检、信号、维护、责任	中关村创新：研究、试验、转化、开源	人民城市：提问、复验、接管、记忆
------------------	-------------------	------------------

AGENT PRINCIPLE 05 / SPATIAL EVIDENCE · VISIBLE STATUS · HUMAN TAKEOVER · RECALCULATE WITH OFFICIAL DATA

城市有智，人民作主

- Rail heritage remains an easy-to-enter everyday place for walking, resting, photographing and reading.
- The canopy is a civic information console: it displays project state and routes tasks between workbenches.
- Developer walk, open-source gallery and contribution wall turn participation into durable public memory.

AGENT LOOP / 05

06 DELIVERY, GOVERNANCE, REVIEW

From reversible pilots to a durable civic institution

CENTENNIAL JING-ZHANG AI INNOVATION BELTDELIVERY + GOVERNANCE + COMPLIANCE

JING-ZHANG CITY AS AGENT · PEOPLE DEFINE, CITY RESPONDS

06DELIVERY + GOVERNANCE + COMPLIANCE

不以设备数量评价未来，以公共能力是否变好评价设计。

任务月台只有在安全、公共价值、维护能力和人工接管同时成立时才继续运行；每一轮试点都必须留下证据、责任以及继续或退出的理由。

VISIBLE STATE MACHINE / FROM ISSUE TO PUBLIC MEMORY

01感知
SENSE

02建单
ASK

03协作
PLAN

04行动
ACT

05复验
VERIFY

06记忆
LEARN

FOUR REVERSIBLE DELIVERY GATES

G0 / 0-3个月	调查	测绘、访谈、数据审计、公共权利基础
G1 / 3-6个月	3米样机	单个工具、独立脚本、人工替代、声光测试
G2 / 6-18个月	节点试点	三重分区分别验证感知、协作与接管
G3 / 年度	续期或退出	公共价值、安全和维护同时通过才续期

WHAT COUNTS AS GOOD / SIX KPI FAMILIES

01感知 问题进入系统的可发性	02行动 从意识到人工响应的时长
03复验 受影响公众的参与度	04记忆 版本与责任责任覆盖率
05退出 停止与转移准确成功率	06公共价值 通行、生态与服务改善

RESPONSIBILITY / SYSTEMS ADVISE, PEOPLE ACCOUNT

每个状态只有一个具名负责人

感知与建单	公众 C	运营 R	场地主挂 A
计划与工具调用	技术 R	专业 C	场地主挂 A
封锁与检修	运营 R	专业 R	场地主挂 A
公众验验	公众 C	专业 R	运营 A
复验或退出	运营 R	审计 C	具名责任人 A

ANNUAL OPERATION LOOP

春 公共问题季 发布任务与开放数据	夏 城市样机季 3米原型与现场测试	秋 全球复验季 开发者、居民与专业评审	冬 维护记忆季 停机演练、归档与贡献陈列
-------------------------	-------------------------	---------------------------	----------------------------

OFFICIAL SIX-TASK COVERAGE

01 总体概念、命名与视觉	02 创新生态与八邻探索
03 12组群、5人群、3测试	04 公共空间与区域地图
05 三代文化与互娱导览	06 群展互动与长期运营

所有范围、新增、项目数量与责任关系图由运营结构化数据、来源、解构和验证规则：临时边界不作为永久边界。

城市有智，人民作主

AGENT PRINCIPLE 06 / PUBLIC BASELINE FIRST · VISIBLE TASK STATUS · HUMAN TAKEOVER · ACCOUNTABLE MEMORY

- Start with reversible prototypes, calibrate through operations, then deepen professionally before construction.
- A state machine, RACI, phasing and KPIs keep the system open to human takeover and annual review.
- All six Agent tasks and announcement requirements map to spatial, operational and machine-readable evidence.

AGENT LOOP / 06

Concept design | provisional boundaries | professional deepening required

One intelligence system, three distinct urban jobs

- Zhongzhiyan senses and verifies, AI Origin collaborates and calls tools, and Dazhongsi enables takeover and public memory.
- Each area identifies its urban problem, users, work units, spatial actions, placement protocol and human verification loop.
- All focus polygons remain provisional; official geometry will trigger clipping, recalculation and interface relocation.

No false precision from invented redlines
