

Three Site-Specific Spatial Rules for the AI Era

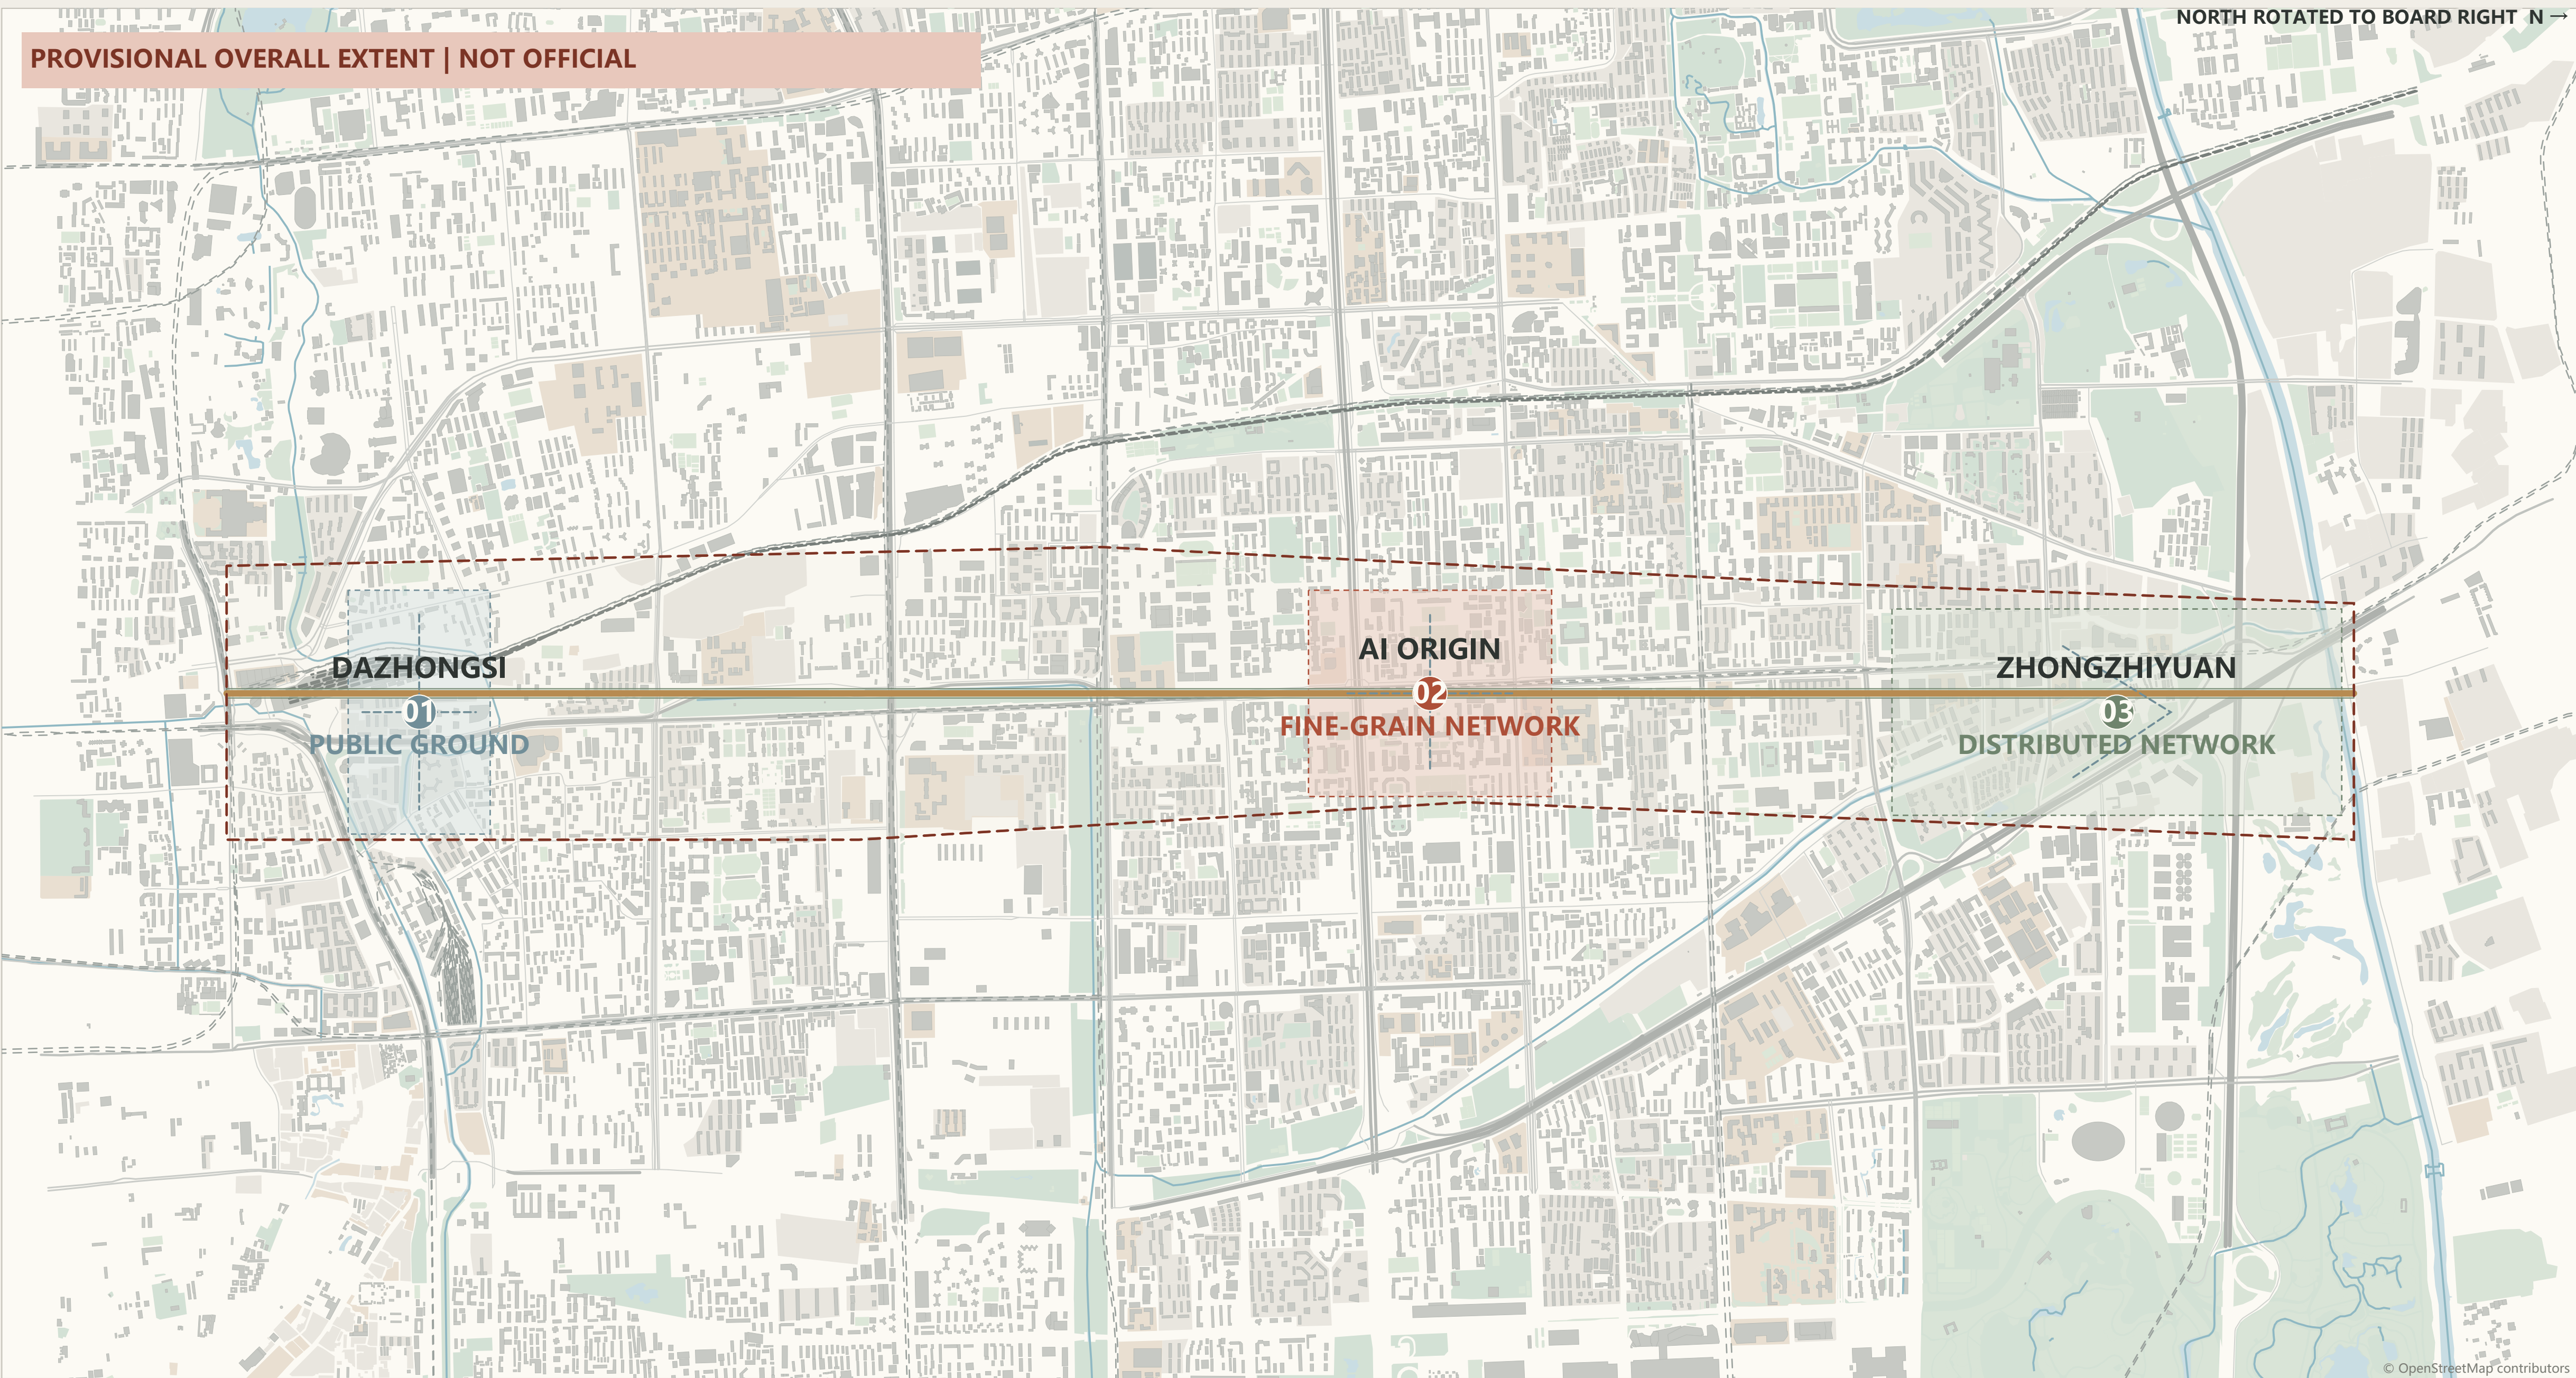

Conceptual urban-design proposal | Provisional design-model extent, not an official boundary, survey, statutory land-use plan or engineering basis | Replace and recompute when formal data are available

OVERALL STRUCTURE | ONE PUBLIC CONNECTION, THREE NON-INTERCHANGEABLE MODES OF RENEWAL

HOW AI SUPPORT CHANGES THE SPATIAL CHOICE

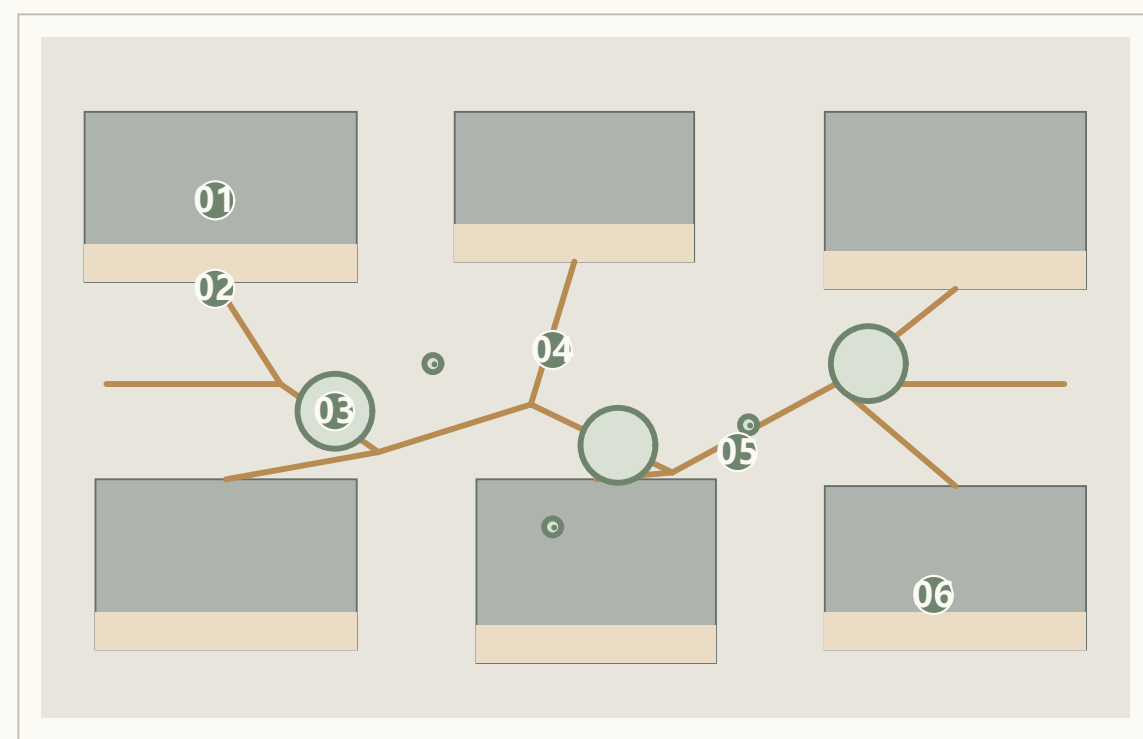

AI SUPPORT 01-03 | PROFESSIONAL JUDGEMENT 04-05

- 01 READ PROPOSALS IN BATCH
- 02 DETECT EQUIVALENT CONSEQUENCES
- 03 GENERATE DIFFERENTIATED OPTIONS
- 04 TEST AGAINST THE THREE SITES
- 05 ENTER GUIDANCE AND PROJECT BRIEFS

THREE SPATIAL IDENTITIES AND DELIVERY RELATIONS

ZHONGZHIYUAN | DISTRIBUTED SHARED-PREMISES NETWORK

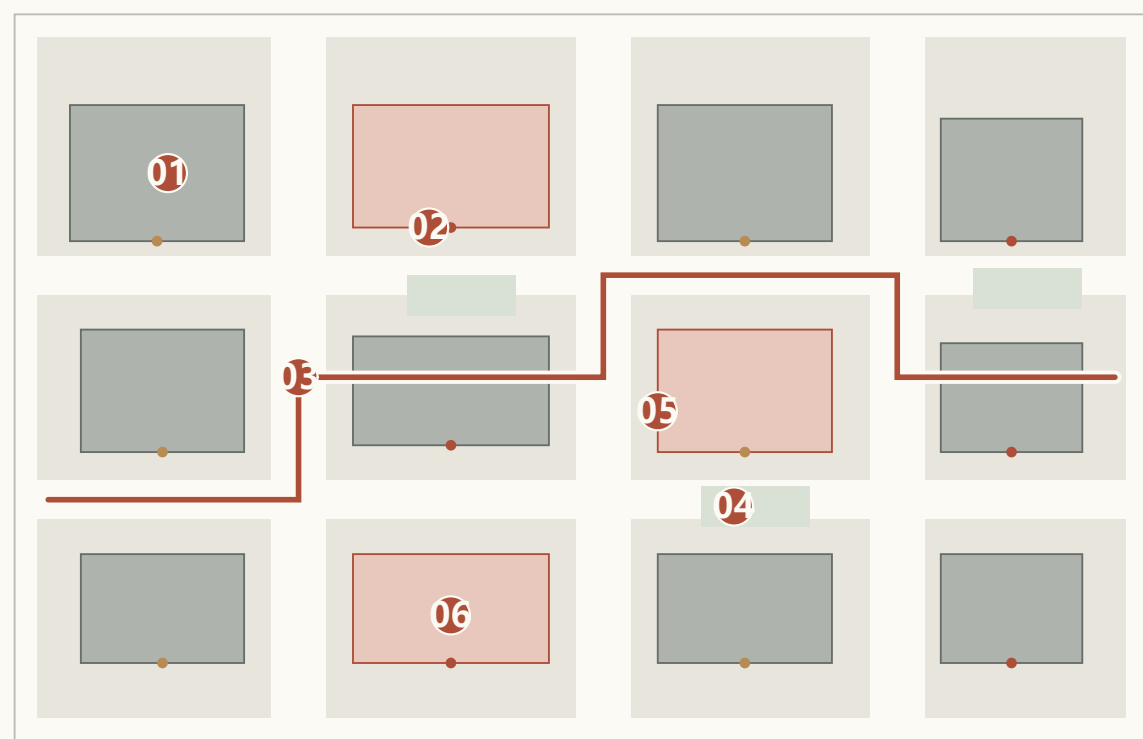

- 01 Existing or under-construction premises
- 02 Open ground floor
- 03 Distributed shared node
- 04 Open courtyard
- 05 Walking and transit connection
- 06 Specialised R&D and validation space (pending verification)

SPATIAL RULE

Distribute ordinary shared uses among existing or adaptable premises. Add specialised space only when verified physical requirements demand it.

GUIDANCE AND BRIEFS GOVERN DISTRIBUTION OF SHARED FUNCTIONS

AI ORIGIN | MULTI-ENTRY STREET-COURTYARD NETWORK

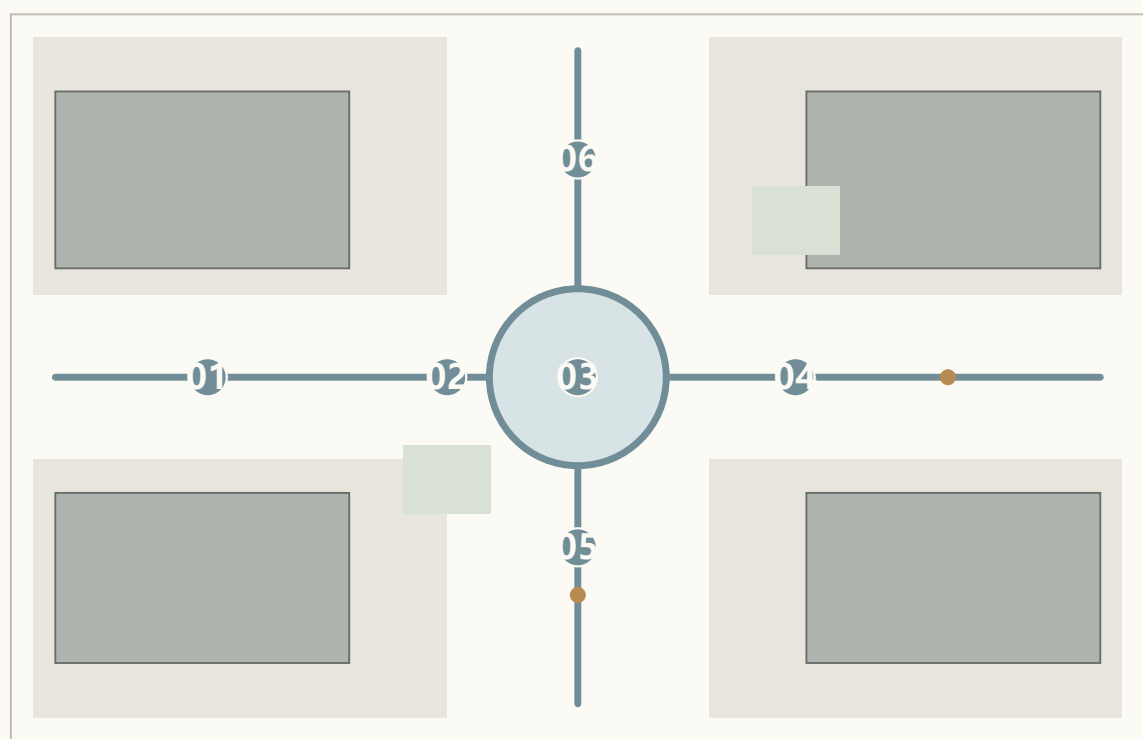

- 01 Retained building
- 02 Independent entrance
- 03 Short street link
- 04 Shared courtyard
- 05 Open ground floor
- 06 Small independently usable unit / adaptive-reuse candidate (pink)

SPATIAL RULE

Renewal must not reduce independent entrances, short links, courtyard connections or small independently usable units.

RENEWAL REVIEW RETAINS ENTRIES, SHORT LINKS, COURTS AND SMALL UNITS

DAZHONGSI | MULTI-PROJECT STATION-AREA PUBLIC GROUND

- 01 Four-direction walking and accessibility
- 02 Cycle organisation
- 03 Station forecourt space
- 04 Public-service interface
- 05 Delivery and construction periods
- 06 Separate works package and acceptance extent

SPATIAL RULE

Combine demand across projects and time to set the public ground's scale, section and sequence.

TIME-BASED DEMAND AND RESPONSIBILITY SCHEDULE SHAPE THE PUBLIC GROUND

PROVISIONAL DESIGN-MODEL VALUES (NOT STATUTORY CONTROLS) | SITE  $\approx 11.4 \text{ km}^2$  GREEN  $\approx 6.7\%$  PUBLIC SPACE  $\approx 5.1\%$  | Replace and recompute in full when official or rights-cleared geometry is available

This is a conceptual urban-design proposal. It does not replace formal planning or constitute government endorsement, project approval, partnership, testing or implementation.
