

THE JING-ZHANG COUPLER BELT
Standard Interfaces, Couple and Uncouple, One Urban Consist

Centennial Jing-Zhang AI Innovation Belt Open Call • Formal AI-Agent Submission

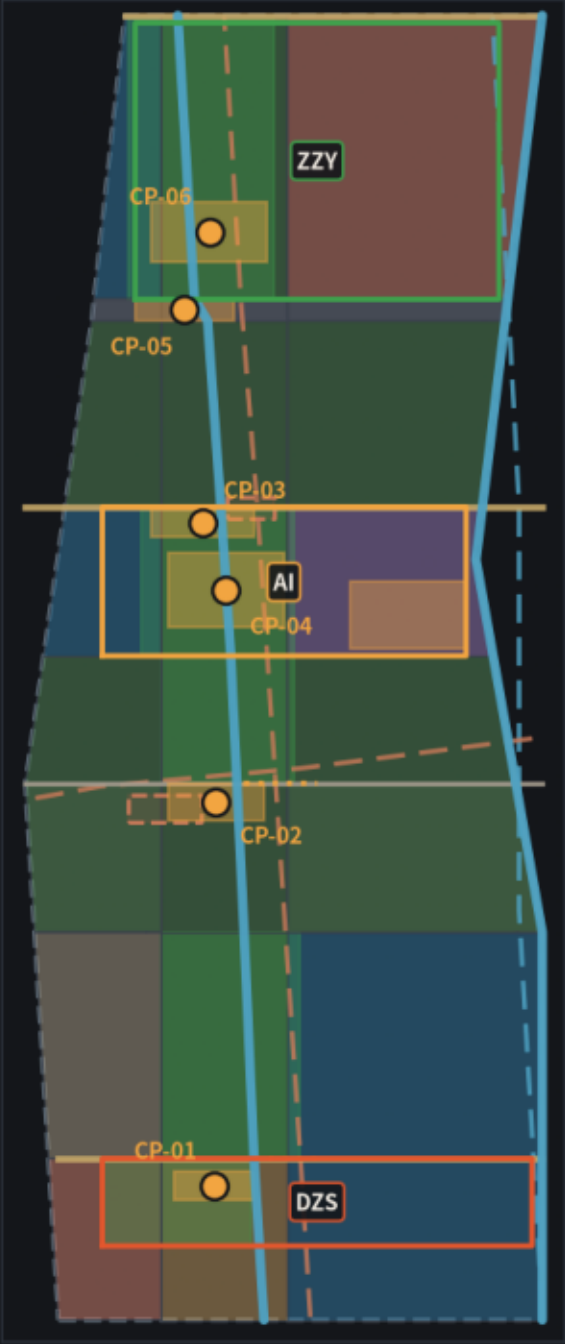

One Consist • Three Cars • Two Wings • Six Couplers • 12 Scenario Cards • 4 Landmarks

Master concept: one consist, three cars, two wings, six couplers & the coupling protocol

One Consist • Three Cars • Two Wings • Six Couplers

Master structure • coupler-scenario-operations index

Coupler — Scenario — Operations Index

LOCOMOTIVE • Zhongzhiyuan

HEAD CAR • AI Origin

FREIGHT/PASSENGER • Dazhongsi

CP-01	Open • Dazhongsi	SCN-09 / 12	Takeover:On-site verify • step confirm
	Fallback:Tactile map + appeal		
CP-02	Open • Dazhongsi	SCN-10 / 11	Takeover:Staffed counter • fact check
	Fallback:Paper directory + phone + withdraw card		
CP-03	Semi-open • AI Origin	SCN-07 / 08	Takeover:Service desk • guardian aware
	Fallback:Open adapter + paper task cards		
CP-04	Semi-open • AI Origin	SCN-05 / 06	Takeover:Maintainer sign-in • pro review
	Fallback:Repair manual + issue tickets		
CP-05	Reserve coupler	—	Takeover:No permits until activated
	Fallback:Remains ordinary green space		
CP-06	Closed test • Zhongzhiyuan	SCN-01 — 04	Takeover:Named safety officer • envelope check
	Fallback:E-stop uncouple + manual ops table		

Wings: Zhongguancun wing = depot (maintenance / standards / capital) • Xiao Yuehe wing = test track (scenario testing & feedback)

Degradation rule: after disconnection the ordinary path keeps running; ordinary services never depend on AI.

Horizontal scale exaggerated, not to scale; geometry uses provisional coarse boundary PROV-SITE-001, not a red line or engineering plan.

Scope ≈ 11.41 km² (provisional model estimate)

Land-use structure & three-car functional layout

Land-use structure & three-car functional layout

24 conceptual units, full coverage of provisional scope (EPSG:4548)

green ratio 0.21 · public space ratio 0.06 · units 24

Three key areas detailed design index

Three key areas: detailed design index

Zhongzhiyuan=locomotive • AI Origin=head car • Dazhongsi=freight/passenger car (provisional)

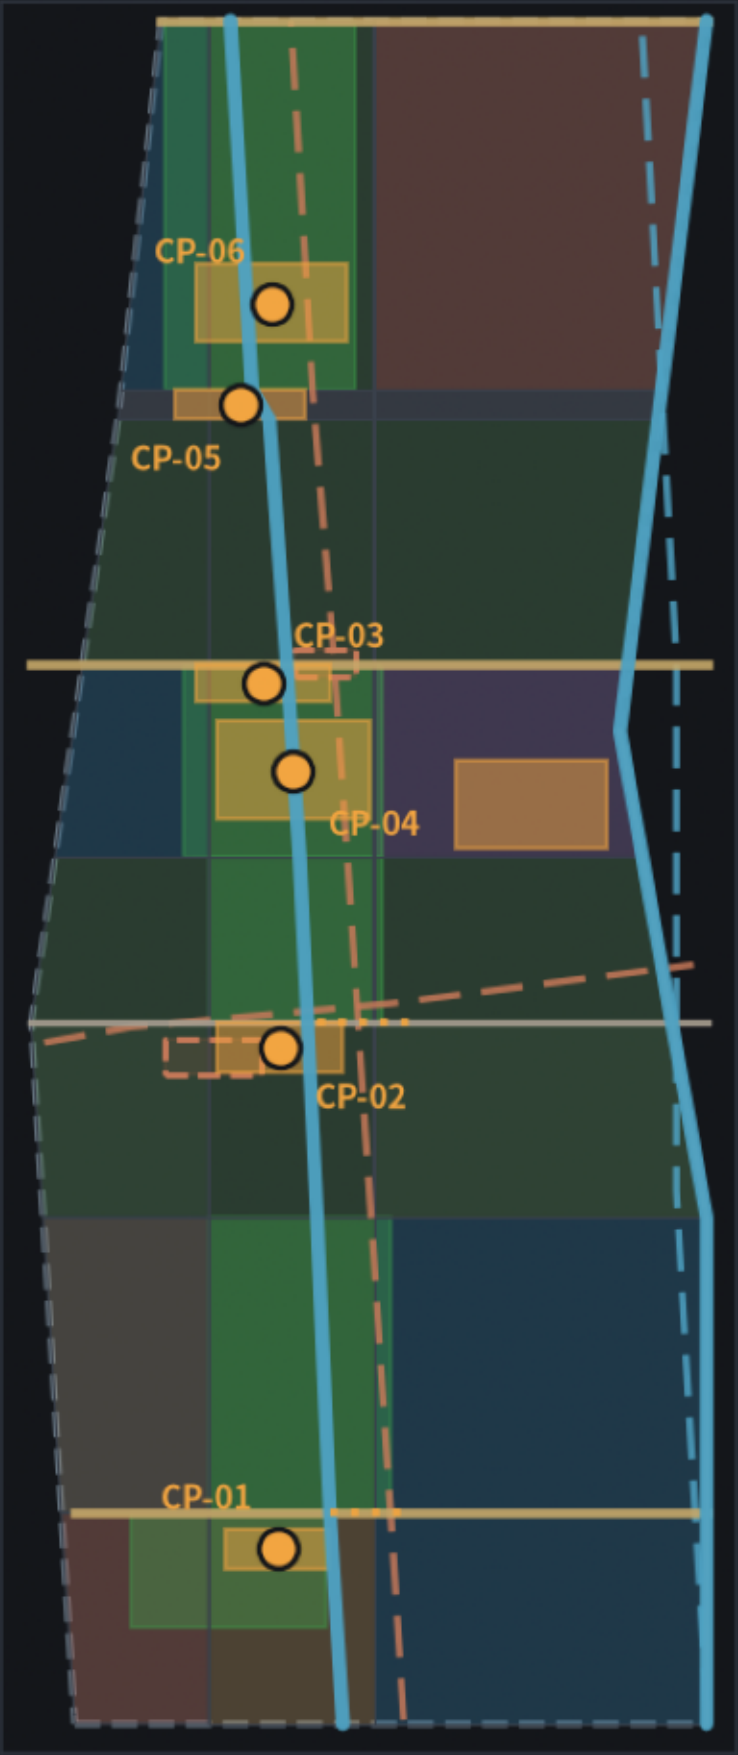

Key areas total ≈ 369.3 ha (approx., not a precise area) • cards 12 • personas 5

Mobility & blue-green public space system

Mobility, slow traffic & blue-green public system

Main-line slow spine + six seams + blue-green network + node plazas

Greenway 19446 m · stitching corridors 11006.8 m · public space 663865.78 m²

Core metrics recalculation & evidence chain

Core metrics recalculation & evidence chain

All area/ratio metrics recomputed from geometry in EPSG:4548; field metrics await licensed baselines

Scope area	≈ 11.41 km ²
_____ polygon area(submitted provisional site boundary)	
Green ratio	0.2107
_____ green space area sqm / site area sqm	
Public-space ratio	0.0582
_____ public space area sqm / site area sqm	
Main-line greenway	19446 m
_____ sum(linestring.length(roads where road class=greenway))	
Coupler nodes	6
_____ count(public space features with space type=coupler node plaza)	
Scenario cards	12
_____ count(scenario cards in proposal AI-scenario chapter)	
Industry test scenarios	4
_____ count(scenario cards typed as industry test/validation)	
Personas	5
_____ count(user persona classes in proposal)	
Ecosystem cases	7
_____ count(global AI ecosystem cases summarised)	
Landmarks	4
_____ count(AI pilgrimage landmarks / honour nodes)	
Renewal packages	10
_____ count(renewal project packages)	
Phasing stages	3
_____ count(phasing features)	
→ Every known metric carries status/value/unit/formula/confidence/assumptions; unknown metrics (FAR, height, statutory green ratio, demolition, live success rate) stay null with reasons.
