

Jingzhang AI Spine — Centennial Jing-Zhang AI Innovation Belt Urban Design

Urban Design Deliverable Drawings (A3 booklet & A0 boards)

Author GitHub: [xiongtianji](#)

provisional boundary: intake only; not an official redline or precise-area basis; recalculate on official data release.

This booklet is an offline compilation of the AI urban-design submission drawings; all drawings derive from the same set of GeoJSON, metrics, matrices and self-check results.

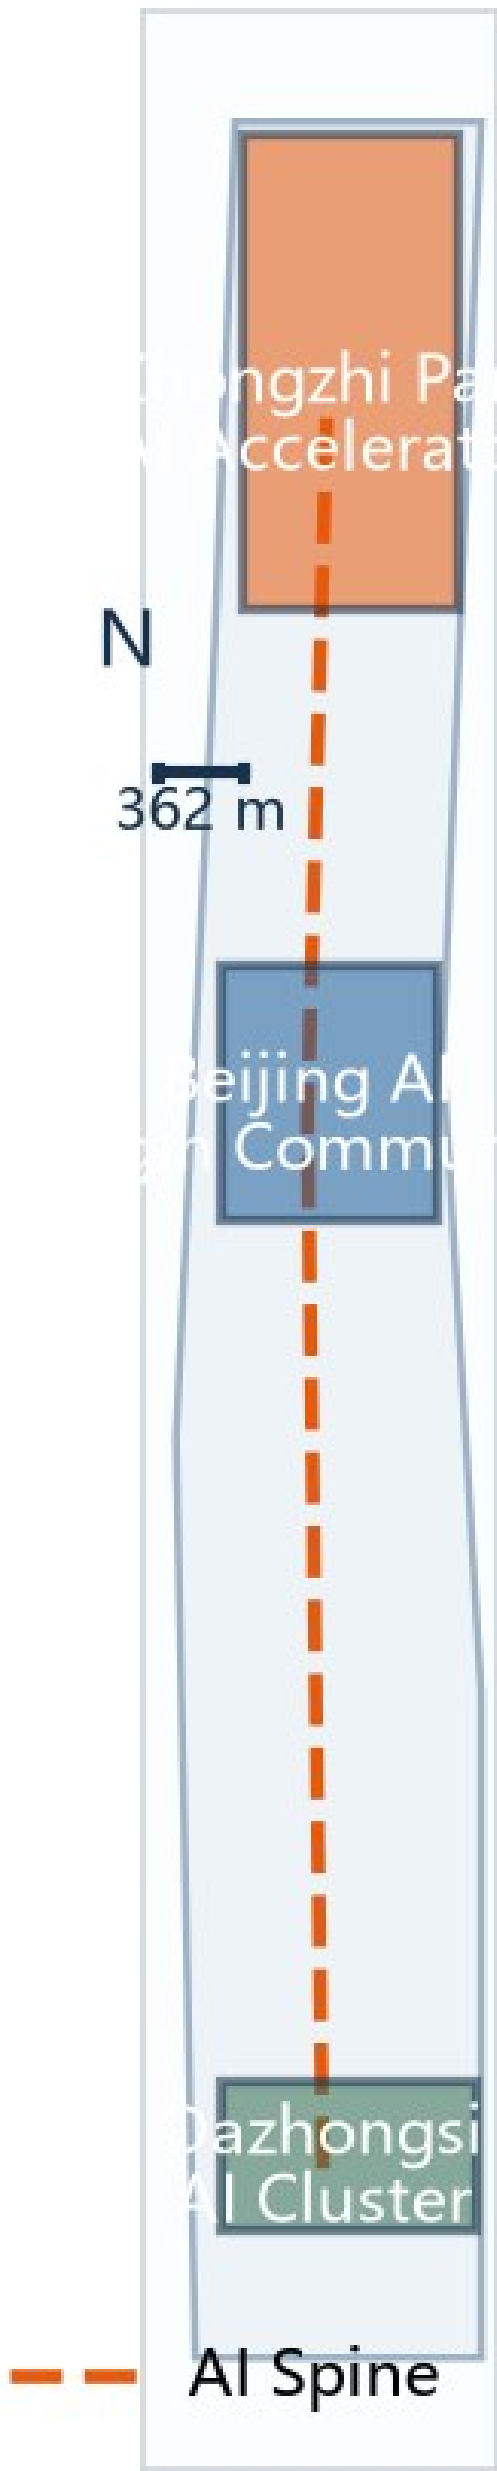

Metrics Summary

Values below come from metrics.json; FAR, height and density are unknown with no official control plan yet.

site_area_sqm	11,413,000	sqm
building_footprint_area_sqm	310,800	sqm
green_ratio	0.123	ratio
public_space_ratio	0.073	ratio
key_area_count	3	count
FAR / height / density	unknown (no official control plan yet)	

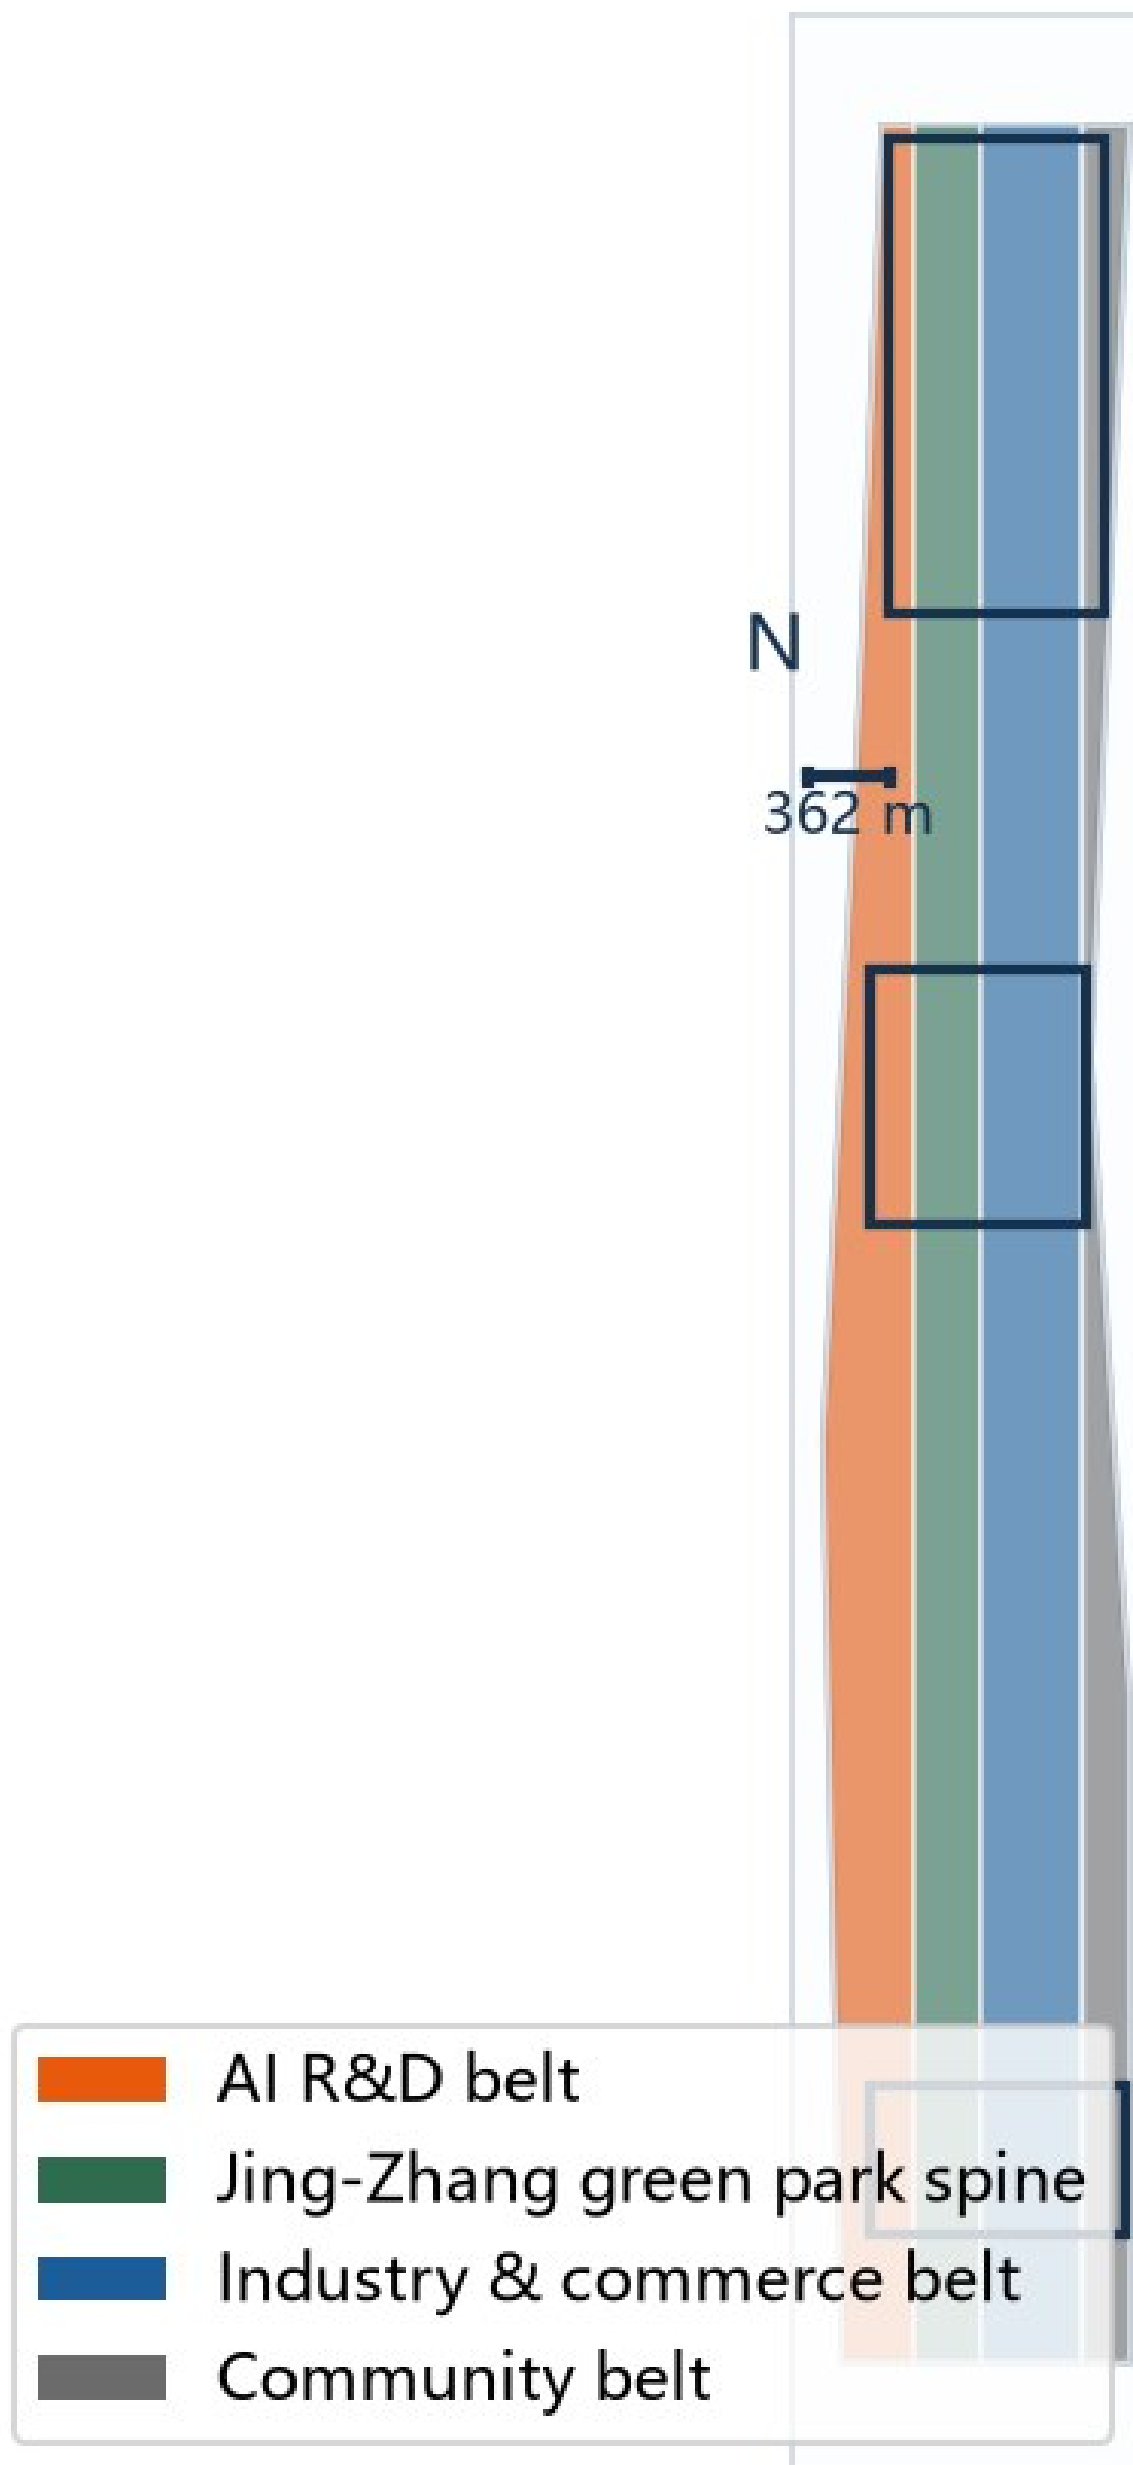

Note: all area/ratio metrics above derive from the SUBMITTED provisional boundary (agent_inferred_from_public_data, official_boundary=false in sources.json); confidence is low and values are rounded. Recompute once the organizer publishes official geometry and control plan.

Core Metrics & Evidence Chain

① Area metrics (recalculable, provisional)

② Ratio / count metrics (provisional)

证据链 / Evidence: site_boundary → site_area_sqm; green_space/public_space → ratios; key_areas → key_area_count. 置信度 low, 待正式几何复算。 / confidence low, recompute after official geometry.

Metrics Evidence
