

JINGZHANG TEST CITY: LET LIFE TEST THE PLAN

Multiple Agents propose plans; 100 digital users test them on the public network; useful genes recombine into a public adaptation route.

DESIGN INTENT / NOT AN EXISTING PHOTOGRAPH / GEOJSON GOVERNS FACTUAL GEOMETRY

100

digital users

3

parent plans

4

urban scenarios

3

evolution rounds

Image generation communicates atmosphere only; scope, routes, rail, nodes, metrics and selection reasons remain traceable.

THREE PARENT PLANS: FROM DIFFERENCE TO EVIDENCE-DRIVEN RECOMBINA

One real base, three spatial strategies. Strategies exit; people never do.

THREE-GENERATION TABLEAU / DESIGN INTENT / NOT SPATIAL EVIDENCE

A CONNECTION B PUBLIC LIFE C TIME SHARING ROUND 2 CROSSOVER ROUND 3 CURRENT PLAN

EVIDENCE STRIP: one public base / 100 digital users / four scenarios / every selection reason archived

Round two comes from selection-state crossover; round three comes from four scenario Pareto archives.

PUBLIC ADAPTATION ROUTE: PLAN, NODE EXPERIENCE AND IMPLEMENTATIO

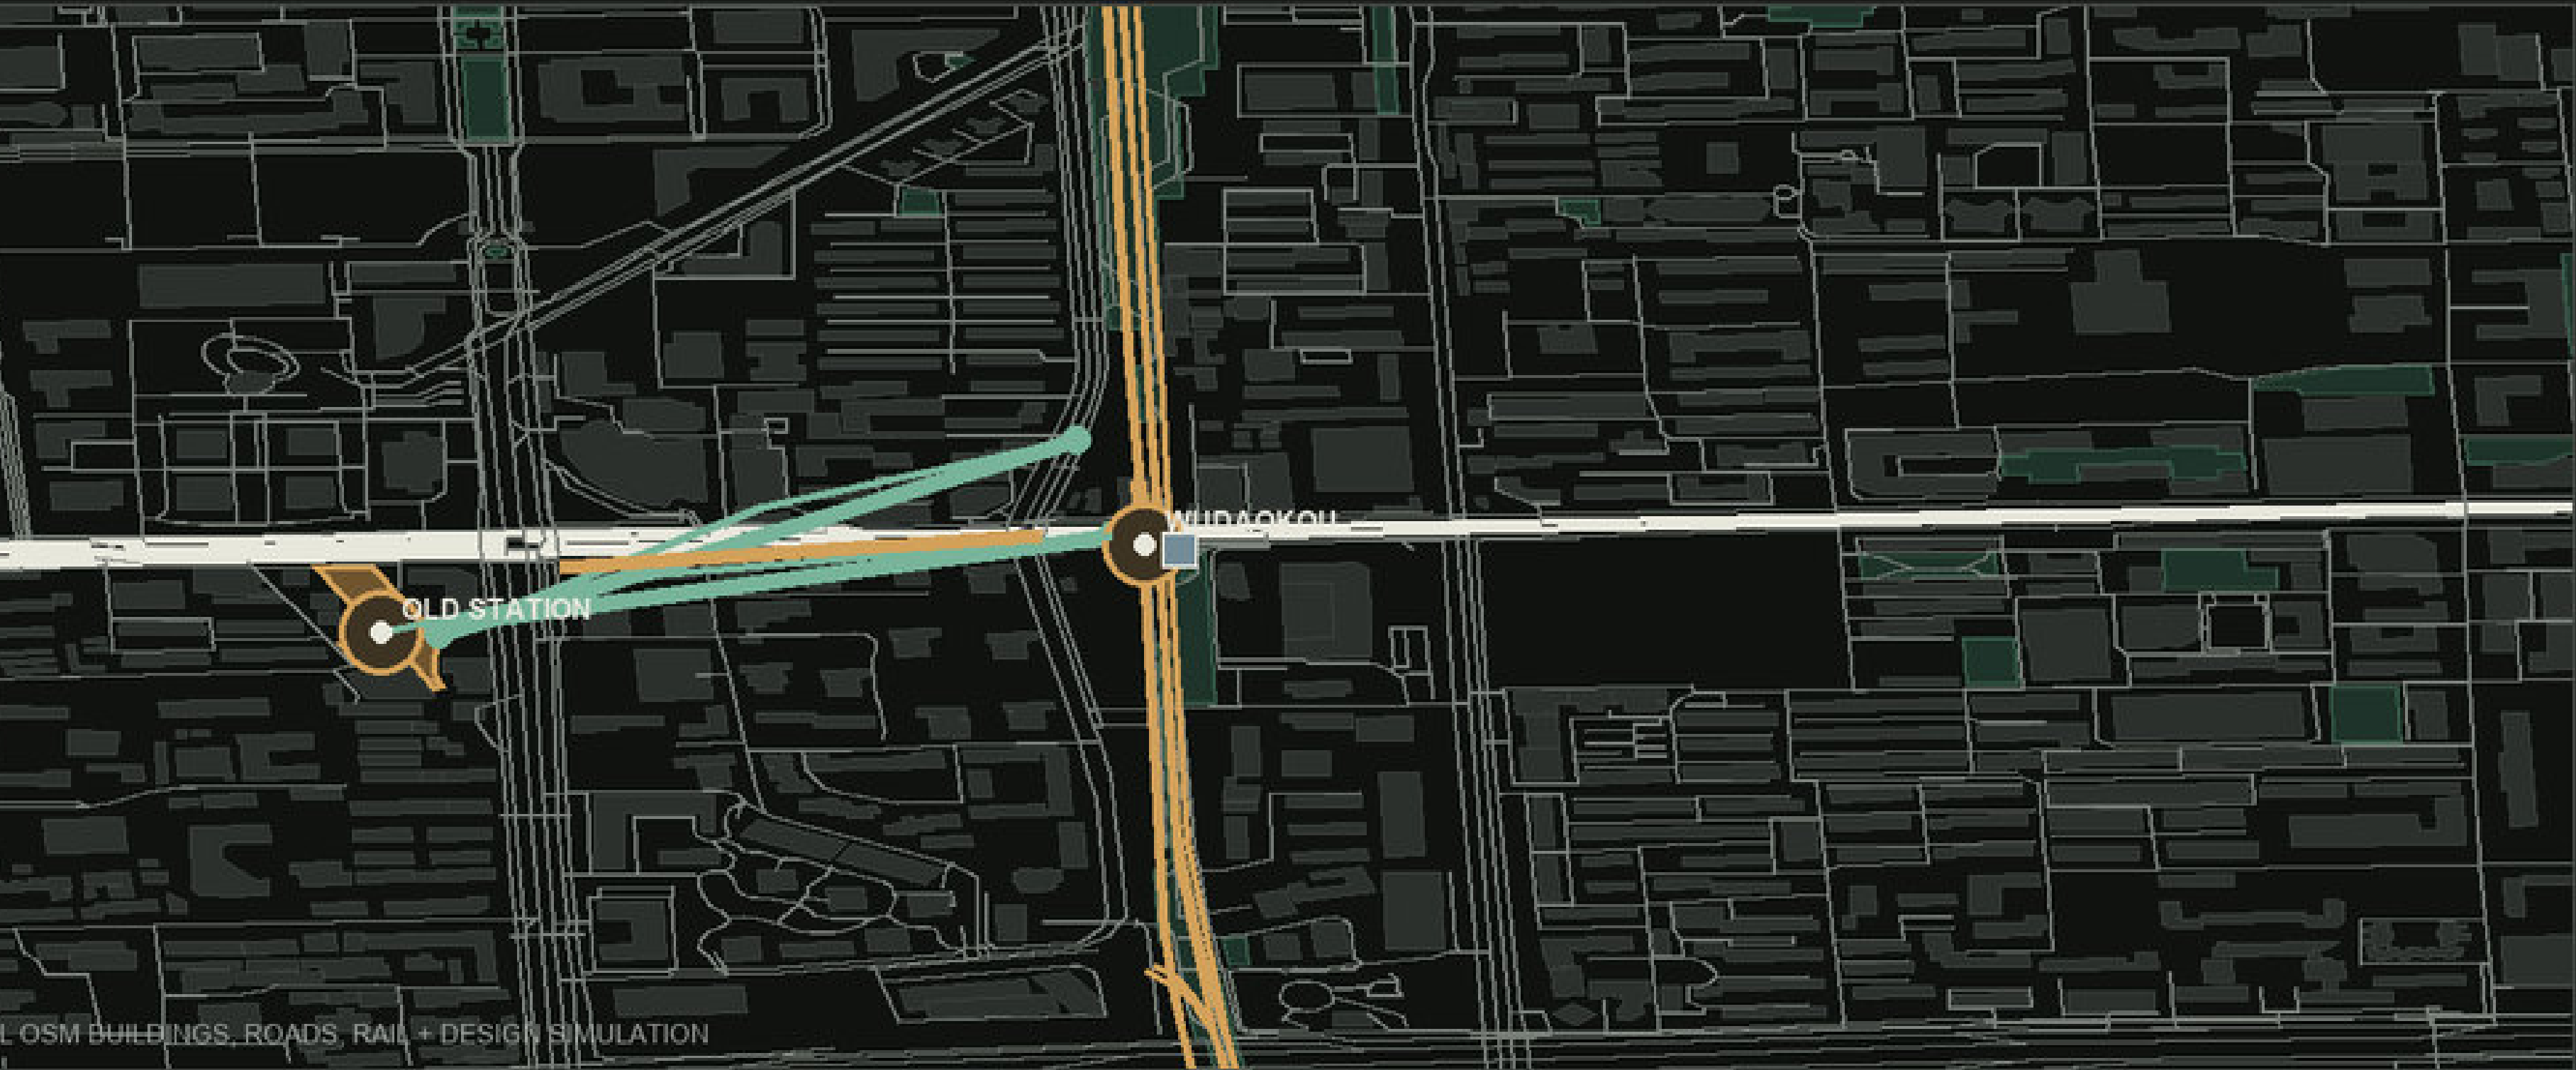

Six spatial objects, three nodes and one relational section. Renderings never replace spatial evidence.

FIGURE 04 /

3 Public Adaptation Route: One Plan, Three Nodes, One Relational Sec

the real S03 base carries six spatial objects. Gates, redlines, slopes and exact widths remain unknown rather than becoming
the precision.

01 Old-station commons

heritage_visibility / dwell / quiet_after_20
unknown: verified_entrance / fire_access

02 Wudaokou adaptive interface

transfer / shade / timed_curb
unknown: station_clearance / kerb_geometry

03 Chengfu ground-floor interface

conditional_opening / offline_service / delivery_window
unknown: ownership / door_positions

TYPICAL TRANSVERSE / RELATIONAL SECTION

North ground-floor interface	Continuous walking and step-free edge	Chengfu Road movement	Cycling, stay and shade	Jingzhang heritage-park portal
MEDIUM	FAST	SLOW	FAST	SLOW
known: verified_road_redline / sidewalk_width / cycle_width / ground_floor_setback / gate_position				

conceptual data / provisional geometry / not a statutory redline

OPEN CITY AI SUBMISSION / LOCAL REVIEW

OLD-STATION COMMONS

WUDAOKOU ADAPTIVE INTERFACE

R1 / 0–6 MONTHS

reversible trials and professional checks

- temporary cross-route and wayfinding
- station-edge and stay facilities
- small-scale opening-hour trials

R2 / 6–18 MONTHS

observed use, maintenance and public review

- retain frequently useful routes
- adjust conflicting facilities and operations
- add tenure, fire and footfall evidence

R3 / AFTER 18–36 MONTHS

statutory process and irreversible decisions

- review permanent public space
- coordinate statutory and sector plans
- keep unapproved projects dormant
