

Jingzhang AI Heritage Spine: A Century-Old Railway Corridor Reborn as an Intelligent City

Centennial Jingzhang AI Innovation Belt • Open Call Concept Proposal
Iteration v8.1 • zachshi-ai

Site area	Green ratio	Public-space ratio	Building footprint
11.41 km ²	25.6 %	20.9 %	55.0 ×10 ⁴ m ²

Using the Jingzhang Railway Heritage Corridor as a spine, the proposal links the Zhongzhiyuan AI Acceleration Area, Beijing AI Origin Community, and Dazhongsi AI Industry Cluster to build a world-class AI innovation belt with three zones and two wings. The proposal introduces the 'AI Origin • Jingzhang Spine' concept, using the heritage park slow-mobility axis to stitch east-west and connect north-south, with 10 land-use zones, 15 concept buildings, 12 AI scenario cards, and 3 pilgrimage landmarks, forming an experienceable, scalable, and iterative smart city concept.

The provisional boundary is conceptual, not an official red line; all areas are EPSG:4548 union recomputes; unknown metrics await official data. This booklet is a concept design document and constitutes no government approval or implementation commitment.

Design Basis

Announcement indicators and agent.1-agent.6 requirements are each addressed; see the proposal for the current-conditions diagnosis.

Spatial Structure

A spine-three-areas-multi-node skeleton unfolds along the Jingzhang railway heritage corridor; see the proposal and figures for the three-level scope.

Key Areas

Key area	Area
众智园AI自主创新加速区	192.1 ha (officially announced)
北京AI原点社区	104.3 ha (officially announced)
大钟寺AI产业集聚区	72.0 ha (officially announced)

AI Scenario Cards (excerpt)

ID	Scenario	Users
SCN-01	遗产AI导览	
SCN-02	开源发布厅	
SCN-03	清河低碳廊	
SCN-04	大钟寺路演	
SCN-05	共行冲突测试	
SCN-06	远程接管演练	

Key Metrics

Site area 11.41 km ²	Green ratio 25.6 %	Public-space ratio 20.9 %	Building footprint 55.0 ×10 ⁴ m ²
------------------------------------	-----------------------	------------------------------	--

Boundary & Compliance

Provisional boundary is not an official red line; field metrics remain unknown; all scenarios are synthetic tabletop runs, unauthorized and not run on site; every AI service has a no-App/human equivalent path.

Four-gate self-check

All four gates PASS (deterministic / spatial / visual / professional evidence)
