

Jingzhang AI Civic Data Commons: A Co-Created Service-Oriented City Spine

Centennial Jingzhang AI Innovation Belt · Open Call Concept Proposal · Iteration v8.1 · zachshi-ai

Overview & Spatial Structure

Restructuring the Jingzhang AI Innovation Belt into a service-oriented city spine built on 'data as a public good': one spine (the open civic-data axis), three hearts (Zhongzhiyuan data factory, AI-Origin community service living room, Dazhongsi enterprise data port), and many nodes (citizen-participatory AI service pods). Public data opens along the belt; citizens and developers co-create AI services at co-creation nodes; the digital platform and physical space are designed as one, forming a governable, experience...

Key Metrics

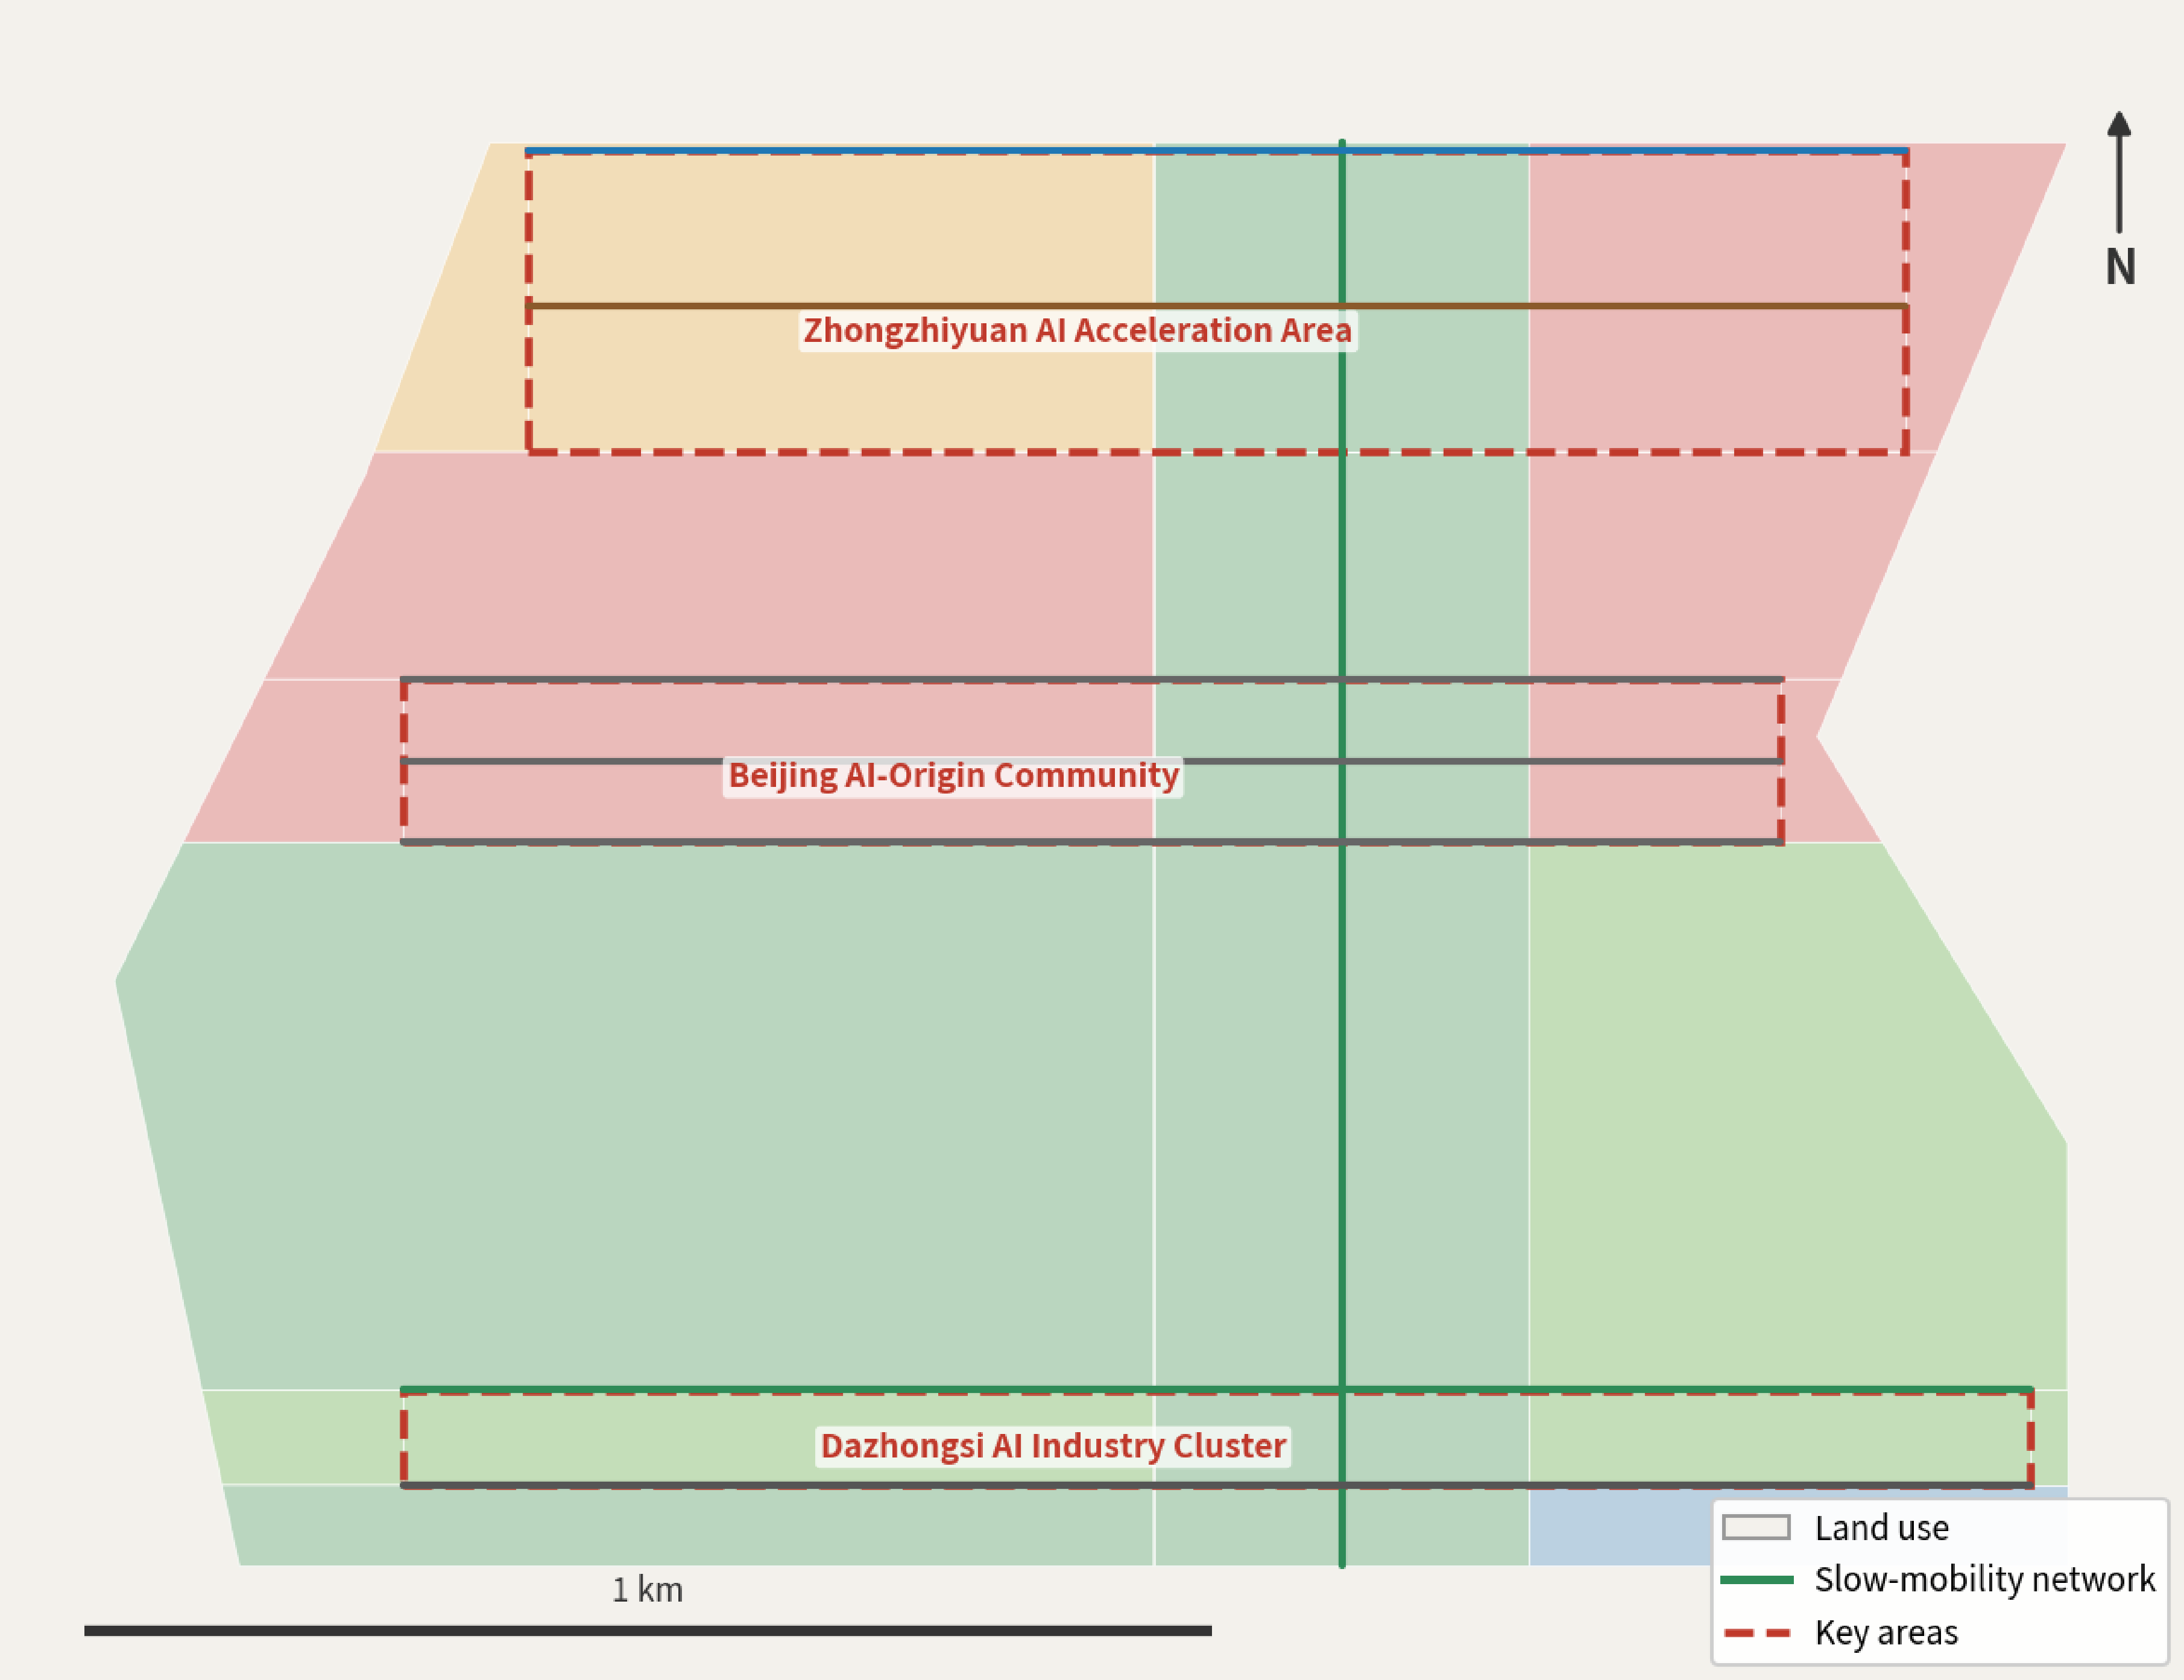

Site area	Green ratio	Public-space ratio	Building footprint
11.41 km²	25.6 %	20.9 %	55.0 × 10³ m²

Key Areas

Key area	Area
众智园AI自主创新加速区	192.1 ha (officially announced)
北京AI原点社区	104.3 ha (officially announced)
大钟寺AI产业集聚区	72.0 ha (officially announced)

Site Overview: Jingzhang AI Civic Data Commons: A Co-Created Service-Oriented City Spine

Land use · Slow-mobility network · Key areas (provisional boundary, subject to official release)

Provisional boundary is conceptual, not an official red line; areas recomputed as EPSG:4548 unions.

Site overview

The provisional boundary is conceptual, not an official red line; all areas are EPSG:4548 union recomputes; unknown metrics await official data. This booklet is a concept design document and constitutes no government approval or implementation commitment.

AI Scenario Cards (excerpt)

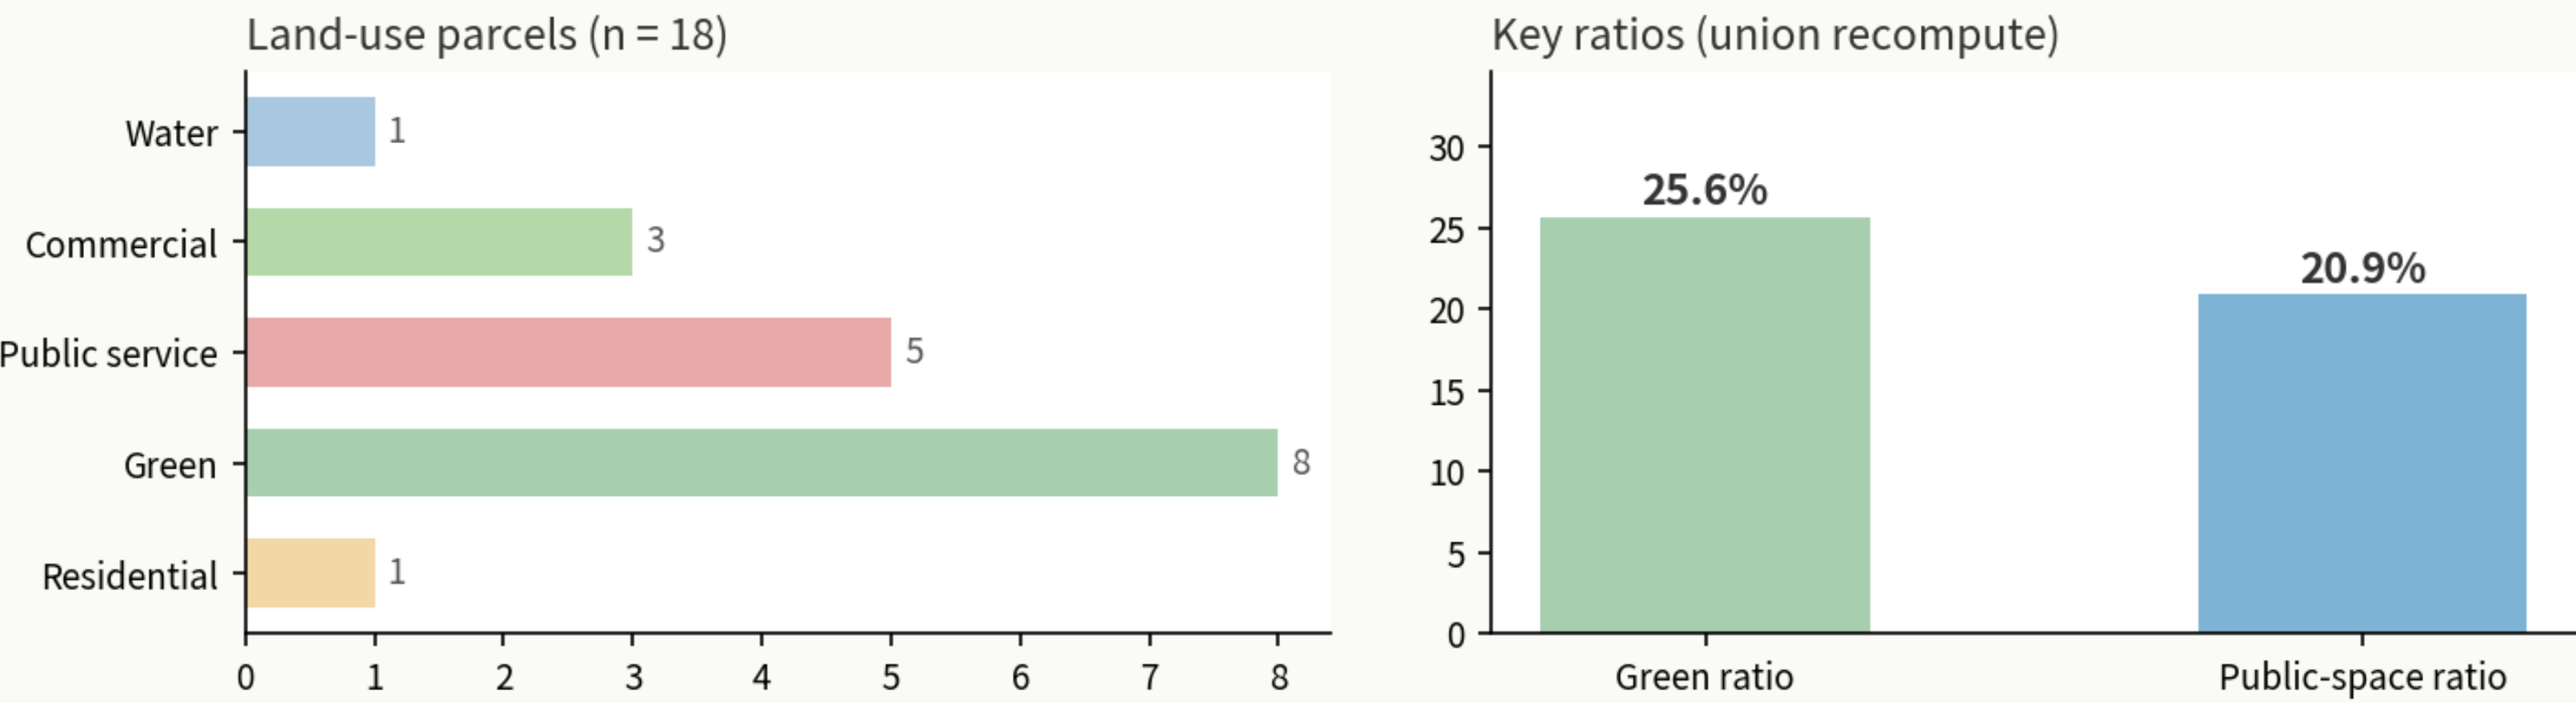

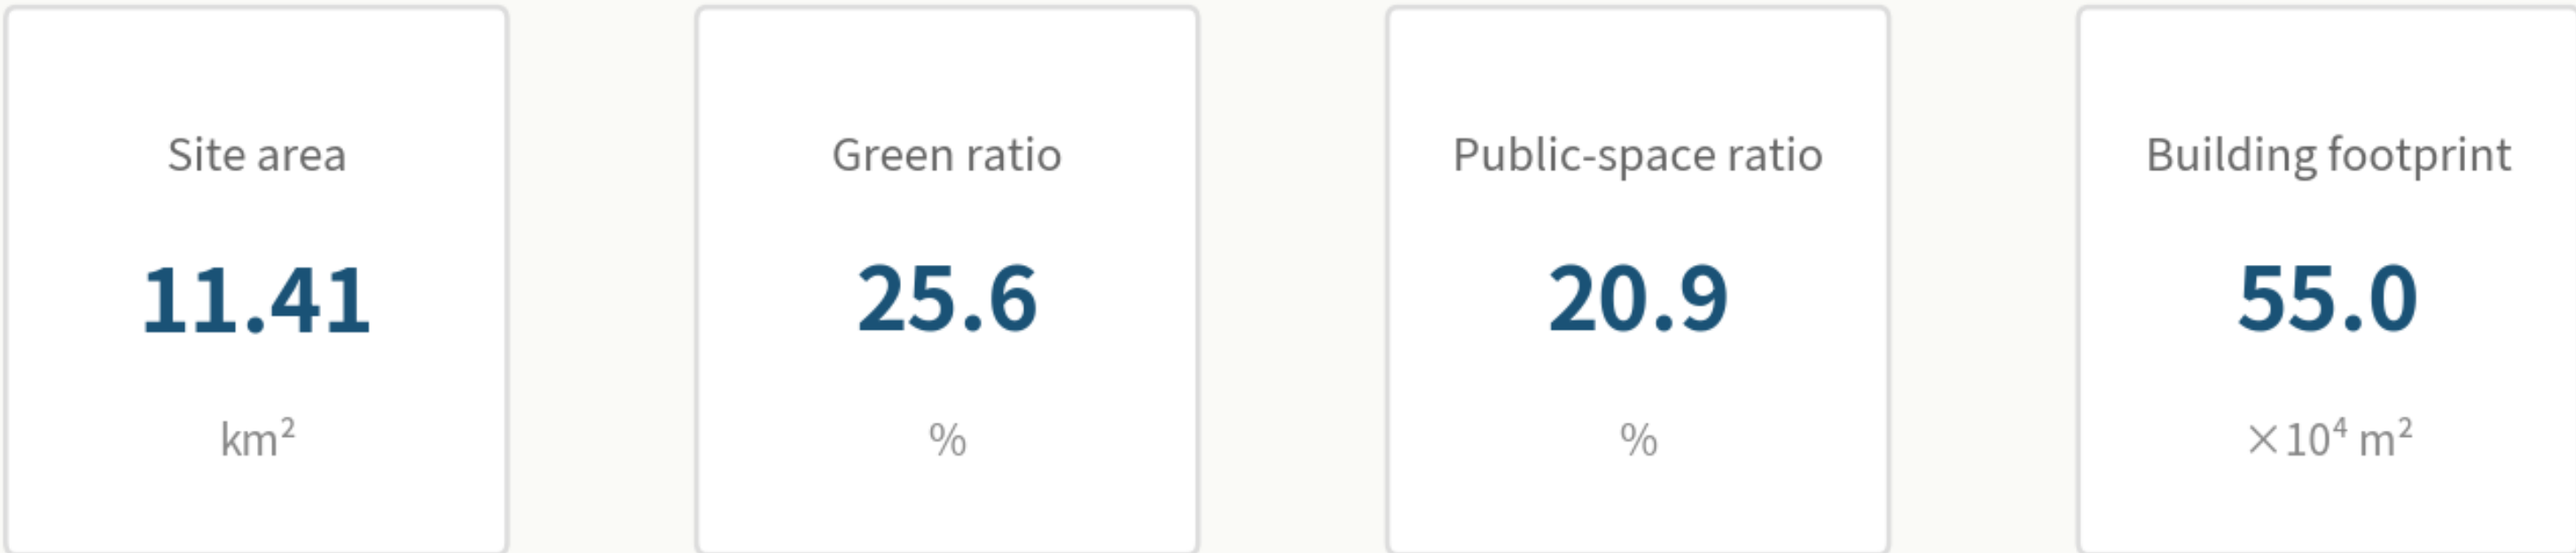

ID	Scenario	Users
SCN-01	数据工厂导览	
SCN-02	市民服务客厅	
SCN-03	企业数据港口	
SCN-04	夜间数据巡检	
SCN-05	数据安全测试	
SCN-06	应急数据恢复演练	

Boundary & Compliance

Provisional boundary is not an official red line; field metrics remain unknown; all scenarios are synthetic tabletop runs, unauthorized and not run on site; every AI service has a no-App/human equivalent path.

All four gates PASS (deterministic / spatial / visual / professional evidence)

Key Metrics Evidence

Values from metrics.json (EPSG:4548 union recompute); unknown metrics are not shown.
